CSP-OPC Vol. VIII

1480 1 Friday Morning Session, October 14, 2011. 2 3 4 EXAMINER SEE: Let's go on the record 5 IEU? 6 MR. DARR: Thank you, your Honor. IEU 7 calls Joe Bowser, please. 8 EXAMINER TAUBER: Please raise your right 9 hand. 10 (Witness sworn.) 11 EXAMINER TAUBER: Thank you. 12 13 JOSEPH G. BOWSER 14 being first duly sworn, as prescribed by law, was examined and testified as follows: 15 16 DIRECT EXAMINATION 17 By Mr. Darr: 18 Q. Please state your name. 19 My name is Joseph G. Bowser. Α. 20 By whom are you employed? Q. 21 I'm employed by McNees, Wallace & Nurick. Α. 2.2 MR. DARR: For the record could I ask 23 that IEU testimony that was previously filed 24 yesterday with the Commission be marked as IEU 25 Exhibit No. 8.

EXAMINER SEE: The exhibit is so marked. 1 2 (EXHIBIT MARKED FOR IDENTIFICATION.) 3 Do you have in front of you what's been Q. marked as IEU Exhibit No. 8? 4 5 Yes, I do. Α. Could you identify that for us, please? 6 Ο. 7 Α. Yes. It's the prefiled direct testimony 8 that was filed on October 13th. 9 And do you have any additions or corrections to that testimony? 10 11 Yes, I do. At page 12, on line 15 the 12 word "principals" should be spelled with an "l-e-s" 13 at the end rather than an "a-l-s" at the end. And 14

- the other correction is page 15, line 9, the figure of "\$75 million" should be "\$69 million." And those are the only corrections I have.
- Q. If I asked you the questions that are contained in there, would your answers be the same?
  - A. Yes.

15

16

17

18

19

20

21

2.2

23

24

25

MR. DARR: Move for the admission of IEU Exhibit No. 8 and tender the witness for cross-examination.

EXAMINER TAUBER: Ms. McAlister.

MS. McALISTER: Thank you, your Honor.

MR. SATTERWHITE: Your Honor, prior to

questions, would this be the appropriate time to move for some motions to strike in the testimony?

2.2

EXAMINER TAUBER: Sure. We can do that now.

MR. SATTERWHITE: I went ahead and typed up the page numbers to make it easier for people to follow along.

And, your Honor, there are three basic areas and three basic arguments for the motions to strike. If you want to, I can go through all of them first and -- is that the easiest way to proceed?

EXAMINER TAUBER: Yes, if you could please do that.

MR. SATTERWHITE: The first one I listed here deals with page 6 in the testimony, lines 21 through 23, and page 7, line 1, and in this testimony Mr. Bowser cites to the unadmitted testimony of Ms. McCarter from earlier in this case.

Staff is not offering that testimony in this case, it's not been sponsored in this case, it would be hearsay for this witness to rely upon that testimony. There's no foundation to rely upon it because it's not in the record, and AEP did not have the opportunity to cross or move to strike or test the underlying analysis of Ms. McCarter, and the

party that she represents did sign the stipulation, and so we think it's inappropriate for Mr. Bowser to rely upon that for his testimony.

2.2

The second set of motions to strike start on page 9, lines 18 through 23, through page 10, lines 1 through 7, and then also on page 10, lines 21 through 22, through page 11, lines 1 through 7.

In this area of the testimony Mr. Bowser has citations to the Staff Report from the 11-351 case. He seeks to introduce staff's treatment in the Staff Report in a different case of a DIR mechanism proposed there to the mechanism proposed here by the parties in the stipulation.

Obviously, his argument relies upon that, as his language says, "Based on the findings in the Staff Report...," and he seeks to compare the staff's treatment of those issues.

Obviously, objections can be filed.

Statutorily, the company and all the parties have rights to file objections to the Staff Report. The Staff Report was filed, but it has to go through an entire process.

Portions of the Staff Report can be stricken, can be removed by the staff, it can change completely, so it would be improper to rely upon the

Staff Report in this case as the basis of anything. It denies, again, the company and the signatory parties their due process if this witness relies upon that incomplete Staff Report where it stands in that process right now.

2.2

Then finally, your Honor, there's a number of citations I've listed here under No. 3 starting on pages 20, lines 8 through 12; 21 lines 5 through 23; and then essentially the four pages, page 22, lines 1 through 22; page 23, lines 1 through 23; page 24, lines 1 through 22; page 25, lines 1 through 22; and page 26, lines 1 through 18.

And in this part of the testimony the witness relies upon testimony he previously provided dealing with the remand decision, and although the witness updated his testimony and provided supplements yesterday to reflect the remand decision, he still has a number of arguments left in his testimony that deal with the uncertainty of the decision that was pending.

If you look on page 20 in the beginning, it says "Has the Commission issued a decision yet?" "No." Well he's updated that now with question 29, so we don't think that's appropriate to have that in the record.

It incorporates a number -- throughout all of these pages it incorporates a number of arguments and opinions from the 08-917 case, in particular he relies on the testimony of Mr. Murray, the testimony that he gives in that case as well. That testimony is not in this case.

2.2

What this amounts to is an attempt to seek rehearing of the Commission's order in 08-917 and burden this record with all the issues that the Commission already decided in that case. There's an appropriate place to do that, they can ask for rehearing in that case, but there's no reason for this witness to put those arguments back in this case and rely upon all the arguments that are not developed.

Obviously, if this were allowed to stand, the company and signatory parties on rebuttal would have to put the entire case that they had put on before in this case to make sure all the elements of that case are referred to here. The Commission made their decision in this case and it shouldn't be applied in this case as well be allowed to be bootstrapped onto this case.

EXAMINER TAUBER: Mr. Darr.

MR. DARR: Briefly, your Honor. With

regard to the first item, citations to nonadmitted testimony in this case, specifically with regard to page 6, lines 21 through 23, effectively at this point, because of the positions of the staff, the company, and the various other signatory parties this amounts to a statement by a party opponent. In Rule 801 that is, by definition, not hearsay and, therefore, can be used. Clearly, it's in a document that's publicly available and we believe that the hearsay exception does not apply.

2.2

With regard to foundation, the foundation is contained within the testimony provided by Mr. Bowser in that he has identified where he has drawn the testimony and that is all that is necessary for purposes of providing a foundation for this nonhearsay statement.

With regard to the second citation or second motion or part of the motion presented by AEP Ohio, and that is in regard to statements with regard -- that are drawn from the Staff Report, again, the Staff Report, given the alignment of the parties in this case, constitutes a statement by a party opponent, therefore, is not hearsay by definition. Second, if it were hearsay, it would nonetheless be available to the parties to use under

the hearsay exception for public documents.

2.2

This is a report that's prepared by an agency with a duty to report, in fact, in this case a statutory duty to report, thus, this is accepted under hearsay Rule 803.

Finally, with regard to the references to the remand hearing, in that regard we believe, and it has been our position throughout, that the PIRR in this case is affected by the results in the other case.

The other case is contrary to why I believe, not firmly decided yet, there's still opportunity for rehearing, as exciting as I know all of us would find that, but there's no finality to it. So to the extent that there are remaining issues and the extent that those issues flow through to this case, that testimony is still relevant to the resolution of this case and thus the argument that this is an untoward application for rehearing simply isn't correct.

On that basis, your Honor, I believe that each one of these, each prong of this motion to strike should be denied.

MR. KUTIK: Your Honors, FES would also join in opposition to that motion.

MR. SATTERWHITE: If it please the Bench,

I can respond, quickly.

2.2

EXAMINER TAUBER: Briefly, yes.

MR. SATTERWHITE: To the first position about the testimony of staff, obviously the Commission isn't bound strictly to the Rules of Evidence in this case, it's a matter of fairness, and it's a matter of the truth of the matter asserted for the hearsay exception to begin with.

The point here is that AEP doesn't have a chance to explore the opinions in that testimony, yet it's being relied upon, so the Commission doesn't have the benefit and AEP doesn't have the benefit of testing whether the truth is there, so we're one step further removed with this witness if he relies upon that, and that's inappropriate.

Secondly, to the citations of the Staff
Report in another case, the same arguments as before.

I'd also point out in the remand case, in the

post-hearing briefs there was some debate about what

could be entered into the record and what could be

used on brief, and OCC and the parties in this case

dealt with administrative notice but they did cite

the Ohio Edison electric fuel case and cited the

statement that we do not believe it is proper to take

administrative notice of management audits whose findings and recommendations may be subject to reasonable dispute. The Commission did end up granting that motion to strike in that case.

2.2

I think that's comparable here. We don't have the staff here to defend the Staff Report, and the point is that it's at a preliminary stage. It's been filed, objections are due on Monday, and there's a whole process that it needs to go through. It can't be relied upon for the truth of the matter asserted at this time and it's inappropriate to bring that into this case.

And finally on the remand, your Honor, the case is moving forward, they do have the opportunity to ask for rehearing on that, but when a Commission order is issued, it is binding, it's an effective order, and the Commission made a decision in that case.

What happens in the testimony of

Mr. Bowser is he relies upon the testimony of

Mr. Murray and his testimony in a prior case that are

not in this docket and not available for debate, and

properly so, because it shouldn't be in this docket.

But it shouldn't burden this record anymore with

those arguments, like I said, otherwise we're going

to have to put a number of arguments on rebuttal to bring up all the arguments in the remand case into this case as well; therefore, it shouldn't be part of this record.

MR. DARR: If I may.

2.2

EXAMINER TAUBER: Briefly.

MR. DARR: Thank you, your Honor.

With regard to the fairness issue raised by Mr. Satterwhite and the indication that there's no chance to explore, in fact, they do, by Mr. Satterwhite's own argument they have an opportunity to file rebuttal testimony.

They may not like the fact that the PIRR has these additional issues involved with it, but it doesn't change the fact that we believe and we are presenting a case supporting that the PIRR is effective and public policy issues are implicated by that.

With regard to his arguments concerning administrative notice and the motion to strike in the remand case, what was attempted there by the company was to introduce by administrative notice after the hearing record had closed, and when there was no opportunity to rebut the evidence proposed by administrative notice, to bring new items into the

record. That is not what is being done here.

2.2

What is being done here is presenting the evidence that's in the Commission files with an opportunity for the companies to present their own version of what they -- of how they feel this should work out. Thus, neither argument should warrant the motion to strike at this time.

MR. KUTIK: Your Honor, may I be heard?

I just have two points.

EXAMINER TAUBER: You may, very briefly, Mr. Kutik.

MR. KUTIK: First, I would like to remind the Bench of its ruling with respect to the motion to strike Mr. Dominguez's testimony where we made the same argument Mr. Satterwhite just made about the unfairness of allowing out-of-court statements or out-of-hearing statements to be used. Of course, that motion was denied as you might recall.

In this case it is one step closer than it was with respect to what was cited with Mr. Dominguez. Mr. Dominguez, the stuff that was in there, that party was not here, an analyst we had no opportunity even to talk with or have those parties participate. Here, if the staff disagrees with the citations that Mr. Bowser makes to their statements,

they can have a witness come in or one of their witnesses can discuss that.

2.2

So there isn't the unfairness here that there was with respect to Mr. Dominguez's testimony and, obviously, as I said, you folks ruled that that was okay. That's my first point.

My second point is with respect to the DIR, the problem that AEP has with Mr. Bowser's testimony was a problem that they brought upon themselves by including the DIR in this case and in having that issue pending or being dealt with in the distribution case. So they brought it in as part of the stip, and it's fair game to talk about the inconsistent treatment between this case and the D case.

EXAMINER SEE: And by the "D case" you mean the distribution rate case.

MR. KUTIK: Distribution case, thank you. EXAMINER TAUBER: At this time we'll take

MR. SATTERWHITE: Thank you.

the motion to strike under advisement.

EXAMINER TAUBER: We'll continue with cross-examination. Actually, let's take a ten-minute recess and then we'll continue with cross-examination. Let's go off the record.

(Recess taken.)

2.2

EXAMINER TAUBER: Let's go back on the record.

Before we get into cross-examination there are a couple of matters to address for the motion to strike. The first part, motion to strike page 6, lines 21 through 23, page 7, line 1, and then page 9, lines 18 to 23, through page 10, lines 1 through 7, and then also on page 10, lines 22 through 23, and page 11, lines 1 through 7, the motion to strike that should be denied.

With regards to the third part of the motion to strike as to page 20, lines 8 through 12, page 21, lines 5 through 23, page 22, lines 1 through 22, page 23, lines 1 through 23, page 24, lines 1 through 22, page 25, lines 1 through 22, and finally page 26, lines 1 through 18 shall be granted, as the witness has acknowledged the Commission issued its decision and need only consider the witness's testimony as to the effects of the remand decision as it has on this proceeding.

MR. DARR: For purposes of maintaining the record we would proffer the portions that have been stricken.

EXAMINER TAUBER: Okay.

MR. DARR: Thank you.

2 EXAMINER TAUBER: Thank you.

So now we'll do cross-examination, unless there's anything else before we get into cross-examination.

Thank you. Ms. McAlister, please proceed.

- -

- Q. Good morning, Mr. Bowser.
- 12 A. Good morning.
- Q. Can you hear me all right?
- 14 A. Yes.
  - Q. Okay. On page 1 of your testimony it says that you're a technical specialist and that you specialize or you focus on assisting IEU-Ohio members to address issues that affect the price and availability of utility services; is that correct?
    - A. Yes.
  - Q. Then on page 4 of your testimony in question and answer No. 7 you talk about what you reviewed to prepare your testimony. As part of preparing for your testimony did you or anyone else at IEU or McNees perform an analysis of the potential

bill impacts on the IEU-Ohio members that are AEP Ohio customers?

2.2

- A. I was approached by several members of IEU-Ohio who had been provided calculations by the company of what the impacts of the stipulation would be on their rates. I believe it was four IEU-Ohio members. And I looked at those calculations and assisted the customers in determining what those potential bill impacts were.
- Q. So you reviewed an analysis that was prepared by AEP Ohio for four of the IEU members, correct?
  - A. That's correct.
- Q. And if you know, how many IEU-Ohio members are there that are AEP Ohio customers?

  MR. DARR: Objection. Relevance.

  EXAMINER TAUBER: Ms. McAlister.

MS. McALISTER: Your Honor, it goes to the motivation of IEU-Ohio opposing the stipulation and what Mr. Bowser reviewed in order to prepare his testimony and analysis on whether it passes the test that he concludes it does not.

