**I. INTRODUCTION**

**1. Q. Please state your name and business address.**

A. Ralph C. Smith, 15728 Farmington Road, Livonia, Michigan 48154.

**2. Q. What is your occupation?**

A. I am a certified public accountant and a senior regulatory utility consultant with the firm Larkin & Associates, PLLC, certified public accountants and regulatory consultants.

**3. Q. Please describe Larkin & Associates.**

A. Larkin & Associates, PLLC, is a Certified Public Accounting and Regulatory Consulting Firm. The firm performs independent regulatory consulting primarily for public service/utility commission staffs and consumer interest groups (public counsels, public advocates, consumer counsels, attorneys general, etc.). Larkin & Associates, PLLC has extensive experience in the utility regulatory field as expert witnesses in over 600 regulatory proceedings, including numerous gas, electric, water and wastewater, and telephone utility cases.

**4. Q. Please summarize your professional experience.**

1           A.     Subsequent to graduation from the University of Michigan, and after a short  
2                   period of installing a computerized accounting system for a Southfield,  
3                   Michigan realty management firm, I accepted a position as an auditor with  
4                   the predecessor CPA firm to Larkin & Associates in July 1979. Before  
5                   becoming involved in utility regulation where the majority of my time for  
6                   the past 31 years has been spent, I performed audit, accounting, and tax  
7                   work for a wide variety of businesses that were clients of the firm.

8  
9                   During my service in the regulatory section of our firm, I have been  
10                  involved in rate cases and other regulatory matters concerning numerous  
11                  electric, gas, telephone, water, and sewer utility companies. My present  
12                  work consists primarily of analyzing rate case and regulatory filings of  
13                  public utility companies before various regulatory commissions, and, where  
14                  appropriate, preparing testimony and schedules relating to the issues for  
15                  presentation before these regulatory agencies.

16  
17                  My professional career has included over 31 years in public accounting and  
18                  utility regulatory consulting at Larkin & Associates and its predecessor  
19                  firm. I have performed work in the field of utility regulation on behalf of  
20                  industry, PSC staffs, state attorneys general, municipalities, and consumer  
21                  groups concerning regulatory matters before regulatory agencies in  
22                  Alabama, Alaska, Arkansas, Arizona, California, Connecticut, Delaware,

1 Florida, Georgia, Hawaii, Illinois, Indiana, Kansas, Kentucky, Louisiana,  
2 Maine, Michigan, Minnesota, Mississippi, Missouri, New Jersey, New  
3 Mexico, New York, Nevada, North Carolina, North Dakota, Ohio,  
4 Pennsylvania, South Carolina, South Dakota, Texas, Utah, Vermont,  
5 Virginia, Washington, Washington, DC, West Virginia, Canada, Federal  
6 Energy Regulatory Commission and various state and federal courts of law.  
7 I have presented expert testimony in regulatory hearings on behalf of utility  
8 commission staffs and intervenors on many occasions. I have also  
9 presented seminars on utility accounting and ratemaking on behalf of  
10 various clients, and have taught at the Institute of Public Utilities sponsored  
11 by Michigan State University.

12  
13 **5. Q. What professional designations do you hold?**

14 A. I hold the following professional designations:

15 Certified Public Accountant (licensed in the State of Michigan)

16 Attorney (licensed in the State of Michigan)

17 Certified Rate of Return Analyst

18 Certified Financial Planner™ professional

19  
20 **6. Q. Please summarize your educational background.**

21 A. I received a Bachelor of Science degree in Business Administration

22 (Accounting Major) with distinction from the University of Michigan -

1 Dearborn, in April 1979. I passed all parts of the C.P.A. examination on  
2 my first sitting in 1979, received my C.P.A. license in 1981, and received a  
3 certified financial planning certificate in 1983. I also have a Master of  
4 Science in Taxation from Walsh College, 1981, and a law degree (J.D.)  
5 cum laude from Wayne State University, 1986. I also have participated  
6 each year in a variety of continuing professional education required to  
7 maintain my CPA license and CFP® certificate.

8  
9 Since 1981, I have been a member of the Michigan Association of Certified  
10 Public Accountants. I am also a member of the Michigan Bar Association  
11 and the Society of Utility and Regulatory Financial Analysts (SURFA)<sup>1</sup>. I  
12 have served as an arbitrator in disputes involving financial transactions as  
13 part of the National Association of Securities Dealers, Inc. (NASD) Dispute  
14 Resolution program and the Financial Industry Regulatory Authority, Inc.  
15 (FINRA). I have also been a member of the American Bar Association  
16 (ABA), and the ABA sections on Public Utility Law and Taxation.

17  
18 **7. Q. Have you prepared an appendix that contains additional information**  
19 **on your educational background and professional experience?**

---

<sup>1</sup> Formerly, the National Society of Rate of Return Analysts.

1 A. Yes. Appendix RCS-1, attached to this testimony also summarizes some of  
2 my regulatory experience and qualifications.  
3

4 **8. Q. On whose behalf are you appearing?**

5 A. I am testifying on behalf of the Staff ("Staff") of the Public Utilities  
6 Commission of Ohio ("Commission" or "PUCO").  
7

8 **9. Q. Have you previously presented testimony before the Commission?**

9 A. Yes. I have testified before the Commission in the following electric utility  
10 fuel adjustment cases:

- 11 • Management/Performance and Financial Audit of the Fuel and Purchased  
12 Power Rider of the Cincinnati Gas & Electric Company, (Audit 1) Case No.  
13 05-806-EL-UNC
- 14 • Management/Performance and Financial Audit of the Fuel and Purchased  
15 Power Rider of the Duke Energy Ohio, (Audit 2) Case No. 06-1068-EL-  
16 UNC
- 17 • Management/Performance and Financial Audits of the FAC of the  
18 Columbus Southern Power Company and the Ohio Power Company, (Audit  
19 1) Case No. 09-0872-EL-FAC and 09-0873-EL-FAC
- 20 • Management/Performance and Financial Audits of the FAC of The  
21 Columbus Southern Power Company and The Ohio Power Company  
22 (Audit 2); Case No. 10-268-EL-FAC, Case No. 10-269-EL-FAC, Case No.

1 10-870-EL-FAC, Case No. 10-871-EL-FAC, Case No. 10-1286-EL-FAC,  
2 Case No. 10-1287-EL-FAC

- 3 • Management/Performance and Financial Audit of the Fuel And Purchased  
4 Power Rider of The Dayton Power and Light Company (Audit 1); Case No.  
5 09-1012-EL-FAC

6 In addition, I filed testimony in Case Nos. 07-1080-GA-ATR and 07-1081-GA-  
7 ALT, involving Vectren Energy Delivery of Ohio, Inc., application for Authority  
8 to Amend its Rates and Charges for Gas Services and Related Matters.

9  
10 **10. Q. What is the purpose of your testimony?**

11 A. Energy Ventures Analysis, Inc. (“EVA”) and Larkin & Associates, PLLC  
12 (“Larkin”) were contracted by the PUCO on March 21, 2012, to compute a  
13 capacity rate for Columbus Southern Power Company (“CSP”) and Ohio  
14 Power Company (“OPCo”), collectively referred to as AEP Ohio or the  
15 Companies. The purpose of my testimony is to describe that analysis and  
16 the resultant capacity rates.

17  
18 **11. Q. Are you sponsoring any exhibits in this proceeding?**

19 A. Yes. I am sponsoring four Exhibits identified as follows:  
20 Exhibit RCS-1: Capacity Rate for CSP based on adjusted 2010 information  
21 and energy margins computed by Ryan Harter of EVA using the Aurora  
22 model;

1 Exhibit RCS-2: Capacity Rate for OPCo based on adjusted 2010  
2 information and energy margins computed by Ryan Harter of EVA using  
3 the Aurora model; and  
4 Exhibit RCS-3: Merged CSP and OPCo capacity rate.  
5

6 **12. Q. Please describe the tasks you performed related to your testimony in**  
7 **this case.**

8 A. I reviewed and analyzed data and performed other procedures as necessary  
9 to obtain an understanding of the Capacity Charges being proposed by AEP  
10 Ohio. These procedures included reviewing the Company's testimony and  
11 exhibits; discussing the information contained within the Excel files  
12 supporting AEP Ohio's formula templates for CSP and OPCo populated  
13 with 2010 data<sup>2</sup>; discovery of AEP; reviewing AEP's responses to the data  
14 requests of the Staff and other parties; review of selected information from  
15 other PUCO dockets; and review of selected information from FERC  
16 Docket No. ER11-2183-000.  
17

18 Q. What issues will you be addressing in your testimony?

19 A. I will be responding to AEP Ohio witness Kelly Pearce's testimony concerning the  
20 capacity rates that were developed in his Exhibits KDP-3 and KDP-4. I

---

<sup>2</sup> These Excel files relate to Exhibits KDP-3 and KDP-4 that were filed with the testimony of AEP Ohio witness Kelly Pearce on August 31, 2011.

1 also present a calculation of the capacity rate for the merged company in  
2 response to Dr. Pearce's Exhibit KDP-6, using the results of my  
3 calculations and information provided to me from PUCO Staff witness  
4 Ryan Harter of EVA concerning energy credits and receipts by AEP Ohio  
5 from PJM relating to the provision of ancillary services.  
6

7 **13. Q. Does your testimony comprehensively address all concerns that may**  
8 **exist with respect to OPC and CSP's Capacity Charges?**

9 A. No. It is strictly limited to developing a capacity rate that uses as a starting  
10 point the AEP Ohio 2010 data from Dr. Pearce's Exhibits KDP-3 and KDP-  
11 4 and which reflects an offset for energy sales margins and ancillary service  
12 receipt amounts (each stated in \$/MW Day) that were provided to me by  
13 Mr. Ryan Harter of EVA.  
14

15 **14. Q. How is the remainder of your testimony organized?**

16 A. The remainder of my testimony is organized into the following sections:

17 II. Summary of Conclusions and Recommendations

18 III. Development of Capacity Rates  
19

## 20 **II. SUMMARY OF CONCLUSIONS AND RECOMMENDATIONS**

21 **15. Q. Please summarize your conclusions and recommendations.**

1           A.     Based on my review of the Company's testimony, on the discovery that has  
2                 been conducted, on publicly available information, and on my experience in  
3                 the area of regulatory accounting, policy, and revenue requirement  
4                 determination, my conclusions and recommendations to date are as follows  
5                 and summarized below:

- 6                 • As shown on Exhibit RCS-1, Schedule A, page 1, a capacity rate for CSP  
7                 based on adjusted 2010 information is \$289.59 per MW day before  
8                 deductions. After deducting the energy margins computed by Ryan Harter  
9                 of EVA using the Aurora model and the ancillary service receipts offset  
10                provided to me by Mr. Harter, the CSP capacity rate would be \$236.18 per  
11                MW day.
- 12                • As shown on Exhibit RCS-2, Schedule A, page 1, a capacity rate for OPCo  
13                based on adjusted 2010 information is \$318.76 per MW day before  
14                deductions. After deducting the energy margins computed by Ryan Harter  
15                of EVA using the Aurora model and the ancillary service receipts offset  
16                provided to me by Mr. Harter, the OPCo capacity rate would be \$81.08 per  
17                MW day.
- 18                • As shown on Exhibit RCS-3, a capacity rate for merged CSP and OPCo  
19                based on adjusted 2010 information is \$305.48 per MW day before  
20                deductions. After deducting the energy margins computed by Ryan Harter  
21                of EVA using the Aurora model and the ancillary service receipts offset

provided to me by Mr. Harter, the merged capacity rate would be \$144.58 per MW day.

