COMMENT DESCRIPTION:

I feel that everyone needs to be on a level playing field where the deregulation of electricity in Ohio is concerned. It is not fair for AEP to have to shoulder more of the burden than anyone else in the game...especially after being a good steward of electricity in Ohio for so many years. I feel also that once a decision is made, it should not be arbitrarily changed without the input of all parties concerned. The economic future of Ohio is at stake and all the care and consideration possible should be put into doing what is best for all concerned.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.

COMMENT DESCRIPTION:

I would like my comments to be docketed in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt the financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14

and modified on January 23. AEP has requested that the Commission set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

I am asking that you take immediate and favorable action on AEP Ohio's petition

COMMENT DESCRIPTION:

AEP has fully embraced the state's decision to move to a competitive market. AEP is prepared to move forward through a fair and reasonable transition much like other utilities in the state of Ohio. During the last decade, with the support and encouragement of the PUCO, AEP Ohio committed its low-cost power plants to serve our customers and avoided implementing higher market rates. This transition is a three-year commitment and cannot be changed overnight.

Competitors, most of whom own no generation assets in Ohio, want to use AEP Ohio's plants to serve customers using an extremely low price. This price would have severe and immediate financial consequences for AEP and would lead to unstable conditions for future investment in Ohio.

To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. The recent and unprecedented decision to revoke the December 14th rate agreement places Ohio's economic recovery in jeopardy with market uncertainty for investors and long-term price instability for electric service

I believe Ohio will benefit from a true and fair competitive electricity market. AEP has asked for a fair transition to a competitive market that includes regulatory certainty to the benefit of all Ohioans, businesses and residents.

On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt financial losses sustained from the Commission's decision on February 23 to revoke its approval of AEP's ESP plan. AEP is requesting the Commission set the capacity charges for alternative suppliers to pay \$255/MW Day for the use of AEP's generating assets until a final ESP can be agreed upon.

Without this immediate action, American Electric Power may be forced to transfer thousands of high paying engineering and IT jobs to other states, reduce their charitable giving in Ohio, and reconsider future growth in the State of Ohio.

Please take immediate and favorable action on AEP Ohio's petition.

COMPLAINT DESCRIPTION:

I want my comments docketed in case nos: 11-346-EL-SSO & 11-348-EL-SSO.

I like cheap power, but what you are doing to AEP is wrong. They have overhead costs that their competitors do not have, most of which do not have investments in Ohio. I don't think you understand how to do business. AEP donates 200 million a year to Ohio based organizations and

generates an amazing amount of tax revenue for OH. If AEP leaves Ohio due to better competitive advantage elsewhere, Ohio will be in a world of hurt.

Ohio needs industry leaders, Ohio needs good jobs, Ohio needs the revenue that AEP generates. Why are you selling our state down the river? For cheaper power bills that are not sustainable? Reinvest in yourself. Reinvest in America. Please, before AEP moves out of Ohio and its too late to realize the damage that you have done.

COMMENT DESCRIPTION:

I have a major concern about how the commission is handling the current AEP case with the continual changes in the commission's position. The commission should be above politics and focus objectively on the long term interest of all types of customers and the long term economic health of Ohio. The recent orders and reorders suggest the commission may not have a long term vision or plan to achieve that vision. AEP is a key element of the Ohio economy. If we do not get our act together, we will not see investment in Ohio in the future. How could anyone invest in a state where we cannot make reasonable rules that allow businesses to plan long term?

COMMENT DESCRIPTION:

Case nos. 11-346-EL-SSO & 11-348-EL-SSO

AEP must have reasonable ROI to be viable in the mare today. By PUCO revoking what was originally approved, makes PUCO look like i did not understand the Electric Security Plan (ESP) filed by AEP. To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service.

COMMENT DESCRIPTION:

The commission has treated AEP very poorly regarding their resent rate increase reversal. Instead of working with a company that has worked with you, columbus and the state ,you pull the rug from under their feet and kick sand in their face. I urge you to take immediate steps to come to a viable and favorable solution with AEP. If the commission cannot find a way to be fare to AEP in these tough times then I would support any thought of them relocating employees and facilities (Corp. Headquarters) to a state that will give them a fare shake. Thanks for your time. L.A. Wolfe

COMMENT DESCRIPTION:

Please docket my comments in case nos. 11-346-EL-SSO & 11-348-EL-SSO.