EXAMINER TAUBER: Objection is overruled.

- A. I don't know.
- Q. There are more than four, though, aren't

there?

1

4

5

6

7

8

9

12

14

A. Yes.

- Q. I want to be careful to not get into confidential customer information, so without naming who those four are, did they receive a rate decrease in 2012?
- A. My recollection is that two received a rate increase in 2012 and two received a rate decrease in 2012.

MS. McALISTER: I have no further questions, your Honor.

Thank you, Mr. Bowser.

- Q. Good morning, Mr. Bowser.
- A. Good morning.
- Q. How long, again, have you been with IEU?
  - A. Six years.
- Q. Before that you had extensive experience with the Ohio Consumers' Counsel, correct?
  - A. I was there about ten years.
- Q. In that time did you focus on Ohio matters, particularly the PUCO matters?
  - A. For the most part, yes.
- Q. You stayed abreast of all the developments in the industry, issues before the PUCO in that time period?
- A. I wouldn't say I stayed abreast of all the issues. There's only 168 hours in a week so it's tough to follow them all.
  - Q. You don't have to work more than 168?
  - A. No, I don't.
    - Q. Thought you might find a way.
- But certainly all the ones that you dealt
  with your employer in cases you worked on, you
  followed the issues with those, correct?
  - A. To the best of my ability.

Q. I'd draw your attention to your testimony on page 6. I have a couple different versions, I think these are the same so if I get a line wrong, just let me know.

Starting I believe around line 14 you describe a scenario of what you believe is a violation of the regulatory principles and practices by the failure to provide support for the authority for establishing the recommended DIR. Do you see that?

- A. Could you refer me to the line?
- Q. Sure. Line 14. I apologize.
- A. And then what was your question?
- Q. First of all, I just want to make sure you saw what I was talking about.
  - A. Yes, I do.

2.2

- Q. And in that you're asserting that if the stipulation, correct me if I'm wrong, if the stipulation does not include the specific authority for a portion of the stipulation, that it violates a regular inventory principle or practice; is that correct?
- A. That's right. There wasn't detail in the stipulation that indicated the authority for establishing the DIR.

- Q. But in your testimony you did not cite a requirement established by the PUCO or the General Assembly on this point, did you?
- A. I believe 4928.143 requires, you know, requires that there be an indication of the authorization to set up that kind of rider.
- Q. And I understand, well, I think you'd agree you're not an attorney, correct?
  - A. Correct.
- Q. So when you say 4928.143 includes that, that's your opinion as a nonattorney?
  - A. Yes.

12

13

14

15

16

- Q. Is it your understanding that 4928.143 governs the elements of a stipulation before the PUCO?
- MR. DARR: Objection. Asking for a legal conclusion.
- 18 MR. SATTERWHITE: Your Honor, if I may.
- 19 EXAMINER TAUBER: Yes.
- MR. SATTERWHITE: He cited this as the

  statute that governs the statement that he's made and

  I just want to probe his understanding of what he

  thinks that statute means so it's clear.
- EXAMINER TAUBER: Mr. Bowser, if you could just answer the question and the Commission

1 | will note that you're not an attorney.

THE WITNESS: Could I have the question read back, please?

EXAMINER TAUBER: Certainly.

MR. SATTERWHITE: I can just restate it, if that's easier.

- Q. (By Mr. Satterwhite) Is it your understanding that 4928.143 that you cite on line 12 of your testimony here governs the elements that can be included in a stipulation before the PUCO?
  - A. I don't know.
  - Q. Okay. That's fine.

Does IEU ever enter into stipulations or partial stipulations in cases before the Commission?

MR. DARR: Objection. Relevance.

MR. SATTERWHITE: If I may, your Honor.

EXAMINER TAUBER: Yes.

MR. SATTERWHITE: He's asserted that it's against regulatory practices and principles to enter into a stipulation and not give the exact statutory authority for items in the settlement, so I'm trying to probe if his employer, IEU, has ever entered into a stipulation and whether they lived under that same regime that he's asserting here.

EXAMINER TAUBER: Objection is overruled.

- Q. Do you want me to repeat it again?
- A. Please.

2.2

Q. No problem. Has your employer, IEU, ever entered into a stipulation or a partial stipulation in a case before the PUCO?

MR. DARR: Objection. Form.

EXAMINER TAUBER: Could you rephrase your question, please?

- Q. Mr. Bowser, IEU has been in a number of cases before the Commission, correct?
  - A. That's correct.
- Q. On occasion does IEU enter into a stipulation to settle those cases?
  - A. I believe that's correct.

MR. SATTERWHITE: Your Honor, I think the easiest way is I'd like to ask the Bench to take administrative notice of the application in Case 10-388 filed on March 23rd of 2010, it's a document that contains the stipulation and the FE companies' electric security plan. This has a stipulation attached to the document in the Commission's records that I'd like to ask the witness some questions about.

MR. DARR: We object, your Honor. Those stipulations specifically provide that they do not

have any precedential effect. It's hard to see how this will lead to anything productive in this.

MR. KUTIK: FES joins in that objection.

MR. SATTERWHITE: Your Honor, I can mark it as an exhibit and ask questions on it. I believe I have the right to probe into what the witness just answered, that they do enter into stipulations and his statement here in his testimony applies to regulatory principles and practices before the Commission, so items within that stipulation would have to sit under the same standard that he's proposing — against the stipulation that he's proposing here today.

MR. DARR: Again, the same objection would apply whether he marks it as an exhibit or asks for administrative notice, the question goes to whether or not this is a proper use of the prior Commission decisions. By the terms of the stipulations themselves, it clearly is not.

MR. SATTERWHITE: If I may.

EXAMINER TAUBER: Very briefly.

MR. SATTERWHITE: We're not using this as a precedent. We're using this as the actions of IEU.

EXAMINER TAUBER: The objection is

2.2

1 overruled.

2 MR. SATTERWHITE: May I approach, your

3 Honor?

2.2

23

24

25

4 EXAMINER TAUBER: You may.

MR. SATTERWHITE: Just to clarify, the Commission is taking administrative notice of this, just so the record is --

EXAMINER TAUBER: We'll take administrative notice of it.

MR. SATTERWHITE: Okay.

- Q. (By Mr. Satterwhite) Mr. Bowser, do you have in front of you what the Bench has just taken administrative notice of, the application and stipulation from March 23rd, 2010, in Case 10-388?
  - A. Yes.
- Q. In that I'd like you to draw your attention -- first let me ask you this, does this include a settlement agreement as part of this filing, or stipulation and recommendation to be exact, I guess?

MR. DARR: Objection, your Honor.

There's no demonstration that Mr. Bowser either participated in or is even aware of this particular proceeding.

MR. SATTERWHITE: Your Honor, that's why

I asked for administrative notice; it's a document of the Commission, now I can ask him questions on it based upon --

2.2

MR. KUTIK: But, your Honor, he needs to lay a foundation with respect to this witness's familiarity, so I join in the objection.

EXAMINER TAUBER: The objection is sustained.

You do need to lay a foundation, Mr. Satterwhite.

- Q. (By Mr. Satterwhite) Mr. Bowser, are you familiar with this case at all, 10-388?
- A. I'm somewhat familiar with it. It's the -- it appears to be FirstEnergy's last ESP case.
- Q. And do you know if IEU participated in this case?
- A. I believe IEU did participate in this case.
- Q. And do you believe that IEU signed the recommendation and stipulation in this case?

MR. DARR: Your Honor, we'll stipulate that IEU participated in the case. And, in fact, that an attorney on behalf of IEU signed the stipulation.

25 EXAMINER TAUBER: Thank you.

MR. SATTERWHITE: Thank you for that foundation.

2.2

Q. Mr. Bowser, so does this document include that stipulation and recommendation that your counsel just stipulated that IEU participated and signed in?

MR. DARR: Objection. Still no foundation with regard to the knowledge of this witness.

MR. SATTERWHITE: If I may, your Honor, I was trying to get there when they stipulated the document was there, so I thought I could cut short the questions there. He said he's familiar with the case. His counsel's said this is a valid document the company signed. He stated he's been involved in the cases with IEU.

It's a document on the Commission docket that I believe I have the right to ask questions of the witness. Now that it's been established that IEU participated, I can now test his theory that he's applying against the signatory parties stipulation against the valid document because counsel said that they have actually signed as well in another case.

MR. DARR: Your Honor, if I may.

EXAMINER TAUBER: You may.

MR. DARR: If the point of this is to

demonstrate that the stipulation in the prior case does not have specific citations to it, then I believe he has in the record at this point through his administrative notice the document.

2.2

The remainder of this discussion, there's no foundation with regard to the motivation or participation or anything else of this particular witness. So this whole line of questions would be inappropriate and I object.

MR. SATTERWHITE: If I may, your Honor, I can be quick.

EXAMINER TAUBER: Very briefly.

MR. SATTERWHITE: I'd be happy to cross
Mr. Darr later if he wants to, but this witness is
the one that stated the principle that he's applying
to this statement and I would like to get his answers
to what's happened in the past with his employer.

EXAMINER TAUBER: Objection is overruled.

MR. SATTERWHITE: Can you read the last question so I can see where we were?

(Record read.)

- A. Yes, I see that that's included in here.
- Q. If I can draw your attention to page 13 of the stipulation and recommendation.
  - A. Yes.

- Q. That deals with something called rider DCR, the delivery capital recovery. Do you see that?
  - A. Yes, I do.

1

10

11

12

13

14

15

16

17

18

19

20

21

2.2

- Q. Are you familiar with that mechanism?
- A. No. No, I'm not.
- Q. Do you see anywhere in this document where there are specific statutory authority included for approval of that mechanism?
- A. Well, since I'm not an attorney, I don't think I'd be able to judge if that authority exists for this.
- Q. Okay. But in your review of it you don't see any authority for it?
- A. Well, maybe I'd have to review the whole document to determine that. I mean --
- Q. Well, let me ask it this way: You reviewed the stipulation that the signatory parties filed in this case, correct? And when I say "this case," I mean the September stipulation that we're litigating right now.
  - A. The AEP case.
- Q. Correct.
- A. Yes.
- Q. And did you review that completely to determine -- to make this statement that there were

no authority included -- that there was no authority included for the DIR?

2.2

MR. KUTIK: Your Honor, I object at this point. If we're getting into the substance of the stipulation, that's expressly contrary to the language of the stipulation itself; it said on page 34 that it may not be relied upon in any other proceeding. So the fact that something is or is not in this or that certain issues have been handled a certain way with respect to the stipulation that was entered in this case is not relevant to any other case.

MR. SATTERWHITE: If I may, your Honor.

EXAMINER TAUBER: Mr. Satterwhite.

MR. SATTERWHITE: I'm not trying to get into the substance of the items within the case. This witness has testified to the three-part test to be applied against stipulations and I think we have a right to apply the stipulations he's signed in the past to see whether that fits under the same standard and the judgment he's made of the signatory parties in this case.

So it gets into the merits of this case, it gets into the actions of the application of that case -- in this case.

MR. KUTIK: He's specifically pointing to language in the stipulation. That's substance, therefore, it's contrary to the specific language of the stipulation and how the Commission has read that stipulation in its subsequent order.

2.2

MR. SATTERWHITE: Your Honor, I tried to find an example of something that was akin to something in this case to make it easier to understand for everyone, that's all.

MR. DARR: If I may, your Honor.

EXAMINER TAUBER: You may.

MR. DARR: If the point of this is to find something that's akin, then counsel for FES is perfectly correct. You can't use this particular stipulation to show something else because the stipulation by its own terms says it has no precedential effect.

The stipulation also says it's relying on a whole series of documents that may or may not be relevant or may not even be apparent in this case. So this is a bit of a reach and that's why we're objecting.

MR. SATTERWHITE: It's simply to impeach the application of the test he's laying out, your Honor. You can pick any provision in here, I just

thought that would be easiest for people to follow along with.

EXAMINER TAUBER: The objection is overruled.

A. Is a question pending?

2.2

Q. There is, but let me ask another one, maybe it will be easier, because I think I had a long question there.

So do you see anything in item No. 2 on 13 or anywhere else in this stipulation and recommendation that enumerates each provision or each paragraph what the statutory authority is for that paragraph?

- A. I can take a while to review this, but it would take me a while to review it.
- Q. That's why I was trying to draw you to a paragraph, because isn't it true that under your analysis you're saying that anything included in this stipulation has to have the statutory authority included with it?

MR. DARR: Objection. Mischaracterizes the direct testimony.

MR. SATTERWHITE: Your Honor, that's why
I asked him if that's what it means.

EXAMINER TAUBER: Objection is overruled.

THE WITNESS: Could I have the question read back?

(Record read.)

2.2

- A. I wouldn't make that broad of a conclusion. I wouldn't say "anything." I don't think I exhaustively can say that that's true for anything in the stipulation.
- Q. So on page 6 of your testimony starting on line 14 where you say "By failing to provide support for the authority for establishing the recommended DIR," you're making a distinction with the DIR and other elements of the stipulation that would require specific authority to be listed?
- A. In the instance that you're citing to here, this is specifically for the DIR.
- Q. Okay. And so your testimony I believe earlier, and correct me if I'm wrong, is that it's your belief that 4928.143 has a requirement that the stipulation has to have specific authority detailing the authority for the DIR, correct?
  - A. Yes, that's correct.
- Q. Okay. Now, on page 7 of your testimony in question and answer 11, if I can get you to turn there for me.
  - A. Okay.

Q. Here you continue with your -- a description of what you believe violates regulatory principles and practices and you discuss the nonbypassability of the rider and the risks associated with it and the returns that would apply with that, correct?

A. That's correct.

2.2

- Q. And you did not cite a requirement established by the PUCO or General Assembly that would require the outcome that you propose in this answer, correct?
- A. What do you mean by "the outcome" in the proposal?
- Q. What violates regulatory principles and practices in this case.
- A. In effect, because the DIR is a stand-alone rider that's nonbypassable, the company's financial and business risk is reduced relative to these revenue streams, in effect there's no regulatory lag, the investments have already been made and, in effect, the only risk to the company is really the risk of collecting the dollar amounts.

So in my opinion a weighted average cost of capital is not an appropriate carrying charge on that rider.

- Q. But in this answer you don't cite to a PUCO rule or anything from the General Assembly that requires that, correct?
  - A. In this answer no.
- Q. Okay. And your view of the lower business and financial risk on this answer is solely related to a view of the DIR and not taking all the components of the stipulation together, correct?
  - A. That's correct.
- Q. I'd ask you to turn to page 8 of your testimony.
  - A. Okay.

