PUCO

the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

AEP is an excellent corporate citizen in Ohio, contributing of 20 million dollars in recent years. The loss of AEP's headquarters would be a major blow to the City of Columbus. There is no sense in causing them this undue burden when all that needs to be done is to allow AEP to charge a fair market price for their product.

COMMENT DESCRIPTION:

AEP has fully embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities did. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost power plants to serve our customers and avoided implementing higher market rates. That commitment cannot be changed overnight and will last three years into the future.

Now competitors, most of whom don't have investments in Ohio and many who own no assets at all, want to use AEP Ohio's plants to serve customers using an arbitrary price as a basis for paying for the use of those plants. This price is extremely low, would have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investment in Ohio.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

I believe competitive electricity markets can work for Ohio. AEP has asked for a fair transition to market that includes regulatory certainty so all Ohioans can be successful. On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14 and modified on January 23. AEP has requested that the Commission set the capacity charge alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

Please take immediate and favorable action on AEP Ohio's petition.

COMMENT DESCRIPTION:

I am BEGGING for the PUCO to take AEP's cries for help into consideration. We cannot absorb all of these costs alone and we are bare bones right now as far as employees go. The majority of employees haven't seen a cost of living increase to take us up to current economic times, in 4 years now, so when the cost of everything around us is increasing and our incomes are not, it's a struggle. I am thankful that I have a job and at my age, I cannot afford to potentially lose my job and do not want to move away from my family and friends Your assistance can potentially make this happen.. You approved the petition to begin with, and then didn't even come back with a counter-offer allowing AEP to at least get part of their request approved. I wish for my comments to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO. There are WAY too many people in this country out of work as it is. Please don't help contribute to that.

COMMENT DESCRIPTION:

Shame on the PUCO for changing a ruling you signed off on. AEP tried to tell you prior of your own ruling that a little increase over time would be far much better than an increase adjustment all at once. AEP accepted your ruling and didn't increase electric for years. Now you are backing out of YOUR own agreement and making the public think its AEPs fault. Shame on YOU !!! I hope the PUCO & the EPA wakeup soon and quit putting the United States of America job markets out of business, due to all your ENDLESS paperwork and regulations the american people CAN'T afford. COMMENT DESCRIPTION:

As an employee AND CUSTOMER of AEP Ohio, I cannot understand how the PUCO can justify it's decision to revoke a previously unanimous decision. As with everything else, the cost of electricity is rising as a result of governmental regulations that have been imposed on the industry. As with gasoline prices, users who are concerned with costs find a way to cut back. But no one controls fuel prices, so we complain and live with them. For the past several years, AEP customers have been receiving a "discount" compared to their competitors. Now that we have to compete, we don't deserve the means to do so? Really? Go out and barter for your gas prices and

see how far you get. With the state beginning to recover from the economic crises, is it really the time to lose 7000 jobs and the tax revenue to the state? Think about it...then turn off all your electricity for a week and see how easy it is to live without the convenience. The PUCO is not in it for the good of the consumer; they're in it for the money. They obviously have no clue what they're doing to competition in the state by pulling the rug out from under the company. I'm willing to pay more for the service that I use because I understand the issue. If you don't educate the public, you should disband the organization because you'll pull this again on some other unsuspecting business, who will cease to do business in this state.

COMMENT DESCRIPTION:

I wish to have my comments to be docketed in case numbers 11-346-EL-SSL and 11-348-EL-SSO I'm looking to the PUCO to provide an immediate, favorable response to AEP Ohio's petition.

I'm a resident of Ohio and also employed by American Electric Power. I would like to continue to be a resident of Ohio for many years to come, however, the immediate and favorable response to AEP Ohio's petition is needed.

If AEP is not able to get a return on the investments made in Ohio it could cost the state thousands of jobs as AEP would need to make cuts and relocate as it would no longer be profitable to continue to operate in Ohio.

I strongly urge the commission to take prompt favorable actions towards AEP

COMMENT DESCRIPTION:

I would like to have my comments docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

While there is plenty of blame to go around, this comment is directed at the PUCO. Why would you have approved a rate plan that wasn't sustainable in the first place? The action to approve this plan and then retract it shows the incompetence of the PUCO. Your job is to serve the

citizens of Ohio. We pay you for your service and this is what you have to show for it? The whole organization should be ashamed, from the top down. Serious consequences are the result of your decisions and the leadership at the PUCO has obviously shown it is incapable of making those decisions. As a tax paying citizen of Ohio I demand better service.

At this point it is necessary that the PUCO take the appropriate steps to ensure that a fair and just outcome is achieved as soon as possible. AEP should not be left in a vulnerable position because of the PUCO's mistakes. This company has invested in Ohio for over 100 years and the PUCO should recognize the potential financial damage that its decisions have on AEP. Produce an outcome, now, that is beneficial to the consumers of Ohio without jeopardizing the future of AEP in Ohio.

