

Case No. 10-1346-EL-REN
Hillsdale Solar, LLC
Staff Interrogatories – Initial Set

Question 1: Please explain the ownership of this facility. Is the building owned Seven Hills Schools? Is NexGen Energy Partners or Seven Hills Schools the owners of the solar array? What is the parent company of Hillsdale Solar LLC?

Answer 1: The legal owner of the project is Hillsdale Solar LLC. NexGen Energy Partners is the majority owner and controller of Hillsdale Solar LLC.

Question 2: In Section G.4 of the application, the total PV capacity (AC) was left blank. Total PV capacity (AC) is somewhat less than total PV capacity (DC) as some power is lost as electricity goes through the inverter. The amount of power lost is dependent on the efficiency of the inverter. If the efficiency of the inverter was 97% then AC capacity would be $0.97 \times 69 \text{ kW} = 66.93 \text{ kW}$.

What is the total PV capacity (AC) for the facility?

Answer 2: The efficiency of the inverters is 97.1% and the AC capacity of the facility is 66.99 kW.

Question 3: In Section G.4 of the application, the questions as to the total number of modules and/or size of the array, was left blank.

What is the total number of modules and/or size of the array?

Answer 3: 300 Sunpower 230W panels make up the array.

Question 4: In Section K of the application, the question as to what attribute tracking system in which you intend to register was left blank. Please fill out the section below:

In which attribute tracking system are you currently registered or in which do you intend to register (the tracking system you identify will be the system the PUCO contacts with your eligibility certification):

☒ X GATS (Generation Attribute Tracking System)
☐ M-RETS (Midwest Renewable Energy Tracking System)
☐ Other (specify):

Answer 4: We intend to register with GATS once we receive certification as a renewable energy Generating facility from PUCO.