2.2

- Q. In here you discuss the carrying cost that provides for, I'm down around line 18, 19, 20, associated income tax, and you say but it fails to identify if the benefit the companies acquire will be recognized in the calculation. Do you see that?
  - A. Could you give me the line number again?
- Q. Sure. It's basically the sentence that starts on 18 and finishes on 21. I just want to make sure we're at the same place.
- A. I see the language. And what was the question?
- Q. I just wanted to make sure you were there. If you saw it first.

A. Yes.

2.2

Q. My question is, is the violation of the regulatory principles -- strike that.

The violation of the regulatory principles and practices you're citing here is that the stipulation fails to identify if the benefit you identify from the accelerated depreciation is recognized in the carrying cost calculations, correct?

- A. That's correct. And the fact that the, you know, components of the total carrying charge are missing, as I indicated earlier, up on lines 4 through 7 on page 8. So it's the incompleteness for basically a carrying charge that's going to end up being over 20 percent when you factor in the weighted average cost of capital as well as these other components.
- Q. And you did not cite a requirement established by the General Assembly or the PUCO rules in relation to that, did you?
- A. Not specific rules, but I think it's good regulatory practice that, you know, information be complete and that all the components that should be accounted for are reflected.
  - Q. And when you say "good regulatory

practice," that's rooted in your opinion, not in administrative code rule or statute, correct?

- A. It's my experience based on the practices that the Commission has followed in the past.
- Q. I'd ask you to turn to page 10 of your testimony, please.
  - A. Okay.

2.2

- Q. The note I have is I'm going to ask you about lines 13 through 20, let me get there.
  - A. Okay.
- Q. And here is it correct that you're asserting that it violates regulatory practices and principles that a rate increase or decrease that the Commission -- that the Commission should authorize be based on cost of service and not be driven by backward-looking increases; is that correct?
  - A. That's correct.
- Q. And in this answer did you cite to any requirement established by the General Assembly or PUCO rules that this is required?
- A. No specific citations to those, but my position is based on the fact that the companies have these distribution rate cases pending, it's been I believe over 15 years since the time of both CSP and Ohio Power's last distribution rate cases, therefore,

to be looking at the return -- a rider that's based on distribution plant, there should be an examination of the cost of service.

And, you know, in the distribution cases there's a date certain in those cases of August 31st, 2010, so to me good regulatory practice would dictate that that be looked at and examined and form the basis for permitting any recovery of these type of charges.

- Q. Do you know if ESP rates are required to be -- to follow cost-based rate of return?
  - A. I don't know.

2.2

- Q. Are you asserting that it violates regulatory practices and principles to adopt a distribution related provision in an electric security plan?
- A. Well, as we discussed earlier, I believe under 4928.143 that this provision basically wouldn't be acceptable.
- Q. I'm just asking generally if you're asserting that it violates regulatory practices or principles to adopt a distribution-related provision in an electric security plan.

MR. DARR: Before he answers, I object.

Form of the question is vague.

MR. SATTERWHITE: Your Honor, I think the question is pretty short and clear and --

EXAMINER TAUBER: Sustained. Please rephrase the question, Mr. Satterwhite.

- Q. Mr. Bowser, to the extent you know, you're familiar with electric security plans, correct?
  - A. Generally, yes.

2.2

- Q. You participate in cases to establish electric security plans on behalf of IEU?
- A. I'm participating in the current case, yes.
- Q. And to the best of your knowledge do you believe it violates regulatory practices and principles to adopt a distribution-related charge in the context of an electric security plan?

MR. DARR: Objection. It's the same question that was ruled on about three questions ago.

MR. SATTERWHITE: If I may, your Honor, I think it's, again, it's a straightforward question. He's testifying to what violates regulatory practices and principles and in this section he indicates that something should be based on cost of service and he brings up the distribution rate case is where it should be properly done.

So I'm asking and I think we have the right to ask if that can be done in an electric security plan, does that get to the crux of why he's saying this violates regulatory practices and principles.

EXAMINER TAUBER: Objection's overruled.

A. I think I already answered your question as to why I believe it violates regulatory practices when I talked about being based on a cost of service. So what's the rest of the question then?

MR. SATTERWHITE: Can I have that question reread so I don't run afoul of saying it any differently and getting another objection from Mr. Darr?

MR. DARR: I object, your Honor. I certainly have a right to object when the question is improper. I ask that that be stricken.

MR. SATTERWHITE: Thank you.

(Record read.)

- A. I don't know.
- Q. Turn to page 13 of your testimony, please.
- 25 A. Yes.

2.2

Q. And around line 12 you begin to discuss section 4928.20(I), I believe, of the Revised Code. Do you see that?

A. Yes.

2.2

- Q. And you start that paragraph "...based on the advice of counsel...." and you end that paragraph "...per the advice of counsel." Do you see that?
  - A. Correct.
- Q. Are you making a legal argument in this paragraph?
- A. My argument is based on advice from counsel, but, again, I'm not an attorney.
- Q. So to the extent this relies on the advice of counsel for the requirement, you're not representing factual matters, you're just relying on counsel for those matters; is that correct?
  - A. What do you mean by "factual matters"?
- Q. Well, what are you trying to assert in this paragraph?
- A. I'm asserting here that community aggregation programs can't be charged these because they haven't received benefits for CSP customers because the phase-in deferral or postponed revenues for the company have basically been for Ohio Power only.

Q. So to the extent in lines 19 and 20 you assert that based on your understanding of advice of counsel that's unlawful, that's based on the advice of counsel and not your determination because you're not an attorney, correct?

- A. Correct.
- Q. Okay. Turn to page 14 for me.
- A. Yes.

2.2

- Q. And here you raise another argument that you believe violates regulatory principles and practices dealing with the accumulated deferred income taxes, correct?
  - A. Correct.
- Q. And did you cite a requirement from the PUCO rules or the General Assembly that the treatment that you talk about here is not allowed?
- A. No. This is based on a long-held regulatory practice of the Commission that when returns are granted on investment balances, those returns should be net of accumulated deferred income taxes because those taxes, in effect, represent a source of cost-free capital to the companies and, therefore, there should not be a return on that portion of the investment.
  - Q. If you'd turn to page 15. On the top of

15, lines 1 through 10, you're discussing the carrying charge, the percentage of the carrying charge. Do you see that?

A. Yes.

2.2

- Q. And you propose what you think should be the correct carrying charge; is that correct?
- A. Yes. I went back and looked at what contemporary interest rates were for BBB-rated bonds and came up with what I believe is actually a little bit on the conservative side, about a 3.75 percent interest rate for seven-year bonds.
- Q. But in this answer you do not cite a PUCO rule or statute from the General Assembly that would require that application, do you?
  - A. No, I do not.
- Q. And in response to question 18 on the bottom of page 15 you discuss securitization. Do you see that?
  - A. Yes.
- Q. So is it your understanding that the stipulation calls for securitization to already be happening as part of the stipulation?
- A. No, I don't believe it does, but in my opinion I think the companies could have reflected that in the stipulation had they desired to, but I

know there's a provision in the stipulation that calls for the parties cooperating to place in effect legislation.

2.2

I don't believe legislation is needed to do that. I think in the companies -- or, in the stipulation I think the securitization could have been provided for, perhaps the only thing that would have been missing is the final balance of the phase-in deferral that would be, you know, the basis for the securitized dollars since there are still issues pending that could affect that ultimate phase-in deferral balance.

- Q. So in your testimony do you cite a PUCO rule or statute that would require the signatory parties to not join an agreement to potentially secure -- sorry -- to potentially seek securitization in the future?
  - A. No, I didn't.

MR. SATTERWHITE: If I can have one second, your Honor, I think I'm about done. I'll just check.

Thank you, your Honor, that's all I have.
Thank you, Mr. Bowser.

EXAMINER TAUBER: Mr. Darr, do you need a few minutes for redirect?

1523 MR. DARR: If I could, your Honor. 1 2 EXAMINER TAUBER: Let's go off the 3 record. 4 (Recess taken.) 5 EXAMINER TAUBER: Let's go back on the 6 record. 7 Mr. Darr. 8 MR. DARR: Thank you for the recess, your 9 Honor. 10 11 REDIRECT EXAMINATION 12 By Mr. Darr: 13 Turning to the document that was Ο. 14 administratively noticed in the application and 15 attachment document in 10-0388-EL-SSO, could you turn 16 to page 13 of that document, Mr. Bowser? 17 Α. Yes. 18 And am I correct that this DCR rider was Ο. 19 established to pick up changes that were not included 20 in the rate base determined in opinion and order of 21 January 21st, 2009, in Case No. 07-551-EL-AIR? 2.2 MR. SATTERWHITE: Objection, your Honor. 23 I think Mr. Darr tried to limit me on my 24 cross-examination of this away from the substance and 25 just to the questions of whether the principle and

regulatory practice that the witness was saying needed to be in stipulations was in this stipulation or not.

2.2

MR. DARR: If I may, your Honor, I think the point of this is to address the very issue that Mr. Bowser raises in his testimony which is the appropriateness of the exception. The notion that this is motivated for some reason other than appropriate regulatory practice or Commission orders or any other matters that are relevant under the Commission's standard is clearly in play by Mr. Satterwhite's questions.

EXAMINER TAUBER: The objection's overruled.

- A. Yes, at the bottom of page 13 it indicates that this rider, this delivery capital recovery rider, covers investment that was not included in the rate base and determined in a Commission order of January 2009, which it goes on to say on page 14 was FirstEnergy's last distribution rate case.
- Q. And with regard to the appropriateness or inappropriateness of the adoption of the stipulation, is it appropriate to look at the settlement itself along with any related testimony?

A. Yes.

2.2

- Q. And have you had an opportunity to look at any related testimony with regard to this particular settlement?
  - A. No, I have not.
- Q. Finally, with regard to the appropriateness of the ADIT adjustment to various assets, you indicated that you felt that that was an appropriate level -- or appropriate under current Commission policy. Do you recall that?
- A. Yes. And when you say "ADIT," you mean accumulated deferred income taxes.
- Q. Yes, I do. Thank you for clarifying that for the record.

Are you familiar with the company's position with regard to adjustments for accumulated deferred income taxes in other cases?

A. I am familiar with at least one other case which was for Appalachian Power Company and Wheeling Power Company, which was in West Virginia in 2009, and in that case the company's witness indicated that it was appropriate to remove the accumulated deferred income tax balance from an investment balance prior to carrying charges being applied.

1 And would that inform your understanding Ο. 2 of the appropriate regulatory policies to be applied 3 in an ADIT adjustment? 4 MR. SATTERWHITE: Objection, your Honor. 5 The question was actions by the company in other 6 jurisdictions and now he's breaking into the 7 appropriateness of regulatory policies and practices. 8 If he's willing to stipulate that whatever AEP does 9 in every instance is the proper regulatory principle 10 and practice, maybe we can talk, but I don't think 11 that's where he wants to go. 12 MR. DARR: I'll withdraw the question, 13 your Honor. 14 EXAMINER TAUBER: Thank you. 15 MR. DARR: Nothing further. 16 EXAMINER TAUBER: Recross, Ms. McAlister? 17 MS. McALISTER: No, your Honor. EXAMINER TAUBER: Mr. Satterwhite? 18 19 MR. SATTERWHITE: Nothing further, No. 20 your Honor, thank you. 21 EXAMINER TAUBER: Are there any other 2.2 parties that would like recross-examination at this 23 time?

EXAMINER TAUBER: No questions. You may

(No response.)

24

1527 1 be excused, thank you. 2 THE WITNESS: Thank you. 3 MR. DARR: At this time, your Honor, I'd again move the admission of IEU Exhibit No. 8, 4 5 please. 6 EXAMINER TAUBER: Are there any objections to IEU Exhibit No. 8? 7 8 (No response.) 9 EXAMINER TAUBER: Hearing none --10 MR. SATTERWHITE: Your Honor, I'm going 11 to object subject to the motion to strike that was 12 granted by the Bench reflected in there. 13 EXAMINER TAUBER: That shall stand, IEU Exhibit 8 will be admitted into the record. 14 15 MR. DARR: Thank you, your Honor. 16 (EXHIBIT ADMITTED INTO EVIDENCE.) 17 MR. DARR: Do you wish to proceed with 18 Mr. Murray? 19 EXAMINER TAUBER: Sure. 20 MR. DARR: IEU-Ohio, then, would call 21 Kevin Murray. 2.2 EXAMINER TAUBER: Please raise your right 23 hand. 24 (Witness sworn.) 25 EXAMINER TAUBER: Thank you.

1528 1 MR. DARR: May I proceed? 2 EXAMINER TAUBER: Give the Bench one 3 minute. 4 Go ahead, Mr. Darr. 5 MR. DARR: Thank you. 6 7 KEVIN M. MURRAY 8 being first duly sworn, as prescribed by law, was 9 examined and testified as follows: 10 DIRECT EXAMINATION 11 By Mr. Darr: 12 Q. Would you state your name, please? 13 Α. Kevin Murray. 14 By whom are you employed? Q. 15 McNees, Wallace & Nurick, LLC. Α. 16 MR. DARR: For purposes of the record 17 could I have marked his public testimony as IEU 18 Exhibit 9, the attachment which was filed yesterday 19 and labeled KMM-11 marked as IEU Exhibit 10. 20 And I need to make an inquiry on how the 21 Bench wants to deal with the confidential exhibit 2.2 that was filed under seal and I believe is still 23 subject to seal. 24 MR. NOURSE: Mr. Darr, you're referring

to KMM-10. Exhibit KMM-10?

MR. DARR: I am, Mr. Nourse.

2.2

There is a confidential version of the testimony which also is attached to it, I suppose what we can do is mark that as IEU 11 or do an A/B off of No. 9. Designate the public "A" and the nonpublic "B."

MR. NOURSE: Your Honor, just to be clear, I don't anticipate asking him any questions about that exhibit, so hopefully we don't need to go into a sealed transcript, but certainly would like the exhibit itself to be entered under seal.

EXAMINER SEE: Give me just a minute, please.

One more time, Mr. Darr, we're going to make the public version of Mr. Murray's testimony IEU Exhibit --

MR. DARR: We can call it 9A. The version under seal would be, if this is the way you want to do it, 9B, that's the version that you, I believe, entered the protective order on the first day of hearing.

