COMMENT DESCRIPTION:

I support AEP's proposal to set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday and respectfully request that the PUCO take immediate action to implement AEP's proposal.

Please include my comments in the docket for case nos. 11-346-EL-SSO & 11-348-EL-SSO.

COMMENT DESCRIPTION:

On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt the financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14 and modified on January 23. AEP Ohio has requested that the Commission set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved. To provide for a fair transition to competitive markets I respectfully ask that the the Commission take immediate and favorable action on AEP Ohio's petition.

COMMENT DESCRIPTION:

I request that my comments be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

I am in complete support of a fair market that encourages diversity in electric power. This competition will ensure low cost and overhead passed on to the consumer in competitive rates.

However, that cost needs to reflect the cost to use electric assets owned by utility companies within the State of Ohio. If utilities are forced to supply electric power below cost then how will we continue to maintain and improve the current electric grid. Healthy investment in the electric grid will lead to more reliability and greater electrical efficiency. Additionally, this investment leads to jobs and money spent in Ohio.

I urge the commission to consider the generation, transmission, and distribution costs that are associated with this equipment. This should not be offered at a below cost rate that may provide short term relief but a much worse long term problem.

Sincerely, David Meisner

COMMENT DESCRIPTION:

It seems to me that the PUCO and its staff can make up its mind and reach a decision after months of discussions with AEP and other concerned parties. Then some one cries about the decision; and the commission and staff reverses their position. It seems that a deal should be a deal; and a hand shake is binding - that is unless your PUCO. It is a shame that we have such incompetents in public service. How can future plans be made for the good of State-wide development if a deals not a deals - its like building a skyscraper on sand. Time for the PUCO to get its act together. The State needs you guys to fix the mess you created quickly and expeditiously. Your decisions need to account and recognize those that have already made a a considerable and significant capital and employment investment in the State. Be careful you don't create another California !!!

COMPLAINT DESCRIPTION:

I am aware that PUCO suspended AEP's recent rate increase, especially as it applies to small businesses. I own a small retail business which operates stores in 3 shopping malls in Ohio. Our store at Ohio Valley Mall in St. Clairsville was hit particularly hard with these increases. We relocated within the mall to a similar sized space as we had before. We couldn't figure out why, but our demand charge in the new space averages 70 KW compared to average of 26 KW over previous 19 months in the old, similar space. My most recent bill dated 3-1-12 must reflect the

return to old rates because it went down to only 33KW and total \$ charges were half of the previous two bills. If it would help you understand how the rate increase impacted small businesses, I have my bills for this location detailed in an excel spreadsheet covering my payments from 2/23/10 to 3/23/12. I would be happy to email that but didn't know how to attach to this form.

COMMENT DESCRIPTION:

Competition in Ohio is good but we have to allow American Electric Power to recoup the costs they incur for the electricity we need and take for granted. IT seems Competitive Retailers are coming into market and purchasing power at low prices and selling at an unfairly low rate. AEP is good for our state and I think we need to grant them some relief. Nobody bats an eye when the gasoline goes up 20 cents a gallon or the cable or cell phone bill goes up but heaven forbid when people complain it costs a bit more to heat the water in their hot tub or power the 5 flat screen TV's

COMMENT DESCRIPTION:

As a consumer and a small injection molding manufacturing business in the State of Ohio, we do not understand the changes that have taken place as of 1/1/2012 on our electric service. Due to rising costs, we elected to go with a 3rd party (Noble America) for generation of power at a fixed rate of 6.3 cents/KWH last fall. That helped tremendously knowing that we had a steady cost for the next 13 months. We have AEP for distribution only (GS2 - tariff 840) and our bill for December was \$868.01. Our January bill was \$2378.51!!!!!!!!!!!!!! We figured that bill CAN'T be