The Dispatch editorial on March 6 said it well, when it noted that American Electric Power “is in a particularly vulnerable competitive position because of the recent revocation of its rate plan by the Public Utilities Commission of Ohio”. If anything, that understates the direness of the situation that AEP and its customer base find itself in. I can not speculate on why the PUCO

chose to do this, however I do not believe that the PUCO fully comprehended the position that their decision would put AEP, its customers, and both AEP and AEP-Ohio employees in. The “financial hemorrhage” that The Dispatch states AEP would suffer is indeed very real, and would ultimately hurt everyone involved. I hope that the Commission has come to fully understand that their initial decision was indeed a mistake, and will work with AEP on a FAIR and REASONABLE transition to the market, one with the regulatory certainty that is so desperately needed at this time.

In short, I respectfully request that the Commission PLEASE do the right thing by taking immediate and favorable action on AEP Ohio's recent petition, including that the Commission set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final Electricity Security Plan has been approved. There is far too much at stake for Ohio, for AEP's customer base, for AEP and AEP-Ohio employees, and for AEP itself, for the Commission to do otherwise. Thank you.

COMMENT DESCRIPTION:

Please reconsider all options to help AEP get through this ruling period. As an employee, times are tough and it would be pretty painful for more Ohioians to lose their jobs. AEP's info structure is old and money needs to be thrown at it to maintain current and future improvements. Scaling back costs to almost nothing does not help AEP at all. It will be hard to keep trees cut and keep the power reliable. Please document my comments under case#11-346-FL-SSO & 11-348-EL-SSO.

Thanks,

Terri Rings

COMMENT DESCRIPTION:

This comment is in reference to PUCO revoking a SIGNED approval of AEP's ESP plan on February 23, 2012. I think that PUCO has made this a political game instead of trying to be fair and reasonable which is what your job is. AEP has fully embraced the state's decision to move to electricity competition and has moved forward through a fair and reasonable transition like other utilities did. Now, competitors, for most of them, dont have investments in Ohio and many who own no assets at all, want to use AEP Ohio's plants to serve our customers using an arbitrary

price as a basis for paying for the use of those plants. This price is extremely low and will have severe financial consequences for AEP and possibly lead to unstable conditions for future investment in Ohio. To have a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service. I do believe that competitive electricity markets can work for Ohio. AEP needs a fair transition to market that includes regulatory certainty so that all Ohioans can be successful. Do not lose sight of what your job is..fairness for both sides, and keep the politicians at a distance. Don't let another corporate company (AEP) who has done so much for the Columbus community fall into financial ruin and forced to pull up stakes.

COMMENT DESCRIPTION:

I am an employee of Americam Electric power and AEP Ohio and am writing to show my disappointment in the process to approve then disapprove the AEP ESP. The plan was modified and approve per your guidance and then disapproved. My opinion is that an oversight organization such as the PUCO should not approve any plan if they do not understand the actual effect of that plan. This process has brought question into the PUCOs credibility. Having said that I urge you to work with us to find common ground on an updated ESP so that we can get to full de-regulation in a fair and just manner. By doing so we will complete on a level playing field and that competition with other utilities will be good for the consumer. By placing AEP on a significant disadvantage to other utilities going into the deregulation process, will stifle competition. I urge you to act quickly and fairly to the upcoming ESP plan from AEP

COMMENT DESCRIPTION:

Please docket Case #11-346-EL-SSO & #11-348-EL-SSO

AEP has been & is still trying to work w/all governing bodies involved to stay competitive, fair & ethical in this changing world. AEP gives alot to Ohio from the people employed and giving back to the communities in which they live. Plus, AEP gives to numerous charities, which if a

swift decision is not met, could alter alot of lives.

AEP has worked hard with the Commission over the past 2 years to come to an agreement that works for all -- just to have it all revoked in one day. We have really had the rug swept out from underneath us. Our CEO is trying his best to come to some reasonable interim until PUCO decides the outcome, which I feel he has done with the "capacity charge to alternative suppliers".

I ask that you PLEASE approve AEP's request for the capacity charge of \$255/MWday to the alternative suppliers until a final ESP has been approved.

Furthermore ... I really hope that it doesn't take the PUCO another year or 2 to decide on the final outcome. This country does not need more unemployed people. We NEED to keep this country strong and to do that .. we need to keep people working and spending money. PLEASE, PLEASE, PLEASE, over 7000 AEP OHIO employees are at your mercy for a QUICK decision.

COMMENT DESCRIPTION:

Pertaining to case nos. 11-346-EL-SSO & 11-348-EL-SSO:

Although opinions differ on how competitive retail electric generation should look in the state of Ohio, one thing is certain. AEP Ohio has proven to be willing to work with the Public Utilities Commission of Ohio to make this a fair transition for customers and stakeholders alike. To have

a healthy competitive environment in any industry, more than one company needs to be capable of competing on a level playing field. Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service. Serving as a city council member in my community, I have great concern for the electric rates for my constituents as well as all Ohioans.