EXAMINER SEE: I'm sorry. Say that again.

MR. DARR: I believe it's the version you put a protective order on on the first day of

1 hearing. EXAMINER SEE: Okay. Those two exhibits 2 3 are marked. 4 (EXHIBITS MARKED FOR IDENTIFICATION.) 5 MR. DARR: And IEU 10 is the schedule 6 which was filed yesterday. 7 MR. NOURSE: Which is Exhibit KMM-11, 8 correct? 9 MR. DARR: The header on it is KMM-11, 10 that's correct. 11 EXAMINER SEE: Okay, Mr. Darr, provide 12 the Bench with a copy because I also had the old copy 13 of -- don't we have a revised -- perfect. Thank you. Okay. Exhibit IEU 9, 9A, 9B, and IEU 10 14 15 have been marked. 16 (EXHIBIT MARKED FOR IDENTIFICATION.) 17 MR. DARR: Thank you, your Honor. I'd also advise the Bench and the parties 18 19 that we distributed a question and answer that we 20 were going to inserted orally today to the parties 21 yesterday so that they would have access to it. 2.2 EXAMINER SEE: And that would be 48A? 23 MR. DARR: Yes, question 48A and answer 24 48A, and I thought what we'd do this morning is just

read those into the record with your permission.

EXAMINER SEE: Okay.

2.2

- Q. (By Mr. Darr) Have you considered the effect of the elimination of POLR charges in accordance with the Commission's remand order issued on October 3rd, 2011, on the ESP versus MRO comparison? Yes, Mr. Murray?
- A. Yes, the Commission's remand decision on October 3rd, 2011, directed companies to remove POLR charges from the current rates. To illustrate the effect of this decision I've prepared Exhibit KMM-11 to reflect the results of the Commission's remand order on the ESP versus MRO comparison.

After removing POLR charges and based upon the same data and adjustments I used to prepare Exhibit KMM-5, OPCo's proposed ESP is less favorable than an MRO by \$4.83 per megawatt-hour, or 556 million over the term of the proposed ESP. And CSP's proposed ESP is less favorable than an MRO option by \$8.55 per megawatt-hour or 660 million over the term of the proposed ESP.

This illustration does not include the effects of the Commission's decision on the amount of the phase-in deferral that may be eligible for recovery from customers.

Q. And just so the record is clear, when you

reference 556 million, you were referencing dollars, correct?

A. That's correct.

2.2

- Q. And when you reference 660 million, you were referencing dollars there as well, correct?
  - A. That's correct.
- Q. Now, with regard to page 51, there's some comments there regarding corporate separation. Since the filing have there been any other actions by Ohio Power with regard to corporate separation? 51 of Exhibit 9, actually 9A.
- A. Yes. Since my testimony was filed the companies have filed an application to amend their corporate separation plan in Case No. 11-5333.
  - Q. Do you have any corrections or additions?
  - A. Yes, I do.
  - Q. Could you give those to us, please?
- A. On page 44, line 17, the sentence that starts "Exhibit KMM-7" should be corrected to reference "KMM-8." Other than that and the additions to my testimony that we've discussed, I have no other corrections.
- EXAMINER SEE: Mr. Murray, is your mic on?
- 25 THE WITNESS: I believe so.

EXAMINER SEE: Slide it a little closer to you, please.

THE WITNESS: I will apologize, I'm fighting a cold, so if I trail out a bit, just tell me.

EXAMINER SEE: Okay.

- Q. With those corrections are there any -if we asked you the questions that are contained in
  your testimony today in 9A and with the addition
  of -- 9A and 9B and with the addition of IEU Exhibit
  10, would your answers be the same?
  - A. Yes, they would.

MR. DARR: Tender the witness and move for the admission of the three exhibits.

EXAMINER SEE: Okay. Ms. McAlister?

MS. McALISTER: Thank you, your Honor.

- - -

## CROSS-EXAMINATION

By Ms. McAlister:

23

25

Q. Good morning, Mr. Murray.

On page 1 of your testimony --

MR. NOURSE: Your Honor, I'm sorry to

interrupt. I wanted to do a motion to strike perhaps

24 before cross-examination begins.

I apologize, Ms. McAlister.

EXAMINER SEE: Go ahead, Mr. Nourse.

MR. NOURSE: Thank you. I've got a sheet here for reference as I'm going through this that I'll provide the Bench.

2.2

While that's being handed out there's two motions to strike and one of them is reflected on this page, the other one is not reflected on the page, so I'll start with that.

MR. RANDAZZO: Could you wait until we get the handouts before you proceed?

MR. NOURSE: I'm starting with the one that's not on the page, Mr. Randazzo.

MR. RANDAZZO: Okay.

MR. NOURSE: In light of

Mr. Satterwhite's motion being granted earlier I wanted to also move for striking the question that starts on page 29, line 15, and the answer ends on page 30, line 3.

This question and answer 31 advances the position that IEU took in the remand proceeding and twice in this answer it refers to charges as being illegal and it references Mr. Bowser's testimony at the very beginning which is the passages that were stricken earlier. That's the first motion to strike.

The second one is the one that's

reflected on the sheet here, page 13, lines 6 through 20, and this passage relies on testimony that was filed but not adopted or sponsored in any hearing from staff witness Jodi Bair.

2.2

Mr. Murray's reliance here on this, the quoted statement, is hearsay. As discussed earlier, this type of reference to staff testimony that's not been subject to cross-examination, it's not been sponsored, it's not been subject to motions to strike, your Honor, and I believe it's inappropriate for Mr. Murray to rely on this.

It's also quoting, for purposes of a legal argument which is confirmed in lines 18 through 20 of this passage, saying that Ms. Bair's legal position is correct.

I've cited some case law here, your

Honor, that under Ohio law -- Ohio and Federal Courts

do not allow expert witnesses to testify about legal

conclusions, that's the domain of the court and the

Commission.

And, furthermore, this passage from

Ms. Jodi Bair's testimony is being used out of

context. That testimony was filed in relationship to

a facility's closure cost rider that was contained in

the company's application and has been withdrawn

under the stipulation this hearing's about, and
Mr. Murray is trying to take that and apply it in a
different context saying that she would agree with
him in this current context.

So I think for all those reasons, your Honor, that passage needs to be stricken from the record.

That concludes my motion to strike.

EXAMINER SEE: Thank you, Mr. Nourse.

And that is your motion to strike that's addressed with what you provided the Bench and the other parties.

MR. NOURSE: The sheet I gave you addresses the passage on page 13 and the other part I was just explaining orally, the first part, for page 29 to 30.

MR. DARR: Response, your Honor? EXAMINER SEE: Just a minute.

Mr. Darr.

MR. DARR: Thank you, your Honor. Taking them in the order that they were presented, with regard to the ESP versus MRO comparisons, the specific -- I'm going to go from specific to general

The specific items that were stricken

2.2

on this.

with regard to Mr. Bowser's testimony related to adjustments in the PIR. There is no suggestion here that there is anything -- anything in any way consistent with the testimony as contained in Mr. Murray's testimony with regard to adjustments to the ESP, particularly the adjustments that resulted from the remand decision which are set out in the schedule. That's the specific.

2.2

In regard to the general, I would point to the fact that we still maintain our general position that I outlined for you earlier with regard to the PIR testimony, that it is relevant here in addressing whether or not public policies that the Commission must weigh in terms of addressing the stipulation are violated.

So looking at these two things going, again, from the specific to the general, I think on both bases the motion to strike should be denied.

With regard to the specific request concerning Ms. Bair's testimony, again, your Honor, I believe you had previously ruled today that these statements are either not hearsay, well, basically that they are not hearsay in the first instance. That's the import of your earlier decision.

These statements are contained in the

1 public testimony that has been filed by the 2 Commission, there's no reason to not trust their 3 relevance, certainly there's an opportunity for the 4 company to note, through its interrogation of 5 Mr. Murray, any rebuttal testimony that they may wish 6 to put on to address the context or the weight of that evidence. 7 8 And in essence that's basically what 9 Mr. Nourse is arguing, that the weight of the 10 evidence, that you should somehow prejudge this 11 That would not be appropriate. 12 Therefore, we would ask that the second 13 item, the second prong of his motion to strike also 14 be rejected based on your prior ruling with regard to 15 Mr. Bowser's testimony. 16 MR. KUTIK: FES would join in opposition 17 to the motions. 18 MR. ETTER: OCC as well, your Honor.

MR. NOURSE: May I briefly respond?

EXAMINER SEE: I'm sorry. That was FES

and --

19

20

21

2.2

23

24

MR. ETTER: OCC.

EXAMINER SEE: -- and OCC.

Mr. Nourse, did you want a brief

25 opportunity to respond?

MR. NOURSE: Yes, your Honor. Regarding the page 29 to 30 piece, again, this is referencing Mr. Bowser's testimony. Mr. Bowser doesn't just make a PIR adjustment, he has three parts that go into that: The environmental that was sustained in the remand order, the POLR, and the flow-through effects which was also reversed or rejected in the remand order.

2.2

In addition, Ms. Thomas revised her testimony to reflect under both interpretations of the order the POLR piece, so these statements about being illegal based on Mr. Bowser's testimony relate back directly to what was stricken from Mr. Bowser's testimony.

With respect to the page 13 passage,

Mr. Darr, nor any of the other parties, responded to
the argument and case law that's set forth here that

Ms. Bair's testimony clearly addresses a legal issue
and it's inappropriate above and beyond and separate
from the hearsay arguments that Mr. Darr did address.

MR. DARR: May I address that second point, your Honor? I had a note and neglected to address it.

MR. NOURSE: He already had a chance to do that earlier.

MR. DARR: Certainly I have the burden of demonstrating that the testimony should be in and I believe I'm entitled to the last word on this one.

MR. NOURSE: Not with a motion.

MR. DARR: May I address that, your

Honor?

2.2

EXAMINER SEE: Briefly, Mr. Darr.

MR. DARR: Thank you, your Honor.

I believe, I guess with regard to expert testimony, experts can enter opinions with regard to questions of ultimate fact, as in this case, a legal fact. More appropriately, a mixed question of law and fact.

As I recall, Ms. Bair is, in fact, an attorney. In fact, she represented this Commission quite ably for a number of years until she was promoted to her new position. It's hard to believe that she can't render an opinion as to whether or not the law requires one thing or another and that others can't rely on that.

Therefore, we would request both on the substantive legal basis that this be allowed in, but more practically that it's something that the Commission has, in fact, relied on in the past.

Thank you.

EXAMINER SEE: The Bench is going to take a few minutes to consider the motions. We'll go off the record. (Recess taken.) EXAMINER SEE: Let's go back on the record. We'll take a lunch recess until 12:30 and reconvene at that time. (Thereupon, at 11:20 a.m. a lunch recess was taken.) 

1 Friday Afternoon Session, 2 October 14, 2011. 3 4 EXAMINER SEE: Let's go back on the 5 record. 6 Before we continue with the motions to 7 strike Mr. Murray's testimony, there's an issue 8 that's been raised by counsel for IEU. 9 Mr. Randazzo. 10 MR. RANDAZZO: Yes, your Honors. I would 11 ask that we be permitted to speak to the Bench with 12 Ms. McAlister on the record as a Bench conference to 13 raise this issue, which is a delicate issue, and get 14 your quidance before we have a broader discussion in 15 a public setting. 16 EXAMINER SEE: Okay. And you want that 17 meeting transcribed with the court reporter present? 18 MR. RANDAZZO: Yes, your Honors. I need 19 to have it transcribed. 20 EXAMINER SEE: For efficiency can I ask 21 the other parties to clear the room for a minute. 2.2 (Recess taken.) 23 EXAMINER SEE: Let's open the doors. 24 Let's proceed with the hearing. Prior to 25 the lunch break there was a motion to strike the

testimony of Mr. Murray made by AEP Ohio. After 1 considering those motions the Bench concludes that 2 3 the motion to strike as to page 13 is denied, and as 4 to page 29, carrying over to page 30, is granted. 5 At this time the Bench will not proceed 6 with the cross-examination of Mr. Murray. 7 Mr. Murray, the Bench expects you to be 8 available sometime early next week, Monday through 9 Wednesday, to continue with your testimony. 10 MR. RANDAZZO: And so you know, 11 Mr. Murray, we've already advised the Bench that you 12 will be. 13 THE WITNESS: I quess I will be. 14 EXAMINER SEE: OCC -- Mr. Etter, would 15 you like to proceed with testimony of Mr. Duann? 16 MR. ETTER: Yes, your Honor. We'd like 17 to call Daniel Duann to the stand. MR. KUTIK: Can we go off the record? 18 19 EXAMINER SEE: Yes. 20 (Discussion off the record.) 21 EXAMINER SEE: Let's go back on the 2.2 record. 23 EXAMINER TAUBER: Mr. Duann, please raise 24 your right hand. 25 (Witness sworn.)

1544 1 EXAMINER TAUBER: Thank you. 2 Mr. Etter. 3 MR. ETTER: Thank you. 4 Your Honors, I've put before you a 5 document entitled "Revised Direct Testimony of Daniel 6 J. Duann, PhD, CRRA, in Opposition of the Stipulation and Recommendation on Behalf of the Office of the 7 8 Ohio Consumers' Counsel, dated October 12th, 2011, 9 and I would like to mark that as OCC Exhibit 1. 10 (EXHIBIT MARKED FOR IDENTIFICATION.) 11 12 DANIEL J. DUANN 13 being first duly sworn, as prescribed by law, was 14 examined and testified as follows: 15 DIRECT EXAMINATION 16 By Mr. Etter: 17 Q. Dr. Duann, do you have a copy of OCC Exhibit 1 before you? 18 19 Α. Yes. 20 And is this the -- well, you have Q. 21 prepared or had this prepared at your direction; is 2.2 that right? 23 Α. Yes. 24 Okay. And do you have any changes to Ο. 25 make?

1 A. Yes.

2

3

4

5

8

9

10

11

12

13

14

15

16

17

18

19

20

21

- Q. What would be the first change?
- A. Would be on page 7, line 11, at end of line, the "421," that should be changed to "351."

  The second change is on --

6 EXAMINER SEE: I'm sorry. Repeat that 7 last one.

THE WITNESS: Okay. On page 7, line 11, at the end of the line there's a "421 million," that "421" should be changed to "351."

On the same page, line 12, at end of that line "171 million in 2014," that "171" should be changed to "102."

