RECEIVED-BOOKETING DIV

To Whom it May Concern,

I have just been made aware of new regulations for commercial trucks rated at 10,000 to 26,000 lbs. This weight class fits just about all of our vehicles. The regulations seem not only extreme, but penalize companies such as ours on the front end financially through time consuming and costly requirements despite the fact that we are already a diligent company in terms of vehicle safety.

We also find the time frame for these regulations (which few companies are even aware of) is far too short. While the regulations were instituted October, 2009, almost no one heard anything about this until just recently, not even many PUCO personnel heard anything about this until summer.

We, along with most other companies will find this to be a huge burden in the state of the economy, to be able to keep our company financially strong and growing.

Sincerely,

Daniel Vera,
 Owner