### III. DEVELOPMENT OF CAPACITY RATES

**16. Q. Please explain how you developed the capacity rates for CSP and OPCo shown on Exhibits RCS-1 and RCS-2.**

**A.** I started with the 2010 information used by AEP Ohio witness Dr. Kelly Pearce from the Excel files that relate to his Exhibits KDP-3 and KDP-4, and made adjustments for the following items:

- 1) The 11.15% return on equity used by AEP Ohio on page 11 of Exhibits KDP-3 and KDP-4 was adjusted to 10.0% for CSP and 10.3% for OPCo.
- 2) The overall rates of return used by AEP Ohio of 8.63% for CSP and 8.62% for OPCo on page 11 of Exhibits KDP-3 and KDP-4 were adjusted to 7.78% and 7.97% for CSP and OPCo, respectively.
- 3) Construction Work in Progress ("CWIP") on page 5 of Exhibits KDP-3 and KDP-4 was removed from rate base.
- 4) Plant Held for Future Use on page 5 of Exhibit KDP-3 was removed from rate base.
- 5) Cash Working Capital, calculated by AEP Ohio using a one-eighth O&M formula method, was removed from rate base on page 5 of Exhibits KDP-3 and KDP-4.

1           6) Prepayments were removed from rate base on page 5 of Exhibits KDP-3  
2           and KDP-4.

3           7) Accumulated Deferred Income Taxes (“ADIT”) on page 5 of Exhibits  
4           KDP-3 and KDP-4 were adjusted to remove various account 190 items  
5           from rate base including a federal investment tax credit “gross up” item that  
6           had been recorded on CSP’s books, ADIT debit balances for IGCC  
7           revenues, net ADIT debits related to uncertain tax positions (i.e., “FIN 48”  
8           items), and ADIT items related to accrued liabilities. ADIT credit balances  
9           in account 283 related to prepayments were also removed, consistent with  
10          the removal of prepayments from rate base.

11          8) The Return on Rate Base on page 4, line 1, of Exhibit KDP-3 and KDP-4  
12          respectively, was adjusted based on the return and rate base adjustments  
13          described above.

14          9) Operations and Maintenance (“O&M”) Expense on page 4, line 2, of Exhibit  
15          KDP-3 and KDP-4, respectively, was adjusted to remove:

16           a. Estimated payroll and employee benefit costs related to positions at  
17           AEP Ohio and the affiliate, AEP Service Company (“AEPSC”), that  
18           no longer exist due to the AEP corporate-wide 2010 voluntary and  
19           involuntary severance programs.

20           b. Nonrecurring severance cost recorded by CSP and OPCo in 2010  
21           related to the AEP corporate-wide 2010 voluntary and involuntary  
22           severance programs.

1 10) Taxes Other Than Income Taxes on page 4, line 4, of Exhibit KDP-3 and  
2 KDP-4, respectively, were adjusted to remove an estimate of the payroll tax  
3 expense recorded by CSP and OPCo in 2010 that relates to payroll for  
4 positions at AEP Ohio and AEPSC that are no longer there due to the AEP  
5 2010 severance programs.

6 11) Income Tax on page 4, line 5, of Exhibit KDP-3 and KDP-4, respectively,  
7 was adjusted for the following:

- 8 a. To reflect the return used.
  - 9 b. To reflect a pro forma estimated Domestic Production Activities  
10 Deduction ("DPAD") on a "separate return" basis as a reduction to  
11 income taxes related to electric generating capacity.
- 12

### 13 **Return on Equity and Rate of Return**

14 **17. Q. What return on equity did you apply for CSP and OPCo?**

15 **A.** I applied a 10.0% ROE for CSP and a 10.3% ROE for OPCo. Both of these  
16 are from the Commission's Opinion and Order dated December 14, 2011 in  
17 Case Nos. 11-351-EL-AIR et al, at page 5, paragraph II-A-(1)(e) and  
18 elsewhere in that order. They were part of a stipulation in the most recent  
19 CSP and OPCo electric distribution rate cases. In the CSP distribution rate  
20 case, Case No. 11-351-EL-AIR, et al, the Staff Report had recommended a

1 cost of equity recommendation of 8.58% to 9.59%.<sup>3</sup> For OPCo, in Case  
2 No. 11-352-EL-AIR, et al, the corresponding recommendation for ROE in  
3 the Staff Report was 8.59% to 9.60%.<sup>4</sup> In lieu of preparing a specific cost  
4 of capital analysis directed to AEP Ohio's capacity costs, the 10.0% and  
5 10.3% ROEs noted above from the December 14, 2011 Opinion and Order  
6 are being used as reasonable inputs and appear to represent a consensus  
7 stipulation position. I also note that those stipulated ROEs were higher  
8 than Staff's recommendations in the respective AEP Ohio electric  
9 distribution utility rate cases.

10  
11 **18. Q. What overall rate of return did you apply?**

12 A. I applied an overall rate of return of 7.78% for CSP and 7.97% for OPCo.  
13 Both of these are from the Commission's Opinion and Order dated  
14 December 14, 2011 in Case Nos. 11-351-EL-AIR et al, at page 5, paragraph  
15 II-A-(1)(c) and (d), respectively. They were part of a stipulation in the  
16 most recent CSP and OPCo electric distribution rate cases. The parties to  
17 the stipulation in those cases specified those returns were a just and  
18 reasonable rate of return for CSP and OPCo, respectively.

19  

---

<sup>3</sup> Staff Report in Case Nos. 11-0351-EL-AIR et al, filed 9/15/2011, at page 16.

<sup>4</sup> Staff Report in Case Nos. 11-0352-EL-AIR et al, filed 9/15/2011, at page 16.

1           **Construction Work in Progress**

2   **19.   Q.    What information was important concerning the circumstances under**  
3           **which CWIP can be included in rate base?**

4           A.   Section 4909.15 of the Ohio Revised Code provides that the Commission,  
5               in its discretion, may include a reasonable allowance for construction work  
6               in progress (CWIP) but, in no event may such allowance be made by the  
7               Commission until it has determined that the particular construction project  
8               is at least seventy-five percent complete.

9  
10           Also, no allowance for CWIP shall be in rates for a period exceeding 48  
11           months and any sums of money that the Company may have received must  
12           be given back to the customers once the property is used and useful and in  
13           service.<sup>5</sup>

14  
15           Section 4928.143 of the Revised Code, dealing with Electric Security Plan,  
16           also provides that a reasonable allowance for CWIP for any of the electric  
17           distribution utility's cost of constructing an electric generation facility or  
18           for an environmental expenditure for any electric generation facility of the  
19           electric distribution utility can be considered, provided the cost is incurred

---

5           This concept of returning any sums of money that the Company may have received during the construction period to the customers once the property has been placed into service is sometimes referred to as "mirror CWIP."

1 or the expenditure occurs on or after January 1, 2009. Any such allowance  
2 shall be subject to the CWIP allowance limitations of division (A) of  
3 section 4905.15 of the Revised Code, except the Commission may  
4 authorize an allowance upon the incurrence of the cost or occurrence of the  
5 expenditure. Additionally, the Commission must first determine in the  
6 proceeding that there is need for the facility based on resource planning.  
7 Further, no CWIP allowance shall be authorized unless the facility's  
8 construction was sourced through a competitive bid process.

9  
10 **20. Q. Has AEP Ohio demonstrated that the CWIP it is requesting in rate**  
11 **base meets the above noted criteria?**

12 A. No. AEP Ohio has not demonstrated (1) that the CWIP it has requested is  
13 75% complete; (2) that the concept of mirror-CWIP has been applied; (3)  
14 that the Commission has determined that there is need for each facility  
15 based on resource planning; or (4) that the facility's construction was  
16 sourced through a competitive bid process. Because these criteria have not  
17 been met, CWIP should be excluded from rate base.

18  
19 **Plant Held for Future Use**

20 **21. Q. Please explain the adjustment to remove Plant Held for Future Use.**

1           A.     AEP Ohio proposed to include \$5.366 million of Plant Held for Future Use  
2                   for CSP on Exhibit KDP-3, page 5, line 6. This adjustment removes that  
3                   amount from the production demand rate base for CSP.

4  
5   **22.   Q.     What items are included in AEP Ohio's request for Plant Held for**  
6                   **Future Use?**

7           A.     AEP Ohio was requested to provide details. Its request for CSP appears to  
8                   primarily relate to land and land rights for a Newbury Project, which CSP's  
9                   2010 FERC Form 1, at page 214, lists as being originally included in  
10                  account 105, Plant Held for Future Use, on 12/80 and 12/87 with balances  
11                  of \$4,991,594 and \$61,220. Nothing is listed in CSP's 2010 FERC Form 1  
12                  for a "date expected to be used in utility service" for those items.

13  
14   **23.   Q.     Why should Plant Held for Future Use be excluded from rate base?**

15           A.     Generally, Plant Held for Future Use should be excluded from utility rate  
16                   base because it is not considered to be used and useful in providing utility  
17                   service. Unless the utility demonstrates specific, definite plans for utilizing  
18                   such property to provide utility service within a reasonable time frame, my  
19                   experience has generally been that the PHFFU is excluded from utility rate  
20                   base. Lacking such definite plans for utilization in the provision of utility  
21                   service, the property is not used and useful for providing utility service, and  
22                   the cost should therefore not be borne by ratepayers. AEP Ohio has

presented no definite plans as to when it will utilize any of the Plant Held for Future Use that it is requesting be included in generation rate base. Consequently, I believe that a compelling argument can be made for the exclusion of this PHFFU from rate base, and my recommendation, therefore, is to exclude it entirely from rate base.

**24. Q. Can Plant Held for Future Use be excluded from rate base?**

**A. Yes.**

**25. Q. Was Plant Held for Future Use included in AEP Ohio's rate base in the recent CSP and OPCo distribution rate cases?**

**A. It appears no PHFFU was included in AEP Ohio's rate base in the recent distribution rate cases. AEP Ohio's workpapers supporting its Exhibit KDP-3, page 5, references the PHFFU to Workpaper 19. That workpaper shows that CSP functionalized the \$13.026 million of December 31, 2010 PHFFU that was reported in its 2010 FERC Form 1 as follows:**

|              |                   |
|--------------|-------------------|
| Production   | 5,366,165         |
| Transmission | 3,796,688         |
| Distribution | 3,356,603         |
| General      | 506,771           |
| Total        | <u>13,026,227</u> |

However, a review of Schedule B-1 from the Staff Report in CSP's distribution rate case, Case Nos. 11-352-EL-AIR *et al*, does not show any Plant Held for Future Use being included in CSP's distribution rate base. Similarly, the Staff

1 report in Case Nos. 11-351-EL-AIR et al, does not show any Plant Held for Future  
2 Use being included in OPCo's distribution rate base. This would appear to be  
3 consistent with the guidance we received from Staff concerning the general policy  
4 that PHFFU is not included in utility rate base.

