Summary of Staff Recommended Conditions (see report text for discussion): • None

Projected Docket Closure Date (if automatically approved): 1 June 2014

Investigation Report

Project Description: This project involves a minor expansion of the Clark Substation (approximately 17.14%) to accommodate the installation of new equipment. Additionally, one new structure would be installed immediately outside of the expanded fence line.

Site Description: The expansion area is currently being maintained as a mowed lawn. New r-o-w is not required. Land use in proximity to the project includes agricultural, interstate highway and railroad uses. This project is located in Springfield Township, Clark County.

Discussion/Comments/Concerns: No appreciable vegetative clearing is required. The construction of this project should pose only minimal negative social and ecological impacts.
