3. SERVICE CONNECTION (cont'd)

3.1 Service Order Charge (cont'd)

Note:

Residential consumers may receive a discount of \$36.00 off the \$135.00 first line installation fee if the installation fee is paid for in advance of service being connected in Sprint area only. Business and Residential consumers may divide Service Installation into three equal monthly payments.

New service may not be initiated on a primary line. Primary service may be initiated if the consumer has had active service with another landline company within the past 30 days, the bill is in the consumer's name, and is in good financial standing with that company.

If the consumer cannot provide a copy of a previous bill, the Company will comply with the requirements of Rule 4901:1-17-05 of the Ohio Administrative Code Deposits.

(N)

(N)

3.1.1 Exceptions to the Charge

- A. No charge applies for a change to a service for which a lower monthly rate applies, made within 90 days after any general rate increase, if a lower grade of service is offered in the customer's exchange.
- B. The Company may from time to time waive or reduce the charge as part of a promotion.

4. REMOTE CALL FROWARDING

4.1 Remote Call Forwarding Service

Remote Call Forwarding (RCF) is a service feature whereby all calls placed to an RCF customer's telephone number (the call forwarding location) are automatically forwarded by Company central office equipment to a designated terminating station of such RCF customer, which is located in an exchange area of the Company or another Telephone Company. RCF is subject to the following regulations:

- A. RCF service will be provided on any exchange service, which can be direct inward dialed except semi-public and public telephone service;
- B. The service is offered from central offices where the Company has arranged the facilities for RCF and is furnished subject to the availability of facilities;
- C. One primary directory listing will be provided without charge for the exchange in which the RCF central office is located.
- D. Since the grade of transmission on calls which are remotely forwarded may vary, depending upon the location of the calling party in relation to the terminating station, the Company cannot guarantee transmission on forwarded calls;
- E. Each RCF feature allows for forwarding one call at a given time. An additional feature is necessary for each additional call to be forwarded simultaneously. The customer must subscribe to sufficient RCF features and facilities at the terminating station to adequately handle calls without impairing, disrupting or deteriorating services offered by the Company. In the event that the use of RCF causes such impairment, disruption or deterioration, the Company shall have the right to discontinue forthwith such service without prior notification to the customer; and
- F. The Company will not provide identification of the originating telephone number to an RCF customer.
- G. Remote Call Forwarding can be provided where the call forwarding number and the terminating station are both located in the same local calling area provided that the Remote Call Forwarding is not used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part of charges that would regularly be applicable between the stations bridged together by the subscriber. (T)(N)
- H. The following rate apply to Remote Call Forwarding. This is applicable for Sprint, SBC, and Verizon areas. (T)

Non-Recurring Charge

Business:	\$50.00
Residential:	\$50.00

5. PRIVACY ID

5.1 Privacy ID Service

- A. Caller ID service is required in order to subscribe to Privacy ID. Tier 2 residential and business services.
- B. Privacy ID provides Caller ID subscribers with the ability to identify unavailable, unknown, blocked and private numbers. Privacy ID intercepts all unidentified calls before the subscriber's telephone rings than asks the caller to state their name or company. Once the calling party has responded, the service rings to the subscriber and announces the calling party's information. The subscriber has the option to accept the call, reject the call, play an announcement to the calling party or forward the call to voicemail.
- C. The Privacy ID subscriber may provide calling parties with a Personal Identification Number (PIN). Use of the PIN allows the calling party to bypass Privacy ID.
- D. Privacy ID is not offered in concurrence with Basic Rate Interface (BRI), Primary Rate Interface (PRI), Centrex, Payphone Line and PBX Trunks.
- E. When the Call Trace and Return Call features are activated on calls intercepted by Privacy ID, the telephone number captured is that of the Service Node, which performs Privacy ID, not the telephone number of the calling party.
- F. The following rates and charges apply to Privacy ID only in Sprint area.