COMMENT DESCRIPTION:

Please include my comments on dockets in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

I am writing to ask the PUCO to please take immediate action and approve AEP Ohio's petition that will be filed later this month.

While a healthy competitive market MAY work in Ohio, allowing competition to "buy" the generation supply at the arbitrary low capacity charge price instead of the true market price is unfair to AEP, and ultimately unfair the customer's who are offered that price. That price would only be available for a few years, and then the price would adjust to the then-market price anyway. Customer's will be significantly negatively impacted again in just a few years, and that will not look good for the PUCO or for competition in Ohio.

AEP Ohio has been a good corporate citizen for decades. They deserve to be treated fairly in the matter. To revoke a decision that the PUCO approved just a few months earlier is unfair to AEP and its shareholders. That decision in and of itself is disappointing. But, what's done is done. You should at least show some respect for those actions by allowing AEP Ohio to charge a fair market price for its generation supply until the final ESP has been approved. Let's not make matters worse for many Ohioans. And I am not just talking about AEP employees. If AEP is forced to make significant cuts, it will undoubtedly have a negative affect on many Ohio communities, businesses, and charities. This can all be avoided if swift action is taken by the PUCO on this matter.

Thank you for consideration on this very important matter for Ohio.

Mike Rozsa

COMMENT DESCRIPTION:

Please take positive action on AEP Ohio's petition. This is one of the few Ohio energy companies that has actually built and keeps, assets here. Causing financial hardship to one company for the quick benefit of other companies is just as wrong as stealing out of a drawer, and it sends an unclear message to other investors about what happens to them when they invest in Ohio.

COMMENT DESCRIPTION:

Docket in cases 11-346-EL-SSO and 11-348-EL-SSO

I strongly urge the PUCO to take immediate action in the AEP petition to allow AEP Ohio charge a fair and necessary rate for generating assets until the final settlement is made. I would also like to register my complaint that the PUCO took the unprecedented steps of revoking an approved rate plan.

Competition is necessary and we must allow AEP to charge rates that cover the costs of generating electricity and making a fair profit. The actions of the PUCO have instead given unfair advantage to AEP's competition.

No one likes higher electric prices, just as no one likes higher gas, oil, and food prices. But in today's world, electricity is still one of the best bargains we have.

AEP has been a good corporate citizen to the state of Ohio and the city of Columbus. As Ohioans, we need to make sure that our rules and regulations encourage good corporate citizens to remain in the state and not take their jobs, people, and community support to other states that would surely welcome them.

I strongly urge you to grant AEP an immediate increase in the generating capacity charge to help keep them competitive with other electricity suppliers.

COMMENT DESCRIPTION:

Today's edition of the Columbus Dispatch included an important editorial ("Reasonable Request") regarding the future of electric generation in Ohio. As you may be aware, our state is at a crucial moment in determining the environment for competitive retail generation where regulatory certainty and stability are critically important in order to attract jobs and investment in Ohio.

AEP has fully embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities did. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost power plants to serve our customers and avoided implementing higher market rates. That commitment cannot be changed overnight and will last three years into the future. Now competitors, most of whom don't have investments in Ohio and many who own no assets at all, want to use AEP Ohio's plants to serve our customers using an arbitrary price as a basis for paying for the use of those plants. This price is extremely low, would have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investment in Ohio.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

I do believe that competitive electricity markets can work for Ohio. A fair transition to market with regulatory certainty can be successful for all Ohioans.

On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt the financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14 and modified on January 23. AEP requested that the Commission set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

I am requesting that the PUCO take immediate and favorable action on AEP Ohio's petition.

COMMENT DESCRIPTION:

I implore you to please implement a favorable action on AEP Ohio's petition to raise the rates that AEP charges its competitors to use infrastructure that AEP owns.

AEP employs 6,247 people in Ohio, which translates to \$300 million plus in taxes for the state of Ohio. American Electric Power also makes substantial charitable investments in Ohio totaling

more than \$200 million dollars.

The decision made by PUCO to reverse there decision on February 23rd for AEP Ohio's rate case will be detrimental to the state of Ohio if an agreement is not made.

I've lived in Ohio all my life, and would hate to see these jobs go to another state with the economic recovery in being so tenuous. Ohio was so hard hit with job cuts; it would be a crime to send more jobs out of state.

For PUCO to revoke a rate increase that it had already approved due to complaints received, indicates they're being influenced by outside pressure. I was under the impression that the PUCO was un-influenced by consumer and political pressure and was suppose to create a fair playing field for all.

Now a good company that's been part of contributing to Ohio for years is indicating lay-offs. Were the ramifications of the reversal of this ruling even considered? Does this seem like a fair deal for all?

I think not.