right. We called and were told that Columbus Southern and Ohio Power merged to make a more level playing field for all the customers under AEP management. Too many Columbus Southern customers were paying a penalty for power and this change is supposed to make life better for everyone. Well, we think different. As we see it, our bill increased 217% (adjusted for KW usage) with no true warning or accountability for the increases. We were told to go to the website and look at our classification and that would explain everything. All the riders, service funds and cost recovery rates spelled out on their website spreadsheet works out perfect to the bill. It did not explain ANYTHING> It just confirmed the new costs and the rate they are applied at - no explanation. The problem is that the people in charge that should be watching the cost structure in real time, seeing the bills stack up, maintenance and repair, replacement equipment, inefficiency, etc. and not enough coming in - evidently were not..... the Managers, Accountants, CFO, COO and CEO and anyone else in authority need to be fired as we see it. They play too much golf. There is no way that all of a sudden these costs that were evidently missed or miscalculated are now on the books for consumers to swallow. It is plain and simple - THEY WERE NOT DOING THEIR JOB and when you do not do your job, you get fired and replaced with someone that can> the business MUST survive. WE can see a cost increase of 5, 7, 10 even 15% across the board to make up for lost revenue or cost increases including R and D on their side because of the outdated grid, fines, plant upgrades, weather problems and everything else that goes into power generation. My god, they do run a business - I think!!!!!! and they have meetings, reports and graphs and consultants and no one saw this coming???? Anything above that we feel is just plain MISMANAGEMENT. As a small business, we could not go to one of our customers and all of a sudden tell them starting April 1st, we are going to raise the cost of your part by 217%. They would say - have the tool skidded and banded, we're coming to pick it up!!!!!!!!!!!! End of story. They will never understand how it got that far out of whack - nor would they care. They will find a new supplier that will provide them with the service and delivery that they expect and we are out of business..... We understand that the Power Company gives you data and you judge by those numbers as to what will be allowed by law. There is just no way that this is fair and equitable and I'm sure that there are alot of other customers in the same boat as we are and we have NO PLACE TO GO. We are a \$750000/1 Million dollar a year company and to add that kind of direct overhead will kill us. To have to generate an additional \$200000.00 per year in sales to pay that extra \$1500.00 per month is right now almost impossible (and it needs to be right now). If we don't pay the bill, AEP will pull the meter and we are DONE. Please review and let us know your thoughts..... Thank You for you time to review. Pat Nolan

COMMENT DESCRIPTION:

Please docket my comments to case nos. 11-346-EL-SSO & 11-348-EL-SSO. I'm asking that you would set the capacity charge that alternative suppliers pay to use AEP's generating assets at \$255/MW day until a final ESP has been approved. America in general, let alone Ohio, can not afford to loose any more jobs. Ohio is allowing other competitors to come in and take advantage of our people and companies that have long standing relationships here. I believe AEP cares and they invest money in the communities of Ohio. Won't you please reconsider and have those companies pay the \$255MW a day. Thanks for your time.

COMMENT DESCRIPTION:

I believe that competitive electricity markets can work in Ohio. But it is unfair of ruling in favor of AEP's ESP plan & then revoking it's approval. With this action that has been taken could lead to 7000 job loses in the state of Ohio and all the charity money that AEP donates to this city and state. I believe that Ohio needs to open it's eyes. Ohio isn't creating any more decent paying jobs and the lose of this company will certainly be devastating to alot of companies and families in this state. We certainly don't need that. I believe that there is a middle ground that we can find with all parties involved and we should look for a solution that works for everyone involved including the American Electric Power.

COMMENT DESCRIPTION:

11-346-EL-SSO & 11-348-EL-SSO. Please take immediate and favorable action on AEP Ohio's petition. AEP Ohio has played a vital role in the support and development of the great State of Ohio. AEP has made massive contributions to many City, Schools, Organizations, and non-profit companies. With the recent decisions of the PUCO, AEP will be forced to evaluate the necessity to continue to do work in Ohio. I can speak for many people when I say that Ohio won't want to loose a great company like AEP and AEP would love to continue to do work and contribute to the great State of Ohio.