5  
6 **26. Q. Please summarize your recommendation concerning PHFFU.**

7 A. The PHFFU that AEP Ohio included in its proposed production demand  
8 rate base for CSP should be removed for the reasons stated above. This  
9 reduces CSP's proposed rate base by \$5.366 million.

#### 10 **Cash Working Capital**

11 **27. Q. What is Cash Working Capital?**

12 A. Cash working capital is generally defined as the average amount of  
13 capital provided by investors in the Company, over and above the  
14 investments in plant and other specifically quantified rate base items,  
15 to bridge the gap between the time that expenditures are required to  
16 provide service and the time collections are received for the service.

17  
18 **28. Q. When is a Cash Working Capital allowance includable in rate base?**

19 A. Large utilities are typically required to prepare a lead-lag study to support a  
20 Cash Working Capital allowance being includable in rate base. CSP and  
21 OPCo, individually and merged, are considered to be large utilities for

1 supporting a Cash Working Capital allowance. Where a lead-lag study is  
2 not presented by a large utility such as CSP or OPCo, we cannot  
3 recommend a Working Capital allowance.  
4

5 **29. Q. Did AEP Ohio prepare a lead-lag study to support its claim for**  
6 **Working Capital?**

7 A. No. AEP Ohio's claim is based on a one-eighth O&M formula. AEP Ohio  
8 did not prepare a lead-lag study.  
9

10 **30. Q. In general, do you agree with the use of the one-eighth formula method**  
11 **to determine a utility's CWC requirement?**

12 A. No. There are several conceptual problems with the use of the one-eighth  
13 formula method, including the following:  
14

15 First and most importantly, there is no evidence that the formula accurately  
16 or appropriately calculates a CWC allowance that is based on AEP Ohio's  
17 actual requirements for cash working capital. The formula always produces  
18 a positive CWC allowance, even in situations where no CWC requirement  
19 exists, and even in situations where the utility's CWC requirement is  
20 negative. Thus, the formula method is not a reliable means of deriving a  
21 CWC allowance for AEP Ohio in this proceeding.  
22

1 AEP Ohio's filing has assumed a cash working capital allowance based on  
2 a one-eighth formula method, without providing any support for an  
3 assumption that AEP Ohio actually has a cash working capital requirement.  
4 The assumption underlying a one-eighth cash working capital allowance is  
5 that revenues for the service are collected, on average, 45 days after cash  
6 operating expenses are paid to produce the service. AEP Ohio has presented  
7 no reliable evidence that it has a net cash working capital requirement of 45  
8 days (1/8th of 365 days = 45 days).

9  
10 Included in AEP Ohio's operating expenses are charges from affiliates,  
11 such as charges from AEP Service Company. Providing for a cash working  
12 capital allowance based on affiliate charges would essentially amount to  
13 giving AEP Ohio a return on affiliate expenses. That would seem to be  
14 contradictory to the provision by the affiliated service company of services  
15 at cost.

16  
17 AEP Ohio's proposed allowance also fails to consider the lag in the  
18 payment of current income tax expense. In a legitimate lead-lag study, there  
19 would need to be recognition of the lag in income tax payments, which are  
20 required to be made quarterly. Because AEP Ohio has failed to prove that it  
21 has a cash working capital requirement, a zero allowance should be used.  
22

1 In the absence of a reliable lead-lag study, the presumption should be that  
2 there is a zero CWC requirement, and the CWC allowance should be set at  
3 zero. Setting the CWC allowance at zero thus places the burden of  
4 establishing and supporting with competent evidence any request for a  
5 positive CWC allowance where it belongs, on the utility that is requesting  
6 the allowance. Setting the CWC allowance presumptively at zero for  
7 determining a utility's revenue requirement thus also places the burden of  
8 establishing the amount of a negative CWC amount on the party advocating  
9 the use of a negative CWC allowance for ratemaking purposes.  
10

11 **31. Q. Have you removed AEP Ohio's Cash Working Capital request from**  
12 **rate base?**

13 A. Yes. Based on the above-noted information and conceptual concerns  
14 regarding the use of a formula method (rather than a properly prepared  
15 lead-lag study), the Working Capital request by AEP Ohio has been  
16 removed from rate base.  
17

## 18 **Prepayments**

19 **32. Q. What Prepayments has AEP Ohio included in rate base?**

20 A. AEP Ohio has included in generation demand rate base two items of  
21 prepayments: (1) non-labor prepayments of \$4.488 million for CSP and

1           \$2.045 million for OPCo and (2) labor related prepayments consisting of  
2           prepaid pensions of \$37.952 million for CSP and \$73.653 million for  
3           OPCo.

4  
5   **33.   Q.   Should the prepayments be included in rate base?**

6           A.   No. Without a properly prepared lead-lag study no prepayments should be  
7           included in rate base.

8  
9   **34.   Q.   How does the ratemaking treatment you have applied for Working**  
10           **Capital and Prepaid Pensions compare with the recommendations in**  
11           **the Staff Reports in CSP and OPCo's last distribution rate cases?**

12          A.   In the Staff Reports in CSP's and OPCo's last distribution rate cases, Case  
13          Nos. 11-351-EL-AIR and 11-352-EL-AIR et al, Staff removed Working  
14          Capital including the 13-month balances requested by AEP Ohio for  
15          materials and supplies, uncollectibles and prepayments, but Staff increased  
16          rate base to recognize a prepaid pension asset. To determine AEP Ohio's  
17          capacity rates, I have removed the one-eighth formula based Company  
18          request for Cash Working Capital and have removed prepayments  
19          including the prepaid pension asset. I have not removed the Company's  
20          requested balance for materials and supplies related to generation capacity  
21          (i.e., the demand portion of generation).

1   **35.   Q.    Please explain the additional concerns relating to the AEP Ohio**  
2                   **proposed pension asset that caused you to remove it in determining a**  
3                   **rate for AEP Ohio's capacity.**

4           A.    The pension asset is being removed because (1) AEP Ohio has failed to  
5                   demonstrate that has a net prepaid pension asset, and information reported  
6                   in the 2010 FERC Form 1 concerning pension funding status suggest there  
7                   is a net liability; (2) pension funding levels are the result of discretionary  
8                   AEP management decisions concerning the funding of defined benefit  
9                   pensions, and (3) pension expense would typically be included in the  
10                  determination of cash working capital in a lead lag study.

11  
12   **36.   Q.    How has AEP Ohio failed to demonstrate that it has a prepaid pension**  
13                   **asset related to the provision of generation capacity?**

14           A.    Page 123.32 of the CSP and OPCo FERC Form 1 for 2010 shows that  
15                   funded status of the defined benefit pension plans. For CSP, the FERC  
16                   Form 1 reports pension plan benefit obligations of \$349.8 million at  
17                   December 31, 2010 and pension plan assets of \$277.3 million, for a net  
18                   underfunded status at December 31, 2010 of \$72.5 million. The FERC  
19                   Form 1 on page 123.32 also shows this net amount of \$72.5 million as a  
20                   long-term liability.

1 For OPCo, the FERC Form 1 reports pension plan benefit obligations of  
2 \$629.9 million at December 31, 2010 and pension plan assets of \$518.7  
3 million, for a net underfunded status at December 31, 2010 of \$111.2  
4 million. OPCo's 2010 FERC Form 1 on page 123.33 also shows this net  
5 amount of \$111.2 million as a long-term liability.

6  
7 The defined benefit pension plans for CSP and OPCo, as reported in the  
8 2010 FERC Form 1 on pages 123.32 and 123.33, thus show pension plan  
9 obligations in excess of pension assets, and show a net long-term pension  
10 liability for both companies. The reporting of a significant long-term  
11 pension liability at December 31, 2010 for each company contradicts the  
12 Companies' proposal to include a pension asset amount in rate base.

13  
14 **37. Q. Could the inclusion in generation capacity rate base of AEP Ohio's**  
15 **proposed pension asset provide a disincentive for making reasonable**  
16 **reforms to the Company's pension plans?**

17 A. I believe that it could. Factors such as worker mobility, the ERISA and  
18 other compliance and reporting requirements, and the increased costs of  
19 defined benefit pension plans in recent years have hastened their decline,  
20 and there is a discernible trend away from such plans. Providing what  
21 essentially would amount to a guaranteed return on a pension asset could

1           deter the Company from making reforms to its pension plans that would  
2           reduce cost, as many companies are doing.

3  
4   **38.   Q.    What evidence do you have that indicates a trend away from defined**  
5           **benefit plans?**

6           A.    In March 2009, the U.S. Government Accountability Office issued a report  
7           (GAO-09-291, dated March 30, 2009)<sup>6</sup>, which concluded that:

8           **The number of private defined benefit (DB) pension plans, an important**  
9           **source of retirement income for millions of Americans, has declined**  
10          **substantially over the past two decades. For example, about 92,000**  
11          **single-employer DB plans existed in 1990, compared to just under**  
12          **29,000 single-employer plans today. Although this decline has been**  
13          **concentrated among smaller plans, there is a widespread concern that**  
14          **large DB plans covering many participants have modified, reduced, or**  
15          **otherwise frozen plan benefits in recent years. GAO was asked to**  
16          **examine (1) what changes employers have made to their pension and**  
17          **benefit offerings, including to their defined contribution (DC) plans and**  
18          **health offerings over the last 10 years or so, and (2) what changes**  
19          **employers might make with respect to their pensions in the future, and how**  
20          **these changes might be influenced by changes in pension law and other**  
21          **factors. To gather information about overall changes in pension and health**  
22          **benefit offerings, GAO asked 94 of the nation's largest DB plan sponsors to**  
23          **participate in a survey; 44 of these sponsors responded. These respondents**  
24          **represent about one-quarter of the total liabilities in the nation's single-**  
25          **employer insured DB plan system as of 2004. The survey was largely**  
26          **completed prior to the current financial market difficulties of late 2008.**

27  
28          GAO's survey of the largest sponsors of DB pension plans revealed that  
29          **respondents have made a number of revisions to their retirement**  
30          **benefit offerings over the last 10 years or so. Generally speaking, they**  
31          **have changed benefit formulas; converted to hybrid plans (such plans**  
32          **are legally DB plans, but they contain certain features that resemble**

---

6           A copy of the complete GAO study can be obtained online at:  
          <http://www.gao.gov/new.items/d09291.pdf>

