Letter of Notification
Evergreen-Ivanhoe 138 kV Transmission Line
To Marvin Group Supplemental Engineering Information
Case No. 10-0597-EL-BLN

Dear Mr. Lambeck:

Please be advised of the supplemental engineering information that is being submitted to the above captioned Letter of Notification submitted on April 30, 2010 and approved June 28, 2010. Enclosed are Exhibits 2B, 5B, 8A and 11A that depict the engineering information. Exhibits 2B and 8A supplement Exhibits 2A and 8, respectively and Exhibit 11A replaces Exhibits 11 and 12 of the Supplemental Engineering Information submitted on September 14, 2010. Exhibit 2B shows the engineering adjustments of general layout of the project, which includes identification of the locations of the structures depicted in Exhibits 8A and 11A. Exhibit 5B identifies the addition of a structure, as shown in Exhibit 2B. In general, the supplemental information involves engineering changes for two structures and is consistent with easements with utilization of an existing easement on parcels 39-256550 and 39-256560 rather than obtaining a new easement on these parcels as identified in the LON. For the structure depicted by Exhibit 8A, the pole has been revised to include down guys. Exhibit 11A replaces the two single pole tangent structures supporting the rebuilt 23 kV line and the other support the 138 kV transmission line depicted in Exhibits 11 and 12.

With the exception of the modifications in Exhibits 2B, 8A and 11, all other structures and features of the project remain the same.

Should the Ohio Power Siting Board desire further information or discussion of this submittal, please contact me at (330) 384-2526.

