SERVICE CONNECTION CHARGES

B. APPLICATION (Continued)

1. General (Continued)

- g. When all required service facilities are already in place, a service charge does not apply for a subscriber to connect an item of customer-provided terminal equipment to that subscriber's existing service under the provisions of Part 68 of the FCC Rules and Regulations. If additional facilities are required or requested, the appropriate service charge(s) will apply. When all required service facilities are already in place, a service ordering charge only will apply for service added or changed in connection with existing service. If additional services are required or requested, the appropriate service charge(s) will apply.
- h. Incorporated in this section is the assumption that the subscriber will allow the Company to complete the requested operations in a manner determined by the Company to be reasonable and efficient. When the subscriber insists, after thorough explanation by the company of the additional charges which would be applicable, that the Company carry out additional or extraordinary work which would not otherwise be required to complete the desired operation, charges in addition to those applicable as specified in this section may be applied. Additional work operations such as premises visits made to deliver new telephone number designations or additional service orders processed to effect multiple completion dates requested by the subscriber will be charged for at the levels specified in paragraph C. Other activity necessitated by requests of the subscriber such as work during other than normal business hours will be charged for at levels not to exceed differential costs of labor and material. This provision in no way relieves the Company from the requirement of providing reasonable and efficient service at the charges specified in this Tariff.
- i. If the customer is known to be a credit risk to the Company, payment of service charges may be required before the work is begun.
- j. If an application for residential telephone service is accepted, the Company will offer the option of deferred payment arrangements on telephone installations charges. If the deferred option is chosen, the installation charges shall be spread over a period of three (3) consecutive months.

B. DEFINITIONS

The Federal Communications Commission (FCC) administers the N11 codes, and has nationally assigned 211, 311, 511, 711, and 811 to the following special services.

"211"

211 is assigned for community information and referral services.

"311"

311 is assigned for non-emergency police and other governmental information.

"511"

511 is assigned for traffic and transportation information.

"711"

711 is assigned for access to Telecommunications Relay Service (TRS).

"811"

811 is assigned for state One Call Services for providing advance notice of excavation activities to underground facility operators.

C. CONDITIONS AND LIMITATIONS

3. Directory listings may be provided for N11.

In addition, operator assisted calls to the N11 Subscriber will not be completed.

5. Suspension of N11 Service is not allowed.
6. The N11 Subscriber will subscribe to adequate telephone facilities initially and subsequently as may be required to adequately handle calls to N11 without impairing the Company's general telephone service or telephone plant.
7. The Company will provide both oral and written notification when a N11 Subscriber's service unreasonably interferes with or impairs other services rendered to the public by the Company or by other Subscribers of N11. The Company reserves the right once notification is made to institute protective measures up to and including termination at any time and without further notice. The Company may take protective measures when the N11 Subscriber make no modification or is unwilling to accept modification in method of operation, or continues to cause service impairments.