Related to case numbers 11-346-EL-SSO & 11-348-EL-SSO:

I fully support and want to re-express to the Commission the Columbus Dispatch's editorial piece published 3/6/2012. It is important in order for electric competition in the state of Ohio to continue that the capacity charges in relation to AEP's assets be allocated evenly across all Retail Electric Providers and customer classes.

COMMENT DESCRIPTION:

Please docket this comment in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

In order to have a fair and appropriate transition to a competitive electricity market, the PUCO must work with AEP and allow them be competitive with other unregulated entities while AEP undergoes its transition. I can't believe the PUCO withdrew its Dec-Jan decision on AEP's ESP. How is it fair that PUCO wants AEP to deregulate without allowing protections to it while it transitions? Stop buckling under pressures from special interests and do the right thing!

COMMENT DESCRIPTION:

I would like my comments docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO. AEP has been a good citizen to the state of OH. I request that immediate and favorable action on AEP Ohio's petition. I am really surprised that you changed your mind after the previous approval. I would really like to understand the reasoning for such unprecedented actions. I hope that a quick and happy medium to this situation is obtained. I am trusting that you do not bend to public pressure and help AEP educate consumers as to the reasoning for your previous approval and why it was the right thing to do. We don not mind the competition just make sure we are not forced out of the game before it even starts. Please just do the right thing and make an even playing field for competition.

COMMENT DESCRIPTION:

I think the PUCO should provide an immediate favorable response to AEP Ohio's petition. They have provided extremely reliable service to me at a low cost -- I have lived in this community for 53 years. To not allow the company to charge their competitors for the use of their infrastructure is totally unfair. Please do something to remedy this situation so that AEP can continue to provide quality service and be a key contributor in this community.

COMMENT DESCRIPTION:

AEP has asked that the PUCO allow it to raise the rate that its competitors are charged to make use of AEP's infrastructure. This rate, called the capacity charge, is what AEP is allowed to charge its competitors for the use of AEP's infrastructure when an AEP customer decides to switch to a competing power company. At present, the capacity charge is lower than AEP's cost to provide the electricity, resulting in a financial hemorrhage for AEP and a gift to its competitors.

Giving generation assets away like this is against the US Constitution and does NOTHING beneficial to customers. The only ones making any money is the middleman sucking things dry at the expense of others. How can you let this happen?

I'm concerned about the future reliability of our electric service in the Columbus area based on the rate situation with AEP. It does not appear the action to reverse the rates is going to have a possitive long term impact with respects to their ability to financially operate in Ohio. Hopefully a more mutually acceptable agreement can be reached soon for the sake of reliability and Ohio jobs.

COMMENT DESCRIPTION:

I am writing today to ask you to take immediate and favorable action on AEP Ohio's petition.

AEP has fully embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities did. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost

power plants to serve our customers and avoided implementing higher market rates. That commitment cannot be changed overnight and will last three years into the future. Now competitors, most of whom don't have investments in Ohio and many who own no assets at all, want to use AEP Ohio's plants to serve our customers using an arbitrary price as a basis for paying for the use of those plants. This price is extremely low, would have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investment in Ohio.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

I do believe that competitive electricity markets can work for Ohio. We ask for a fair transition to market that includes regulatory certainty so that all Ohioans can be successful. AEP Ohio will file a modified Electric Security Plan (ESP) with the PUCO by the end of March that will outline a path toward this goal.

I request these comments be docketed in case numbers 11-346-EL-SSO & 11-348-EL-SSO. As an employee of AEP in Ohio, I encourage the PUCO to take immediate action regarding AEP Ohio's Feb. 27 motion for relief and expedited action to halt the financial losses sustained as a result of the Commission's decision on Feb. 23 to revoke its approval of the company's Electric Security Plan, which the Commission had approved on Dec. 14 and modified on Jan. 23. I request that the Commission set the capacity charge that alternative suppliers must pay to use

AEP's generating assets at \$255/MWday until a final ESP has been approved.

AEP has embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities did. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost power plants to serve our customers and avoided implementing higher market rates. COMMENT DESCRIPTION:

I would like to get my opinion on the AEP Ohio rate case heard. I do not like the fact that rates have gone up, however I do believe it is not out of the ordinary nor was it overwhelming. The cost to produce everything in this country has gone up over the last several years so it comes as no suprise that the cost of electricity has gone up to.