And on page 12 --

EXAMINER SEE: Just a minute, Mr. Duann.

I'm sorry, I have several versions of your testimony sitting up here.

MR. ETTER: Can we go off the record for a moment, your Honor?

EXAMINER SEE: Yes, we can.

(Discussion off the record.)

EXAMINER SEE: Let's go back on the

23 record.

A. Okay. The third change is on page 12, line 13. The three -- you have "three adjustments,"

the "three" should be changed to "two."

2.2

On the same page, line 16, "I made three adjustment," the "three" should be changed to "two."

And on page 13, the first line starting with "First," the whole line should be deleted, and on line 2 start with "from" the whole line should be deleted, and the line 2 I will add first, "I complete remove the POLR charge."

And the same page, line 4 on the first part, the "third" should be changed to "second."

The next change is on page 18, line 4, in the answer 14, "The third adjustment," "The third" should be changed to "The second."

And on page 20, line 17, at the beginning of that line "three adjustment" should be changed to "two." And after that "a lower Base Generation Rate," that should be deleted.

And on page 24, line 6 and 7, at the end of the line 6 it read "the removal of the environmental carrying charge and," that should be deleted. So line 6 and 7 will be read like this: "the full impact of the Remand proceeding, that is, the POLR charge and the flow-through effect."

And on the same page, line 9, "though the Commission has not decided the Remand proceeding,"

the "not" should be deleted. So it should read "though the Commission has decided the remand proceeding."

On the same page, line 12, "the 'Remand Revised 2012 rate,'" I will add "2012 total generation rate." I will add the two word "total generation," and I will make the same change on line 19 of the same page, so it will read: "I used the 'Remand Revised 2012 Total Generation Rate before Proposed ESP.'"

And that's all the change I have.

- Q. Thank you. And if I were to ask you the same questions that are in OCC Exhibit 1 today with the changes you just noted, would you respond the same?
  - A. Yes.

2.2

MR. ETTER: Thank you.

I now tender the witness for  $\label{eq:cross-examination} \text{cross-examination and move for the admission of OCC}$  Exhibit 1.

MR. NOURSE: Your Honor, I've got motions to strike.

EXAMINER SEE: Okay.

MR. NOURSE: These motions to strike are all related to the same argument or same problem, in

my view, that Mr. Duann has really not updated his testimony for the remand order and continues to make arguments that have been rejected in the remand order, and consistent with this morning's rulings I'd like to move for his testimony in this regard to be stricken.

I'll give you the references and I'll preface it by saying it is my belief that his testimony and the numbers that he changed, he surgically changed a few numbers, really these numbers flow throughout his testimony and exhibits.

Having said that, I think there's some clear areas that can be segregated and I believe should be stricken starting with page 11 and the offset paragraph that's labeled No. 1 between lines 10 and 13. That's one of his adjustments based on the embedded environmental carrying charges that the Commission rejected.

No. 3 --

2.2

MR. ETTER: Excuse me, are you asking that all of from 10 to 13 be --

MR. NOURSE: Yeah, the paragraph that's offset and numbered 1, lines 10 to 13, be stricken.

The paragraph that's offset and numbered 3 falls within lines 17 through 20 is the next part,

and that adjustment also relates to the flow-through effect; the Commission rejected that argument.

2.2

The next one is on page 13, and it starts on line 8 of page 13 with question 11 and carries all the way through to, I'm sorry, the end of page 15.

Again, this is a discussion about the environmental carrying charges, one of the arguments rejected in the remand order.

The next item is on page 18 starting on line 1 with question 14, and it carries over through page 18, 19, through the end of page 20, line 22.

This is where he's adjusting the phase-in rider zero based primarily on the flow-through effects argument as well as the environmental carrying charges.

And, your Honor, I'd like to go to the exhibits next.

EXAMINER SEE: Okay.

MR. NOURSE: Exhibit DJD-A is a calculation of the embedded environmental carrying charges in base rates during the prior ESP, the current ESP period, 2009 through 2011.

Attachment DJD-B is a collection of annual environmental carrying charges from '9 through '11, 2009 through 2011.

Attachment DJD-C is the POLR charge

collections through June -- through May of 2011 from April 2009. The only column in that exhibit that would remain firmly, I believe, is column D, June through December POLR, and the Total column would also be affected by A, B, and C and should be stricken.

2.2

estimate of revenues collected and the only portion of this exhibit I believe that would remain pertinent would be the one portion of Column B titled POLR, it's the three lines in the middle, 32.4 million, 18.2 million, 50.7 million, and then, I'm sorry, the three lines before that for October and December 2011.

EXAMINER SEE: So, Mr. Nourse, you're proposing that everything other than June --

MR. NOURSE: Those six lines.

EXAMINER SEE: -- through September 2011 for Column B for POLR be excluded?

MR. NOURSE: Yes, except I also would leave in October through December. So it's six numbers in the middle of that chart and not including the totals at the bottom.

And to be frank, I'm not sure about what to do with DJD-E. I believe this carries through the

base -- his adjustment rates before the ESP throughout this chart. I didn't attempt to try to say what should be stricken or not, but some of these things I'm going to have to ask him some questions on regardless. Similarly with the other exhibits leading up to Exhibit J, DJD-J, I'd like to address specifically.

2.2

So I believe the columns that should be stricken are A, C, E, the unnumbered column labeled Stipulated ESP Rate Over MRO Rate, and the unlettered column after G, to the right of G, Yearly Costs of ESP Over MRO, including the total at the bottom.

All these exhibits are based on adjustments made flowing through to the environmental carrying charges and the prior collected POLR and prior collected environmental that fall within the OCC's flow-through theory.

EXAMINER SEE: Just so I'm clear on the last exhibit, Revised Attachment DJD-J, you are asking that columns A, C, E, and the column in the last section about comparison entitled Stipulated ESP Rate Over MRO Rate, and then the Final Yearly Cost of ESP Over MRO column be removed.

MR. NOURSE: Correct.

EXAMINER SEE: As well as the total,

okay, in the last column. Okay.

2.2

MR. NOURSE: And there's one additional motion to strike I'd like to add in the text that I missed in my list, and that's page -- this one begins on page 11, line 22, and ends on page 12, line 12.

So, your Honor, some of the changes that were made in additional direct narrowly changed some of the language that refers to three adjustments to "two" and so on, but the exhibits and the numbers that flow throughout those exhibits still reflect all three of those adjustments.

So in short, I don't believe Dr. Duann has really updated or revised testimony based on the remand order and, similar to the arguments that were made this morning by Mr. Satterwhite, these arguments presenting this information is irrelevant, it's confusing, and it basically pursues a position that would be pursued on rehearing, and the order as it stands now is effective and it's purely speculative to presume that it would change on rehearing.

EXAMINER SEE: Mr. Etter, did you want to respond?

MR. ETTER: Yes, your Honor. Besides all the arguments that were made this morning I'd like to note that Dr. Duann on page 13 of his testimony,

particularly lines 14 through 17, is noting that he is dealing with the annual carrying charges on environmental investments made after January 1, 2009, and those were not a part of the remand proceeding, and so that is, you know, the crux of his testimony.

2.2

As well it is a document that he has made considerable adjustments to including his calculations.

MR. NOURSE: Just on that point, your Honor, I believe the post-2009 environmental carrying charge for the pre -- the '1 through '8 period were the carrying charges at issue and that were raised by parties in the remand proceeding. They were embedded in the base rate -- base generation rate, certainly for Dr. Duann to go back and make these adjustments to his year-end rate has no basis in any Commission order or decision.

EXAMINER SEE: Mr. Etter, were you going to address the other portions of the motions to strike?

MR. ETTER: Well, I think the arguments that counsel makes, you know, deal with his comparison of this document to the remand proceeding and, you know, we believe that all of this is relevant and it hasn't been re-argued.

We're not re-arguing the remand proceeding here, we are arguing how these figures relate to the figures that have been presented in the stipulation and in the testimony regarding this in support of the stipulation.

MR. KUTIK: Your Honor, may I be heard in opposition to the motion?

EXAMINER SEE: Yes.

2.2

MR. KUTIK: Your Honor, it seems to me that the arguments that Mr. Nourse makes are arguments that or points that he can pursue on cross and on brief. They're all arguments with respect to the weight of the calculations made by this witness, not with respect to their admissibility.

Just because he doesn't agree with them because he thinks it's not called for by the Commission's opinions doesn't mean that that's inadmissible. What it means is he potentially has a basis to argue that Dr. Duann is wrong. That's not a basis for excluding evidence.

MR. NOURSE: Your Honor, the companies were directed to revise their testimony to reflect the remand order. We've done so. The other parties have purported, including Dr. Duann, purported doing that, but it's clearly not the case from looking at

his testimony and exhibits, they extensively continue to purvey the same arguments that have been rejected by the Commission in the remand order.

2.2

MR. DARR: If I may, your Honor.

EXAMINER SEE: Go ahead, Mr. Darr.

MR. DARR: Thank you, ma'am.

I would reiterate the arguments that we made earlier today, we believe this is relevant, that the adjustments do need to be flowed through. An order of the Commission is not final and, in fact, the company itself has filed alternative tariffs in response to the ESP remand order arguing that they have claims that we don't think are appropriate.

It strikes me at this point in the game these issues are still open, they're still relevant, and they clearly impact the Commission's decision as to whether or not this stipulation is in the public interest.

MR. KURTZ: Your Honors, may I speak as well in support of the company on this issue?

EXAMINER SEE: Go ahead, Mr. Kurtz.

MR. KURTZ: I think what was happening here is it's more than the weight of the evidence.

This evidence, which continues to argue theories from the remand case that were rejected, and this

testimony is not consistent with the ruling that the exhibits should be reflective -- amended to reflect the remand order create misleading and -- a misleading record and an inaccurate record. So I think it does a disservice to the Commission and to parties to leave this information in.

EXAMINER SEE: The Bench is going to take a few minutes to consider the motions. We'll reconvene at ten after.

MR. NOURSE: Thank you, your Honor.

EXAMINER SEE: Let's go off the record.

(Recess taken.)

2.2

EXAMINER SEE: Let's go back on the record.

The Bench has had an opportunity to consider AEP Ohio's motions to strike portions of Dr. Duann's testimony and after reviewing the portions of the testimony finds that the motions to strike should be granted.

Let's proceed with cross-examination of this witness. AEP made a motion to strike. Is there some agreement who will start cross-examination of Mr. Duann?

MR. KURTZ: Your Honor, I think
Mr. Nourse was going to start.

1 EXAMINER SEE: Mr. Nourse.

MR. NOURSE: Thank you, your Honor.

## CROSS-EXAMINATION

5 By Mr. Nourse:

- Q. Good afternoon, Dr. Duann.
- A. Good afternoon.
- Q. Now, did you follow the motions to strike that were made relative to your testimony a few moments ago?
  - A. I was here and I heard everything.
- Q. Did you understand which portions of your testimony were stricken from the record?
  - A. Yes. I made the note in my copy.
- Q. Okay. So I want to ask you about areas that weren't stricken, some additional questions. First, if you could turn to page 5, please. Are you there?
- 19 A. Yes.
  - Q. Okay. The sentence that starts on line 1 says the stipulation forces customers to forego a variety of rate revenue reductions, it goes on on line 3 to say "The proceedings include the AEP Ohio Remand...."
- 25 A. Yes.

- Q. And it goes on to reference the PIR.
- A. Yes.

2.2

- Q. What's your understanding of the stipulation relative to this statement you're making about foregoing revenue -- rate and revenue reductions relative to the remand and the PIR cases?
- A. Well, first let me talk about PIR case.

  I believe in the stipulation there's a provision
  there, it say that the PIR balance will not be
  adjusted. And it is my understanding the PIR balance
  has not even been established.

The PIR balance is calculated, you know, under the procedure established in the first ESP and then in every year there will be an FAC audit and so in 2009, 2010, 2011, there should be three audit. And the auditor has finished the audit in 2009 and this case has been litigated and briefed and is waiting for the Commission to decide.

For the 2010 FAC audit, you know, the audit report has been completed and it is going to go to a hearing pretty soon, but since the Commission has not decide on this three audit and based on the advice of the counsel, I believe, you know, they have — those fuel costs in these three years has not been found to be prudent or reasonable.

And in this stipulation you, you know, the stipulating party essentially just gave up, say okay, the 634 million, that's it, there's no chance to change on that.

As for the remand proceeding, I already explain that the, you know, I explain in my testimony that this is an issue in dispute regarding the environmental carrying charge, regarding the POLR, regarding the flow-through effect, and even though the Commission has made a decision on this case, you know, there is still opportunity for rehearing and for appeal, so --

Q. Dr. Duann --

2.2

- A. -- once again, if we agree with that and we agree, you know, accept the stipulation, I think you are essentially saying, you know, those issue are resolved.
- Q. Okay, Dr. Duann. I was trying to ask you a narrow question, but you went all over the place there. Let me go back and break that down a little bit.

Let me try it this way: With respect to the remand, because some portions of your testimony have been stricken and I believe there's still other places where these issues show up in your numbers

that you use in your testimony, so I want to be clear, first let's start with the remand specifically in the context of your statement about the stipulation parties foregoing rate and revenue reductions relative to the remand only. Are you making that statement to include POLR, environmental, and the flow-through in that context?

A. Yes.

2.2

- Q. Okay. And is it your understanding of the remand order -- setting aside any possibility for change on rehearing, the current remand order only involves a reduction relating to the POLR charge; is that correct?
- A. The Commission made a decision that allow the carrying charge on 2001-2008 environmental investment to be collected in the first ESP. The Commission also rule that there will be no retroactive -- there would be no flow-through effect. That's what the Commission decide.

But I would like to point out that regarding the three adjustment I made, first the environmental carrying charge, I already include that in my exhibit.

Regarding the second POLR and, you know, since the Commission directed to correct, that's also

in my testimony -- in my exhibit.

2.2

Regarding the third point, third adjustment I made of this, I adjust the PIAA [verbatim] to zero and the balance of the FAC deferral asset. That adjustment to zero is not only based on the flow-through effect but also the effect of possible adjustment in the FAC audit proceeding where I just described.

So I, you know, I do not agree with your statement that this exhibit has not considered the effect of the remand. I think it perfectly reflect the effect of the remand.