1       **DC plans); or frozen some of their plans.** Eighty-one percent of  
2       responding sponsors reported that they modified the formula for computing  
3       benefits for one or more of their DB plans. Among all plans reported by  
4       respondents, 28 percent of these (or 47 of 169) plans were under a plan  
5       freeze--an amendment to the plan to limit some or all future pension  
6       accruals for some or all plan participants. The vast majority of respondents  
7       (90 percent, or 38 of 42 respondents) reported on their 401(k)-type DC  
8       plans. Regarding these DC plans, a majority of respondents reported either  
9       an increase or no change to the employer or employee contribution rates,  
10      with roughly equal responses to both categories. About 67 percent of (or  
11      28 of 42) responding firms plan to implement or have already implemented  
12      an automatic enrollment feature to one or more of their DC plans. With  
13      respect to health care offerings, all of the (42) responding firms offered  
14      health care to their current workers. Eighty percent (or 33 of 41  
15      respondents) offered a retiree health care plan to at least some current  
16      workers, although 20 percent of (or 8 of 41) respondents reported that  
17      retiree health benefits were to be fully paid by retirees. Further, 46 percent  
18      of (or 19 of 41) responding firms reported that it is no longer offered to  
19      employees hired after a certain date. At the time of the survey, most  
20      sponsors reported no plans to revise plan formulas, freeze or terminate  
21      plans, or convert to hybrid plans before 2012. When asked about the  
22      influence of recent legislation or changes to the rules for pension  
23      accounting and reporting, responding firms generally indicated these were  
24      not significant factors in their benefit decisions. Finally, a minority of  
25      sponsors said they would consider forming a new DB plan. Those sponsors  
26      that would consider forming a new plan might do so if there were reduced  
27      unpredictability or volatility in DB plan funding requirements and greater  
28      scope in accounting for DB plans on corporate balance sheets. **The survey**  
29      **results suggest that the long-time stability of larger DB plans is now**  
30      **vulnerable to the broader trends of eroding retirement security. The**  
31      **current market turmoil appears likely to exacerbate this trend.**  
32

33       As illustrative examples, I am also aware that the following utilities have closed,  
34       frozen, significantly modified or discontinued their defined benefit pension plans:

- 35       •   PacifiCorp / Rocky Mountain Power – In 2007, the company froze the final  
36       average pay formula for non-union employees and will make future accruals  
37       under a cash balance formula. Employees hired on or after 1/1/08 do not  
38       participate in the retirement plan. In 2008: (1) the company also froze the  
39       final average pay formula within the retirement plans and ceased future  
40       accruals for Local 659 union employees and Local S1978 union employees;

1 and (2) the company froze the final average pay formula within the retirement  
2 plan and ceased future accruals for Local 125 union employees hired prior to  
3 1/1/06 and over a certain age. Effective 1/1/09, non-union employees were  
4 permitted to choose to continue receiving pay credits under the cash balance  
5 formula approach within the retirement plan or receive the credits as  
6 additional fixed contribution within the 401(k) plan during a limited election  
7 period.

- 8 • American Water Works Company, Inc. – The company closed the defined  
9 benefit pension plan to all non-union employees hired on or after 1/1/06, and  
10 froze the accrued benefits under the defined benefit plan for union employees  
11 hired on or after 1/1/01.
- 12 • Aqua America, Inc. Employees hired after April 1, 2003 do not participate in  
13 the Company's defined benefit pension plans.
- 14 • Verizon – As of 6/30/06, Verizon management employees no longer earn  
15 pension benefits under the defined benefit plan.
- 16 • Shenandoah Telecommunications Company – The defined benefit pension  
17 plan was frozen as of 1/31/07; the company also announced its intent to settle  
18 benefits earned under the plan and terminate the plan.
- 19 • Cincinnati Bell – Effective 3/28/09, the company froze pay-related pension  
20 credits under the defined benefit pension plan for managers and non-union  
21 employees who were accruing benefits under such plan, were under the age of  
22 50, and were not eligible for the 2007 early retirement option.

23  
24 Additionally, United Illuminating Company, Vermont Electric Cooperative (union  
25 employees), Connecticut Natural Gas, Southern Connecticut Gas, and Northeast  
26 Utilities no longer offer defined benefit pension plans to new hires or only allow  
27 for a cash balance plan for new hires.

28  
29 **39. Q. Does management have a wide latitude in determining how and when**  
30 **to fund defined benefit pension plans?**

31 A. Yes. There is frequently a very large range between the minimum funding  
32 required under ERISA and the maximum annual funding, which is typically

1 limited by the maximum tax-deductible funding contribution limitations  
2 under the Internal Revenue Code.

3  
4 **40. Q. Over the long-term, would increased funding of a defined benefit**  
5 **pension plan be expected to result in lower future net periodic pension**  
6 **cost, other things being equal?**

7 A. Yes. The additional funds contributed into the pension trust would earn a  
8 return and the earned return would reduce future pension expense, other  
9 things being equal.

10  
11 **41. Q. How does CSP's and OPCo's 2010 pension expense compare with**  
12 **2009?**

13 A. Page 123.39 from CSP's and OPCo's FERC Form 1 for 2010 shows the net  
14 periodic pension cost recognized as expense for 2009 and 2010. For CSP,  
15 the defined benefit pension expense increased from \$1.788 million in 2009  
16 to \$3.939 million in 2010, an increase of \$2.151 million or 120%. For  
17 OPCo, the defined benefit pension expense increased from \$1.788 million  
18 in 2009 to \$3.939 million in 2010, an increase of \$3.538 million or 67%, as  
19 summarized below:

| Net Periodic Pension Cost<br>Recognized As Expense (\$000) |       |       |
|--|-------|-------|
| Year   | CSP   | OPCo  |
| 2010   | 3,939 | 8,804 |
| 2009   | 1,788 | 5,266 |
| Increase \$  | 2,151 | 3,538 |
| Increase %   | 120%  | 67%   |
| Source: FERC Form 1, page 123.39                           |       |       |

The increased 2010 defined benefit pension expense for CSP and OPCo have not been adjusted by Staff in determining AEP Ohio's revenue requirement for generating capacity.

**42. Q. Are the considerations with respect to the appropriateness of including of a pension asset in utility rate base perhaps different for determining a capacity rate in the current case, than they might be for determining rates for electric distribution utility service?**

**A.** Yes. The situation with AEP Ohio's distribution function and its generation function in this respect are somewhat different in the aspect of whether potential future reductions to pension cost that could occur from increased pension funding would inure to ratepayers. In the current case, capacity rates are being developed for AEP Ohio that will be in place for a relatively short time, i.e., until AEP Ohio's generation is market priced. This is a different situation from AEP Ohio's provision of distribution service, which has been and is expected to continue to be based on cost-based regulation. Thus, the ratepayers paying the rates established in the

1 current case, i.e., the CRES providers, may not benefit over the long term  
2 from future reductions in AEP Ohio's pension cost. Thus, including a  
3 pension asset in rate base for purposes of establishing a capacity rate would  
4 not be appropriate.

5  
6 **43. Q. How is pension expense typically reflected in a lead-lag study?**

7 A. Pension expense associated with defined benefit pension plans and other  
8 types of retirement plans is typically reflected in a lead-lag study by  
9 applying a calculated payment lag to the amount of related pension expense  
10 that is included in the utility's operating expenses. In the current case, AEP  
11 Ohio has not presented a lead-lag study. The lack of a lead-lag study to  
12 properly measure a working capital requirement in total and specifically as  
13 it relates to pension expense, is thus another reason for rejecting inclusion  
14 of a pension asset in CSP's or OPCo's rate base in the current case for  
15 purposes of determining a capacity rate.

16  
17 **44. Q. In another recent rate case, involving an AEP affiliated utility in  
18 another jurisdiction, have you also recommended a reasonable  
19 alternative concerning the ratemaking treatment of a utility's claimed  
20 pension asset?**

21 A. Yes. In a recent rate case involving Appalachian Power Company (APCO)  
22 in Virginia State Corporation Commission Case No. PUE-2011-00037 I

1 had noted that statements in AEP's board minutes revealed that recent  
2 decisions by AEP management to provide for prefunding of future pension  
3 obligations in 2010 was to be financed by AEP with a relatively low cost  
4 source of capital; thus the pension asset presented in APCO's rate case  
5 should not receive a return at APCO's overall cost of capital. In that  
6 Virginia rate case, APCO had included a lead-lag study to determine the  
7 allowance for cash working capital, and pension expense was included in  
8 the expenses that were addressed in the lead-lag study. APCO's detailed  
9 lead-lag study included a provision for cash working capital related to the  
10 net payment lag for labor costs, including pension and other employee  
11 benefits. In that case, I had recommended, in addition to removing the  
12 prepaid pension from rate base, making a corresponding adjustment to  
13 provide interest on the average prepaid pension balance, net of related  
14 ADIT, at the commercial paper interest rate. The allowance of financing  
15 costs on the net prepaid pension asset at the commercial paper rate  
16 addressed a source of financing for the prepaid pension asset.<sup>7</sup> The  
17 additional offsetting adjustment was intended to address concerns with  
18 respect to the relationship between pension expense in rate base and  
19 operating expenses, and to protect ratepayers from having their base rates  
20 for APCO's electric service increased unnecessarily as a result of the AEP

---

<sup>7</sup> The interest expense related to imputing the debt-based financing would then be included above-the-line as a utility operating expense for ratemaking purposes.

1 management decision to pre-fund future pension obligations. I also have  
2 noted that a similar regulatory treatment of applying a debt-based return on  
3 pension asset amounts had been applied by the Illinois Commerce  
4 Commission in a series of rate cases involving Commonwealth Edison  
5 Company ("ComEd").  
6

7 **45. Q. How have you treated the Accumulated Deferred Income Taxes related**  
8 **to the CSP and OPCo pension assets?**

9 A. The Accumulated Deferred Income Taxes related to the CSP and OPCo  
10 pension assets have also been removed from AEP Ohio's proposed  
11 generation demand rate base for CSP and OPCo, as described below.