COMMENT DESCRIPTION:

Dear Sir/Madame, While you will likely view this as a 'biased AEP employee' writing you, I can only say that many of my family and friends were subject to the rate increase by AEP, therefore I do not consider myself to be unimpacted by AEP rates.

I am a 'student' of competitive markets, having participated in them for over 15 years. During

any transition to a competitive market, there are typically costs that cannot be recovered, via the new market construct. Most of defined these as 'stranded costs.' Unfortunately, they are a natural progression to the the transition to market rates. In this case, the PUCO has elected to chose the PJM RPM capacity rate as the rate in which capacity is charged to people switching suppliers, as opposed to AEP's actual cost of generation, which has served Ohio customers economically for decades. The current capacity rate is and will become far to low to adequately compensate AEP for the costs of their investments for Ohio customers. As there are fewer AEP customers to help compensate for these charges, their charges will increase, and there will be a snowball impact to rates until AEP Ohio has no customers. This loss of customers is NOT due to competition, but are due to the ignoring of reasonable transitions to a competitive market transition.

Thank you for your time. Brock Ondayko

COMMENT DESCRIPTION:

Its extremely important that PUCO provide a level playing field to AEP. I realize that large rate increases are difficult for everyone to absorb but supply deregulation and enviromental requirements are a product of governement actions and not the result of arbitrary rate increase requests by AEP. Without a fair increase in rates, the quality and quantity of future service in Ohio will suffer to the overall detriment of both businesses and individuals. Thanks for your consideration.

COMMENT DESCRIPTION:

Please docket my comments in case nos. 11-346-EL-SSO & 11-348-EL-SSO. I'm writing today to urge you to grant AEP's motion for expedited relief. Although I obviously have a personal financial stake in this company's financial well-being as an AEP employee, I am FAR more concerned about the loss of charitable giving that this community will endure if AEP is not granted the relief it requests. Charitable dollars will be the first to be cut, and AEP supports SO MANY organizations that quite literally count on AEP for substantial portions of their budgets

each year. The resulting blow to the social service, education, arts, and other nonprofit sectors will be difficult to quantify, but certainly devastating, particularly in a time when overall charitable giving is already severely limited. As an AEP employee, I've always been proud of our strong record of supporting community and charitable causes. Please help us continue those efforts. Thanks.

COMPLAINT DESCRIPTION:

Dear Sir or Ma'am. I'm writing you to 'complian' about the one sided treatment AEP is receiving from the PUCO in relation to pulling the legal agreement that has been agreed upon/implemented already and now pulled out from under us. Your organization needs to seriously reconsider how it does business in the future. I'm sure you would not appreciate AEP or another utility doing the same to you even though now you now have set this prescedent. The amount of work and

uncertainty the PUCO is generating within AEP is not appreciated one bit by myself or my co-workers. We have a history of providing low cost power to our customers that not only I enjoy, but my extended family, and my neighbors. Case in point is that I joined AEP from Dayton, OH (DP&L), my neighbor came from Dayton, OH (DP&L), and my Father-in-law moved from Mansfield to Lexington, OH (Toledo Edison). All of us experienced a substantial monthly price reduction that we now enjoy. Please do not tell us that we are too high because we already know the truth. Instead, educate those who are complaining to you what the other companies are charging and give us all the time we need to figure out how to lower our costs and compete in a competitive market. Sincerely, Steve Austin

COMMENT DESCRIPTION:

Please docket my comments on Case#'s 11-346-EL-SSO & 11-348-EL-SSO

I request that you act immediately on a favorable resolution to AEP Ohio's petition for rate relief. I feel very strongly that the PUCO's decision on Feb 23 to revoke it's prior approval of AEP's rates is proving to be a very harmful decision to AEP Ohio in particular, AEP in general and

ultimately to the PUCO and state of Ohio's decision to move to a fully competitive market in our state.

Much like AEP supports the EPA's goals of cleaner air and water, AEP Ohio supports the state of Ohio's goal of competition. Both of these goals are obtainable, but neither goal can be reached short term, and neither goal is without significant risk. The costs associated with each are astronomical and put AEP's financial well being at stake. AEP Ohio has made huge investments in power plant and wires infrastructure within Ohio and has been an outstanding corporate citizen both in the communities it serves as well as in the capital city.

The energy companies who want to compete 'now' have made no such investments in our state, and may leave as quickly as they arrived. They have no interest in being the provider of last resort and certainly have no plan in place to do anything other than to 'piggy back' onto AEP's hard earned assets.

Please take immediate action to set the capacity charge for the use of AEP's generating assets at \$255 per day until a final ESP has been approved. Just as importantly, please work in good faith with AEP Ohio to resolve the rates issue and let's moved forward with certainty to a competitive model in Ohio.

COMMENT DESCRIPTION:

I write with respect to case nos. 11-346-EL-SSO & 11-348-EL-SSO, and hereby request that my comments be docketed in these cases.