	<u>Monthly Rate</u>	
Residential:	\$5.00	(1)

6. FEATURES and RATES

6.1 Custom Calling Service

6.1.1 Regulations

- A. Custom calling service is provided only with individual line service. The services may be included in multiple feature packages.
- B. The service will be provided subject to availability; features may not be available with all classes of service.
- C. The normal quality of transmission may not be sufficient on all calls for the customer of these services.
- D. A service order charge may apply when a customer request service of one or more custom calling features. Orders requested for the same customer made at the same time for the same premises will be considered one request. This charge may not apply if the features are ordered at the same time as other work for the same customer at the same premises are being processed.
- E. A non-recurring charge applies if custom calling service is ordered subsequent to the initial order for service as set forth in Section 3.3.2. The non-recurring charge will not be applicable for customers converting service from another provider or installing new service with ValTech.
- F. **Repeat Dialing and Automatic Callback cannot be activated for calls originating from a line that is forwarded.**
- G. **Caller ID block is not intended for use by telemarketers. Upon receiving complaints that a telemarketer is blocking the disclosure of its telephone number, the Company will investigate the complaints and permanently unblock the number delivery where appropriate.**

PUCO Tariff No. 1
Section 6
Sheet 2

6. FEATURES and RATES (cont'd)

6.1 Custom Calling Service (cont'd)

6.1.2 Description of Features (cont'd)

A. **Three-Way Calling**

Three-Way Calling permits a customer to add a third party to an existing connection, thereby establishing a three-way conversation. The call must have originated from outside the station group and terminate to a station within the station group.

B. **Call Hold**

Call hold allows a customer to place a call on hold, and then continue the conversation either from the same telephone set or from a different location. This feature can also allow the customer to make an outgoing call to another number. Only one call per line can be on hold at a time, the third party cannot be added to the original call. Call hold is activated by flashing the switch-hook, dialing an access code, and then hanging up. The call is resumed when the handset of the same telephone, or another telephone on the same line, is picked up. This is applicable only in Sprint area.

C. **Three-Way Calling - Pay Per Use**

The pay per use (per attempt) option is available only to subscribers not subscribing to the features on a monthly basis. At the customer's request, access to the feature on a pay per use basis will be blocked, at no charge to the subscriber. The following feature rates apply on a per attempt basis. This is applicable for Sprint, SBC, and Verizon areas.

D. **Three-Way Call with Transfer**

This feature allows a business user to hold an in-progress call and complete a second call while maintaining privacy from the first call, or to add on the previously held call for a three-way conference. This is applicable only in Sprint area.

1. **This feature is not available to Residential customers.**
2. **The subscriber can transfer the caller to the secondary destination by one of three ways: blind transfer, announced transfer, or Three-Way conferencing with option to transfer.**
3. **The Three-Way Calling with Transfer subscriber is responsible for all applicable local and toll usage charges for calls originated by the subscriber, including connections which continue after the subscriber exits the call.**

6. FEATURES and RATES (cont'd)

6.1 Custom Calling Service (cont'd)

6.1.2 Description of Features (cont'd)

E. Basic Call Forwarding / Call Forward -Variable

Call forwarding permits a subscriber to transfer all incoming calls to another telephone number by dialing a code and the telephone number of the service to which the calls are to be transferred. The subscriber will be responsible to activate and deactivate the forwarding function throughout each procedure. **When activated, call forwarding overrides call forward busy and call forward no answer, but those features resume their original function when basic call forward is deactivated.** (T)

F. Call Forwarding – Busy / Fixed / Customer Controlled (T)

Call Forwarding – Busy allows the subscriber to have calls forwarded to another station when the called station is busy. The subscriber can continue a conversation while incoming calls are answered elsewhere. **This customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.** (T)

G. Call Forward Busy – Customer Programmable (N)

Call Forward Busy – Customer Programmable allows the subscriber the capability to control activation/deactivation and the forward-to number of the service by using dialing tones.

(N)

H. Call Forwarding - No Answer / Fixed / Customer Controlled (T)

Call Forwarding – Don't Answer automatically reroutes an incoming call to another station when the called station has not answered after a specified number of rings. The subscriber can answer an incoming call before the designated time lapse or let the call be answered at the forwarding destination. **This customer selected forward-to number is preprogrammed by the Company at the time service is established and can only be changed via service order.** (T)

I. Call Forward No Answer – Customer Programmable (N)

Call Forward No Answer – Customer Programmable allows the subscriber the capability to control activation/deactivation and the forward-to number of the service by using dialing tones.

(N)(M)

(M) Material previously appearing on this page now appears on First Revised Sheet 4.

6. FEATURES and RATES (cont'd)

6.1 Custom Calling Service (cont'd)

6.1.2 Description of Features (cont'd)

J. Call Forwarding – Remote Activation

(T)(M)

Call Forwarding – Remote Activation allows the subscriber to change the call forwarding status of a residential or business telephone from a remote location. The subscriber must have call forwarding service in order to utilize this feature. To redirect call forwarding from a remote location, the subscriber dials a remote-access directory number. Once the subscriber's authorization code is verified, the subscriber can activate, deactivate, or change call forwarding to a new destination.