#### 12 **Accumulated Deferred Income Taxes**

13 **46. Q. How did AEP Ohio determine its rate base offset for ADIT?**

14 A. AEP Ohio started with the components of its recorded balances of ADIT at  
15 December 31, 2010 and allocated them to the generation (demand)  
16 function.  
17

18 **47. Q. What adjustments have you made for ADIT?**

19 A. The adjustments I have made for ADIT are shown on Schedule B-1 of  
20 Exhibit RCS-1 for CSP and Exhibit RCS-2 for OPCo.  
21

1   **48.   Q.   Please explain those adjustments.**

2           A.   Referring to Exhibit RCS-1, Schedule B-1, line 1, CSP had increased rate  
3           base for \$5.228 million of ADIT in account 190 for a “gross up” related to  
4           federal investment tax credits (“ITC”). For ratemaking purposes, ITC is  
5           being amortized as a reduction to federal income tax expense. Amortizing  
6           ITC as a reduction to income tax expense is one of the methods provided  
7           for the normalization of ITC in the Internal Revenue Code and Treasury  
8           Regulations. When that method is selected, there is no rate base impact of  
9           the deferred ITC. An alternative method of reflecting ITC for ratemaking  
10          purposes that is also permitted by the tax code involves deducting ITC from  
11          rate base, and not reflecting an impact on income tax expense. Because  
12          CSP has chosen to reduce income taxes for the ITC amortization, there is  
13          no basis for either adding or deducting the ITC from rate base. CSP has  
14          provided no valid basis for adding the deferred ITC to jurisdictional rate  
15          base. Additionally, when the debit balance that CSP has recorded in  
16          Account 190 for the ITC is amortized, that amortization would reduce  
17          income tax expense; however, CSP has not reflected that additional  
18          reduction to income tax expense for this additional amortization of the ITC  
19          item it recorded in Account 190 in its proposed income tax expense.  
20          Removal of the Deferred ITC in account 190 that CSP had proposed to  
21          include in rate base reduces the Company’s proposed production demand  
22          jurisdictional rate base by \$5.229 million.

1  
2 **49. Q. Please discuss the removal of the ADIT debit balance in Account 190**  
3 **for "IGCC Revenues."**

4 A. As shown on Exhibits RCS-1 and RCS-2, Schedule B-1, line 2, CSP and  
5 OPCo proposed to increase production demand rate base by \$4.324 million  
6 and \$4.160 million, respectively, for ADIT in account 190 for "IGCC  
7 Revenues." CSP and OPCo have not identified an IGCC power plant that  
8 is in service and providing capacity. Page 123.21 of CSP's and OPCo's  
9 respective 2010 FERC Form 1 reports state that CSP and OPCo will not  
10 start construction of an IGCC plant until existing statutory barriers are  
11 addressed and sufficient assurance of cost recovery exists. The ADIT debit  
12 balance in account 190 is not related to a plant that is in service.  
13 Additionally, none of the revenue that CSP and OPCo collected for pre-  
14 construction costs of an IGCC plant has been reflected in their  
15 determinations of the revenue requirement for capacity in the current case.  
16 Consequently, the ADIT debit balance for the "IGCC Plant" should be  
17 removed from production demand rate base, as shown on Schedule B-1,  
18 line 2, of Exhibits RCS-1 and RCS-2.

19  
20 **50. Q. Please discuss the removal of the net "FIN 48" items from account 190**  
21 **ADIT.**

1           A.     Both CSP and OPCo included net debit balances in account 190 ADIT for  
2                 “FIN 48” items that relate to uncertain tax positions. Those items should be  
3                 removed from rate base, consistent with accounting guidance provided by  
4                 FERC and for other reasons discussed below. Removal of the FIN 48 items  
5                 from account 190 ADIT reduces CSP’s production demand rate base by  
6                 \$275,544 as shown on Exhibit RCS-1, Schedule B-1, line 3, and reduces  
7                 OPCo’s production demand rate base by \$1.772 million as shown on  
8                 Exhibit RCS-2, Schedule B-1, line 3. Detail of each company’s account  
9                 190 FIN 48 items is presented on Schedule B-1, lines 9-13.

11   **51.   Q.     What is a “FIN 48” amount?**

12           A.     The FIN 48 liability represents the difference between the Company’s  
13                 position taken on the tax return versus the identification of “uncertain” tax  
14                 positions as required for financial statement reporting.<sup>8</sup> FIN 48 recognizes  
15                 that differences in the interpretation of tax law exist (i.e. legislation and  
16                 statutes, legislative intent, regulations, rulings and case law), and seeks to  
17                 eliminate any uncertain tax benefit from the financial statements until the  
18                 uncertainty associated with the position has been removed. An uncertainty  
19                 may be removed by either (1) review of the technical merits of the position

---

<sup>8</sup> Financial Accounting Standards Interpretation No. 48 (“FIN 48”) has subsequently been codified in the Accounting Standards Codification (“ASC”) as part of ASC 740 Income Taxes.

1 by the relevant taxing authority, (2) expiration of the statute of limitations  
2 or (3) law change.

3  
4 **52. Q. Has FERC provided guidance on accounting and financial reporting**  
5 **for uncertainty in income taxes?**

6 A. Yes. On May 25, 2007, in Docket No. AI07-2-000, FERC provided  
7 guidance on accounting for uncertainty in income taxes. That FERC  
8 regulatory accounting guidance on uncertain taxes is attached in CUB  
9 Exhibit 1.3. The FERC guidance provides as follows:

10 Under existing Commission requirements, entities measure  
11 and recognize current and deferred tax liabilities (and assets)  
12 based on the positions taken or expected to be taken in a filed  
13 tax return and recognize uncertainties regarding those  
14 positions by recording a separate liability for the potential  
15 future payment of taxes when the criteria for recognition of a  
16 liability contained in FASB Statement No. 5, *Accounting for*  
17 *Contingencies*, are met, generally as part of the accrual for  
18 current payment of income tax. Where uncertainties exist  
19 with respect to tax positions involving temporary differences,  
20 the amounts recorded in the accounts established for  
21 accumulated deferred income taxes are based on the positions  
22 taken in the tax returns filed or expected to be filed.  
23 [Temporary difference as used here means a difference  
24 between the tax basis of an asset or liability as reflected or  
25 expected to be reflected in a tax return and its reported  
26 amount in the financial statements.] Recognition of a separate  
27 liability for any uncertainty related to temporary differences  
28 is therefore not necessary because the entity has already  
29 recorded a deferred tax liability for the item or would be  
30 entitled to record a deferred tax asset for the item if a separate  
31 liability for the uncertainty was recognized.

32 This practice results in the accumulated deferred income tax  
33 accounts reflecting an accurate measurement of the cash

1 available to the entity as a result of temporary differences.  
2 This is an important measurement objective of the  
3 Commission Uniform Systems of Account because  
4 accumulated deferred income tax balances, which are  
5 significant in amount for most Commission jurisdictional  
6 entities, reduce the base on which cost-based, rate-regulated  
7 entities are permitted to earn a return. **FIN 48, which does**  
8 **not permit a liability for uncertain tax positions related to**  
9 **temporary differences to be classified as a deferred tax**  
10 **liability, frustrates this important measurement objective.**  
11 Therefore, entities should continue to recognize deferred  
12 income taxes for Commission accounting and reporting  
13 purposes based on the difference between positions taken in  
14 tax returns filed or expected to be filed and amounts reported  
15 in the financial statements. Also, consistent with the direction  
16 provided in Docket No. AI93-5 regarding the implementation  
17 of FASB Statement No. 109, **public utilities and licensees,**  
18 **natural gas companies and centralized service companies**  
19 **should not remove from accumulated deferred income**  
20 **taxes and reclassify as a current liability the amount of**  
21 **deferred income taxes payable within 12 months of the**  
22 **balance sheet date.**

23 (Emphasis supplied.)

24  
25 **53. Q. Are you familiar with how another electric utility owned by AEP has**  
26 **applied the FERC guidance?**

27 A. Yes, I am aware of a response by Indiana Michigan Power Company  
28 ("IMPC") to data request SDI 4-7 in its current electric utility rate case in  
29 Indiana, IURC Cause No. 44075. Parts c and d of that request and the  
30 related responses state as follows:

31 c. How has the Company treated FIN 48 amounts for  
32 purposes of its rate case filing? Please explain fully and  
33 provide references to where such treatment is reflected in the  
34 Company's filing.

1 Response: For purposes of the Company's filing, the FIN-48  
2 ADIT balances have not been taken into consideration. The  
3 Company adheres to the guidance pursuant to FERC Docket  
4 No. AI07-2-000 which summarizes the accounting for  
5 uncertain tax positions. The accounting for uncertain tax  
6 positions represents accruals and recordation's of income  
7 taxes which will be ultimately resolved at a future unspecified  
8 time. Therefore, in the Company's rate filing, there are no  
9 amounts related to uncertain tax positions in rate base or  
10 income tax expense.

11  
12 d. Has the Company attempted to not reflect any tax savings  
13 related to repairs deductions or any other tax deductions taken  
14 on an income tax return because of uncertainty?

15 Response: No.

16 (Emphasis supplied.)

17  
18 In summary, that utility (which is also part of American Electric Power Company)  
19 has interpreted the FERC guidance on uncertain income tax positions to require  
20 that tax savings related to deductions taken on income tax returns should be  
21 reflected for ratemaking purposes and the FIN 48 ADIT balances are not to be  
22 taken into consideration for ratemaking purposes. CSP and OPCo are also AEP-  
23 owned electric utilities and should thus be similarly following the FERC guidance  
24 for uncertain income taxes. Following the FERC guidance for uncertain tax  
25 positions as IMPC has done is a good general practice, and should also be applied  
26 for AEP Ohio in the current case.

27  
28 **54. Q. Please describe the adjustment for FIN 48**

1           A.     As shown on Exhibits RCS-1 and RCS-2, Schedule B-1, line 3, this  
2                     adjustment removes the net ADIT items related to FIN 48 from rate base.

3  
4   **55.   Q.     Please continue with your explanation of the ADIT adjustments.**

5           A.     ADIT in account 190 related to other asset or liability balances that are not  
6                     reflected in rate base is removed on Exhibits RCS-1 and RCS-2, Schedule  
7                     B-1, line 4, for CSP and OPCo, respectively. This decreases CSP's  
8                     production demand rate base by \$1.362 million and increases OPCo's by  
9                     \$1.884 million. Each of the "labor-related" ADIT balances in account 190  
10                    listed on Exhibit RCS-1, Schedule B-1, lines 14-22 and on Exhibit RCS-2,  
11                    Schedule B-1, lines 14-23, are being removed. Each of these items  
12                    apparently relates to other balance sheet accounts that are not being  
13                    reflected in the determination of rate base. For example, there are  
14                    apparently liability balances related to vacation pay, incentive  
15                    compensation and other postretirement benefits (SFAS 106). Based on the  
16                    matching principle, if the related ADIT debit balances are included in rate  
17                    base, then the accrued liabilities and operating reserves giving rise to those  
18                    deferred taxes should be deducted from rate base. However, those related  
19                    liability balances or reserves are not being deducted from rate base.  
20                    Consequently, the related ADIT balances in Account 190 for CSP and  
21                    OPCo are being removed to reflect proper matching of related items.

1   **56.   Q.    Has AEP indicated that it would be providing additional information**  
2                   **for some of those items?**

3           A.    Yes. In particular, it is unusual to have a large credit balance for ADIT in  
4                   account 190 for a reserve for workers compensation or SFAS 112  
5                   postemployment benefits, as OPCo had at December 31, 2010.<sup>9</sup> Those  
6                   balances may be indicative of unusual activity in 2010 for OPCo.

