COMMENT DESCRIPTION:

I would like to file a comment in Case # 10-176. I attended the PUCO meeting in Strongsville earlier this month. I would like to add to all the comments made that evening. We have lived in our home since 1998 and was told that our electric rates would be a special rate for an all electric home. This is our third Schmidt Home and when we purchased this home in 1998 we were told about the positive features of an all electric home and told that the rates would remaine comparable to heating with gas. Well I hope you can read all the comments made at the meeting. Everyone who spoke talked about the promises and the now pull back of the promise from First Energy. I was impressed with how well the people documented all the promises. It was also very evident that CEI and First Energy were not truefull when the gave all these incentives to buy all electric homes. I strongley ask that the PUCO and the State of

PUCO

OHIO reinstate the all Electric discounts and make them available for who ever owns the home. I also heard that there are smart meters that are available that will regulate the use of electricity just like we had when we first purchased the home. We had a load balancing meter and system that really worked well but when CEI started to see how well our homes were able to ration electricity the got the PUCO to let them drop the load balancing rates. This changing the rates to CEI's advantage through the PUCO is really awful. Where is the help that the PUCO is suppose to provide to the citizens of OHIO. I also want to find out who in the State Governement is going to reimburse me for the loss of value to my home and property. Even when the all electric rate is made perminent there is still going to be an all electric stigma associated with my home since the PUCO let First Energy drop the all electric rate, and then made alot of public publicity about it.. It will keep alot of realestate and construction people out of work.
