To Whom It May Concern:

SUBJECT: Case Number 10-176-EL-ATA

I wanted to be heard regarding my all electric house and how my hands are tied to do anything about it. Now the electric company is trying to break its promise to those of us who was promised a discount for purchasing the all-electric homes during a time that it was more expensive than gas. It helped them then, but now is a different story. And we know how much the salaries and bonuses are for the executives there.

My house is all electric and has no duct work to convert it to gas. The gas line runs right in front of my house, but I would have to spend thousands of dollars to remodel my home to put in duct work to attach to it. Therefore, my hands are tied to alternate energy sources. My house is cold because we have radiant heat from the ceiling, so we have to wear heavy clothing just to keep the winter bills under \$400 as it is. To take off the discount would make it too expensive to live there and impossible to sell the house.

My husband is retired and I am still working for a few more years. Please do not allow the electric company to do this to the citizens who believed their promise to continue the all-electric home discount when we bought the house. We have lived here 27 years. We need your help in this matter. The electric company is the one who made the promise and the electric company should cover the expense—not the customer base. Without it, I can't afford to stay in the house, and will be unable to sell it. Please help us.

Sincerely,

Lewis & Cathy Todd
