PUCO

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

Let's be one of the states that gets electricity competition right.

Thank you, Karl E Maki

COMMENT DESCRIPTION:

Please include my comments in dockets for case numbers 11-346-EL-SSO and 11-348-EL-SSO. I'm requesting that the PUCO take immediate and favorable action on AEP Ohio's petition to set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

COMMENT DESCRIPTION:

Please docket this comment in case nos. 11-346-EL-SSO & 11-348-EL-SS.

I do believe that competitive electricity markets can work for Ohio. We ask for a fair transition to market that includes regulatory certainty so that all Ohioans can be successful. AEP Ohio will file a modified Electric Security Plan (ESP) with the PUCO by the end of March that will outline

a path toward this goal.

Please take immediate and favorable action on AEP Ohio's petition.

Thank you.

COMMENT DESCRIPTION:

I want my comments to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO. Competition in Ohio cannot be successful if all parties are not treated with equity. Unlike many of their competitors in the retail market, American Electric Power has invested infrastructure and jobs in Ohio to assure the consumer's electric needs are met. Asking them to continue to supply this infrastructure at a price below their cost to do so is unfairly subsidizing the profits of those competitors. The commission must allow those companies willing to invest in the future of Ohio to make a reasonable return on their investment until the competitive market is fully integrated and should put in place interim rates that allow AEP transition to market with regulatory certainty and without putting them at an unfair disadvantage of having others reap the benefit of their investments.

COMMENT DESCRIPTION:

Please docket these comments to Case Nos. 11-346-EL-SSO & 11-348-EL-SSO:

I request the Commission to promptly take favorable action on AEP Ohio's petition set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved. The lack of the capacity charge increase will provide AEP's competitors an unfair advantage to deplete the company's customer base and will severely impact AEP's financial status.

COMMENT DESCRIPTION:

This is a comment concerning the recent reversal of the AEP rate plan that the PUCO made. I don't understand how you expect AEP to transition from a regulated utility to a non-regulated utility when there are so many variables changing that the public Utility of Ohio is causing. AEP is a company, meaning they are in this business to make a reasonable amount of money, and when they cannot get an estimated rate of return on there capital, AEP suffers. I am writing you to state my complaint during this transition period and in the future please be aware of your actions and the impacts that those actions could impose on Ohio employees of American Electric Power.
