PUCO

PUCO Commissioners

Dear PUCO Commissioners,

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Ms. Catherine

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Mr. John Fetters

PUCO Commissioners

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

Currently, many Ohio electric utilities are evaluating the economic viability of their aging, inefficient fleet of coal plants. As a result, Ohio is seeing a number of coal plants set for retirement. This is a positive step in alleviating the numerous health complications, such as asthma attacks, triggered by air pollution. In addition, coal plant retirements are setting a clear path for Ohio's transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please insure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Mr. David Minger

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Mrs. Jeannie Finlay-Kochanowski

Mrs. Carolyn Biemler

THE BIG QUESTION IS--- HOW MUCH MORE IS IT GOING TO COST US PER MONTH NOW??? !!! I'M ON A FIXED INCOME, ALTHO I'VE CUT BACK ON THE AMOUNT OF ELECTRIC I USE, MY MONTHLY BILL HAS DOUBLED THIS PAST YEAR! !!! SO WILL THIS "NEW" ENERGY COST THE EVERAGE GUY EVEN MORE??????? OR WILL THIS NEW ENERGY CUT OUR COSTS???? WHAT IS THE ANSWER TO THIS QUESTION??
THANK YOU

PUCO Commissioners

Subject: Ramp-up Energy Efficiency in Ohio!

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Mrs. Sally Small

Dear PUCO Commissioners,

As an electric customer and an Ohioan I urge you to ensure all of Ohio's utilities are pursuing all cost-effective energy efficiency.

Many Ohio electric utilities are evaluating the economic viability of their aging fleets of coal plants, and retiring the oldest and dirtiest plants. This is critical to reducing air pollution and improving the health of our communities. Additionally, these coal plant retirements create the opportunity to transition to clean energy solutions.

Ohio's energy law calls for minimum annual energy efficiency benchmarks for utilities to meet. The law is creating jobs where they are needed most and securing our electric grid while saving customers millions.

Please ensure that utilities are pursuing all cost-effective energy efficiency as a way to curb pollution and create economic growth.

Sincerely,
Ms. Marcia Boggs