For the record, I am a customer of AEP Ohio, and an employee of AEP. I write today to express my deep concern about the recent decision by the PUCO with respect to AEP ohio's ESP plan.

The consequences of this actionb are sure known to the members of PUCO. It's hard to even understand how this decision alligns with the state of Ohio's stated goal of creating an environment condusive to job creation and retention. Here we have a company that has and continues to employ many in Ohio, participates in it's communities in many ways, being treated so unfairly, it's hard to understate.

However the case may be. I believe and strongly urge the commission (PUCO) to take immediate action to grant AEP's request as stipulated in the above mentioned cases (case nos. 11-346-EL-SSO & 11-348-EL-SSO) before the PUCO. This will be nothing short of an attempt to restore some fairness towards AEP, as well as some hope in the commission's ability to handle the issue at hand.

Respectfully, Emmanuel Fombang.

I want my comments to be docketed in case nos. 11-346-EL-SSO and 11-348-EL-SSO As a customer and an employee of AEP I find your decision to reverse what you ALL READY approved ridiculous and totally unprofessional. The fallout of this whole mess is on AEP's shoulders due to your inability to do your job. Now the risk of Columbus and me losing AEP as an employer is on your shoulders. I respectfully ask that you at the very least, set the capacity charge that alternative suppliers must pay to AEP to the requested 255/MWday until the final

ESP has been approved. I respectfully request that when the final ESP is approved that you do your job this time and approve a plan that you are willing to stand behind. I love my job and this company. It pays me a good, fair salary so that I can pay my taxes, bills, and support the community I live in. In addition through AEP I volunteer in the schools and other events they sponsor in the area. It would be a huge loss to me and this city if you did not support AEP in this.

Sincerely,

Betty Lou Magnuson

Please come to an agreement with AEP regarding the rates and Choice providers, who are very rude and would do anything to take our customers. We all need our jobs at AEP...Please take this into consideration, that many other things and programs could be cut, so we can keep our jobs. A big one would be PIPP.

Sincerely, Marianne Seitzinger AEP employee

COMMENT DESCRIPTION:

Please add my comments to docketed case nos. 11-346-EL-SSO & 11-348-EL-SSO.

I don't see how this decision by PUCO is profitable for OHIO. With a fragile economy and unemployment at an all time high this does not seem to be the best course of action. I don't know if this is a way for big businnes to make a statement or if it is truly not thought through as a long term solution. I am new to Ohio and like living here but do not see how this descision is benefiting me in the long term.

COMPLAINT DESCRIPTION:

These comments to be docketed on case #346-EL-SSO & 11-348-EL-SSO. My complaint is directly to the PUCO, the actions they have taken towards AEP and the changes you have forced AEP to make to its pricing structure. I am not a business man, nor do I have the time to spend on becoming a utilities expert. It is VERY clear however that PUCO approved a plan that AEP was following, willing to work with, and now PUCO has made a knee jerk reaction causing the loss of millions (?) to a company that has grown in and supported Ohio for many years. PUCO made

this mistake, if there is one, you should clean it up and not at the expense of the public or AEP. Take care of this issue NOW. Quit using your power to harm an Ohio company that has an outstanding past with working with other ridiculous government agencies. Our government is forcing AEP and companies like them to purchase power from impractical and expensive sources, pushing outlandish regulations, and placed large burdens on them to modify power plants, yet expect no raise in utility cost. All of this is based on the agenda's of a government that is failing its people. Big government took a hit last election, and all I can hope is it takes another one next election. Then maybe we can get away from the true waste of cost to the people, organizations such as PUCO, EPA, and thousands of others. What you people have done in this situation is unprecedented, and inexcusable. Chase another good company out of Ohio, I am starting to like the idea of living on an unemployment check. I have an idea, lets close the doors at PUCO and let the free market have its way, a looonnnnggg time ago some people created a great country with crazy ideas like that. I apologize if my email is incoherent and abrasive, I do not partake in contacting agency's often. Contrary to my previous comment, I have a job, that I am at now, I work hard to keep because I do not wish to be a burden on my fellow tax payers. I do not have time to contact every agency of our government that makes ignorant decisions. This topic caught me at a bad time, and I do feel this complaint will fall on deaf ears, I will get a cute little email thanking me for sending it, but the big government machine will just keep rolling. All I can hope is if AEP leaves Ohio and 1/3 or hopefully 2/3 of you will lose your job. That, I would be glad to pay for.

COMMENT DESCRIPTION:

I would appreciate my comments be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO. This is a plea to the commission to be fair and reasonable by reviewing AEP's Ohio petition quickly as possible and rule favorable. The consequences of delayed and unfavorable action will continue to negatively impact the AEP employees within Ohio that are long standing residents in the State, that work in the State (and Cities) and must importantly have established their families livelihood. Within the Canton area the opportunity of finding a job with comparable wages and benefits do not exist. I personally hope the commission takes into account that Ohio AEP employees also are taxpayers, voters, customers, etc, too and a nonfavorable decision will continue to spiral unfavorable consequences.