What I am concerned about is the audacity that the PUCO has to say a company cannot get a ROI that was promised them for investments made already. If this is what the state has come to I don't know of any company that would fall under your jurisdiction that would want to do business in Ohio. To withdrawl on an agreement because of a vocal MINORITY is unheard of. Please approve AEPs' request we cannot afford to lose more jobs in Ohio. Be part of the solution not the problem!

COMMENT DESCRIPTION:

I want my comments to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

Please take immediate and favorable action on AEP Ohio's petition to secure capacity charges at \$255/MWday and approve a fair transition to competitive power markets. I am not only a customer of AEP, but an employee as well. I understand the complexities of a regulated utility

and competitive market. AEP has been and will continue to be a corporate citizen that goes above and beyond not only for its customers and employees, but for the service territory AEP serves. Over the years Ohio has been able to enjoy some of the lowest power prices in the nation thanks to AEP Ohio. Significant investment has been made in the generating assets and their imbedded value simply cannot be turned over for pennies on the dollar to companies that operate with no assets and are not based in Ohio. This will not serve the state for the better. A fair transition to market that includes regulatory certainty is needed for AEP Ohio or significant cuts in the nearly 7,000 person workforce will be required. A fair transition to market will result increased competition for the state in the long term. That is what we need in Ohio. We do not need the transition to be a failure resulting in a much reduced competitive base for generation in the future. This approach would provide for lower prices over the next few years and much higher prices over the long term. Do not allow others to mislead you in your decision making to support their financial gain. AEP has been transparent and has laid out the facts for your evaluation. I advocate for a fair transition to foster a vibrant competitive market for decades to come.

As a resident of this state, I'm requesting that You (the Commission) provide a fair transition to

market that includes regulatory certainty so that all Ohioans can be successful.

AEP Ohio filed a motion for relief and expedited action with the PUCO to halt its financial losses sustained as a result of Your (the Commission's) decision on February 23th to revoke approval of AEP Ohio's plan, which You (the Commission) had previously approved on December 14, 2011 and further modified on January 23, 2012.

I request that You (the Commission) set the capacity charge that alternative suppliers must pay to use AEP Ohio's generating assets until a final electric security plan is approved.

THIS IS ONLY FAIR AND REASONABLE.

Again, please take immediate and favorable action on the pending petition.

COMMENT DESCRIPTION:

AEP has fully embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities did. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost power plants to serve our customers and avoided implementing higher market rates. That commitment cannot be changed overnight and will last three years into the future. Now competitors, most of whom don't have investments in Ohio and many who own no assets at all,

want to use AEP Ohio's plants to serve our customers using an arbitrary price as a basis for paying for the use of those plants. This price is extremely low, would have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investment in Ohio.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

I do believe that competitive electricity markets can work for Ohio. I ask for a fair transition to market that includes regulatory certainty so that all Ohioans can be successful. AEP Ohio will file a modified Electric Security Plan (ESP) with the PUCO by the end of March that will outline a path toward this goal.

On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt the financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14 and modified on January 23. AEP Ohio requested that the Commission set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

I ask that you please take immediate and favorable action on AEP Ohio's petition.

COMMENT DESCRIPTION:

AEP made a commitment to the people of Ohio as an electricity provider many years ago. This has provided jobs for almost 7000 in Ohio, and has been a positive footprint in many communities, not only with electric service but also assisting with crucial needs within the area through charitable donations. Our employees "give back" every single day. AEP is ready and will to continue a positive footprint in Ohio if we can move forward with a fighting chance to be successful. No company can afford to lose money every day and remain in business. I am asking the PUCO to consider the big picture and work with us to come to a solution that will benefit all parties.