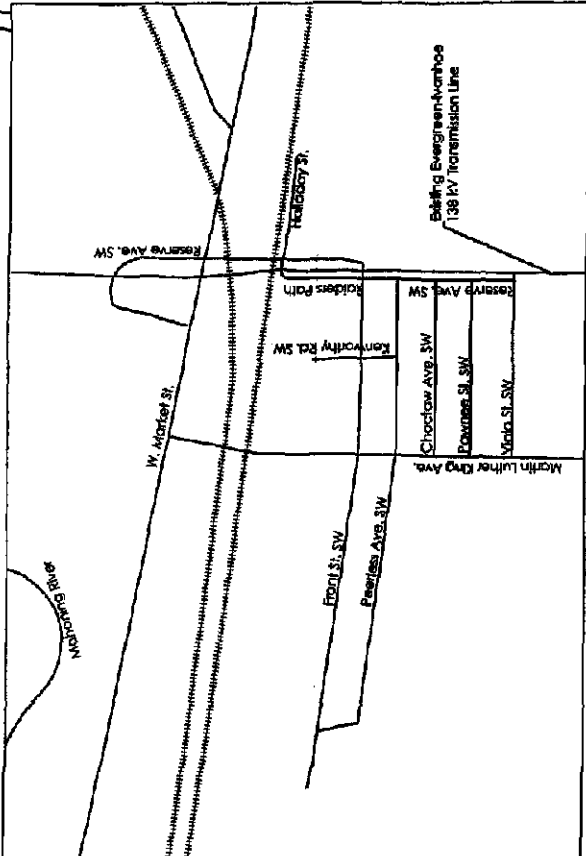

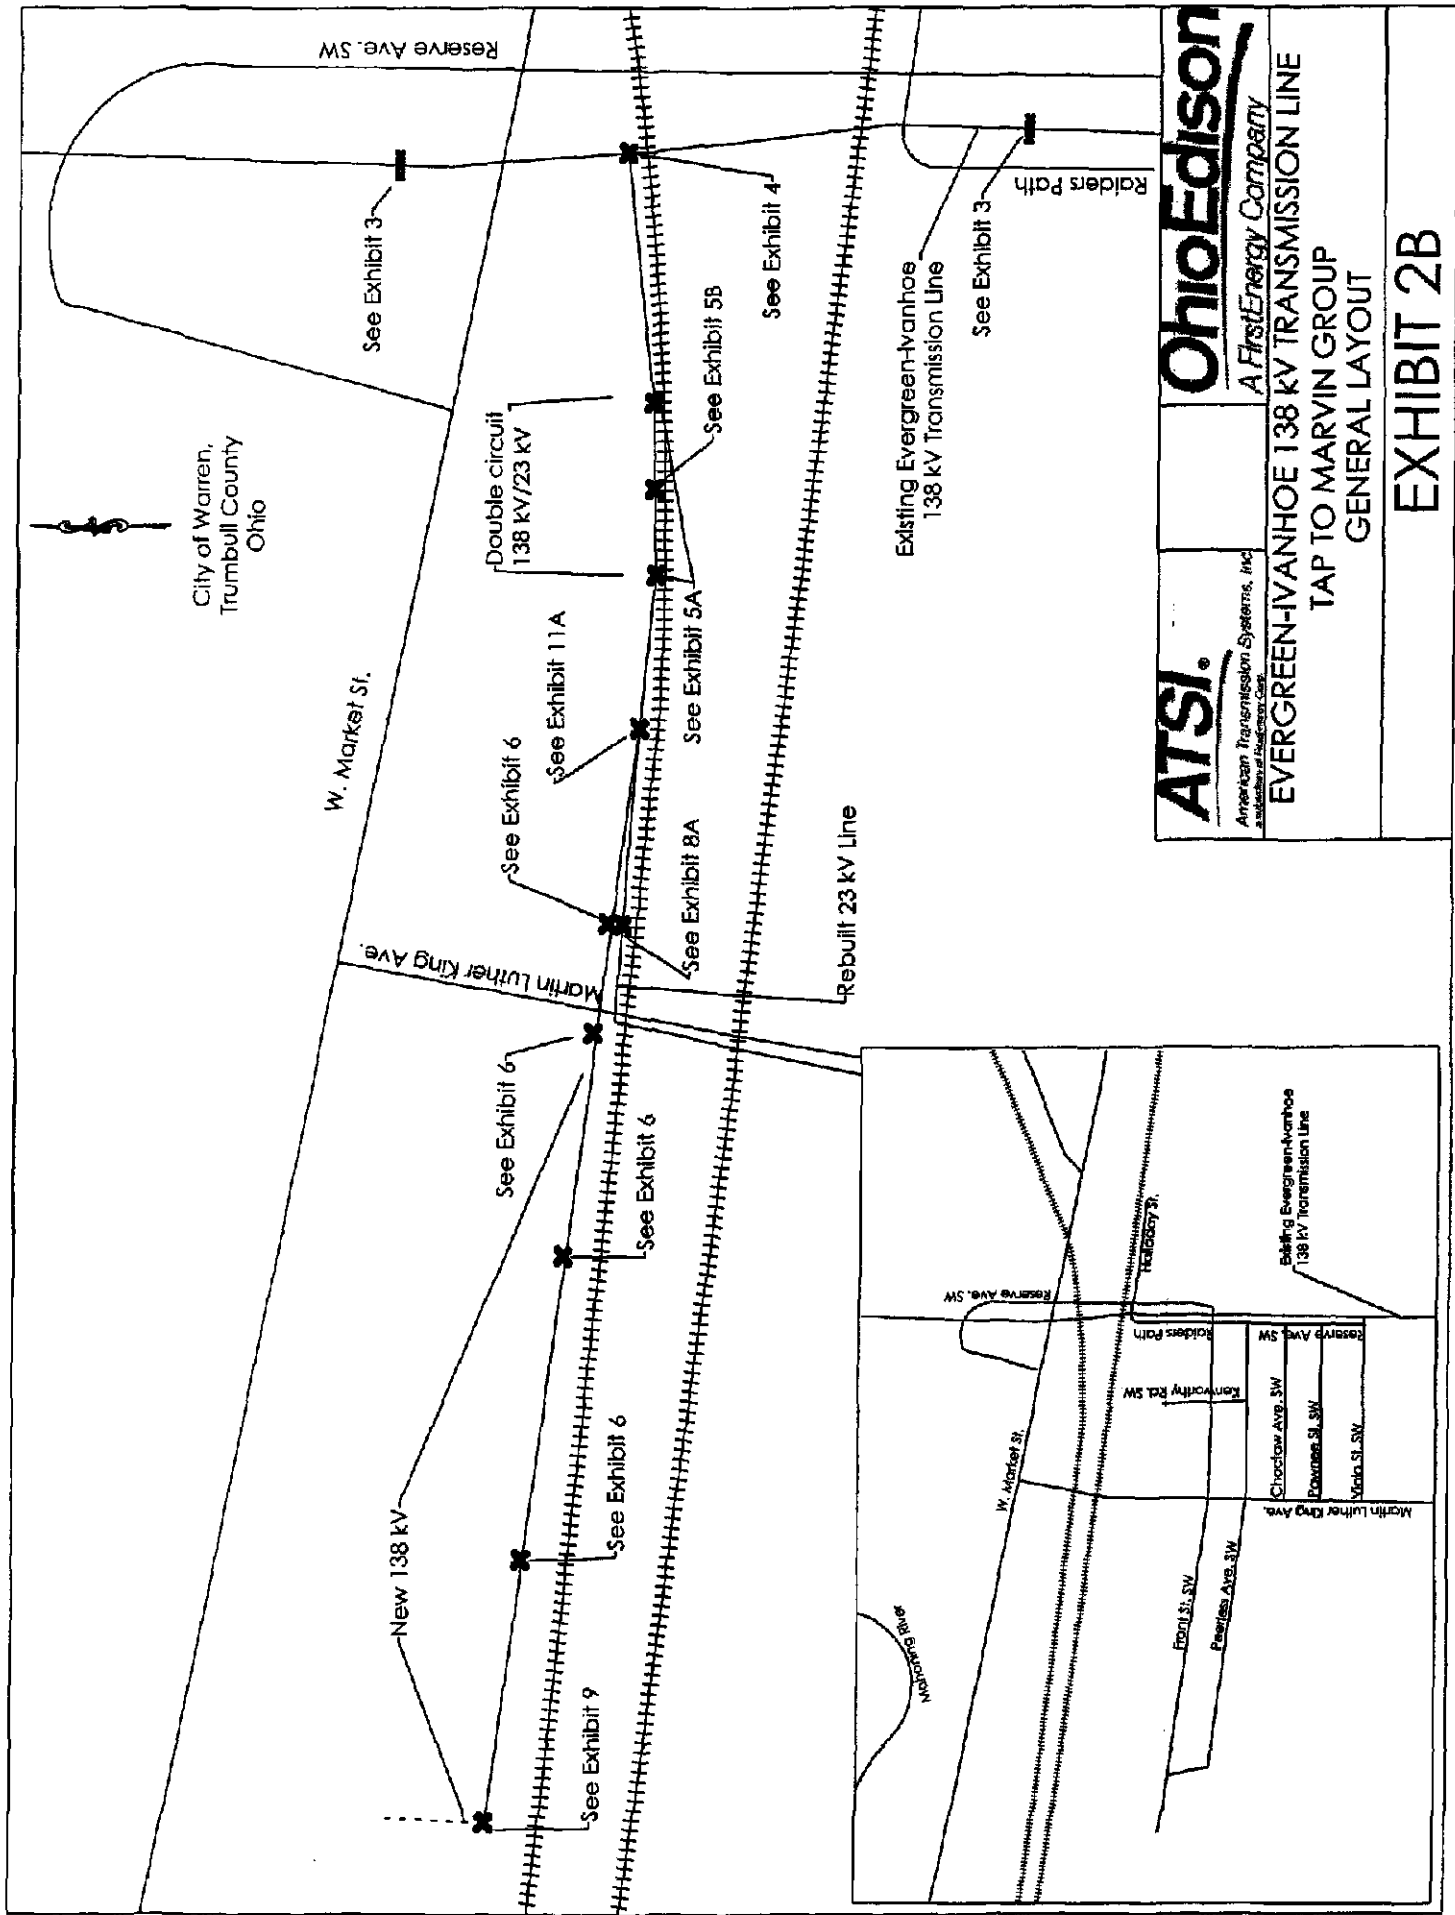

Sincerely,

Scott M. Humphrys
Associate Distribution Specialist
Energy Delivery Transmission and Substation Design