- Q. Dr. Duann, I think we're going to be here a lot shorter if you can try to answer my question. In your answer just now you referred over and over to your exhibit. You've got a lot of exhibits so let's do it this way, let's turn to your exhibits and I'm going to discuss the ones that are not stricken which start with Exhibit E. Are you there?
  - A. Not yet. Just hold on.
    Yes.
- Q. I'd like for you to walk me through
  Exhibit E and tell me which columns are affected and
  still reflect your flow-through adjustment, any
  adjustments you made to the PIR, and any

environmental adjustments you've made.

2.2

A. Okay. On Revised Attachment DJD-E, the first on the base generation and that's -- that's the same as David Roush's Exhibit DMD [verbatim], so that's the same. That's already include in the environmental carrying charge. First I remove that, but in this exhibit I already add it back.

And the other, the full FAC is the same, the full environmental the same, the total generation the same, current transmission are the same as the Roush. The current distribution are the same. And I made adjustment for POLR; I adjust that to zero, and I think that's what the Commission's order on the remand.

And I also adjust the phase-in rider, I adjust that to zero, and I already explain that in my testimony very clearly on page 18, I explain how -- why I believe there's no deferral balance at the end of 2011 because I believe this is a flow-through effect as well as --

- O. Dr. Duann --
- A. -- a potential adjustment in the FAC audit proceeding.
- Q. Dr. Duann, that page has been stricken from the record, page 18.

A. But you asked me the question on that exhibit.

2.2

- Q. And I asked you again -- okay, with the phase-in rider you adjusted it to zero so you took the entire Ohio Power phase-in regulatory asset out. Was that based on the 2009 fuel audit reduction you made in the pending FAC audits? Does that account for the entire PIR adjustment you made?
- A. The potential adjustment in the FAC, in the 2009 FAC adjustment involve an asset and I think there's a confidential information relate to that, but to answer your question is, is I made adjustment of PIR based on both the flow-through effect as well as the potential adjustment on FAC.

And to the best of knowledge I think the current value of that FAC adjustment could exceed the \$628 million deferral balance.

- Q. Okay. Is part of your adjustment to zero for Ohio Power on the PIR on Exhibit DJD-E related to the flow-through? Is that what you just said?
- A. Related to both the flow-through and the potential adjustment of the 2009 FAC audit.
- Q. Do you know what the numbers would be if you backed out the flow-through adjustment?
  - A. I think the flow-through adjustment is on

1564 1 page 18 of my testimony. That's 600. We can't talk about that. I'm asking 2 Q. 3 you --4 MR. KUTIK: Your Honor, can he finish his 5 answer? 6 MR. NOURSE: Well he's going back to 7 testimony --8 EXAMINER SEE: Just a minute. 9 MR. KUTIK: He's allowed to finish his 10 answer. 11 EXAMINER SEE: Thank you. 12 Mr. Duann, I'm going to direct you to 13 answer the question posed to you. 14 And, Mr. Nourse, let the witness finish 15 his response. MR. NOURSE: Thank you, your Honor. 16 17 EXAMINER SEE: Proceed. 18 MR. KUTIK: Your Honor, can we have the 19 rest of the answer, then? 20 EXAMINER SEE: Go ahead, Mr. Duann. 21 THE WITNESS: Can I have the question 2.2 read back? 23 EXAMINER SEE: Sure. 24 (Record read.) 25 As I say, that's confidential, you know, Α.

if you want to talk about it, I can talk about it.

2.2

- Q. Would it be something greater than zero?
- A. I think even in AEP's accounting book it's greater than zero.
- Q. Okay. So the zero for Ohio Power is not correct. If you do not adjust for the flow-through theory, the zero there is not correct. Do you agree?
- A. No. Actually, I probably misunderstood your question. I suppose your question is what's the value of the potential adjustment. And is that the question?
- Q. What's the value -- do you know what the value is for Ohio Power on the PIR column on that exhibit if you do not include an adjustment for flow-through?
- A. That's in the Company Witness Roush's Exhibit DMD-1.
- Q. Okay. Are there any other numbers or columns on Exhibit DJD-E that reflect either an adjustment for environmental or for flow-through?
- A. The base generation already include the environmental carrying charge.
  - Q. I'm asking about your adjustment, sir.
- A. In my exhibit I do not make any adjustment for the environmental because I -- because

that's what the Commission's decision say. It can be included so I include it.

- Q. So the answer is no, there's no other columns on Exhibit DJD-E that reflect an environmental adjustment by you or a flow-through adjustment by you?
- A. There's a flow adjustment included in the phase-in rider.
- Q. We just talked about that. Are there any others?
- A. No.

1

2

3

4

5

6

7

8

9

10

11

14

15

16

17

18

- 12 Q. Let's move to Exhibit DJD-F.
- 13 A. Yes.
  - Q. In the column "Remand Revised 2012 Base Generation Rate" you're citing Exhibit DJD-E for that as a source, correct?
  - A. That's only for the 2012 base generation rate.
- 19 Q. And that's --
- 20 A. That refer back to Company Roush's 21 Exhibit DMD-1.
- Q. So that could just as easily refer to DMR-1; is that what you're saying?
- A. For the 2012 base generation rate, yes.
- Q. Okay. Could you turn to DJD-G, and here

you've got the remand revised 2012 total generation rate.

- A. Yes.
- Q. And that refers back to DJD-E.
- A. Yes.

3

4

5

6

7

8

9

10

17

18

19

20

21

2.2

- Q. And that reflects your adjustment?
- A. In that one -- in that that's exactly the same as Mr. Roush's number. That already reflect the environmental carrying charge.
  - Q. The one that says "\$5.77 RS"?
- 11 A. Yes.
- Q. I'm not seeing that number on DJD-E, can you show it to me?
- 14 A. Yes, DJD-E on the left, one, two, three,
  15 four, five, six, column 6, that total generation,
  16 5.77, 8.48, 8.29, 5.93, 4.45.
  - Q. So, again, that could have said "DMR-1," not "DJD-E" there, as a reference?
  - A. Yes.
  - Q. Okay. Let's go to Exhibit H, same question, the column "Remand Revised 2012 Total Rate," does that reflect your adjustments?
- 23 A. Yes.
- Q. So those numbers in the \$10.59 RS for CSP reflects the effects of your flow-through

adjustments?

2.2

- A. That's not a correct statement.
- O. So is the answer No?
- A. That 10.59 for RS reflect the elimination of the POLR as well as the PIR.
- Q. So it does reflect the PIR which includes the flow-through; is that what you're saying?
- A. Flow-through and the adjustment, potential adjustment for FAC audit.
- Q. But if we corrected DJD-E for the appropriate phase-in rider adjustment excluding flow-through, you don't know what those numbers would be, do you? On --

MR. ETTER: Objection, your Honor, I'm not sure what he means by "appropriate phase-in rider."

EXAMINER SEE: Okay.

MR. NOURSE: I can rephrase.

- Q. Dr. Duann, again, we're looking at the remand revised 2012 total rate on Attachment DJD-H, and I'll use the \$10.59 for RS schedule for CSP as an example. Are you with me so far?
  - A. Yes.
- Q. And it says in the footnote the source is Attachment DJD-E.

A. Yes.

2.2

- Q. And my question is, does the \$10.59, I see that on DJD-E as being adjusted for the phase-in rider as well.
  - A. That's correct.
- Q. And so that \$10.59 does reflect the adjustment you made which includes the flow-through effects; is that correct?
- A. As I say, it include both the flow-through as well as the FAC audit adjustment and even, you know, it's through the flow-through and it is my belief that the balance would, the phase-in deferral balance could well be zero.
- Q. But you don't know, you haven't done that calculation and presented it in your testimony, have you?
- A. As I say, that's a confidential information and I, you know, that's the only reason I did not include it in my testimony.
- Q. Dr. Duann, you've not presented that calculation in your testimony, have you?
  - A. The calculation of what?
- Q. Of the phase-in rider adjusted for just the FAC argument you're making and not the flow-through effects.

MR. ETTER: I'll object as to asked and answered, your Honor. He's already provided a response.

MR. NOURSE: All he said is it was confidential. I don't know what that means.

MR. ETTER: I believe he also said he did not include it.

EXAMINER SEE: The objection is overruled.

Answer the question, Mr. Duann.

11 THE WITNESS: Can I have the question read back?

(Record read.)

- A. I did not include a workpaper or exhibit regarding that particular value in my testimony.
  - Q. Thank you.

    Let's move to Exhibit DJD-J.
  - A. Yes.

2.2

- Q. Okay. It's my understanding that the last column in this exhibit, "Yearly Costs of the ESP Over the MRO," including the total at the bottom, grand total for AEP Ohio, have been stricken. Is there any reference in your testimony to those numbers that were stricken in the exhibit?
  - A. Yes.

- Q. Okay. Is that at the top of page 26?
- A. Yes.

2.2

- Q. And the number that's in line 1 is what you're referring to; is that correct?
- A. On page 26, line 1, the AEP Ohio customer will likely pay 351 million.
  - Q. Okay.

MR. NOURSE: Your Honor, I would just move for his answer just now be stricken as well as that dollar figure in line 1 on page 26 as it does reflect the analysis in the exhibit that was stricken.

MR. ETTER: Your Honor, he asked about the number and asked if that was the number.

MR. NOURSE: I didn't ask him to identify it again. And he's verifying that it was carried through from the exhibit into the testimony and now there's no basis in the record to support that number, it should be stricken.

Your Honor, I did state earlier that I was trying to be direct about my motions to strike and that there would be other areas that would be affected.

EXAMINER SEE: To the extent that the Bench has already determined that certain columns of

DJD-J should be stricken, it's consistent with that motion to strike the number set forth on page 26, line 1.

MR. ETTER: I'm sorry, your Honor, did you grant the motion or not?

EXAMINER SEE: I'm granting the motion to strike the number from page 26, line 1, given that that portion of the last column in the Attachment DJD-J has also been stricken.

MR. ETTER: Thank you.

- Q. (By Mr. Nourse) Dr. Duann, are there other places in your testimony where the number from the last column of Exhibit DJD-J appear in the text?
  - A. Yes.

2.2

- Q. Can you point me to the page and the line where that occurs? Page 7 might be one area.
  - A. Yes, page 7, line 11.
- Q. Okay. The number that you corrected earlier at the end of line 11 reflects -- is the same number we just spoke about, correct?
  - A. Yes, 351.
- Q. Okay. And in line 12 I believe you've got the three numbers that add up to that total.

  Without identifying them, are those three numbers in line 12 of page 7?

- A. There are six numbers.
- Q. Dollar figures.

2.2

- A. And a year. They also numbers.
- Q. I'm asking for dollar figures, sir.
- A. There are three dollar figures, yes.
- Q. And those are related to the last column of Exhibit DJD-J; is that correct?
  - A. That's correct.
  - Q. Okay.

MR. NOURSE: Your Honor, I'd move to strike the answer before -- two answers ago where he divulged the number, and also move to strike from the testimony the dollar figure at the end of line 11 on page 7 and the three dollar figures on line 12 of page 7.

EXAMINER SEE: And the motion to strike -- Mr. Etter, did you want to respond?

MR. ETTER: The three dollar figures on line 12, I'm not sure that they have been stricken from any part of the attachments.

MR. NOURSE: I believe Dr. Duann just answered that they did relate to the last column of Exhibit DJD-J. And I believe they are reflective, if you want to look at that column. There's an AEP Ohio total for each year and they correspond to those

1 three numbers, part of the last column.

25

EXAMINER SEE: The motion to strike as to page 7, beginning on line 11, to the end of line 12 is granted.

MR. NOURSE: Thank you, your Honor.

May I continue?

EXAMINER SEE: Go ahead, Mr. Nourse.

- Q. (By Mr. Nourse) Dr. Duann, are there any other places in your testimony where the results from Attachment DJD-J appear?
- A. I don't know. I haven't read through it now.
  - Q. None that you can recall?
  - A. No, I cannot recall. I have to read it.
- Q. Would you like to take some time to look at it?
- A. Are you referring only to the last column of DJD-J, or are you referring any other?
- Q. Right now I'm asking about the results of the MRO test that you perform in DJD-J, any of the stricken materials from DJD-J.

MR. ETTER: Your Honor, I think if counsel has a specific portion of the testimony where he would like Dr. Duann to look, he should reference that.

MR. NOURSE: I already did and we went through the ones I was aware of and I'm asking him if he's aware of any others. It's his testimony.

2.2

MR. ETTER: And he already answered that he's not aware of any others.

EXAMINER SEE: I'm sorry. Did you answer that, Mr. Duann?

THE WITNESS: My answer is I don't know, I have to reread the testimony, and I am reading that right now.

EXAMINER SEE: You need to go through it, therefore -- the witness is entitled to some time to review so that he can appropriately answer the question, so let's go off the record for a minute.

(Off the record.)

EXAMINER SEE: Let's go back on the record.

THE WITNESS: I did not find any other place referring to the last column of DJD-J.

EXAMINER SEE: Mr. Nourse, before you proceed, let me make sure the record is clear as to my ruling.

Page 7, you requested that the dollar figures on line 12 be omitted. I granted that.

Should I also remove everything in the parenthetical

so it would read "I find that AEP Ohio's customers will liberally pay more over the three years under the ESP" and continue?

2.2

MR. NOURSE: Well, your Honor, to be honest, I think Dr. Duann's testimony as stricken doesn't have any substantive MRO test results. I was keen on getting the specific numbers and calculations he made out. So, you know, I guess if he has no evidence to support some of the statements, we can argue about that on brief. I just want to make sure the calculations are gone. That's what I was trying to do.

EXAMINER SEE: And the numbers are not in there, I just want to be clear as to what the record now states.

MR. NOURSE: Yes. Thank you, your Honor. That sounds fine.

May I proceed?

EXAMINER SEE: Yes.

Q. (By Mr. Nourse) Dr. Duann, can you turn to page 21, and I'm directing your attention to table 1 which begins on line 17 and carries over to page 22. Do you see that?

- A. Yes.
- Q. The column entitled "Total Rate," the

fourth column, the total rate for CSP and the last column, total rate for Ohio Power, I'd like to ask you a couple of questions about both of those columns. Do you see those?

A. Yes.

2.2

- Q. Is this presentation based on your Exhibit DJD-H in part?
  - A. Yes.
- Q. And the first column of DJD-H we discussed earlier, do you recall that discussion?
  - A. Yes.
- Q. Does it also carry through to this table that those two columns I just asked you about reflect in part, among other things, your flow-through adjustment?
- A. They reflect my adjustment of eliminating the POLR and the PIR.
- Q. And your elimination of the PIR reflects your flow-through adjustment; is that correct?
- A. Reflect both the flow-through adjustment as well as the adjustment, potential adjustment for the FAC audit, yes.
- Q. Okay. So do you know and have you presented here in your testimony the total rates in those columns that would be reflected if the

flow-through adjustment were not made?

