Push to Talk

Push to Talks calls may be made with other Verizon Wireless Push to Talk subscribers, and only from the National Enhanced Services Rate and Coverage Area. A Push to Talk call is terminated by pressing **END** or will automatically time out after twenty (20) seconds of inactivity. While you are on a Push to Talk call, voice calls received will go directly to Voice Mail. When you are on a voice call, you cannot receive a Push to Talk call. You cannot prevent others who have your wireless phone number from entering you into their Push to Talk contact list. Only one person can speak at a time during Push to Talk calls. When using your phone keypad to make a Push to Talk call, you must enter the 10-digit phone number of the called party. Your Push to Talk service cannot be used for any applications that tether your phone to computers or other devices for any purpose. Push to Talk-capable phone and calling plan required. If you switch from a Push to Talk calling plan to another calling plan, you must first stop using your Push to Talk-capable phone and purchase or provide another compatible phone.