COMMENT DESCRIPTION:

To Whom It May Concern:

As a citizen of the state of Ohio, a utility customer, and an employee of American Electric Power, I am writing to you today to protest your February 23rd decision to revoke approval of AEP's Electric Security Plan (ESP). It is certain that you are aware that the PUCO had approved

this plan only two months prior. How a regulatory commission could stumble so egregiously in its judgment is beyond my comprehension.

The PUCO, simply put, is failing in its mission. The PUCO is NOT "fostering competition by establishing and enforcing a fair competitive framework for all utilities." The PUCO is NOT "promoting utility infrastructure investment through appropriate regulatory policies and structures." The PUCO is NOT "ensuring financial integrity and service reliability in the Ohio utility industry."

The PUCO, through its decisions, has damaged AEP's reputation, its financial well being, and its future investment in the state of Ohio. AEP, on February 27th filed a motion for relief and expedited action to halt financial losses associated with the PUCO's revocation of the previous ESP. The PUCO would further fail the state of Ohio if it does not grant AEP this relief until a final ESP can be approved. It is my hope that all affected parties can reconcile a suitable and fair agreement in the final ESP that best benefits the state of Ohio, including ratepayers and American Electric Power.

Sincerely,

Eric J. Lowe

COMMENT DESCRIPTION:

This has been an issue that has been on my mind since the passing of the original rate case. AEP has been "thrown under the bus" from PUCO on many issues concerning this case. I have emailed the governor and explained to him, that although him adding an additional 250 jobs to Ohio recently, does he really think that will come into view if over 6,000 employees leave the State of Ohio and move elsewhere with AEP. There are many of us that feel as though this situation was handled Inappropriately by PUCO. Nevermind all of the man hours (storm

restorations) and volunteer work that is performed yearly by AEP employees you forget WE as a team keep the lights on, All of that will all be gone, and someone elses problem if we move our home office to an new state, and I am positive that other states would love to have that kind of revenue/leadership within their communities and not be "thrown under the bus" by people that work for their "PUCO". If the people that works at PUCO did not understand what tariffs and rates were. They have no business in that position. As a tax payer in Ohio and a long life resident I am ashamed that the people working for PUCO is that uninformed on how utilities actually work and that it costs AEP alot of money to run such a business even more now with the EPA and the new rules recently provided and expected to conform by AEP. Find someone that does understand those terms and what it does to small businesses and residential people. And how can a company such as HUSKY energy have a 175% ROI for 2011 and them not even be looked at as PRICE GOUGING, or doing anything inappropriately. THAT IS UNAMERICAN!!! Especially since the owners there aren't even American. Our problems here in Ohio are WAY deeper than high rates on electric bills. And what minimal programs does HUSKY even do for Ohio? I don't see nearly as much as what AEP does for Ohioans from HUSKY.

COMMENT DESCRIPTION:

Please docket these comments in case nos.11-346-EL-SSO & 11-348-EL-SSO AEP rates have been historically some of the lowest in the state and in the nation. As the state moves into competitive generation it seems to me this transition should be fair and reasonable, for the benefit of consumers and the companies providing the service. Allowing the use of AEP generation plants by other companies to serve AEP customers at such low and arbitrary prices is tantamount to buying a taxi cab and giving free rides in it. Undoubtedly, the taxi cab company will be bankrupted, there will be no investment in new cabs and everyone will be walking. I urge the Commission to waste no time in setting these interim generation charges at the FAIR and REASONABLE rates AEP has requested. Thank You

COMMENT DESCRIPTION:

I would like my comments to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO. To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

I do believe that competitive electricity markets can work for Ohio. I ask for a fair transition to market that includes regulatory certainty so that all Ohioans can be successful. AEP Ohio will file a modified Electric Security Plan (ESP) with the PUCO by the end of March that will outline a path toward this goal. Swift and fair action needs to be taken. AEP donated more than 88 mil last year to Ohioans. AEP employees more than 8,000 people in central Ohio. These people have a large impact on Central Ohios economy.

Sincerely,

COMMENT DESCRIPTION:

I read the Editorial "Reasonable Request" in the Columbus Dispatch and have to agree with them. I think that it was unfair for the PUCO to renege on the rate increase that was negotiated and agreed upon by the PUCO and AEP. This is BAD business and doesn't reflect well on the PUCO. The PUCO is also sending a signal to ALL utilities that the PUCO will not agree to a fair rate of return on the Utilities investments, even when the investment is mandated by Federal Regulations. By not providing a fair rate of return on investments, these utilities will be forced to no longer invest any additional capital in the State of Ohio. Ohio needs a means to promote capital investment and jobs in Ohio; not turn them away.