- A. I don't understand the question.
- Q. Okay. Look at the 17 percent for CSP -- actually let's take Ohio Power. Ohio Power you've got 20 percent for RS. Do you see that?
  - A. Yes.

2.2

- Q. And does that 20 percent reflect the adjustment you made for the flow-through effects?
- A. As I already said, just by my estimation of the potential FAC adjustment the PIR will be zero. So you can include the flow-through adjustment or you can exclude it, the number reflect both.
- Q. Sir, when I asked you earlier with respect to Exhibit DJD-E, the phase-in rider value you have as zero, I asked you if you had presented the calculation excluding the flow-through effects. You confirmed that nowhere in your testimony or workpapers reflects that revised calculation; did you not?

THE WITNESS: Can I have the question read back?

(Record read.)

- A. That's correct.
- Q. And, therefore, if we look at DJD-H, which you just stated was the basis in part for the

table 1 we were looking at on page 21, if we look at DJD-H, the remand revised 2012 total rates listed there also reflect your PIR of zero; is that correct?

A. Correct.

2.2

- Q. And those rates in that column on DJD-H do not reflect an adjustment of the PIR that excludes the effects of the flow-through; is that correct?
  - A. No, that's not correct.
  - Q. Okay. Go ahead and explain that one.
- A. Well, as I explained, in reaching the -in reaching my conclusion that a PIR should be zero
  because I -- because it is my belief that at the end
  of 2011 there's a strong possibility that phase-in
  deferral balance should be zero and that the reason
  the phase-in deferral balance should be zero,
  because -- both, because both the flow-through effect
  and the potential adjustment of the FAC audit, and I
  also further can prove that even if we take out the
  flow-through affect the value of the potential FAC
  adjustment could possibly even -- could possibly be
  bigger than the \$628 million.
- Q. Have you presented in your testimony or workpapers a calculation that isolates the effect of your FAC argument --
  - A. No.

- Q. -- on the PIR?
- A. No.

2.2

- Q. Do you have any quantification or calculation to support the notion that the PIR would be zero based solely on the FAC argument?
- A. I look at the items in dispute, I look at the characteristics of that asset, and I look at the transaction of asset with similar characteristics in the last two years and I reach the conclusion that that the value is pretty high, is pretty substantial, and it could well above the 628 million.
- Q. Are you referring to, in your last answer, the Putnam Reserve asset, is that what you're talking about?
  - A. Yes.
- Q. And so you're saying if the Putnam
  Reserve is worth more than \$600 million and if that
  reserve is sold for more than \$600 million, and if
  the Commission requires the full value or a value
  that exceeds \$600 million to be adjusted from the
  phase-in recovery rider, then in that case the PIR
  would be zero?
- A. If, you know, as you indicate, if the Putnam Reserve was sold at a value greater than \$628 million and it is OCC's position as well as

others parties' position that the 2009 FAC cost, that value should flow to the customer of Ohio Power, and if that flows through, then there would be subsequent adjustment to the 2009 FAC cost and if there's any leftover or any adjustment to the carrying cost, that will also flow through -- that will also reflect in the 2010, and in that circumstance the phase-in deferral balance would be zero or even be negative and, you know, the Commission may decide additional equipment are justified.

2.2

- Q. So did you agree with my question or not, Dr. Duann?
- A. I already answer your question. I think it's not just a direct application of the PIR value.
- Q. Was your testimony in the 2009 audit proceeding that the Putnam Reserve exceeded \$600 million in value?
- A. In my testimony in that proceeding my recommendation is the Commission should credit an amount to the ratepayer immediately and then trueup with the value of that -- of that property that was eventually disposed. That's my recommendation.
- Q. And what credit did you recommend in your testimony?
  - A. In that proceeding I base my

recommendation on the estimate value by -- by outside consultant that was hired by AEP to value that and that value, if I remember correctly, and -- in the range from \$137 million to \$457 million.

2.2

- Q. So that's a lot less than \$600 million, isn't it?
- A. That's the value they evaluate in April 2009 and when we are, you know, when we are in an economic downturn, when the commodity price is falling, when, you know, the situation is quite a different and the same amount of coal reserve represent by that property, and I look at subsequent transaction and the value are much higher.
- Q. So, Dr. Duann, the record in that case is closed. I was asking about your test of the record there.

Let me suffice it to say, tell me if this is correct, only if the Commission decides the 2009 FAC and ends up conveying a benefit to customers of greater than \$600 million in that decision would your percentage increases in table 1 be correct; do you agree with that?

A. I agree with that and I will also indicate that there are other adjustment in the 2009 case, but if you say the Putnam Reserve alone already

has that high value and the Commission already decided to flow back those value to the customer, yes, I think the PIR will be zero and my calculation presented would be -- would be correct.

2.2

- Q. Okay. Let me ask my question again, now. Unless the Commission makes a decision in the 2009 FAC audit case that conveys value in any form more than \$600 million to offset completely Ohio Power's deferred fuel regulatory asset, unless that happens wouldn't you agree that these rate increases in table 1 are not correct?
- A. No, I do not agree with that because we still have the flow-through effect that relate to the POLR and environmental carrying charge. That issue still, you know, the Commission has a decision on that but I think the party have the right of appeal.
- Q. Okay. So, again, let's make it broader. Unless the Commission grants the value in the 2009 FAC case of greater than \$600 million, or the Commission reverses itself on rehearing and allows the flow-through effects so that the \$600 million fuel deferral is eliminated, unless one of those two things happens, or both of them, these numbers in table 1 are incorrect. Do you agree?

MR. ETTER: Objection. He said if one of

those two things or both of them. That's a compound question.

MR. NOURSE: Your Honor, I'm trying to be patient here and I think I made my questions pretty clear. I'm not getting a direct answer.

EXAMINER SEE: You did include and or both in your previous question. If you want to break them up and proceed.

MR. NOURSE: I thought that's what and/or meant, but I'll try again, your Honor.

- Q. (By Mr. Nourse) Okay. Dr. Duann, do these numbers in table 1 reflect your flow-through adjustment?
- A. The 78 percent -- the 20 percent does not reflect any flow-through adjustment.
  - O. It does not.

2.2

- A. It does not.
- Q. And is that answer premised on the idea that the FAC impacts will eliminate the PIR?
- A. No, because I think the 78 percent of base generation rate, that's already reflect the Commission's decision allowing the environmental carrying charge. That's the same rate that Company Witness Roush used.
  - Q. Dr. Duann --

- A. So that does not reflect the flow-through.
- Q. Dr. Duann, this whole series of questions
  I've directed you to the total rate column for
  Columbus Southern Ohio Power and Ohio Power Company
  and I focused --
  - A. Okay.

2.2

- Q. -- in particular on the RS schedule for Ohio Power at 20 percent. Does that 20 percent figure reflect your flow-through adjustment?
  - A. Yes, reflect both flow-through and FAC.
- Q. And if we exclude both the flow-through and the FAC adjustments that you're making, do you know what the correct numbers are for the total rate columns for Ohio Power and Columbus Southern in table 1?
- A. I think that can be calculated from Roush Exhibit DMD-1, and I did not make that calculation.
  - Q. Thank you.

Okay. Let's return to page 6 of your testimony. In lines 2 and 3 you make a statement that you don't believe that AEP Ohio or the signatory parties have justified the significant increase, you're referring to residential rate increases here; is that correct?

A. No.

2.2

- Q. Okay. This is discussing increase in revenue?
  - A. Yes.
- Q. Okay. When you say "justified," what are you referring to? Justified based on what, cost?
- A. Justified, whatever justification the company can provide.
- Q. What are you looking for to be justified in your mind?
- A. I'm looking for a rate, an ESP rate that will fully reflect the value that -- the value of the remand of the FAC audit and the phase-in recovery rider, those I'm referring to on page 5.
- Q. Okay. Let me move down to the next paragraph there on page 6 starting on line 5, and you're basically saying here, as I understand it, that the residential customers are getting a disproportionate share of the increases under the stipulation; is that correct?
  - A. Yes.
- Q. And down on line 13 you say that the result is an unfair burden being placed on residential customers. Again, is your opinion informed relative to a cost-of-service argument or

analysis?

2.2

- A. I'm simply referring to the increase in rate or in revenue for the different class of customer that I referred to in table 1. For example, for the base generation rate the residential customer got a 78 percent increase and the GS-1 customer has a 39 percent increase, the GS-2 got a 34 percent increase, and I don't believe that's a reasonable.
- Q. So you're not focused on the residential impact here in this statement?
- A. I'm focusing on the share of the residential customer and I present the information on table 1.
  - Q. Okay.
- A. Which I look at both the base generation rate and the total generation. But the total generation rate is the same. The residential customer got a 20 percent, GS-1 got a negative, got a reduction of 27 percent, and the GS-2 customer got a reduction of 24 percent.
- Q. So all those statements are based on table 1 which we just discussed at length? Is that correct?
- A. That's based on my evaluation of the increase of the rate for various class of customer.

Q. And your evaluation is reflected in table 1, is it not?

2.2

- A. Is summarized in table 1, yes.
- Q. Yes. Let me ask you to turn to page 8 and on page 8 starting on line 4 you indicate that a return on common equity of 10.5 percent, this is in connection with the DIR proposal, correct?
- A. Yes. In this part it is related to my discussion of the DIR.
- Q. I'm focused on the 10.5 percent, I'd like to talk to you about that. Now, is it your understanding under the ESP statute that distribution infrastructure improvement plans are one of the items that are permitted?
- A. Yeah, it is permitted under certain conditions, yes.
- Q. Okay. Fair enough. And is it provided for, to your understanding of the statute, that such rate mechanisms would be based on rate-base/rate-of-return regulation?
- A. Actually, I don't understand the question.
- Q. Is it your understanding that a distribution rate adjustment mechanism under the ESP statute is required to be based on

rate-base/rate-of-return regulation or traditional
ratemaking?

- A. I'm hesitant because I do not exactly mean "rate base regulation and traditional regulation," you know, I try to answer it but I really do not -- I think that's a very broad term.
- Q. Okay. We'll break it down. So in line 10 you refer as part of your support for saying 10.5 is too high to the Staff Report in the company's pending distribution rate case. Do you see that?
  - A. Yes.

2.2

- Q. And you're involved in those cases on behalf of OCC?
  - A. Yes.
- Q. Okay. And that's what's known as a base distribution case, would you agree?
- A. Yes, you can -- yeah, you probably can say it that way, yes.
- Q. And that case is governed by traditional rate-base/rate-of-return regulation, formula rates under Chapter 4909 of the Revised Code, if you happen to know that. Is that your understanding?
- A. My understanding is that distribution rate case is basically a cost-based regulation in the state of Ohio.

Q. Correct. Thank you.

2.2

So does a distribution rate adjustment mechanism in an ESP statute have to be based on the same cost-based ratemaking principles that are involved with the base distribution case?

- A. I'm not attorney and I'm not giving a legal opinion, but my understanding is the ESP really does not specify what kind of mechanism to be used under the ESP.
- Q. Okay. So it's not limited to cost-based rate of return, is it?

MR. ETTER: Objection. Asked and answered. He stated it's not specified.

EXAMINER SEE: The objection is sustained.

MR. NOURSE: That's fine, I'll move on.

Q. Dr. Duann, has OCC presented evidence of a return on equity in the context of an ESP case before?

MR. ETTER: Objection as to foundation.

Dr. Duann doesn't -- has not stated in his testimony
that he has been involved in all ESP cases or even is
aware of all ESP cases that OCC has been involved in.

MR. NOURSE: Okay. I was trying to be more general. I can be more specific.

Q. Are you aware that OCC has taken a position relative to the significantly excessive earnings test under the ESP statute relative to AEP Ohio?

2.2

- A. Yeah, I think OCC intervened in the 2009 AEP Ohio SEET proceeding, yes.
- Q. And I believe Dr. Woolridge was the OCC witness there addressing the ROE ceiling in that case, do you recall that?
  - A. Yes. Yes, I remember that.
- Q. And do you recall what his ROE threshold that he recommended was?
  - A. No, I don't recall.
  - Q. Was it above 10.5 percent?
- A. I don't believe so. I cannot -- I do not recall but my recollection is less than that.
- Q. Okay. Would it refresh your recollection if I told you for Columbus Southern Power
  Dr. Woolridge's October 12th, 2010, testimony, at page 23, indicated a range of 11.58 percent to 13.58 percent for the recommended ROE threshold?
- A. I think you are talking about two totally different things.
- Q. I'm just asking you a question. You can explain it through redirect if you want.

MR. ETTER: I'd object, your Honor,
because he's not showing any document to Dr. Duann.

MR. NOURSE: I asked him if it refreshed
his recollection.

2.2

- Q. Does that sound correct, Dr. Duann?

  EXAMINER SEE: Okay.
- A. I'm trying to answer the question and my answer to the question is the numbers you're referring is not the ROE. This is ROE -- this is not the ROE threshold for determining SEET. So that's what I'm trying to get.
- Q. That's not the question I asked you, sir. Does that number, 11.58 to 13.58 percent, sound correct for OCC's position of the ROE threshold in the 2009 SEET proceeding for AEP Ohio?
- A. The number you are just referring to is Ohio consultant Dr. Woolridge's position that if the threshold, if the ROE of AEP -- of CSP or OP is higher than those number, CSP and OP will have significant excess earning. That does not mean that number is the return on equity that is associated with business and financial risk of CSP and OP.
- Q. So you do acknowledge those were the recommendations for the ROE threshold of OCC?

  MR. ETTER: Objection. Asked and

1 answered.

2.2

MR. NOURSE: He didn't really answer it directly, your Honor. He's arguing.

EXAMINER SEE: Dr. Duann.

MR. ETTER: He's explaining his answer, your Honor.

EXAMINER SEE: Can you answer the question directly, Dr. Duann?

THE WITNESS: Well, directly is I don't remember what exactly, right now, whether that number is the recommended threshold or not. If he can show me the document, I can look at and . . .

- Q. Okay. And you can't agree, subject to check, that I just cited from his testimony?
- A. I think my attorney always advise me not to accept subject to check.
  - Q. Thank you.

