Docketing Case No.: 10-0176-EL-ATA

Notes:

10-0176-EL-ATA

To whom it concerns at First Energy,

I have been living in Lake county all of my 55+ years. I had bought my first (all electric) house in 1977 in Painesville, though the electricity was generated from Painesville Power, we had received a discount on our electric rates back then. In 1999, we purchased our 2nd (all electric) house in Painesville Twp. First Energy is the provider. In both circumstances, I would not have bought either, without a discount on the electric rates, and in both circumstances, when I checked into the rate, did any one on the other end of the phone suggest that the rate was only temporary. I actually had the feeling that they wanted my business for the rest of my life and my homes life. Telling us anything different would be like telling us that this is not a good investment. No one would purchase a home. knowing the cost of electricity was going to double or more. So you made these deals (electric discount for building multiple communities) with builders to make it easier for the builder not to have the cost of multiple utilities hookups. And to generate more usage of electricity, which I am sure of, was and is still, giving you a profit on your bottom line. Why else do you purchase another electric company. So you want more profits, (for what? to purchase more electric companies) and the best way to start, is to take away the discounts. What do you think the results would be? Because of the current economic conditions and to have high rates of electricity. We are struggling now to make any headway with our current budget and no headway for

our future. My guess would be that we and many others would have to foreclose on our homes. Not just because we couldn't afford it. But the fact that we could not sell it for what we owe on it because no one wants the high electric rates. You say that this rate increase would help us to conserve on our electric usage. How nice for your concern of our energy consumption, the same energy consumption that allows you to grow and pad your leaders pockets. How dare you think that we are so blind to your greed. How dare you not care what happens to our communities. This is nothing more than a slap in the face. Just take your bonuses and retire to riches and fame. We won't notice that either. Thanks for the memories.

POCO, Please don't let First Energy and its sister companies to unfairly raise the rates of all electric homes, to the point that we have to foreclose on our homes and possibility of moving out of state. We bought these homes with the understanding that we would always have a break on the rates for having a all electric home. Thank you, Daniel T. Nagle Pamela K. Nagle