7   **57.   Q.    Please explain the adjustment to remove the ADIT in account 283**  
8                   **related to the pension asset.**

9           A.    CSP and OPCo recorded ADIT in account 283 related to a pension asset.  
10               Because the pension asset is being excluded from production demand rate  
11               base, as explained above, the ADIT credits that relate to the pension asset  
12               should also be removed, consistent with the matching principle. As shown  
13               on Exhibits RCS-1 and RCS-2, Schedule B-1, line 5, removal of the ADIT  
14               for prepaid pension increase CSP's production demand rate base by \$1.362  
15               million and OPCo's by \$1.883 million. These ADIT amounts related to the  
16               pension asset are credit balances and had decreased AEP Ohio's proposed  
17               rate base. On a net basis, AEP Ohio's proposal to include a prepaid  
18               pension asset in rate base increased rate base by the net amount of the  
19               prepaid pension asset, less the related ADIT. The pension asset and the

---

<sup>9</sup> See, e.g., Exhibit RCS-2, Schedule B-1, lines 14 and 22, respectively.

1 directly related ADIT should receive the same ratemaking treatment, i.e.,  
2 both should be excluded from rate base, based on the matching principle.  
3

4 **58. Q. How does the "CCD Bill" item relate to the pension asset that AEP**  
5 **Ohio included in generation capacity rate base?**

6 A. That is presently unclear. AEP Ohio was requested to provide additional  
7 information concerning the item on Exhibit RCS-1, Schedule B-1, line 28,  
8 with respect to item 620C, the CCD Bill ADIT for prepaid pensions. The  
9 CCD Bill refers to billings from joint owners.  
10

11 **59. Q. Please explain the adjustment to ADIT for item 906D, SFAS 106**  
12 **postretirement benefits, nondeductible contribution.**

13 A. As shown on Exhibits RCS-1 and RCS-2, Schedule B-1, line 6, this ADIT  
14 debit-balance item that CSP and OPCo included in account 283 is also  
15 being removed from production demand rate base. This item appears to be  
16 similar in concept to the ADIT items for various benefit items that were  
17 removed from account 190. The debit-balance ADIT presumably relates to  
18 a deferred credit or liability account that is not being recognized in the  
19 determination of rate base. Consequently, the related ADIT should also be  
20 removed.  
21

1   **60.   Q.    What is the net result of the ADIT adjustments on CSP's and OPCo's**  
2                   **capacity rate base?**

3           A.    The ADIT adjustments reduce CSP's production demand rate base by  
4                   \$7.848 million as shown on Exhibit RCS-1, Schedule B-1, and increases  
5                   OPCo's production demand rate base by \$8.480 million, as shown on  
6                   Exhibit RCS-2, Schedule B-1.

7  
8           **Operating and Maintenance Expense**

9   **61.   Q.    Have you made any adjustments to Operating and Maintenance**  
10                   **Expense?**

11          A.    Yes. As shown on Exhibits RCS-1 and RCS-2, Schedule C, the following  
12                   adjustments have been made to O&M Expense:

13                1) To remove payroll and benefits for eliminated positions; and

14                2) To remove 2010 severance expense.

15                Each of those adjustments is explained below.

16  
17           **Payroll and Benefits for Eliminated Positions**

18   **62.   Q.    Why is there a need to adjust AEP Ohio's 2010 data to remove payroll**  
19                   **and benefit costs associated with positions that were eliminated in the**  
20                   **2010 severance programs?**

1           A.     AEP Ohio's unadjusted 2010 data includes the payroll, benefit and payroll  
2                   tax expense for positions that have been eliminated as a result of AEP's  
3                   2010 voluntary and involuntary severance programs. Because the rates in  
4                   this proceeding are to be applied prospectively, AEP Ohio's expenses  
5                   should not include labor costs for personnel that were there in early 2010  
6                   but who, as a result of the 2010 severance programs, are no longer with the  
7                   Company. Consequently, there is a need to adjust AEP Ohio's 2010  
8                   information to remove the costs related to the significant number of  
9                   positions that were permanently eliminated as a result of the 2010  
10                  severance programs.

11  
12   **63.   Q.     Has AEP Ohio provided work force information for CSP, OPCo and**  
13                   **the AEP Service Company?**

14           A.     Yes. In response to PUCO Staff Set 1 INT-01-011, Attachment 1 provided  
15                   work force information for CSP, OPCO and AEPSC. That information  
16                   shows that significant work force reductions occurred after May 2010:

Headcount Before and After 2010 Severance

| Date   | AEPSC | CSP   | OPCo  |           |
|--------|-------|-------|-------|-----------|
| 10-Jan | 6,169 | 1,256 | 2,389 |           |
| 10-Feb | 6,134 | 1,244 | 2,386 |           |
| 10-Mar | 6,116 | 1,233 | 2,383 |           |
| 10-Apr | 6,088 | 1,227 | 2,375 |           |
| 10-May | 6,101 | 1,222 | 2,372 | Severance |
| 10-Jun | 5,510 | 1,054 | 2,081 |           |
| 10-Jul | 5,479 | 1,049 | 2,071 |           |
| 10-Aug | 5,246 | 1,055 | 2,083 |           |
| 10-Sep | 5,208 | 1,047 | 2,081 |           |
| 10-Oct | 5,197 | 1,054 | 2,094 |           |
| 10-Nov | 5,179 | 1,062 | 2,103 |           |
| 10-Dec | 5,171 | 1,062 | 2,104 |           |
| 11-Jan | 5,138 | 1,056 | 2,098 |           |
| 11-Feb | 5,146 | 1,057 | 2,096 |           |
| 11-Mar | 5,152 | 1,058 | 2,103 |           |
| 11-Apr | 5,148 | 1,059 | 2,105 |           |
| 11-May | 5,156 | 1,055 | 2,101 |           |
| 11-Jun | 5,182 | 1,059 | 2,111 |           |
| 11-Jul | 5,170 | 1,055 | 2,125 |           |
| 11-Aug | 5,146 | 1,054 | 2,124 |           |
| 11-Sep | 5,094 | 1,055 | 2,106 |           |
| 11-Oct | 5,072 | 1,054 | 2,104 |           |
| 11-Nov | 5,064 | 1,054 | 2,099 |           |
| 11-Dec | 5,068 | 1,055 | 2,106 |           |

The following tables compare the average work force for January through May 2010, with the average work force subsequently in 2010 and with the average work force in 2011:

|                   |       |       |       |  |
|-------------------|-------|-------|-------|--|
| Average           |       |       |       |  |
| Jan-May 2010      | 6,122 | 1,236 | 2,381 |  |
| Remainder of 2010 | 5,284 | 1,055 | 2,088 |  |
| 2011              | 5,128 | 1,056 | 2,107 |  |

|  |     |     |     |  |
|--|-----|-----|-----|--|
| Estimated net severed positions        |     |     |     |  |
| Jan-May 2010 versus remainder of 2010: |     |     |     |  |
| Count                                  | 837 | 182 | 293 |  |
| Percent                                | 14% | 15% | 12% |  |

|                                  |       |       |       |  |
|----------------------------------|-------|-------|-------|--|
| Jan-May 2010 versus average 2011 |       |       |       |  |
| Count                            | 994   | 180   | 275   |  |
| Percent                          | 16.2% | 14.6% | 11.5% |  |

1 The information on work force levels summarized above reinforces that using  
2 unadjusted 2010 payroll and benefit expenses would not be representative of  
3 ongoing conditions since AEP's work force, including the work force at CSP,  
4 OPCo and AEP Service Company has been significantly reduced from the levels  
5 that existed in early 2010.  
6

7 **64. Q. What amount of payroll and benefit costs have you removed from AEP**  
8 **Ohio's 2010 O&M Expense allocated to the generation function?**

9 A. As shown on Exhibit RCS-1, Schedule C-1, for CSP an amount of \$6.022  
10 million is removed for direct payroll expense reductions for CSP allocated  
11 to the generation demand function, and \$0.495 million for reductions in  
12 expense to various employee benefits that were directly impacted by the  
13 work force reduction. Additionally, \$3.533 million is removed for payroll  
14 for AEP Service Company employee payroll charged to CSP and allocated  
15 to CSP's generation demand function, and approximately \$290,000 for  
16 AEP Service Company employee benefits. The total reduction in payroll  
17 and benefits allocated to CSP's generation function is \$10.340 million.  
18 Similarly, as shown on Exhibit RCS-2, Schedule C-1, for OPCo, an amount  
19 of \$15.734 million is removed for direct payroll expense reductions for  
20 OPCo allocated to the generation demand function, and \$1.136 million for  
21 reductions in expense to various employee benefits that were directly  
22 impacted by the work force reduction. Additionally, \$7.323 million is

1 removed for payroll for AEP Service Company employee payroll charged  
2 to OPCo allocated to OPCo's generation demand function, and  
3 approximately \$529,000 for AEP Service Company employee benefits.  
4 The total reduction in payroll and benefits allocated to OPCo's generation  
5 function is \$24.722 million.  
6

#### 7 **AEP 2010 Severance Program Cost**

8 **65. Q. Please explain why the 2010 severance program cost should be**  
9 **removed from 2010 O&M Expense.**

10 A. The 2010 severance cost should be removed from 2010 O&M Expense  
11 because rates for AEP Ohio's generating capacity are being established  
12 prospectively and this was a significant non-recurring cost that was  
13 recorded in 2010.  
14

15 **66. Q. Should the severance cost be amortized?**

16 A. Perhaps, but the amortization should have commenced when the savings  
17 began, and there is no demonstrated need for a prospective amortization of  
18 2010 severance cost in the current case to determine a revenue requirement  
19 for AEP Ohio's capacity. AEP began to realize cost savings due to the  
20 reduced salaries as soon as employees accepted the voluntary retirement  
21 offer and/or were involuntarily terminated in mid-2010. Amortization of

1 the costs to achieve that savings should have commenced as soon as the  
2 savings from the reduced work force and reduced AEPSC charges  
3 commenced. AEP Ohio has not demonstrated that there is any net amount  
4 of remaining costs to achieve that has not already been absorbed by related  
5 savings experienced by AEP through June 1, 2012, the approximate  
6 effective date of new rates in this proceeding. Consequently, there is no  
7 need for a prospective amortization of 2010 severance costs in establishing  
8 AEP Ohio's revenue requirement for capacity rates that would be applied  
9 prospectively from June 1, 2012. Severance costs recorded by CSP and  
10 OPCo in 2010, including AEPSC charges to these utilities, should therefore  
11 be removed in determining a revenue requirement for AEP Ohio's capacity.

12  
13 **67. Q. When did AEP and its subsidiaries begin to realize savings from the**  
14 **severance program?**

15 **A. AEP and its subsidiaries including AEPSC and APCO implemented a**  
16 **work force reduction program in 2010, and the related payroll savings**  
17 **commenced around June 2010. One of the primary purposes of this**  
18 **work force reduction was to manage AEP's earnings in view of**  
19 **changing economic conditions. AEP's Securities and Exchange**  
20 **Commission ("SEC") form 10-Q for the quarterly period ending June**  
21 **30, 2011, for example, describes that cost reduction initiative at page 79**  
22 **as follows:**

1 In April 2010, we began initiatives to decrease both labor and non-  
2 labor expenses with a goal of achieving significant reductions in  
3 operation and maintenance expenses. A total of 2,461 positions  
4 were eliminated across the AEP System as a result of process  
5 improvements, streamlined organizational designs and other  
6 efficiencies. Most of the affected employees terminated employment  
7 May 31, 2010. The severance program provided two weeks of base  
8 pay for every year of service along with other severance benefits.

