Dear McCheryl Roberts,

I am 75 years old, and built my all-electric home in 1963. I made the decision to live in an all-electric home based on the promise of a discounted rate that makes it affordable to heat/cool with 100 percent electric. I had no reason to believe the all-electric rate could be significantly increased because it has been in place since the 1960s. I made plans to live the rest of my life "knowing" I could afford my electric bill.

In your work as a Public Utilities Commissioner, please keep in mind that First-Energy has three advantages that I don't have. First-Energy has money, people and the capacity to innovate. I have myself and my wife, my retirement income and my house that is no longer marketable.

If you fail to hold First-Energy accountable for its verbal and written promises, thousands of senior citizens will become financially vulnerable and unable to maintain their independence.

Donald Johnson