(M)

K. Selective Call Forward

(T)(M)

Selective Call Forward permits the subscriber to have only calls from up to twelve selected numbers forwarded. If a call is placed from a number on the screening list, the call will be forwarded to the subscriber-programmed number. Calls not on the screening list will terminate in a normal manner.

(M)

L. Fixed Call Forward

(T)

Fixed Call Forward allows any incoming calls to be automatically routed to a predesignated fixed number. Toll charges are applicable to the fixed call forwarding subscriber if the programmed number is not within the subscriber's local calling area.

(D)

M. Enhanced Call Waiting

(T)

Enhanced Call Waiting provides a tone signal to indicate to the subscriber, already on an existing call, that an unanswered call is waiting to be completed to the subscriber's number. The subscriber may place the existing call on hold, answer the second call, and alternately talk on both calls until one has been terminated. Enhanced Call Waiting also gives the option to cancel Call Waiting. Cancel Call Waiting can be activated before or during a call by dialing an access code and then stays in effect for the duration of the call. Incoming calls receive a busy signal while cancel call waiting is in effect.

(M1)

(M) Material now appearing on this page previously appeared on Original Sheet 3.

(M1) Material previously appearing on this page now appears on First Revised Sheet 5.

6. FEATURES and RATES (cont'd)

6.1 Custom Calling Service (cont'd)

6.1.2 Description of Features (cont'd)

N. Talking Call Waiting

(T)(M)

Talking Call Waiting allows the subscriber to know who is calling while they are on the telephone with another party. Talking Call Waiting enhances Call Waiting by allowing the subscriber to hear the name associated with the directory listing of the calling number after hearing the call waiting tone while the subscriber is on the line, unless the message is censored. Any and all available names will be voiced to the subscriber. If the name is not available, the terms "private" or unavailable" will be voiced. Applicable in Sprint area only.

(M)

O. Signal Ring / Distinctive Ring

(T)

Signal Ring enables an individual line subscriber to identify an incoming call by having up to three additional directory numbers (Secondary Directory Number) assigned to their main access line. Each Secondary Directory Number is assigned a distinctive ring in order to determine which number or person is being called.

A. If a subscriber requests a Secondary Directory Number as a business listing, the main access line must be a business access line.

B. Each Secondary Directory Number is entitled to one directory listing. Should the subscriber not desire the listing to be published, the Company will designate the Secondary Directory Number as a No Charge Non-Pub. The subscriber would not be charged the Non-Pub recurring monthly charge.

P. Speed Dialing

(T)

Speed Dial provides the subscribers with the capability of placing local and message toll calls to frequently called numbers by dialing abbreviated codes. This arrangement is available in either an eight (8) or a thirty (30) number selection.

(M1)

(M) Material now appearing on this page previously appeared on Original Sheet 4.

(M1) Material previously appearing on this page now appears on First Revised Sheet 6

6. FEATURES and RATES (cont'd)

6.1 Custom Calling Service (cont'd)

6.1.2 Description of Features (cont'd)

Q. Repeat Dialing/Auto Redial

(T)(M)

Repeat dialing allows the subscriber to automatically redial the last number dialed from the subscriber's telephone regardless of the completion status of the last number dial. If the called line is available, the call will be placed immediately. If the redialed called line is busy, the number will automatically be dialed, for the thirty (30) minute period, until it becomes available. The subscriber can make and receive calls during the thirty (30) minute period that the busy number is being dialed. When the call can be completed, a distinctive ring will be provided to the caller's line to alert the subscriber that the requested callback is ready.

The following types of calls cannot be Automatically Redialed:

1. Calls to 800 Service numbers;
2. Calls to 900 Service numbers;
3. Calls preceded by an Interexchange carrier access code;
4. International Direct Distance Dialed calls;
5. Calls to Directory Assistance; and
6. Calls to 9-1-1.

(M)

R. Repeat Dialing/Auto Redial - Pay Per Use

(T)

The pay per use (per attempt) option is available only to subscribers not subscribing to the features on a monthly basis. At the customer's request, access to the feature on a pay per use basis will be blocked, at no charge to the subscriber. The following feature rates apply on a per attempt basis.

S. Calling Party Number Blocking

(T)

Caller ID block allows the subscriber to prevent the delivery of the subscriber's directory number on a per call basis (per call block) or per line basis (per line block). Per call block will block the delivery of the subscriber's number for one call only and may be activated from all individual access lines by dialing an activation code prior to placing a call. Per line block will automatically block delivery of the subscriber's telephone number on all calls and will be provided, upon request, at no charge to subscribers of non-published telephone number service, and at a monthly charge to customers not subscribing to non-published telephone number service.