9 We recorded a charge for \$293 million to Other Operation expense  
10 during the second quarter of 2010 primarily related to severance  
11 benefits as the result of the headcount reduction initiatives.

12 AEP's SEC Form 10-K for the year ending December 31, 2010 contains  
13 similar statements at page 403, and also states that:

14 Management recorded a charge to expense in 2010 primarily related  
15 to the headcount reduction initiatives. Management does not expect  
16 additional costs to be incurred related to this initiative.

17 AEP began to realize cost savings due to the reduced salaries and benefits as soon  
18 as employees accepted the voluntary retirement offer and/or were involuntarily  
19 terminated in mid-2010.

20  
21 **68. Q. How has the regulatory commission in Virginia addressed amortization**  
22 **of severance costs associated with the AEP 2010 severance program?**

23 A. In its Final Order dated November 30, 2011, in Case No. PUE-2011-00037,  
24 an Appalachian Power Company ("APCo") application for the review of  
25 rates, the Virginia State Corporation Commission addressed the AEP  
26 severance program cost at pages 16-17 as follows (footnotes omitted):

27 In 2010, AEP implemented cost reduction initiatives  
28 associated primarily with workforce reductions. The final

1 cost of the workforce reduction was \$299 million at a total  
2 AEP level. The Company's "share of those costs was  
3 approximately \$26.7 million, of which \$16.7 million of such  
4 costs was directly related to [APCo's] workforce reductions  
5 and approximately \$10 million of such costs was for the  
6 Company's share of [American Electric Power Service  
7 Corporation's ('ASPSC')] workforce reductions." We reject  
8 the Company's request to defer and amortize the costs of the  
9 workforce reduction program over four years beginning with  
10 the effective date of the rates provided in this case, which  
11 would "cause customers to pay the full amount of the  
12 workforce reduction costs over that period of time."

13 We find that it is reasonable – for regulatory accounting  
14 purposes in this case – to match the specific costs of this  
15 severance program with the specific savings related thereto.  
16 We deny the Company's proposal to evaluate earnings to  
17 determine whether these 2010 costs should be deferred,  
18 amortized, and collected in full from ratepayers in the future.  
19 Rather, we conclude that it is appropriate for the amortization  
20 of the costs of this program to commence with – and to track  
21 – the realization of the savings related thereto in a manner  
22 that effectuates the matching of costs and savings. Moreover,  
23 this finding provides the Company with a reasonable  
24 opportunity to recover its severance costs.

25 In this regard, based on the evidence presented, we find that  
26 the savings realized from this cost reduction initiative exceed  
27 the costs therefore prior to the start of the rate year in this  
28 case. As a result, these severance costs will be completely  
29 amortized before the beginning of the rate year, and, thus, no  
30 such costs shall be included in rates prospectively. ...

31  
32 **69. Q. Was that the same AEP 2010 severance program that also impacted**  
33 **CSP and OPCo in 2010?**

34 **A. Yes.**  
35

1   **70.   Q.    The Virginia Order you quoted above referred to an “effective date” of**  
2                   **the rates provided in that case. To what specific date or dates does that**  
3                   **pertain?**

4           A.    In Virginia Case No. PUE-2011-00037, APCo had proposed to defer and  
5                   amortize severance cost for itself and for AEPSC charges, commencing  
6                   with December 1, 2012, the date when APCO’s application had initially  
7                   assumed new rates from that proceeding would become effective.<sup>10</sup>  
8

9   **71.   Q.    Have you evaluated the amortization period of severance cost for CSP**  
10                   **and OPCo similarly to the method described in that Virginia APCo**  
11                   **order?**

12          A.    Yes. As shown on Exhibit RCS-1, Schedule C-2, for CSP, total annual  
13                   payroll savings of approximately \$34.536 million would provide for  
14                   amortization of the total severance cost of \$32.213 million over a period of  
15                   approximately 11 months. Thus, commencing with June 2010, the  
16                   amortization of severance costs for CSP would be effectively completed in  
17                   approximately May or June of 2011, roughly one year prior to the June 1,  
18                   2012 effective date for the CSP capacity rates being established in the  
19                   current proceeding. Thus, there is no basis for a prospective amortization

---

<sup>10</sup> Due to various delays encountered in processing that case, expectations about the rate effective date were adjusted accordingly such that the rate year was subsequently expected to commence on or about February 1, 2012.

1 of CSP's severance cost to be included in operating expenses in the current  
2 case.

3 Similarly, as shown on Exhibit RCS-2, Schedule C-2, for OPCO, total  
4 annual payroll savings of approximately \$49.258 million would provide for  
5 amortization of the total severance cost of \$52.661 million over a period of  
6 approximately 13 months. Thus, commencing with June 2010, the  
7 amortization of severance costs for OPCO would be effectively completed  
8 in approximately July 2011, roughly ten months prior to the June 1, 2012  
9 effective date for the OPCO capacity rates being established in the current  
10 proceeding. Thus, there is no basis for a prospective amortization of  
11 OPCO's severance cost to be included in operating expenses in the current  
12 case.

13  
14 **72. Q. What amount of severance costs have you removed from AEP Ohio's**  
15 **2010 O&M Expense allocated to the generation demand (i.e., capacity)**  
16 **function?**

17 **A.** As shown on Exhibit RCS-1, Schedule C-2, an amount of \$9.852 million of  
18 severance cost for CSP and allocated AEP Service Company severance  
19 costs allocated to CSP's generation demand function has been removed.  
20 Similarly, as shown on Exhibit RCS-1, Schedule C-2, an amount of  
21 \$29.152 million of severance cost for OPCO and allocated AEP Service

1 Company severance costs allocated to OPCO's generation demand function  
2 has been removed.  
3

#### 4 **Income Tax Expense**

5 **73. Q. How has AEP Ohio proposed to provide for income tax expense in its**  
6 **capacity rates?**

7 A. AEP Ohio proposes to calculate income tax expense based on an  
8 assumption that its requested equity return represents taxable income. AEP  
9 Ohio has calculated its proposed income tax expense by applying an  
10 income tax rate "gross up" factor to its requested return. The AEP Ohio  
11 calculations of income taxes are reproduced for CSP and OPCo,  
12 respectively, on Exhibits RCS-1 and RCS-2, Schedule E, lines 1-5.  
13

14 **74. Q. What adjustments have you made to AEP Ohio's calculation?**

15 A. I have revised the return amount to correspond with the rate base and cost  
16 of capital being used. I have also reflected a pro forma adjustment for a  
17 Domestic Production Activities Deduction on a "separate return" basis.  
18 As shown on Exhibit RCS-1, Schedule E, this produces an allowance for  
19 income taxes for CSP of \$36.907 million (without the DPAD), for a  
20 reduction of \$8.984 million from CSP's requested amount of \$45.891  
21 million. The tax effect of the "separate return" based DPAD calculation

1 reduces that by \$3.379 million, for a total reduction to CSP's requested  
2 income taxes of \$12.363 million.

3 Similarly, as shown on Exhibit RCS-2, Schedule E, this produces an  
4 allowance for income taxes for OPCO of \$108.811 million (without the  
5 DPAD), for a reduction of \$14.529 million from OPCO's requested amount  
6 of \$123.340 million. The tax effect of the "separate return" based DPAD  
7 calculation reduces that by \$0.879 million, for a total reduction to OPCO's  
8 requested income taxes of \$15.409 million.

9  
10 **Domestic Production Activities Deduction**

11 **75. Q. What is the §199 deduction for Domestic Production Activities?**

12 A. Section 199 of the Internal Revenue Code provides for a special deduction  
13 for Domestic Production Activities. This is known as the §199 Deduction  
14 or the Domestic Production Activities Deduction (or DPAD). Because AEP  
15 Ohio has its own generation supply, such activities are considered domestic  
16 production activities, and thus AEP Ohio are eligible for the DPAD  
17 deduction for their generation operations if they have positive taxable  
18 income and meet the other requirements for claiming the deduction. For  
19 purposes of determining its capacity revenue requirement, AEP Ohio has  
20 taxable income, and otherwise meets the requirements of qualifying for a  
21 DPAD on a "separate return" basis. Thus for purposes of determining a

1 revenue requirement for AEP Ohio's generating capacity, the result should  
2 reflect the reduction to current federal income tax expense for the §199  
3 deduction, computed on a "separate return" basis.  
4

5 **76. Q. Does AEP Ohio participate in a consolidated federal income tax**  
6 **return?**

7 A. Yes. AEP Ohio participates in the AEP corporate consolidated corporate  
8 federal income tax return. However, for purposes of determine a rate for  
9 AEP Ohio's generation capacity, the Company's federal income tax  
10 expense is based on an assumption of a "separate return" (i.e., all impacts  
11 of the consolidated income tax are ignored for ratemaking purposes).  
12 Consequently, for ratemaking purposes it is appropriate to compute the  
13 impact on current federal income tax expense for the Company's generation  
14 function on a separate return basis, including the §199 deduction. AEP  
15 Ohio's federal income tax expense is being determined on a "separate  
16 return" basis in the current case. For its income tax calculation for  
17 ratemaking purposes, AEP Ohio has assumed that it has federal taxable  
18 income and has requested a positive amount of federal income tax expense  
19 which is included in its proposed revenue requirement for generation  
20 capacity. The Company's generation revenue requirement calculation  
21 assumes that the generation function has positive federal taxable income. It

1 also appears from other information that both CSP and OPCo would have  
2 qualified for a DPAD for 2010 based on their “separate return” information.  
3

4 **77. Q. Did AEP Ohio include a calculation of the §199 deduction impact in its**  
5 **revenue requirement for generation capacity?**

6 A. No. Nowhere in the AEP Ohio revenue requirement calculation for capacity  
7 is the impact of a pro forma §199 deduction accounted for.  
8

9 **78. Q. On what form is the §199 deduction calculated?**

10 A. The §199 deduction for Domestic Production Activities is computed on IRS  
11 form 8903. The DPAD that is computed on form 8903 appears on the front  
12 page of the corporate federal income tax return (form 1120) on line 25. It is  
13 an additional deduction that is beyond the operating expenses recorded by  
14 the utility on its books and the other tax deductions.  
15

16 **79. Q. Please address the Section 199 deduction, as it relates to the interplay**  
17 **between a “separate return” based calculation for income taxes and the**  
18 **impact of participating in a consolidated federal income tax return in**  
19 **another recent utility rate case?**

20 A. Where a utility participates in a consolidated federal income tax return with  
21 other affiliates, the Section 199 deduction amount that is allocated to a  
22 utility as result of participating in the consolidated tax return can be lower

1           than the Section 199 deduction when computed on a “stand alone” basis for  
2           the utility. Because of other impacts on the consolidated return, the amount  
3           of the allocated DPAD can be lower than if it had been computed on a  
4           separate standalone tax return basis.

