Investigation Report

Project Description: This project is a condition replacement project initiated by Columbia Gas of Ohio to rebuild the existing regulator station known as District Regulator Station #316, which was destroyed by fire on November 16, 2010.

Site Description: This regulator station and facilities, including the building, outlet valve setting, high pressure inlet main and portions of the medium pressure outlet mainline facilities will be installed on the existing lot owned by Columbia. The remaining segments of the medium pressure outlet mainline facilities will be installed within the Manhattan Boulevard public right-of-way.

Discussion/Comments/Concerns: The construction of this project should pose only minimal negative social and environmental impacts.