COMMENT DESCRIPTION:

As an employee of American Electric Power and a customer within AEP's service territory, I am extremely concerned by the PUCO's recent action to revoke AEP's approved rate plan and revert back to previous pricing. Rate cases are extremely time consuming, expensive, and are passed for good reason. In this case, a 3+ years long plan to FINALLY allow AEP to become fully competitive in Ohio which may not be "popular" with the general consumers who have little understanding of what it takes to generate, transmit, and distribute electricity to their homes and

businesses. Instead of giving in to peer pressure and complaints, try educating consumers and making the playing field level for all electric utilities, not just some.

"For a decade, Ohio's electric utilities have been transitioning away from a highly regulated marketplace for electricity toward a competitive market system. That transition is incomplete, with some utilities further along in the process than others. AEP is not as far along as, for example, FirstEnergy, one of its primary competitors." - The Columbus Dispatch 3/6/2012

The PUCO must take immediate action to rectify the poor decision to revoke AEP's rate plan by setting the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

Sincerely, Shannon Dunaway, AEP Employee AND Customer

COMMENT DESCRIPTION:

I would like to comment of the AEP cases currently before the commission (11-346-EL-SSO & 11-348-EL-SSO. I encourage the commission to act quickly to resolve this case. After careful review the PUCO approved a plan in December that could have been tweaked to address a narrow set of concerns by a small number of customers, however it chose to throw out the entire case and put a public company and the state of Ohio electric market in dire straits. While AEP is a regulated entity, is not a social pawn that should be gutted by bad public policy. That answer serves no one well, including the state, AEP and other electric providers. Other companies in the

electric market should also feel the chill of this decision. If the PUCO can complete such a capricious act, who says they would not do it to the others in the market. If AEP moves, is put out of business or has a low rate of return, what company in their right mind would invest to take their place? AEP deserves to earn a competitive rate of return based upon prudent investments and a fair transition to a competitive market that was afforded other companies. Allowing other companies to succeed on the backs of AEP Ohio just because it curries political favor that helps a small group serves no one well. While this decision may be difficult and at some point may adversely affect rates, that is the charge of the PUCO and competition was a path the PUCO chose over a decade ago. The PUCO is supposed to make decisions that are the public's interest, not in the interest of few. While there may be some that are hurt by a decision, the term "public" means everyone in Ohio is collectively better than they would have been. That you didn't like the answer for AEP, or a small group of customers or suppliers, throwing out the case is bad public policy and endangers many aspects of the electricity markets in Ohio. Quick resolution that maintains a strong public company and moves the state toward an orderly deregulation is in the best interest of the state. Putting AEP in dire financial straits simply raises their cost of doing business in the market (e.g. borrowing money) and further hurts Ohio ratepayers. Letting this issue linger puts a strong institution at risk, lowers confidence in the state of Ohio to govern, hurts our economic development, and makes the PUCO look further incompetent. If the PUCO wantst to become a social engineering organziation, do that in another way than through rate making. Do the right thing and approve the latest request by AEP, provide AEP a fair rate of return, support a deregulated environment that is fair to all, allow a public company to do with their assets what they are legally able to do and restore confidence in the state of Ohio.

COMMENT DESCRIPTION:

Please docket these comments to case numbers 11-346-EL-SSO & 11-348-EL-SSO related to AEP Ohio.

For the last decade, AEP has cooperated with the PUCO in trying to maintain low cost rates while other provides have separated assets and moved to a market model. Now that AEP is

trying to do the same thing (at the desire of the PUCO by the way), the company is being placed in a financially unstable position by having rates approved and then rescinded. This has already resulted in substantial financial losses and placed all future plans in jeopardy.

In order to provide a level playing field, the commission must approve AEP Ohio's petition to adjust the capacity charge to \$255/MW day so that AEP is not forced to operate the generating units at a loss. Without this approval there will be instability which will impact the ability to attract jobs and investment in Ohio.

I would like my comments to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

To whom it may concern,

I respectfully ask you to emphatically rule immediately and in favor of AEP with regards to the