This relates to case numbers 11-346-EL-SSO & 11-348-EL-SSO. I DO support AEP's move towards a deregulated environment. They should be allowed to recover the capacity charge which others are trying to disallow or at a far lower rate than needed. Treat AEP fairly and do not let the outsiders pressure the commission into hurting AEP's financial needs. Thank you.

COMMENT DESCRIPTION:

Please docket these comments in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

The recent actions by the Ohio PUC to revoke AEP's ESP is at the very least unfair and provides a decidedly unfair advantage for AEP's competitors. Further, this action will ultimately provide

for an unstable and uncertain future for not only AEP, but for all electrical consumers in Ohio as well. AEP moved forward with a its ESP in good faith, and now the PUCO has decided to hit the 'do over' button. The PUCO's actions are much like someone who enters into a contract and then reneges on the terms and conditions. How can we ever trust that person again?

If the PUCO would like to restore that trust, I would urge them at a minimum to take immediate and favorable action on AEP's petition for the restoration of previous rates.

Curtis Sharp

COMPLAINT DESCRIPTION:

I'm writing to request that the PUCO reconsider its decision on the AEP rate case. Forcing AEP to sell power into the wholesale market at a loss is not what the PUCO had intended, I understand that, but there needs to be quick and fair action to ensure the best interests of Ohio consumers are met. Others should not be able to use AEP's assets for a profit while AEP is left with the bill; this is not reasonable. Some will argue that AEP was not complaining when rates were more favorable, which is true. However, others still could have competed with AEP to

supply customers; others were not forced to operate at a loss to supply AEP's customers. Now, the market is not equitable. Any company that would lose money upon operation would immediately stop operation, but AEP does not have that luxury. The lights must stay on, and for providing that service, AEP should be compensated. Forcing a company to lose money is, well, wrong. I trust that the PUCO understands this and will remedy the situation, but I am disappointed that Ohio consumers are unaware of the consequences of their animosity towards AEP. There are worse things than having AEP in Ohio (losing to Michigan ten years in a row and having 5' of snow in a two-day period are two examples that come to mind), and I would like the PUCO and AEP to both keep that in mind during the coming months. AEP has its problems, but First Energy is no model citizen. They do, however, both represent significant forces that maintain a competitive balance in Ohio. Please do not allow one of them to undercut the other; please set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MW day until a final Electric Security Plan has been approved. AEP has provided low rates for a substantial amount of time because it opted to stay regulated and to protect its customers. First Energy, on the other hand, allowed a blackout due to a mistake on its system. I understand that small businesses are upset with the rates; my folks own a convenience store and were not too thrilled to see their latest electricity bill, to say the least. I also understand that large customers have been subsidizing small businesses for years, and at some point, enough is enough. Please work with AEP to develop a plan to allow a more moderate transition in electricity costs. Small businesses should pay their fair share, but we should provide them with more time to do so. The PUCO's decision will have far-reaching impacts, so please error on the side of completing the deal.

Thanks, Ray Phillips

Concerned citizen and AEP engineer

COMMENT DESCRIPTION:

Cases 11-346-EL-SSO & 11-348-EL-SSO

As an employee at AEP Ohio and a member of the leadership team I am appalled at the direction that this commission is taking to the value of AEP's generation capacity. AEP has dutifully invested in Ohio assets with full knowledge of the commission over the last ten years. When the

law permitting competition was passed, AEP could have moved immediately to market based rates which were well above the traditional cost based allocation in the early years. Charging at market back then could have crippled the Ohio economy. Now that the market has flipped, AEP is in a compromised position and the commission has not recognized the need to allow for an orderly transition.

Please reconsider your position on the capacity charge and other key elements. A weak AEP will cause more harm to Ohions over the long haul all for the benefit of the here and now. It is time to lead and not be held by special interests.

COMMENT DESCRIPTION:

I want my comments to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

A competitive electricity marketplace in Ohio requires as many strong electricity suppliers as possible. A market in which one player has an advantage is not in the best interests of customers.

At present, one of the state's major electricity suppliers, American Electric Power, is in a particularly vulnerable competitive position because of the recent revocation of its rate plan by the Public Utilities Commission of Ohio. Without action by the PUCO to give AEP the breathing space and rates it needs to continue to do business, electricity competition in the state could be harmed for years to come.

