Dec. 29, 2010

Dear Senators and all others concerned,
I am a homeowner of an all electric
home. I have steadily watched my
utility bill rise, and it is very frightening.

Last winter, we got an electric bill
of \$700.00? Now, could you pay
that bill? Especially, since our electric
bill ran about \$350.00 in the winter. Our
utilities have always been very
reasonable, but now we have to
choose between eating and paying our
electric bill!

I would encourage/plead with
First Energy/Ohio Edison to keep
their commitment to their
customers. Please don't hold
us hostage!

Sincerely,
Susan Stromp
