CASE #10-176 Please look at all the 360,000 homes telling you we were told we would have cheap rates for ever if we but an all electric home. Look back at the News paper ads from the 1960's. They give you all the appliances with the house, even a garbage disposal, just to get you to buy. With all there profits the GRID has not been up graded, a black out could happen again. With people buying electric cars more then ever,see Plain Dealer Oct 31 car section, Eaton Corp will supply public refueling stations for plug-in cars in 8 states, demand will bring down the grid. For future profits, THEY MUST FIX THE INFOSTRUCTURE. You also can not let my city loose tax money from over 2500 all electric homes when there value drops, no one will buy these homes.If you have one you know electric heat is just a big toaster, it's cold, gas is warm, I will never buy one again. A discounted winter pricing is fair, the summer rate should be what everybody else pays. The winter is not cheap, it is hard.
