PUCO Commissioners

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth. -

Sincerely,
Mrs. Nancy Gay

PUCO Commissioners

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Mr. Michael Lees

PUCO Commissioners

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Mr. Jeff Cassidy

Miss Patricia Casserly

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Steve Wolfe

PUCO Commissioners

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As a new resident of the state, I was shocked to learn Ohio's air is among the dirtiest in the country and this is due to coal-fired power plants and mining per se.

I have just gotten good news that two aging coal plants are being retired. I hope this will continue. Grandfathering obsolete technology is harmful.

I know energy efficiency and conservation, which I practice, can remove the need for new generation. Here in Athens county lots of solar energy is happening.

So I encourage you to look toward cleaner, climate neutral technologies to fulfill the needs of Ohioans.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Mrs. Ashton Grizzell

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

In the late 19th century, with the advent of the car, many worried that establishing "gas stations" would bring great risks of explosions, etc. Had we paid attention to that we would still be horse commuting! Change is the only constant and we need to invest in alternate sources for energy efficiency (clean coal and gas would be great, if they were really CLEAN)

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth. Clean energy = new jobs!!

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Mrs. Virginia Stone-Meyer

PUCO Commissioners

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Ms. Susan RIDGEWAY