For a decade, Ohio's electric utilities have been transitioning away from a highly regulated marketplace for electricity toward a competitive market system. That transition is incomplete, with some utilities further along in the process than others. AEP is not as far along as, for example, FirstEnergy, one of its primary competitors.

Until a few days ago, AEP was operating under a new rate plan designed to help it transition to market competition in four years. That plan, which went into effect in December, imposed sharp rate increases on small businesses, schools, churches and some homeowners, leading to more than 1,000 complaints to the PUCO. In an unprecedented move, the PUCO simply revoked the rate plan and announced that a new plan would have to be devised, a process that could take the better part of a year.

Not surprisingly, AEP officials felt that the rug had been pulled out from under them. Their planning for years to come was based on the terms of the now-revoked rate plan.

In response, AEP has asked that the PUCO allow it to raise the rate that its competitors are charged to make use of AEP's infrastructure. This rate, called the capacity charge, is what AEP is allowed to charge its competitors for the use of AEP's infrastructure when an AEP customer decides to switch to a competing power company. At present, the capacity charge is lower than AEP's cost to provide the electricity, resulting in a financial hemorrhage for AEP and a gift to its competitors.

The company has warned that unless such losses are stemmed, it could result in job cuts among the 7,000 Ohioans who work for the company.

Also, without the capacity-charge increase, AEP's competitors will be able to make deep inroads into the company's customer base, so that even after AEP completes the transition to a market-based system, it will do so with diminished strength that will make it a less effective competitor in the future. Less competition is bad news for Ohio's electricity users.

At some point soon, AEP will have to sink or swim on its own in a competitive electricity market. But the crisis it now faces is not the result of fair competition.

The PUCO should take the steps necessary to allow AEP to hold its own against competitors until a new rate plan is agreed upon.

COMMENT DESCRIPTION:

How can the PUCO stand by its decision to revoke approval for the AEP rate plan. AEP is a large Ohio company that employs thousands of Ohio workers, whom spend millions of dollars a year in Ohio. AEP it self spends billions of dollars on Ohio goods and services and pays hundreds of millions of dollars in taxes to Ohio each year. If AEP follows through with the threat to leave Ohio, how will Ohio be able to make up for that loss, how can Ohio make up for 350 million dollars in lost tax revenue? They cant. Does the PUCO realize the financial impacts of what they are doing?

COMMENT DESCRIPTION:

Could we please have some stability as to the rate structure and forward position concerning AEP and their customers. Energy costs are an important part of the overall economic welfare of this state going forward, but so is the economic viability of our energy providers and the jobs they help create. If a move to market pricing is the forgone conclusion, then do it in a way that provides some sort of confidence in the direction. Ensure to both current and potential customers that there is fair pricing in the short and long term and that short term objectives don't create long term instability. Show leadership in how we transition and how you support the overall Ohio economic environment.

COMMENT DESCRIPTION:

The recent revocation of the AEP Ohio Rate case has caused me great concern. The very idea of revocation of AEP Ohio's rate increase after the several months of review and negotiation on the basis that the PUCO was not aware of the full implications is not excusable and has serious implications for the rate payers and the State of Ohio regarding the viability of attracting businesses and the employment. In addition it has a seriously detrimental impact to AEP Ohio. I believe your decision completely revoke a previously approved rate request is purely politically

motivated and does not actually recognize the PUCO fiduciary duties. Quick and informed modification of the rate request which was previously economically justified is imperative. Please take the necessary actions to quickly resolved the issue without resorting to some type of "ham-fisted" response which undermines the integrity of the PUCO. An interim solution which can mitigate the electric rate problems for the small minority of electric users impacted by the agreed upon rate case can be readily resloved without damaging both economic development in the State of Ohio as well as the health of AEP Ohio must be implemented

I agree with today's edition of the Columbus Dispatch editorial ("Reasonable Request") regarding the future of electric generation in Ohio. As you may be aware, our state is at a crucial moment in determining the environment for competitive retail generation where regulatory

certainty and stability are critically important in order to attract jobs and investment in Ohio.

