**TARIFF FORMAT**

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of the various suspension periods and deferrals the Commission follows in its tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect. Consult the check sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
  - 2.1
  - 2.1.1
  - 2.1.1.A
  - 2.1.1.A.1
  - 2.1.1.A.1.(a)
  - 2.1.1.A.1.(a).I
  - 2.1.1.A.1.(a).I.(i)
  - 2.1.1.A.1.(a).I.(i)(1)
- D. Check Sheet** - When a tariff filing is made with the Commission an updated check sheet accompanies the filing. The check sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There shall be no other symbols used on this page if these are the only changes made to it. The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

---

**EXPLANATION OF SYMBOLS**

Changes to this tariff shall be identified on the revised page(s) through the use of symbols. The following are the only symbols used for the purposes indicated below:

- (C) - To signify a changed regulation
- (D) - To signify a discontinued rate or regulation
- (I) - To signify an increase in rate or charge
- (M) - To signify material relocated from one page to another without change
- (N) - To signify a new rate or regulation
- (R) - To signify a reduced rate or charge
- (S) - To signify a correction or reissued matter

**2.15 Mileage Calculation**

**2.15.1** Mileage between Carrier's POPs where services are offered is calculated based on V and H (V&H) coordinates as obtained by reference to NECA Tariff F.C.C. No. 4. Not all services are available from all POPs. (M)

Material appearing on this page previously appeared on Page 21.

---

**SECTION 2 - REGULATIONS (Continued)****2.15 Mileage Calculation (Continued)**

**2.15.2** The airline mileage between Carrier network terminal offices is calculated as follows.

- A. Obtain the V and H coordinates for each POP.
- B. Obtain the difference between the V coordinates and between the H coordinates for each POP.
- C. Square each difference from B, above.
- D. Add the square of the V difference to the square of the H difference from C, above.
- E. Divide the sum of the squared numbers by 10. Round to the next higher whole number.
- F. Obtain the square root of the number obtained in E, above. Round to the next higher whole number. This is the airline mileage figure.

G. Example:

	<u>V</u>	<u>H</u>
Abbeville, AL	7752	1993
Abernathy, TX	8546	4978

The difference between the V coordinates is 794.  
The difference between the H coordinates is 2985.

Squaring each difference yields:  
 $794 \times 794 = 630,436$   
 $2985 \times 2985 = 8,910,225$

Adding the results equals 9,540,661.

Dividing by 10 equals 954,066.

The square root of 954,066 is 977, which is the mileage figure.

**2.16 Access Facilities**

**2.16.1** Carrier will offer access facilities to provide a communications channel from the Customer's location to each POP. Customers may elect to purchase the access facilities through Carrier or to provide or arrange for the facilities themselves.

**2.16.2** Carrier will undertake to arrange for alternative access facilities when requested and ordered by Customer, subject to availability and approval by Carrier. At the discretion of Carrier, such alternative access facility arrangements may be utilized in lieu of local exchange company facilities. Alternative access facilities may vary in cost and will be charged on an individual case basis.

**2.16.3** Any special construction or non-standard charges assessed by the access service provider to Carrier will be the responsibility of Customer.

(C)

---

**SECTION 2 - REGULATIONS (Continued)**

**2.17 Other Rules**

Demonstration or promotional calls of up to 10 minutes may be offered to existing or prospective Customers to demonstrate new services, at no charge to Customer. Such offerings will be limited to specific locations and dates and may include originating and/or terminating restrictions.

**6.2 Operator Services - Payphone****6.2.1 General**

Operator Services - Payphone allows calls to be placed from payphones pre-subscribed to Carrier for the handling of long distance traffic. These calls are placed with the assistance of an automated or live operator. Calls are billed in increments of one minute. Partial minutes are rounded to the next higher increment for billing purposes. A one-time Operator Surcharge, if applicable, will be added to the first minute of each operator assisted call in addition to per minute rates as specified in 6.2.4.

The following types of calls are available for operator assistance:

- **Collect Calls** - Operator assistance for collect calls will ask the caller to provide his/her name or other identification, then contact the party at the domestic telephone number specified by the caller, repeat the caller's identification and then ask if the called party will accept charges for the call. If the called party agrees to accept the charges, the call will be established and the associated charges for a collect call will be billed to the called party's residential telephone number billing account. Collect calls can be either person-to-person or station-to-station.
- **Billed-to-Third Number** - Operator assistance will establish the call requested by the caller and arrange for billing of associated charges to a residential domestic telephone number specified by the caller that is other than the calling telephone number or the called telephone number. Requests for third number billing are subject to operator verification that the party at the telephone number to be billed will accept charges for the call. Other efforts may be undertaken subsequently by Carrier, as necessary, to determine responsibility for payment of such calls.
- **Person-to-Person** - At the caller's request, operator assistance will attempt to place a call to a particular party at a domestic telephone number specified by the caller. The party specified by the caller may be a person, station, department, extension, or office. If successful, the Operator will establish the person-to-person call between the calling and called parties. If the identified party is not available and the caller requests, or agrees, to speak to a party other than the party initially specified, the call will be established and billed at the person-to-person call rates.