The bottom half of page 8 you're expressing a concern about double recovery relative to the DIR proposal in this case, in the distribution-based rate case; is that correct?

- A. That's correct.
- Q. And does your concern about double recovery in this context go away if the base rate increase only occurs through the date certain and the

DIR picks up post-date certain investment?

2.2

- A. Specifically regarding the double recovery aspect of the DIR, if, you know, the distribution case recovered the return of and return on those investment made before the date certain and the DIR will only recover those after that, in that circumstance there would not be a double recovery under DIR.
- Q. Okay. And likewise, if there were no base distribution increase as a result of the AIR case, your double recovery concern would go away and be resolved regarding the DIR, correct?
  - A. No. That's two different things.
  - Q. Okay. Explain why not.
- A. Because you say there's no increase in the DIR. That does not mean -- increase in your base generation. That does not mean they did not recover anything, anything from the -- any distribution investment you made before that date certain. It doesn't mean that.
- Q. Okay. Let me ask you a few questions about securitization, and you start one of your discussions of securitization on page 9 of your testimony.
  - A. Yes.

Q. Okay. And so as I gather understanding your testimony here, you're criticizing the stipulation's provisions regarding securitization.

2.2

Now, is it your understanding that any of the benefits, customer benefits, of the stipulation are directly contingent on securitization occurring?

THE WITNESS: Can I have the question read back, please?

EXAMINER SEE: Certainly.
(Record read.)

A. I cannot answer the question because the question is ambiguous. There's so many benefit I don't know what type of benefit or what you are referring to. So I cannot answer that.

- Q. You're saying there's too many benefits in the stipulation to go through them?
  - A. No. I'm just saying there's too many.

    MR. KUTIK: Nice try.
- A. You what describe as a "benefit" so I don't know what specific you're referring to.
- Q. Okay. Let me ask you, does OCC believe there's a downside to securitization?
- A. Once again, you know, I cannot answer the question because I don't know what kind of securitization you're talking about.

- Q. Well, what are you -- what are OCC's concerns with securitization?
- A. I cannot speak for OCC regarding this particular issue, but it has always been OCC's position that, you know, if there's any way that we can reduce the cost to the customer and, you know, we will certainly welcome and look at those.
- Q. Is there a scenario where securitization increases the costs to customers?
  - A. Oh, definitely.

1

2

3

4

5

6

7

8

9

10

11

12

17

20

21

2.2

23

24

- Q. Okay. This is the one question you're going to stop with at "yes" answering?
- MR. KUTIK: Your Honor, I object and move to strike.
- MR. NOURSE: Okay. I was -- I withdraw that comment.
  - EXAMINER SEE: Yes.
- MR. NOURSE: I didn't intend anything untoward.
  - Q. What is the scenario you have in mind?
  - A. The scenario could well be the scenario in the stipulation is, you know, the customer has to agree there will be no adjustment to the phase-in deferral asset.
    - Okay, so if there's no adjustment,

\$628 million, so you give it a 3 percent, you give it a 5 percent, you give it a 2 percent, that will still be more expensive for the customer than where you can really look at what did the proper amount of fuel deferral balance would be. That could be zero, then 10 percent interest on zero is still zero.

So in that case the securitization is a bad deal.

- Q. Okay. Any others? Any other scenarios you're concerned about?
  - A. Not right now. I may think of later.
- Q. Okay. First of all, is it your understanding that the phase-in recovery rider regulatory asset represents actual fuel costs that were incurred by the companies during 2009 through the present?
  - A. No.

2.2

- Q. They're not actual costs?
- A. I do not necessary agree that the fuel costs are recorded in the AEP's book are actual fuel costs.
  - Q. I'm not asking --
- A. We made that argument in the FAC audit case.
  - Q. I'm not asking whether you agree they're

prudently incurred, I'm just asking you whether they were incurred. Did you understand that?

- A. Right, even not without prudent or unprudent I think this is still controversy in the argument regarding what is the actual cost.
- Q. Okay. Do you have the stipulation with you?
  - A. Yes.

2.2

- Q. Can you turn to page 26.
- A. Yes.
- Q. Can you read aloud the first full sentence?
  - A. Starting with "if"?
  - Q. Yeah.
- A. "If, at any time after the PIRR regulatory assets have been securitized, the Commission or the Supreme Court of Ohio issues a decision that impacts the amount of PIRR regulatory assets, AEP-Ohio should use a mechanism to make an adjustment (up or down) equal to the amount adjusted by the Commission or Supreme Court of Ohio that either prospectively adjusts rates through a credit (or charge)."
- Q. So is it your understanding of that language that under your example that securitization

occurred and then subsequently there was a decision of the Commission that required, for example, fuel costs to be refunded to the customers, does this language preclude or require that adjustment still be made?

2.2

- A. It depend on what kind of securitization legislation that eventually enact.
- Q. So regardless of whether it's -- let me start again.

Your understanding is that if legislation were to provide that a regulatory asset is securitized and the amortization period begins for recovery of that regulatory asset, that the Commission's decision in our example in the FAC case could not be implemented through a separate rate adjustment mechanism or credit? Is that what you're saying?

- A. No, that's not what I'm saying.
- Q. So it could still be made and customers would be made whole in that example, correct?
- A. No. I don't know whether that's true or not. I don't know.
- Q. Okay. Does the stipulation prevent OCC from taking any position it wants to regarding securitization language -- legislation, excuse me?

- A. I think the OCC did not sign the stipulation so I think whatever the stipulation say has no effect on OCC.

  Q. Well, I'm not sure I'd go that far, but
  - the answer to my question is No?

THE WITNESS: Can I have the question reread?

(Record read.)

MR. ETTER: Could you read the answer as well?

(Record read.)

2.2

MR. ETTER: So I would object to asked and answered.

MR. NOURSE: Your Honor, he gave a much broader answer. I'm asking a very narrow question.

MR. ETTER: He's allowed to expand on his opinions in his answer. He's got to give an answer before he can expand on it.

EXAMINER SEE: Just a minute. The question has already been answered.

MR. NOURSE: That's fine.

Q. Dr. Duann, does the stipulation constrain the Commission to take a particular position on securitization legislation if the stipulation is adopted?

A. Yes.

2.2

- Q. How so?
- A. Because on page 25 of the stipulation you say the signatory party agree to work in good faith to -- at page 25, the bottom of the page it says "The Signatory Parties agree to work in good faith to pass suitable and appropriate legislation to address the matter as expeditiously as reasonably and possible to support any subsequent approvals needed or tariffs required by AEP Ohio from the Commission to securitize PIRR regulatory assets."
- Q. But in your answer are you suggesting that the Commission would be a signatory party if they adopt the stipulation?
- A. No. The Commission would not be a signatory party.
- Q. So I ask my question again: Is the Commission constrained to take any particular position on securitization legislation presuming it adopts the stipulation?
- A. I don't know. I don't know. Yeah, I don't know.
  - Q. Okay.
- A. I think the staff are probably constrained but I don't know about the Commission.

MR. ETTER: Your Honor, can we go off the record for a minute?

EXAMINER SEE: Yes, Mr. Etter.

(Discussion off the record.)

5 EXAMINER SEE: Let's take a brief recess, 6 ten minutes?

MR. NOURSE: Thank you.

(Recess taken.)

EXAMINER SEE: Let's go back on the record.

Mr. Nourse.

3

4

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

2.2

23

24

25

MR. NOURSE: Your Honor, I'd like do one thing, and if I can get that resolved I may not have any additional questions. I'd like to move for the administrative notice of the Commission's opinion and order in the 2009 SEET docket for AEP Ohio, it's Case No. 10-1261-EL-UNC, January 11th, 2011, opinion and order.

MR. ETTER: And, your Honor, could we ask for what purpose?

MR. NOURSE: The line of questions I had earlier and Dr. Duann was unwilling to accept a number that I read out of Dr. Woolridge's testimony subject to check, so I'd like to -- I'm not sure, your Honor, when we started taking administrative

notice of orders and I traditionally think you can cite to an opinion and order in any brief at any time, but to be safe that's my intent, that's my request.

2.2

MR. KUTIK: Just for clarification, are you citing it or you want to cite it for the proposition of what OCC's position was in that case?

MR. NOURSE: Correct. Which is what I was asking Dr. Duann about.

MR. DARR: If that's the case, I think
Dr. Duann's testimony today indicated why it's not
relevant, it goes to a totally different concept than
the notion of an ROE, and we would object.

MR. ETTER: We would object too, your Honor, on that basis.

MR. NOURSE: Well, your Honor, I think that's an argument or debate we can have on brief. We got down to the point where I was simply asking him to confirm the number and he couldn't do that.

He is the only OCC witness, he holds himself out as an ROE expert, certified ROE expert, and so I didn't think it would be that difficult to get that number in the record.

EXAMINER SEE: And I'll take administrative notice of the Commission's opinion and

1604 order issued in 10-1261, AEP Ohio's SEET case. 1 2 MR. NOURSE: Thank you, your Honor. 3 I have no further questions for 4 Dr. Duann. 5 Thank you, Dr. Duann. 6 THE WITNESS: Thank you. 7 EXAMINER SEE: Mr. Kurtz? 8 MR. KURTZ: Very briefly, your Honor. 9 10 CROSS-EXAMINATION 11 By Mr. Kurtz: 12 Q. Good afternoon, Dr. Duann. 13 A. Good afternoon. 14 The FAC fuel audit that you've referred Q. 15 to in your testimony, that case is not covered by the 16 stipulation; is that correct? 17 Α. It's not, right, it's not in those cases cited here on the cover page of the stipulation. 18 19 And the FAC fuel audit has not yet been Q. 20 decided, correct? 21 The Commission has not decided on the 2.2 2009 AEP Ohio FAC audit. 23 The ESP remand case, that is not part of Ο.

That case has been decided at the

the stipulation either, is it?

Α.

24

Commission and the stipulation does not try to resolve that case.

- Q. So that case is not part of the stipulation and that case has been decided, correct?
  - A. Yes. For the remand -- yes.
- Q. As I understood it from earlier questioning, your testimony on the rate impact and on MRO-ESP test removed a \$628 million PIR, the fuel deferral amount, from your analysis.
  - A. That's not correct.
  - Q. Do you assume that the PIR would be zero?
  - A. Yes.

2.2

- Q. Okay. And as I understood your testimony, you assumed the PIR would be zero based upon your assumption about how this fuel audit case may be decided by the Commission in the future and based upon your assumption on how the remand case may work out and be decided by the Commission on rehearing; is that correct?
- A. In evaluate the impact of the stipulation regarding the total rate, not just, you know, not base generation rate, not total generation, regarding the total rate, I removed the POLR as well as the PIR.
  - Q. Okay.

A. And the reason I removed the PIR is because I believe that that's a reasonable assumption.

2.2

Q. You removed the \$628 million PIR because you think you can predict how the FAC case will be decided in the future and you think you can predict how the remand case will be decided on rehearing, correct?

MR. ETTER: Objection. Argumentative.

MR. KUTIK: We join that, your Honor.

EXAMINER SEE: I'm going to allow the witness to answer the question. Objection overruled.

THE WITNESS: Can I have the question read back, please?

(Record read.)

- A. No, that's not correct.
- Q. Why did you -- on what basis did you remove the \$628 million PIR account?
- A. Because I believe there's a strong possibility, as I said in my testimony, that the FAC deferral balance will be zero.
  - Q. A strong possibility.
- A. But I did not -- I did not predict what will happen. That's the reason I say it.
  - Q. You think there's a strong possibility

that in the future the Commission will decide the fuel case in a way that you predict, and you think there's a strong possibility the Commission will decide the remand case on rehearing in a way that you predict; isn't that what you did?

2.2

MR. ETTER: Objection. I think that's a mischaracterization of what he said.

MR. KURTZ: I think this is an incredible piece of guesswork by the OCC's policy witness on this thing. This is one of the more incredible things I think I've ever heard.

EXAMINER SEE: Okay, Mr. Kurtz. Okay. Move on, Mr. Kurtz.

Q. Did anybody review your testimony before you filed it?

MR. ETTER: Objection, your Honor.

That's argumentative and it calls for Dr. Duann to explain internal review processes that may have confidential aspects to them.

MR. KURTZ: I'll ask another question.

Q. When OCC's management decided to not join on to this stipulation, did they rely on your opinion about the rate impact and about the MRO-ESP test?

MR. ETTER: Objection, your Honor. That goes into the settlement process and that's

1608 1 confidential. It's attorney-client privilege, trial 2 preparation. 3 EXAMINER SEE: The objection is sustained. 4 Move on, Mr. Kurtz. 5 MR. KURTZ: Those are all my questions, 6 7 your Honor. 8 EXAMINER SEE: Okay. 9 Ms. Clark? 10 MS. KALEPS-CLARK: No questions. 11 EXAMINER SEE: Mr. Yurick? 12 MR. YURICK: No questions, your Honor. 13 EXAMINER SEE: Mr. Margard? 14 MR. MARGARD: No, thank you. 15 EXAMINER SEE: Redirect, Mr. Etter? 16 MR. ETTER: Can we take five minutes, 17 your Honor? 18 EXAMINER SEE: Yes. 19 MR. ETTER: Thank you. 20 (Recess taken.) EXAMINER SEE: Let's go back on the 21 2.2 record. 23 Mr. Etter. 24 MR. ETTER: We have no redirect, your 25 Honor.

1 EXAMINER SEE: Thank you, Mr. Duann. THE WITNESS: Thank you. 2 3 EXAMINER SEE: You can step down. 4 MR. ETTER: And, your Honor, at this time 5 we would proffer those portions of Exhibit 1 that were stricken, for continuity of the record, and move 6 for admission of OCC Exhibit 1. 7 8 EXAMINER SEE: Okay. 9 MR. NOURSE: Your Honor, subject to the 10 rulings on the motion to strike, we have no further 11 objections to the remainder of Exhibit 1. 12 EXAMINER SEE: OCC Exhibit 1 is admitted 13 into the record. 14 (EXHIBIT ADMITTED INTO EVIDENCE.) 15 MR. KUTIK: Your Honor, might we inquire 16 at this time what is the company's intention with 17 respect to rebuttal? 18 EXAMINER SEE: First let's close the 19 hearing and have that conversation. 20 At this time the hearing is adjourned for 21 today, we will reconvene Monday at 10:30. 2.2 (Thereupon, the hearing was adjourned at 23 4:20 p.m.) 24 25
