Docketing Case No.: 11-0352-EL-AIR

Notes:

I am totally against the proposed rate increase for AEP. I have had to invest in a complete home generator due to the numerous outages in my area. There has been no improvements or updating of transmitting power in our area, so I don't buy the bull of preventive maintenance. There is none. My electricity bills are set up to be on a budget. In the last 5 yrs it has increased from \$148.00 per month to \$181.00 per month, that I feel is enough if not too much of an increase already. It works out to be around a 21% increase. I sure would like to get that kind of return on an investment, if I could. I think that is more than substantial for a company who shows large profits already. How rich does someone need to get to satisfy their greed? Especially on the backs of people struggling to get by today? If you honestly can sleep at night without any regrets then pass their increase, or do the right thing and turn them down. Thank you for your time and consideration. Merry Christmas.
