Re: *In the Matter of the Fuel Adjustment Clauses for  
Columbus Southern Power Company and Ohio Power  
Company*, Case Nos. 10-3042-EL-FAC and 10-3043-EL-  
FAC ✓

Dear Ms. Jenkins:

Pursuant to the Commission approval of a fuel adjustment clause (FAC) for CSP and OPCo in the Companies' ESP cases, 08-917-EL-SSO and 08-918-EL-SSO, the Companies submit their FAC quarterly filing. The schedules attached to this letter provide information for the Commission's review. This filing is for the 1st quarter of 2011.

Column D of Schedule 1 shows that CSP's FAC rates would have slightly increased in the 1<sup>st</sup> quarter of 2011, based on current fuel cost projections for the 1<sup>st</sup> quarter of 2011. However, the Companies are proposing no change in the FAC rates for CSP in this filing due to prior communication to customers of their anticipation that a rate increase would not be necessary in the 1<sup>st</sup> quarter of 2011. Accordingly, no tariff sheets are being submitted as CSP's FAC rates will not change during the 1<sup>st</sup> quarter of 2011. CSP reserves the right to make rate changes throughout 2011 under the 6% rate cap established for CSP. If a rate increase is necessary in future quarterly fuel filings throughout 2011 based on fuel costs, the Company will address those increases in subsequent quarterly filings within 2011.

The FAC rates being proposed by OPCo to be effective with the first billing cycle of 2011 reflect the percent increase approved by the Commission in the ESP. Below is a description of the schedules that are attached to this application. There are two sets of schedules, one set for each company. The Companies are including in this submission, actual fuel data for July through September 2010 and forecast information for the 1st quarter (January, February and March) of 2011.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.

Technician 2 Date Processed DEC 16 2010

**Schedule 1:** This schedule shows the current FAC rate by tariff and delivery voltage in Column A. Column B shows the forecast component (FC) rate that would be necessary to recover the estimated fuel expense for the 1st quarter of 2011. Column C shows the reconciliation adjustment (RA) that would be necessary to recover the actual fuel under-recovery experienced through September 2011. Column D is the sum of the FC component and the RA component. If the Companies' FAC were not governed by the ESP rate caps, the rates set out in Column D would be their requested FAC rates. Since the ESP rate caps do apply, the Companies are requesting that the current FAC rates remain in effect as is reflected in Column E.

**Schedule 2:** This schedule shows the Companies' estimates of the fuel cost by month it is expecting to incur in the 1st quarter of 2011. Schedule 2 calculates the rates by voltage that would be necessary to recover the forecast costs. For CSP, these forecasted (FC) rates are projected to be lower than the current FAC rates. This results in some recovery of CSP's under-recovery balance during the 1st quarter of 2011. Conversely, for OPCo, the FC rates on Schedule 2 are higher than the current FAC rates for some and lower for others, so there is a potential that OPCo's rates may result in some recovery of the balance during the 1st quarter of 2011.

**Schedule 3, page 1:** This page of schedule 3 shows the under-recovery of fuel expense for the months of July, August and September 2010, as well as, the cumulative balance through September 2010. It also shows the carrying cost associated with the under-recoveries. The "Other Credits/Charges" column reflects adjustments to the FAC deferrals based on prior Commissions orders. Schedule 3 calculates the adjustment to the FAC rates that would be necessary to recover the under-recovery during the 1st quarter of 2011. The rate for OPCo demonstrates that recovery of the deferral over just 3 months would not be practical. It is probable that OPCo will have a long-term deferral to be recovered subsequent to the ESP, as envisioned by the modified ESP approved by the Commission. Under current conditions, CSP may be in a position before the ESP ends to begin recovering its actual fuel expense concurrently upon full recovery of the deferrals.

**Schedule 3, page 2:** This page of schedule 3 provides monthly data on the actual fuel costs recorded by the Companies from July 2011 through September 2011. The Retail FAC Cost shown in the last column on this page is carried over to page 1 of Schedule 3. Shown on page 2 and included in the total FAC cost is an amount representing the revenue requirement associated with solar panels installed by the Companies to help meet the renewable energy requirements of SB221, as well as other renewable energy costs. Revenues provided by the FAC will first be applied to recovery of renewable energy costs, so that they are not part of the long-term deferral of either Company and thus are by-passable by customers choosing an alternative energy supplier.

Ms. Renee J. Jenkins

June 22, 2010

Page 3

**Schedule 3, page 3:** This page of schedule 3 provides the monthly carrying costs for the Ormet Interim Agreement which are the subject of Case No. 09-1094-EL-FAC. These carrying costs are calculated on the deferral that is included in the FAC for the period January 1, 2009 through September 17, 2009. Any rate discounts provided to Ormet subsequent to September 17 will be recovered through the Economic Development Rider (EDR).

**Schedule 4:** Schedule 4 sets out the FAC rates by tariff that are currently in. These rates are in compliance with the provision for the capped rate percent increases approved by the Commission in its ESP orders for the Companies.

Sincerely,

Steven T. Nourse
