180 E. Broad Str.

Columbus, Ohio 43215

Dear Chairman Snitchier,

I am writing to you and the rest of the board about the up coming vote on All Electric Homes Case # 10-176. The financial lose to me, my city and school system would be over whelming. We would never make it back. Papers filed in this case show the cost to us would be a drop in value of 30 to 50 thousand dollars. I have no other fuel in my development and even if I did the cost to change over to gas would be 25 to 56 thousand dollars. The financial hard ship would ruin our future to support our self. The electric company states the average house uses 750 KW a month, I us over 4000 KW a month in the winter. We understand things change but for the wintertime only, I think a bulk usage price should be in place, the rest of the year we are like any other home. The PUCO cannot trash to lives of over 360,000 families just because the laws changed. A 48-year-old promise of clean cheap power should stay. First Energy should not have got into the home building business just for their profit goals back then. Bulk pricing is the fix, even the state should pool all their power usage in to one bill and save the state a lot of money.

Please file this letter under case #10-176 and vote for us!

Thank you  
Don+Karen Kvasno