AEP CEO Nick Akins has stated that he believes that competitive electricity markets can work for Ohio. The company is simply asking for a fair transition to market that includes regulatory certainty so that all Ohioans can be successful. As you know, AEP Ohio will file a modified Electric Security Plan (ESP) with the PUCO by the end of March that will outline a path toward this goal.

I write today asking the commission to set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved.

Thank you,

Guy Guidone Louisville City Council Member (Louisville, Ohio) AEP Supervisor (Canton, Ohio)

COMMENT DESCRIPTION:

As an AEP Ohio customer and an employee of American Electric Power for nearly 12 years, I am writing to show support of AEP's petition to PUCO regarding the capacity charge that alternative suppliers must pay.

In my view, as a customer, the capacity charge must be set at a fair rate in order for Ohio to

successfully achieve competitive electricity markets in the future. By not allowing AEP to recover a fair rate, its future market position is compromised and this threatens the competitiveness of the future market.

As an employee, my livelihood to support my family may also be compromised by PUCO's actions. In order for AEP to set and make projected earnings, it relied on the decisions previously made by PUCO approving its ESP plan. AEP has indicated that an unfavorable or delayed decision could mean that it needs to make drastic cuts to its workforce and charitable giving. Neither of these would be in the best interest of the public served by PUCO.

I respectfully request that PUCO move quickly to approve AEP's petition. Thank you, Gina Bivens

Without a reasonable transition to a fair competitive framework, Ohio's economic recovery is not sustainable due to uncertainty for investors, and long term price instability for electric service. The PUCO needs to worry more about the long term landscape of Ohio rather than knee jerk political pressure. Feel confident in the rules you set in place because when you keep changing the rules of the game after the fact, no one will come out the winner. AEP must be treated fairly going forward or we risk loosing one of our best employers in the State. Thank you.

COMMENT DESCRIPTION:

AEP has asked that the PUCO allow it to raise the rate (capacity charge) that its competitors are charged to make use of AEP's infrastructure when an AEP customer decides to switch to a competing power company. Currently, the capacity charge is lower than AEP's cost to provide the electricity. This is not fair to AEP.

PUCO should take the steps necessary to allow AEP to hold its own against competitors until a new rate plan is agreed upon. Please rule favorably for AEP, and keep AEP jobs in Ohio.

COMMENT DESCRIPTION:

Please consider getting back to actual facts when deciding what is best for Ohio's electric ratepayers. AEP's cost-based rate for generation capacity is approximately \$350 per megawatt day. I know for a fact that rate is just and reasonable and is AEP Ohio's generation investment and generation expenses - nothing more nothing less. What basis do you have to come up with something different. The input from intervenors whose only purpose is to make more money for their company. Do you actually think they will pass on this 'windfall' if they only pay 'market

price' to their customers. Really??? I have been working in regulatory for over thirty years - and have never seen such a blatant disregard of the 'facts.' AEP must now retrofit its generation - costing ratepayers many billions of dollars - that is a fact. The rate increases are not due to frivolous spending. AEP must comply -- and so must all other coal fired power plants. Now on top of that you want to let them collect 5% of their 'real' cost of generating power. The facts do not add up.

When I go to fill up my car or pay my cable bill --- those expenses are still more than my electric bill --- and I have an all electric home - plus if the lights go out AEP is right out there in any type of weather getting the lights back on. Do you really want to disregard the actual investment and expense associated with that. What really will happen to the reliability we enjoy now???

COMMENT DESCRIPTION:

AEP has asked that the PUCO allow it to raise the rate (capacity charge) that its competitors are charged to make use of AEP's infrastructure when an AEP customer decides to switch to a competing power company. Currently, the capacity charge is lower than AEP's cost to provide the electricity. This is not fair to AEP.

PUCO should take the steps necessary to allow AEP to hold its own against competitors until a new rate plan is agreed upon. Please rule favorably for AEP, and keep AEP jobs in Ohio.

COMMENT DESCRIPTION:

Docket the following comments to case nos. 11-346-EL-SSO & 11-348-EL-SSO. On February 27, AEP Ohio filed a motion for relief and expedited action with the PUCO to halt the financial losses sustained as a result of the Commission's decision on February 23 to revoke its approval of the company's ESP plan, which the Commission had approved on December 14 and modified on January 23. AEP has requested that the Commission set the capacity charge that alternative suppliers must pay to use AEP's generating assets at \$255/MWday until a final ESP has been approved. Please take immediate and favorable action on AEP Ohio's petition. Thank you.
