Subject: Don't Jeopardize Ohio State's Wetlands -- Divert the Ackerman Pipeline #11-3534-GA-BTX

Oct 17, 2011

Public Utilities Commission

I recently learned that Columbia gas plans to locate a high-pressure gas line through the Wilma H. Schiermer Olentangy River Wetland Research Park at The Ohio State University; and the university intends to allow it. These wetlands are among only thirty sites in the United States that have been designated as Ramsar sites of international importance because of their valuable and unique ecological features.

The potential consequences from the planned gas line to this fragile and special area are of great concern. Please reroute the gas line, and protect this special ecosystem.

The US Fish and Wildlife (FWS) service has objected to previous plans to locate gas lines through the Ohio State wetlands. By making these recommendations, the FWS has recognized the value of these wetlands and the potential costs to the environment and native species from the installation of a gas line. The opinion of the FWS should dictate the outcome of this decision. Even in the absence of a catastrophic pipe leak or explosion, pipes conveying natural gas frequently leak to some degree.

Thank you for listening to my concerns. The Ohio State wetlands are a gem for the university and Columbus. It would be a mistake to risk their health when this gas line can be easily diverted. Please relocate this line, and protect this valuable area.

Respectfully,

Mr. Stephen Nawrocki

By making these recommendations, the FWS has recognized the value of these wetlands and the potential costs to the environment and native species from the installation of a gas line. The opinion of the FWS should dictate the outcome of this decision. Even in the absence of a catastrophic pipe leak or explosion, pipes conveying natural gas frequently leak to some degree.

In addition, I'd like to note that much has been made in the press recently about the potential to generate much needed jobs through gas exploration and energy development in the United States. We should never endanger sensitive ecosystems just to tap fossil fuels. In the end, we will have damaged some pristine areas, all so that a few corporations can make big money in a last dying gasp of dirty energy extraction.

Thank you for listening to my concerns. The Ohio State wetlands are a gem for the university and Columbus. It would be a mistake to risk their health when this gas line can be easily diverted. Please relocate this line, and protect this valuable area.

The two letters that you reference below were for the Ashland County-West Holmes Joint Vocational School District Application (Case No. 10-2021) and the North Royalton School District Application. They contained the wrong case number, which caused them to be filed in this docket. I am attaching all three revised letters to this email, which I will file today and will send a copy to Staff's eepdr email address.

I would include a reference that this is a correction to the letter filed 10/13.

Also, please take a look at <http://dis.puc.state.oh.us/CaseRecord.aspx?CaseNo=10-2014> –

It appears the 2 letters filed on 10/13 were filed in the wrong case. Docketing can move these to the correct case if you let them know where they go:

10/13/2011	Correspondence requesting that the Commission approve the customer's choice of cash rebate from Ohio Edison electronically filed by Mr. Kevin P. Shannon on behalf of Ohio Edison Company.	3
------------	--	---

10/13/2011	Correspondence requesting that the Commission approve the customer's choice of cash rebate from The Cleveland Electric Illuminating Company electronically filed by Mr. Kevin P. Shannon on behalf of The Cleveland Electric Illuminating Company.

Dick:

In the Lowe's/Ohio Edison application (Case No. 10-2008), I put an incorrect amount in the letter I filed. The rebate should actually be \$500,000 instead of \$801,180. I am attaching a revised letter correcting this. I wanted to let you know before I went ahead and filed the revised letter to make sure this was the proper procedure for doing so. Please let me know if you or Staff have any questions and if I should go ahead and file.

Dick:

I figured that before I start filing all of these, it wouldn't hurt to run these by you to see if this is what you envisioned. This is the letter I have drafted. It will be filed along with an exhibit demonstrating how the rebate amount was calculated. Do you see any issues with the attached other than the fact that I haven't filled in the rebate amount yet? Let me know if you can.

Thanks,

Kevin