recently submitted AEP Ohio petition (case numbers referenced above). AEP has been an important partner to Columbus and Ohio for decades. Without the investment and employment AEP has provided in Ohio, I'm not sure where our state would be. They have always worked with the PUCO effectively to provide some of the least expensive electricity in the country to Ohio residents. The transition to a deregulated market can't be done overnight. It is like turning the Titanic. I don't feel that the magnitude of what AEP is being asked to do has been fully recognized by the PUCO. It will take a carefully crafted plan and most importantly, trust, between PUCO and AEP to make the transition to a competitive electricity market in a way that benefits the electricity customers. The plan submitted by AEP is in the best interest of Ohio's utility customers to ensure that the most important electricity provider in the state remains here, providing electricity for a long time to come. Without AEP's generation, the electricity supply in Ohio is dramatically reduced which will lead to higher prices. Catering to other entities who aren't nearly as vested in the community as AEP is a poor decision. Please remember, 7,000 of the ratepayers who will be affected by the electricity prices are also AEP employees. They care about their neighbors and family members who would be affected by an unfair electricity plan. They don't want that. Most importantly, the AEP plan should be approved because Ohio is competing against 49 other states for jobs and business development. A regulating agency that does not honor an approved electricity plan paints the picture of an Ohio that is not busy friendly, has regulatory uncertainty, and is borderline dysfunctional. We need to get that shored up as soon as possible- it is hurting our state. It is now up to the PUCO to approve this fair deal that shows Ohio is a place where you should want to move your business, Ohio is a place that appreciates and values companies like AEP that provide so much to the state, and Ohio is a place with a clearly defined path to prosperity.

Thank you for your time and consideration in my request,

COMMENT DESCRIPTION:

Please have these comments docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

As an employee (not a manager) at American Electric Power, I'm deeply concerned about the recent action that the PUCO has undertaken in Ohio. I was fortunate enough to be able to witness the POLR charge hearing last summer, and I found the hearing format to be reasonable, chaired

by a reasonable person, and had the impression that the PUCO was well organized, fair, balanced, and had the interests of all parties concerned in mind.

When the Commission, then, buckled to public pressure and completely revoked AEP's ESP filing recently, I was truly shocked by this apparent lack of direction, commitment, and focus.

First, I'm utterly baffled by the fact that the corporate separation of our generation units from our wires company was overturned, and have a difficult time understanding how this could potentially be bad for consumers. Second, I'm still trying to grasp this fact: AEP is somehow expected to transition to market immediately. The Commission may not know what AEP charges its operating companies for generation sourced in Ohio, but at the requested rate of \$255 per megawatt-day, you can trust me when I say that this is already deeply discounted. This is the kind of discount you would be thrilled to receive on anything else! Asking the company to provide generation to CRES providers at market rates - instantaneously - will cause heartburn for a lot of people, consumers and employees alike.

Let's say that you own a lot of power plants. You pay significantly more than \$255 per megawatt-day to generate your electricity. If someone offered to pay you \$17 per megawatt-day, you would probably rather shut the plant down and lay off the people who work there - it would be far less expensive than losing hundreds of dollars per unit sold. I'm not saying that this is what AEP plans to do - I have no knowledge of our contingency plans. But that's what I would do.

One of the perils of moving to market is that it can be extremely short sighted. Of course everyone wants the market rates when the market rates are low! But if power companies across the nation have to shut their plants down in order to stop hemorrhaging money, demand will exceed supply and the consumers will wind up sitting around in the dark. On the positive side of this, think about how much money they'll be saving! Personally, though, I'd rather have the lights on.

During about nine months out of the year, I pay less on my electricity bill than I do on my cable bill - and anyone who is reading this that does not have an all-electric household stands a good chance of being able to make the same statement. I don't even subscribe to premium channels! My point is this: at the prices that AEP is charging - even with the new rate structure - electricity is a far better value to me than anything else I pay for.

Finally, the difference to the consumer between paying \$17 per megawatt-day and \$255 per megawatt-day on a typical household usage of 1,000 KWh (1 MWh) per month is approximately (you can check my math): \$9.92. That might break the bank for some people, but I think most of us have spent that at Starbucks or McDonalds at one time or another.

Please allow AEP to make a graceful transition to market. We have been the low cost energy provider in Ohio for many years, and our rates are still among the very best in the state. Weakening any utility will result in less competition, higher prices, and indefinitely stalled economic growth in the state of Ohio. A strong AEP will provide strong competition for all utilities, and strong competition is what the market needs in order to benefit consumers, small businesses, and industry alike. Thank you.

I believe that competitive electricity markets can work for Ohio, if there is a fair transition to market that includes regulatory certainty so that all Ohioans can be successful. On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt the financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14 and modified on January 23. Please take immediate and favorable action on AEP Ohio's petition.

COMMENT DESCRIPTION:

I want my comments to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO. I'm asking the PUCO to take immediate and favorable action on AEP Ohio's petition.

AEP has fully embraced the state's decision to move to electricity competition and is prepared to move forward through a fair and reasonable transition much like other utilities did. During the

last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost power plants to serve our customers and avoided implementing higher market rates. That commitment cannot be changed overnight and will last three years into the future. Now competitors, most of whom don't have investments in Ohio and many who own no assets at all, want to use AEP Ohio's plants to serve our customers using an arbitrary price as a basis for paying for the use of those plants. This price is extremely low, would have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investment in Ohio.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

I do believe that competitive electricity markets can work for Ohio. I ask for a fair transition to market that includes regulatory certainty so that all Ohioans can be successful. AEP Ohio will file a modified Electric Security Plan (ESP) with the PUCO by the end of March that will outline a path toward this goal.

