

BEFORE

THE PUBLIC UTILITIES COMMISSION OF OHIO

In the Matter of the Authorization of the)
Chicago, Ft. Wayne & Eastern Railway to) Case No. 10-2472-RR-FED
Install Active Grade Crossing Warning)
Devices in Allen County.)

ENTRY

The Commission finds:

- (1) On November 2, 2010, the Commission's railroad staff filed a memorandum indicating that the Ohio Rail Development Commission (ORDC) had secured funding for the installation of flashing lights and roadway gates at the N. Cool Road/Township Road 209 grade crossing (DOT # 532-698C), located in Bath Township, Allen County, by the Chicago, Ft. Wayne & Eastern Railway (CFE).
- (2) Staff recommended authorization for preliminary engineering within 90 days and a construction deadline of one year for the project.
- (3) Upon review, CFE shall submit to the Commission and ORDC by February 8, 2011, site plans and cost estimates for the project. Within seven days thereafter, CFE shall file a notice in this docket advising that the site plans and cost estimates have been submitted to the Commission and ORDC. Following submission and approval of the site plans and cost estimates by ORDC, and, unless otherwise directed, CFE is hereby authorized to acquire project materials and to commence construction as detailed in the letter of construction authorization. CFE shall notify staff at least five working days before the date work is scheduled to begin at the project so that arrangements can be made for an inspection. In addition, CFE shall timely notify staff of any changes in the scope of work, cost overruns, materials, etc., which are not in the approved plans and estimates and secure approval before the work is performed.

- (4) Within 120 days of the issuance of this entry, CFE shall file in the docket notice that it has initiated discussions with American Electric Power (AEP) to ensure that electric service will be available to enable the grade crossing improvements to be constructed and placed in service within the deadline specified by the Commission. Such filing shall identify the steps CFE has taken with AEP, the government entity, and the local highway authority to have electric service available during the construction and cut-in phases of the project. CFE shall serve a copy of the notice upon AEP. To ensure that the deadline is met, CFE shall timely inform the Commission, in writing, of any issues regarding the availability of electric service.
- (5) The Commission will issue no further construction authorization. Further, the grade crossing improvement project should be completed by November 10, 2011.
- (6) In order to expedite the activation of the warning devices, the Commission no longer requires railroad companies to delay such activation pending final inspection by staff. However, CFE should notify staff and ORDC 30 days before the projected date of completion. At the time the Commission or ORDC staff makes its final inspection of the devices and if it finds that the identified installation is completed and the warning devices have been put in service, staff should file a memorandum in this docket indicating that the installation is completed and the warning devices have been put in service.
- (7) With the intention of promoting increased public safety during the pendency of the project, the Commission urges the appropriate local government agency to make an immediate assessment of interim physical improvements, which would enhance driver awareness at the crossing. The Commission may provide assistance in funding improvements such as rumble strips, illumination, signs, or other safety enhancements for the project. Applications for such funding should be made to the Commission's Transportation Department, Rail Division, which shall review all proposals. In the event the department finds the improvements appropriate, the department director is hereby authorized to

execute a contract with the local government agency, and obligate up to \$5,000 from the State Grade Crossing Safety Fund for such improvements at the project location. However, the local government agency should not initiate any improvements until a contract has been executed.

It is, therefore,

ORDERED, That CFE submit to the Commission and ORDC site plans and cost estimates for the project by February 8, 2011. It is, further,

ORDERED, That, by February 15, 2011, CFE file a notice in this docket advising that it has submitted site plans and cost estimates to the Commission and ORDC. It is, further,

ORDERED, That, by March 10, 2011, CFE file a notice that it has initiated with AEP the process to ensure that electric service will be available at the involved grade crossing as set forth in finding 4. It is, further,

ORDERED, That CFE follow the detailed instructions as outlined in the ORDC letter of construction authorization and proceed with and complete the project by November 10, 2011. It is, further,

ORDERED, That CFE notify staff at least five working days before the date work is scheduled to begin at the site of the project so that arrangements can be made for inspections. It is, further,

ORDERED, That CFE timely notify staff of any changes in the scope of work, cost overruns, materials, etc., which are not in the approved plans and estimate, and shall secure approval before the work is performed. It is, further,

ORDERED, That CFE notify the Commission and ORDC 30 days before the projected date of completion. It is, further,

ORDERED, That, at the time staff or ORDC makes its final inspection and if it finds that the installation at the grade crossing is completed and the warning devices have been put in service, staff will file a memorandum in this docket indicating that the installation is completed and the warning devices have been put in service. It is, further,

ORDERED, That copies of this entry be served upon CFE, ORDC, Bath Township Trustees, AEP, and any other interested person of record.