(M1)

(M) Material now appearing on this page previously appeared on Original Sheet 5.

(M1) Material previously appearing on this page now appears on First Revised Sheet 7

6. FEATURES and RATES (cont'd)

6.1 Custom Calling Service (cont'd)

6.1.2 Description of Features (cont'd)

T. Anonymous Call Rejection

(T)(M)

Anonymous Call Rejection is a service that enables subscribers the ability to reject calls from parties who have a privacy feature that prevents the delivery of their telephone number to the called party when the called party has Caller ID with Name. The call is routed to a denial announcement and subsequently terminated. The calling party hears a denial announcement which indicates the calling party can retry their call after unblocking their number. Anonymous Call Rejection automatically is free of charge with the Caller ID feature.

(M)

U. Return Call/Automatic Callback

(T)

Return Call permits the subscriber to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the telephone number is known. If the called line is available, the call is immediately completed. If the called line is not available, the network will try to complete the call up to a thirty minute period. When the call can be completed, the calling subscriber is notified by a distinctive ring that the network is ready to place the call. When the subscriber picks up the telephone, the call is automatically placed.

V. Return Call/Automatic Callback - Pay Per Use

(T)

The pay per use (per attempt) option is available only to subscribers not subscribing to the features on a monthly basis. At the customer's request, access to the feature on a pay per use basis will be blocked, at no charge to the subscriber. The following feature rates apply on a per attempt basis.

W. Call Trace

(T)

Call trace permits a subscriber to initiate a trace of a harassing or obscene call without first having to obtain legal authorization or telephone company assistance. Upon activation by the subscriber, the network automatically sends information (if available) to law enforcement officials engaged in conducting, at the customer's request or otherwise, any investigation with respect to such calls, which will indicate the calling number, the time the call was received, and the time the trace was activated. Information pertaining to non-published numbers will be provided to the authorized law enforcement agency upon request of the agency.

(T)

(T)

(M) Material now appearing on this page previously appeared on Original Sheet 6.

6. FEATURES and RATES (cont'd)

6.1 Custom Calling Service (cont'd)

6.1.2 Description of Features (cont'd)

X. Selective Call Screening

(T)

Selective Call Screening permits the subscriber the ability to prevent repeated calls from an unwanted caller whose number may or may not be known. This feature is activated by a two-digit access code at the beginning of the call that provides information about the line originating the call. The two-digit access code is designed to identify the call as being selectively screened. The subscriber has the ability to create a list of telephone numbers from which the subscriber may wish to not receive calls. Under this arrangement, operators accept only those originating toll calls that are made collect, billed to a third number, or billed to a calling card.

Y. Multi-line Hunting / Rotary

(T)

Multi-line hunting permits a subscriber to have incoming calls rollover to another designated station when the called station is busy or has not answered after a specified number of rings. The line hunting arrangement provides sequential search of available numbers within a hunt group, which is only available to a subscriber with more than one line. Multi-line hunting is free of charge subsequent to their initial establishment of service in Sprint area only.

(T)

Z. Selective Call Acceptance

(T)

Selective Call Acceptance allows a subscriber to accept calls from up to twelve calling parties whether or not the number is known. The subscriber can create a screening list by entering known numbers or activating the addition of the number of the last call received. Unaccepted callers will be connected to an announcement indicating that the called party is not accepting calls from that number.

6. FEATURES and RATES (cont'd)

6.1 Custom Calling Service (cont'd)

6.1.2 Description of Features (cont'd)

AA. Selective Call Rejection

(T)

Selective Call Rejection allows the subscriber to prevent incoming calls from a pre-selected list of up to twelve numbers whether or not the number is known. The subscriber can create a screening list by entering known numbers or activating the addition of the number of the last call received. Incoming rejected calls are routed to an announcement indicating that the called party is not accepting calls from that number

AB. Selective Call Ring

(T)

Selective Call Ring permits the subscriber to designate up to twelve specific telephone numbers, whether or not the number is known, so that calls from those numbers may be identified by a distinctive ring. The subscriber can create a screening list by entering known numbers or activating the addition of the number of the last call received.