On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt the financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14 and modified on January 23. I request that the Commission set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

Docket Comment to case no.:11-346-EL-SSO & 11-348-EL-SSO

AEP takes on risk to secure billions in financing in order to install pollution controls and meet clean air standards. AEP also operates a fleet of power plants and thousands of miles of distribution line at a significant cost. AEP, a publicly traded company, needs to attract Wall

Street investment in order to generate the funding needed to provide the inexpensive electricity that Ohioans have long enjoyed. Therefore, AEP needs to make a profit and AEP has the right to make a profit. Corporations across the United States have the right to discontinue non-profitable ventures and Wall Street expects them to take this corrective action. However, AEP, by law, must provide electric service in Ohio. Yet, per PUCO, AEP is required to sustain non-profitable operations. This is not fair, not in the best interest on Ohioans, and highlights irresponsible leadership in Ohio and at PUCO. It is clear that PUCO leadership does not understand their responsibilities and the time for PUCO leadership replacement is now. Regardless, at a minimum, emergency action to approve of the current AEP petition is needed.

Docket my comments in case nos. 11-346-EL-SSO and 11-348-EL-SSO.

Please take immediate action approving AEP Ohio's petition filed on February 27, 2012 requesting approval to charge alternative suppliers a capacity charge of \$255/MW-D. AEP Ohio supports the PUCO's goal of moving to a competitive market in its service territory. It is only reasonable that this goal be accomplished over a time period that allows AEP to adequately plan for and implement the transition.

Good Afternoon, I am writing to ask you to please take immediate and favorable action on AEP Ohio's petition in the above mentioned cases. I believe AEP is supportive of the state's decision

to transition to a competitive market, however, it needs time to do so properly. The impact of recent decisions, as you know, have extraordinary consequences for thousands of workers at AEP as well as a trickle down effect to many suppliers and other stakeholders in the entire state of Ohio. Every day this issues remains unresolved increases the likelihood that AEP will be required to take significant action to reduce its operating expenses to a level that is sustainable...that means cutting jobs. I urge you to please consider approving AEP's petition until a final decision can be made. Thank you.

COMMENT DESCRIPTION:

Regarding case numbers 11-346-EL-SSO & 11-348-EL-SSO

I am a proud AEP employee and have been for the last 11 years. I value this company greatly. The thought of uprooting my family, which includes 3 young sons, is heart-breaking. I work in Commerical Operations with some of the most talented and likeable people. I imagine their

thoughts of moving to another state or finding another career in central Ohio mirror my own. My husband also works for AEP. He chose this company because of its reputation as a solid and respectable presence in Columbus. It seems like such an unfair turn of events in the last month. AEP had received approval for the ESP plan then unexpectedly it was revoked. I ask as an AEP employee and a central Ohio resident that the PUCO reconsider their actions and reinstate the decision that was reached on December 14, 2011 (modified January 23). I fully agree with the quote from yesterday's Columbus Dispatch Editorial: "The PUCO should take the steps necessary to allow AEP to hold its own against competitors until a new rate plan is agreed upon."

Thank you. Michelle Rutledge

COMMENT DESCRIPTION:

OHIO I would like my comments to be docketed to cases 11-346-EL-SSO & 11-348EL-SSO.

Please take immediate and favorable action on AEP Ohio's petition.

Thank You.

COMMENT DESCRIPTION:

AEP's competitors, most of whom don't have investments in Ohio and many who own no assets at all, want to use AEP Ohio's generating plants to serve the consumers using an arbitrary price as a basis for paying for the use of those plants. This price is extremely low, would have severe and immediate financial consequences for AEP, and could lead to unstable conditions for future investment in Ohio. I believe that there must be a way to maintain the viability of businesses within the state of Ohio without destroying a company like AEP that has given so much back to the city of Columbus and to the state of Ohio. Please support AEP and not let other utilities take advantage of AEP and ultimately the state of Ohio.

COMMENT DESCRIPTION:

I am writing to express my support of the recent petition submitted by AEP. I have lived in 3 different states (not counting Ohio) and AEP has without a doubt had the cheapest rates and the best overall service of any of the utilities in the other 3 states. I am also concerned about the long term impacts that your recent ruling will have on our rates in the years to come, as well as the impact this will have on central Ohio and the state of Ohio as a whole. Having moved back to central Ohio 8 years ago, I have been truly amazed to see the amount of money and time that

AEP commits to our local communities and charities. While AEP is certainly not perfect, losing them and all of the positives that they bring to our state would be devastating for Ohio. I am also extremely skeptical that any of their competitors will make the same investment in Ohio as AEP has done over the years. They have been an excellent corporate citizen and deserve better than what the PUCO has done to them in recent months. Make the right decision and do what is best for Ohio!!