AEP has fully embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities did. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost power plants to serve their customers and avoided implementing higher market rates. That commitment cannot be changed overnight and will last three years into the future. Now competitors, most of whom don't have investments in Ohio and many who own no assets at all, want to use AEP Ohio's plants to serve their customers using an arbitrary price as a basis for paying for the use of those plants. This price is extremely low, would have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investment in Ohio.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

I do believe that competitive electricity markets can work for Ohio. I ask for a fair transition to market that includes regulatory certainty so that all Ohioans can be successful. AEP Ohio will file a modified Electric Security Plan (ESP) with the PUCO by the end of March that will outline a path toward this goal.

On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt the financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14 and modified on January 23. AEP has requested that the Commission set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

I believe this is important to fair competition in Ohio and request PUCO approve AEP's request immediately.

To avoid lossing jobs in Ohio, please provide favorable response to AEP Ohio's petition. What AEP asking is resonable, PUCO should provide verdict favorable to creating jobs and maintaing jobs in Ohio.

Regards! Ramesh

COMMENT DESCRIPTION:

How could you make a contract with AEP and then change your mind? No negotiation, nothing, just change your mind. I wish I could do that with some of my contracts, but I can't.

You think that you are helping because you don't want complaints. Did you compare any of the complained bills to other electric bills in the state? You would have seen that AEP, which has been a lot cheaper than other utilities, will should not be punished by charging the same as them?

Well, my mom is going to lose her job because of this. You had 1000 complaints, and for that, you are willing to have 6000 families affected by losing their jobs. I sure hope the people who complained are happy now. AEP will leave and their bills will double anyways.

The joke will be on them. But we won't have the last laugh, we will be forced to pay the higher bill without the good job my mom had.

I hope that you are really happy with yourselves. You are not helping anyone with this decision, but you are going to end up hurting the entire state. You are supposed to make sure things are fair, how do you consider this fair?

Sincerely,

Maria

COMMENT DESCRIPTION:

Please docket my comments in case nos. 11-346-EL-SSO & 11-348-EL-SSO

I write you as a lifelong Ohioan who has had the good fortune to be employed by American Electric Power, a great American company headquartered in Columbus, Ohio. During my time with AEP I have served our customers faithfully, interacted with Commission staff honestly, and

analyzed the state of our business prudently with the goal of balancing the needs of our customers, regulators, shareholders, and employees so that in the end we could all benefit from the generation and delivery of reliable, low-cost electricity, a staple of modern life. I am deeply concerned that the Commission's decision to reject AEP Ohio's stipulation agreement may lead to a situation in which I will have to choose between a community I have called home for thirty-two years and an employer that has provided me with the opportunity to serve our customers in the state of Ohio for the last eight years. I know that my job will likely move to another state if the Commission does not see fit to provide a workable solution for the RPM set-aside quandary we find ourselves in today, and that I will need to choose between moving with that job and looking for another. I also know that literally hundreds, if not thousands, of my friends and colleagues who serve Ohio customers directly will find themselves without employment. Worst of all, I know that allowing our competitors to benefit from what amounts to an unearned subsidy stemming from the RPM pricing model will impair AEP's ability to compete in the future, unjustly hampering consumers with higher costs and benefiting firms that may not even own generating assets within Ohio.

I implore the Commission to grant AEP's request to set the capacity charge at \$255/MW day immediately so that we may avoid further unreasonable losses. I further ask that the Commission grant AEP's motion for relief and expedited action immediately.

At the end of the day the Commission's main responsibility is to those who consume utility services in the state of Ohio. I submit that Ohio consumers will be irreparably damaged if AEP's ability to compete is impaired and its Ohio headcount reduced. I have faith that the Commission will rule wisely in a manner that will best serve the interests of Ohio consumers. Thank you for your consideration.

Kyle Lehmkuhl Enterprise Risk Oversight Analyst American Electric Power