AC. Caller ID with Name & Number

(T)

Caller ID with Name allows the subscriber, with the use of a display phone or attachment display device, to view the directory number, and the name associated with that number, of an incoming call before answering. If the caller's number is not part of the network, is a multi-party line, or is blocked, the display phone or attachment display device will display an indicator for "out of area" or for "private". Caller ID with Name includes anonymous call rejection, which allows the subscriber to reject calls from parties who have blocked the delivery of their number.

6. FEATURES and RATES (cont'd)

6.1 Custom Calling Service (cont'd)

6.1.2 Description of Features (cont'd)

AD. Wake-up (T)

Wake-up service allows a subscriber to program from a telephone the time to be called by an automated wake up service. The feature is activated and deactivated by an access code. When the feature is activated, the subscriber may program one "ring back" time within the succeeding 24-hour period, and must repeat this activation sequence for each succeeding 24-hour period. If a wake-up call is not answered or fails for any reason, two more attempts are made at approximately 5-minute intervals. After the third attempt is made, and the call is unanswered, the event is recorded and no further attempt is made.

AE. Intercom Service (T)

Intercom Service permits a subscriber to call the subscriber's own number, hang up and thereby ring all the telephones at that number.

AF. Warm Line Transfer (T)

Warm line service provides a signaling arrangement whereby a predetermined telephone number (local or toll) will be automatically called when the subscriber's telephone goes off-hook and no digits are dialed within a set number of seconds. The number that will be automatically called is determined by the subscriber and recorded in the serving network. During the time interval between off-hook and the calling of the warm line number, the subscriber can use the telephone to make regular-dialed calls if desired.

AG. Subscriber Activated Call Block (T)

Subscriber Activated Call Block restricts access to certain types of outgoing calls, such as direct-dialed toll calls. Other types of calls, such as local, calls to 911, or calls to the operator can still be originated from the line. The subscriber dials an access code to activate and deactivate the feature.

3. SERVICE CONNECTION

3.1 Service Order Charges

A service order charge applies per customer order, for the work associated with receiving, recording and processing information necessary to carry out a customer's request to connect, move, add and/or change telephone service. Only one service order charge applies per customer's request regardless of the quantity of work requested.

		<u>Non-Recurring Charge Maximum</u>	
		<u>Residential</u>	<u>Business</u>
A.	Service Order – Initial		
	Sprint Area	\$15.00	\$15.00
	SBC Area	\$20.00	\$20.00
	Verizon Area	\$25.00	\$25.00
B.	Service Order – Conversion Charge		
	Sprint Area	\$11.00	\$10.00
	SBC Area	\$45.00	\$45.00
	Verizon Area	\$45.00	\$45.00
C.	Service Order – Directory Listing , per listing		
	Sprint Area	\$20.00	\$20.00
	SBC Area	\$25.00	\$25.00
	Verizon Area	\$30.00	\$30.00
D.	Service Order – Number Change, per number		
	Sprint Area	\$30.00	\$30.00
	SBC Area	\$30.00	\$30.00
	Verizon Area	\$35.00	\$35.00
E.	Service Order – Access line charge		
	Sprint Area		
	(1) First Line	\$135.00	\$80.00
	(2) Each additional line	\$ 20.00	\$20.00
	SBC Area		
	(1) First Line	\$135.00	\$135.00
	(2) Each additional line	\$135.00	\$135.00
	Verizon Area, per order	\$135.00	\$135.00
F.	Service Order – Primary Interexchange Carrier Change Charge (PIC)	\$5.50	\$5.50

(N)

3. SERVICE CONNECTION (cont'd)

3.1 Service Order Charge (cont'd)

Note:

Residential consumers may receive a discount of \$36.00 off the \$135.00 first line installation fee if the installation fee is paid for in advance of service being connected in Sprint area only. Business and Residential consumers may divide Service Installation into three equal monthly payments.

New service may not be initiated on a primary line. Primary service may be initiated if the consumer has had active service with another landline company within the past 30 days, the bill is in the consumer's name, and is in good financial standing with that company.

If the consumer cannot provide a copy of a previous bill, the Company will comply with the requirements of Rule 4901:1-17-05 of the Ohio Administrative Code Deposits.

When the InterLATA and IntraLATA PIC are changed simultaneously then 50% of the IntraLATA PIC change charge will be waived. The Company does not process electronic orders.

(N)
—
(N)

3.1.1 Exceptions to the Charge

- A. No charge applies for a change to a service for which a lower monthly rate applies, made within 90 days after any general rate increase, if a lower grade of service is offered in the customer's exchange.
- B. The Company may from time to time waive or reduce the charge as part of a promotion.
