**Subject:** Tell Duke No Nuke! We Want Low-Cost Efficiency and Renewables!

Sep 27, 2010

Public Utilities Commission

Docket # 10-503

Ohio utilities rely too heavily on dirty and expensive fossil fuels. Ohio's new law that requires utilities to invest in efficiency and renewables is a step in the right direction - creating jobs, protecting public health, and cleaning our air. But Duke wants to be let off the hook for its efficiency responsibilities and has proposed to build an expensive new nuclear plant instead. Please hold Duke accountable! Ohioans want efficiency and renewables - not a new nuclear plant!

Many market potential studies have proven that it's cost effective for Duke to go well beyond its efficiency requirements, and many renewable technologies are far cheaper than building a nuclear plant. Efficiency and renewables are the most cost effective ways of shielding consumers from high energy costs and protecting the environment.

Nuclear power is too dangerous and leaves a toxic legacy for generations to come with its waste. We are smarted then nuclear power.

If Duke is let off the hook for its energy efficiency requirements, every utility in the state may try to follow suit. Please protect all customers and the environment through strong enforcement of SB221.

Sincerely

Mr. Ted Johanson

Ohio utilities rely too heavily on dirty and expensive fossil fuels. Ohio's new law that requires utilities to invest in efficiency and renewables is a step in the right direction - creating jobs, protecting public health, and cleaning our air. But Duke wants to be let off the hook for its efficiency responsibilities and has proposed to build an expensive new nuclear plant instead. Please hold Duke accountable! Ohioans want efficiency and renewables - not a new nuclear plant!

Many market potential studies have proven that it's cost effective for Duke to go well beyond its efficiency requirements, and many renewable technologies are far cheaper than building a nuclear plant. Efficiency and renewables are the most cost effective ways of shielding consumers from high energy costs and protecting the environment.

If Duke is let off the hook for its energy efficiency requirements, every utility in the state may try to follow suit. Please protect all customers and the environment through strong enforcement of SB221.

Sincerely

COMPLAINT DESCRIPTION:

I moved to Marine Parkway apartments in May. Our first Bill was around 150 dollars. No AC was ran...itâ€™s May. The next month it was 150. Then out of no where we received a 530 dollar bill. We live in a two room apartment. Its around 1000 square feet. There is no way we used that much. We asked to have the AC unit looked at and the maintenance man said we had a bad thermostat and something else. We asked the apartment to help with our bill but they said no. This month again itâ€™s over 200 dollars. We are behind on this bill and its affecting all other bills. Our apartment wonâ€™t help and we believe something is wrong. I go to school and I work. But I and my girlfriend can't afford this. We can not seem to find any help with this and it may end up leaving us in great debt if this issue does not get resolved.
