RECEIVED-BOOKETING DIV

Please find enclosed a petition from the residents / owners at Deepwood Condominiums in Mentor, Ohio to keep the all electric rate forever, etc.

Also enclosed is justification why the impact on the NON All Electric customers is meaningless.

We appreciate your review and support.

Thank you,
Jerry DeCicca

Deepwood Condominium Association

Petition to KEEP all Electronic Rate

"I am a resident of Deepwood Condo Association located in Mentor, Ohio. We have 170 family units that were built in the late 60's and we only have electric heat. We have no option for natural gas etc. as gas is not available. Over 50% of our residents are seniors and due to the economy ALL of us are on fixed incomes. Last winter's doubling and tripling of our electric bill created a real hardship for us.

We believe when the electric utility provided this all electric rate it should last until our homes no longer exist or as a maximum the rates would increase with the government inflation rates.

We insist that the PUCO decide that the Electric Utility Co. maintain the all electric rate to the low percentage of all homes."

For: All Electric Rate Hearing on 11/23/10 at Lakeland College

Question: Are non all electric rate customers subsidizing the all electric rate ones?

Answer: No, Look at the reasoning below:

1. Total First Energy Customers ~ 4,600,000
2. Total All Electric Customers ~ 360,000
3. % of All Electric Customers is $360,000/4,600,000 = 7.8\%$
4. Consider All Electric Rate is only in effect 5 months – say November thru March
5. Then with only a 5 month effect the 7.8% becomes 3.25%
 $5/12 \times 7.8 = 3.25\%$
6. Take the 3.25% difference by the remaining Non All Electric Rate Customers
 $3.25\%/4,240,000 = .0000007\%$
7. The calculation shows that a Non All Electric Customer would need an electric bill of \$1,428,571.14 before his bill would increase by one dollar.
8. By buying Alleghany Energy with another 1,600,000 customers makes the .0000007% even less.
