Re: System Expansion
Case: 11-0325-EL-REN

In reference to 11-0325-EL-REN, Sol Systems has been informed the solar energy system has been expanded from a 1.988 kW to a 4.266 kW photovoltaic system. We are writing to request the record for 11-0325-EL-REN be amended to reflect the system expansion.

In July 2011, 13 Sharp 142 watt modules and 6 Sharp 72 watt modules were added to the facility. The module power rating is 213 watts each. The meter remains the General Electric. Please see photographs of the array, with the expansion.

This request will allow Sol Systems to amend the customer's account on GATS to account for the total electrical generation by the system.

Thank-you for your help, and please advise if we can provide further information.

Best,
Dan Yonkin
