

Public Utilities Commission of Ohio

Memo

To:

Docketing Division

From: George Martin, Grade Crossing Planner, Rail Division

Re:

In the matter of the authorization of Norfolk Southern Railway to install an active grade

crossing warning device in Ottawa County

February 16, 2011

The Ohio Rail Development Commission (ORDC) has authorized funding for Norfolk Southern Railway (NS) to install mast-mounted flashing lights and roadway gates at Ottawa County, near Oak Harbor, Benton-Carroll Rd/CR 23, DOT# 473769H. On December 16, 2010, a train/vehicle collision occurred at the crossing that resulted in a fatality.

On January 10, 2011, staff from ORDC, NS, the Commission and Ottawa County surveyed the crossing and determined that an upgrade of the warning devices was appropriate.

This project will be actual cost and will be federally funded. Staff requests an Entry with plans and an estimate to be submitted within 90 days and completion within one year. Upon approval of the plans and estimate by ORDC, construction may commence. A suggested case coding and heading would be:

PUCO Case No. 11-863 -RR-FED In the matter of the authorization of Norfolk Southern Railway to install an active grade crossing warning device in Ottawa County

C: Legal Department

Please serve the following parties of record

OHIO RAIL DEVELOPMENT COMMISSION INTER-OFFICE COMMUNICATION

TO: George Martin, Planner, Railroad Division, PUCO

FROM: Susan Kirkland, Supervisor, Rail-Highway Safety Section

BY: Tod Darfus, Project Manager

SUBJECT: Grade Crossing Warning Projects

DATE: February 11, 2011

You may authorize the Norfolk Southern Railroad to proceed with the non-field work for the project listed below. This construction authorization is made with the stipulation and understanding that any field work needs prior approval before work begins. This authorization is made with the stipulation and understanding that an approved estimate may contain entries for items or activities that may be cited and found to be ineligible for federal participation during the project audit. The construction portion and preliminary engineering will be financed with federal funds.

Please initiate a one (1) year order with the plan and estimate due in ninety (90) days for the following.

Ottawa-Benton-Carroll Road/CR-23 AAR # 473 769 H

Thank you for your assistance with this matter.

85	2040
90	2160

Source: R-H Grade Crossing Handbook Table 36 (pp. 132-133)

Notes:

All calculated distances are rounded up to the next higher 5foot increment.

Distances indicated are for 65-ft double bottom semi-tractor trailers and level single track 90 degree crossings; and may need to be adjusted for multiple tracks, skewed crossings or approaches on grades.

Clearing Sight Distance is to be measured in each vehicle travel direction at <u>non-gated crossings</u> as viewed from a point 25 feet from centerline of nearest track in the center of whichever travel lane is nearest the direction along track being measured.

Notes:

All calculated distances are rounded up to the next higher 5foot increment.

Distances indicated are for 65-ft double bottom semi-tractor trailers on dry level pavements.

Stopping Sight Distance is to be measured on each roadway approach to crossing from stop bar.