5           AEP Ohio’s proposed revenue requirement for generating capacity and its  
6           computation of income tax expense for purposes of determining capacity  
7           rates in the current proceeding is essentially based on the assumption that  
8           CSP and OPCo each file a separate standalone tax return for all income and  
9           deductions. The §199 Deduction related to AEP Ohio’s generation revenue  
10          requirement should therefore, also reflect the §199 deduction computed on  
11          separate return basis. In other words, for ratemaking purposes all  
12          components of the income tax expense should be computed on a standalone  
13          separate tax return basis, including the §199 Deduction, as a matter of  
14          conceptual and computational consistency. The principle is that it would  
15          not be appropriate to randomly quantify certain components of an income  
16          tax expense computation on a standalone basis and other components on a  
17          consolidated basis. By omitting a DPAD for CSP and OPCo, the Company  
18          is applying a consolidated tax return concept, whereas for all other aspects  
19          of the income tax calculations, a "separate return" concept is being applied.  
20          The inconsistency in the application of the "separate return" concept causes  
21          AEP Ohio's income tax request to be overstated.

1    **80.    Q.    Would that principle of consistent application of the "separate return"**  
2                   **concept also apply to AEP Ohio for determining the revenue**  
3                   **requirement for its generating capacity?**

4            A.    Yes. The principle that it is not appropriate to randomly quantify certain  
5                   components of an income tax expense computation on a standalone basis  
6                   and other components on a consolidated basis would apply to AEP Ohio in  
7                   the current case. For purposes of determining a revenue requirement and  
8                   cost rate for capacity, AEP Ohio has computed its federal income tax  
9                   expense for ratemaking purposes on a "separate return" basis. They have  
10                  essentially based their request for income tax expense at proposed rates  
11                  upon the current taxable income represented by the return on equity  
12                  (grossed up for income taxes), and have reduced that only for ITC  
13                  amortization, but not for other deductions, such as the DPAD, that CSP or  
14                  OPCo would claim on a "separate return" basis. Nor have the companies  
15                  reflected any benefit from participating in the AEP consolidated federal  
16                  income tax return in their proposed income tax calculations. AEP Ohio has  
17                  not reflected the §199 deduction that CSP and OPCo would be eligible for  
18                  on a separate return basis. Consistent ratemaking treatment would thus  
19                  require the §199 deduction to be reflected for ratemaking purposes by  
20                  preparing a pro forma calculation that is consistent with the "separate  
21                  return" concept that is being used for ratemaking purposes.

1    **81.    Q.    Has AEP Ohio provided calculations of the §199 deduction/DPAD for**  
2                    **CSP and OPCo on a “separate return” basis for 2010?**

3            A.    Yes. AEP Ohio provided that information in response to PUCO Staff Set 1,  
4                    INT-01-025, in CONFIDENTIAL Attachment 1.

6    **82.    Q.    Have you prepared a pro forma §199 deduction/DPAD for CSP and**  
7                    **OPCo on a “separate return” basis?**

8            A.    Yes. For purposes of determining the generation capacity revenue  
9                    requirement, I prepared a calculation of the §199 deduction and the related  
10                  reduction to current income tax expense on a separate return basis for CSP  
11                  and OPCo. The calculations are shown on Exhibit RCS-1 and RCS-2,  
12                  Schedule E, for each company.

14   **83.    Q.    Please explain that calculation.**

15           A.    Once it is determined that the entity has qualifying domestic production  
16                  activities, which CSP and OPCo each do for their electric generation  
17                  operations, there are three factors that limit the amount of deduction for  
18                  domestic production activities: (1) Qualified Production Activities Income;  
19                  (2) Taxable Income; and (3) W-2 wages. As shown on Schedule E of  
20                  Exhibits RCS-1 and RCS-2, for CSP’s and OPCo’s generation operations,  
21                  respectively, I have computed a pro forma §199 deduction on a separate  
22                  return basis that takes into consideration each of these three factors. The tax

1 effect of the pro forma §199 deduction thus reduces income tax expense for  
2 CSP by \$3.379 million as shown on Exhibit RCS-1, Schedule E. Similarly,  
3 the tax effect of the DPAD reduces income tax expense for OPCo by  
4 \$0.879 million, as shown on Exhibit RCS-2, Schedule E.  
5

### 6 **Payroll Tax Expense**

7 **84. Q. Have you reflected an adjustment for Taxes Other Than Income Taxes?**

8 A. Yes. As shown on Exhibits RCS-1 and RCS-2, Schedule F, for CSP and OPCo,  
9 respectively, the reduction in 2010 payroll expense related to the lower work  
10 force after the AEP severance program, also reduces Payroll Tax Expense. To  
11 estimate the reduction to Payroll Tax Expense, I applied the combined FICA and  
12 Medicare rate of 7.65% to the reduction to Payroll Expense allocated to  
13 production demand. As shown on Exhibit RCS-1, Schedule F, this reduces Taxes  
14 Other Than Income Taxes allocated to CSP's generation demand function by  
15 \$0.731 million. Similarly, as shown on Exhibit RCS-2, Schedule F, this reduces  
16 Taxes Other Than Income Taxes allocated to OPCo's generation demand function  
17 by \$1.764 million.  
18

### 19 **Capacity Equalization Revenue**

20 **85. Q. How has AEP Ohio reflected the Capacity Equalization Revenue received in**  
21 **2010 by CSP and OPCo?**

1           A.     During 2010, both CSP and OPCo received significant amounts of Capacity  
2                   Equalization Revenue from other members of the AEP East Pool, primarily from  
3                   Appalachian Power Company. AEP Ohio has reflected the Capacity Equalization  
4                   Revenue received in 2010 by CSP and OPCo as a dollar-for-dollar offset against  
5                   their capacity revenue requirement. The Capacity Equalization Revenues  
6                   received in 2010 by CSP and OPCo are included on Exhibits KDP-3 and KDP-4,  
7                   respectively, at page 4, line 6, in the Sales for Resale Revenue, which AEP Ohio  
8                   subtracted in determining its proposed revenue requirement for capacity on line 8,  
9                   which is labeled there as the Annual Production Fixed Cost.  
10                  For CSP, Exhibit KDP-3, at page 4, line 6, shows an amount of \$30,785,441.  
11                  That amount agrees with the \$30,785,441 demand charges amount on page 311.8  
12                  of CSP's 2010 FERC Form 1.  
13                  For OPCo, Exhibit KDP-4, at page 4, line 6, shows an amount of \$459,510,726.  
14                  That amount agrees with the \$459,510,726 demand charges amount on page 311.6  
15                  of OPCo's 2010 FERC Form 1.

16  
17   **86.   Q.    Are you satisfied with AEP Ohio's reflection of the Capacity Equalization**  
18                   **Revenue?**

19           A.     Yes. The payments that AEP Ohio receives from the other members in the AEP  
20                   East Pool for capacity equalization are payments for capacity. It is therefore  
21                   necessary and appropriate to deduct such amounts in arriving at the capacity  
22                   revenue requirement of AEP Ohio that remains, i.e., that is not being covered by  
23                   payments from the other members in the AEP East Pool.

1

2       **Ancillary Services Revenue**

3   **87.   Q.    What amounts of Ancillary Services Revenue has AEP Ohio used?**

4       A.    As shown on Exhibits KDP-3 and KDP-4, page 4, line 7, AEP Ohio used \$29,070  
5           for CSP and \$34,520 for OPCo, respectively, for Ancillary Services Revenue.

6

7   **88.   Q.    What is the source of that Ancillary Services Revenue?**

8       A.    The source of those amounts of Ancillary Services Revenue is described in the  
9           OPCo's FERC Form 1 for 2010 at page 450.1, as a footnote for Schedule page  
10          310.1, line no. 5, as: "Carolina Power and Light transmission services from a  
11          grandfathered agreement. Activity reflects both the base rate and Ancillary 1 base  
12          dollars." AEP advised us that the grandfathered Carolina Power and Light  
13          agreement is also the source for the CSP Ancillary Services Revenue.

14

15   **89.   Q.    Do those amounts appear to account for all of the receipts for providing**  
16          **Ancillary Services that AEP Ohio receives from PJM?**

17       A.    No, it does not. AEP Ohio receives payments from PJM when AEP Ohio is  
18          called upon to provide a variety of Ancillary Services.

19

20   **90.   Q.    How much did CSP and OPCo receive from PJM in 2010 and 2011 for the**  
21          **provision of Ancillary Services?**

22       A.    That information was requested by Staff from AEP Ohio and has been analyzed  
23          and addressed, as described below, by Staff witness Ryan Harter.

**Energy Sales Margin and Ancillary Services Receipts**

**91. Q. What was your source for the Energy Sales Margins and Ancillary Services Receipts shown on Exhibits RCS-1 and RCS-2, Schedule A?**

A. That information was provided to me by Ryan Harter of EVA. Mr. Harter is also appearing as a Staff witness in this matter.

**92. Q. How have you reflected the energy sales margin and ancillary services receipts?**

A. I have reflected those items, as provided to me by Mr. Harter, as deductions to the calculated rate for capacity. This is shown for CSP and OPCo, respectively, on Exhibits RCS-1 and RCS-2, Schedule A, page 1, lines 3 and 4.

**93. Q. How would you propose to address additional information provided by AEP Ohio?**

A. Rather than hold up the filing of testimony pending receipt of some additional information from AEP Ohio, I have determined that it is preferable that my testimony should be filed prior to the start of the hearing. Additional information provided by AEP Ohio after finalization of my testimony will therefore be evaluated as received. If it is determined to materially affect the results, updates can be provided prior to or concurrent with oral testimony at the hearing.

**94. Q. Does this conclude your testimony?**

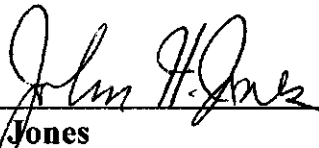

1           A.    Yes. However, I reserve the right to submit supplemental testimony as  
2               described herein, as new information subsequently becomes available or in  
3               response to positions taken by other parties.

4

5

## II. PROOF OF SERVICE

I hereby certify that a true copy of the foregoing **Direct Testimony of Ralph C. Smith** submitted on behalf of the Staff of the Public Utilities Commission of Ohio, was served by electronic mail, upon the following Parties of Record, this 16<sup>th</sup> day of April, 2012.

  
\_\_\_\_\_  
**John H. Jones**  
Assistant Attorney General

Note A: PUCO Staff Set 1 INT-01-025, CONFIDENTIAL Attachment 1

In an email received on 4-16-2012, AEP counsel indicated that:

If they confine the numbers in their testimony to OP and CSP numbers off the schedule we would not require that to be treated as confidential. No total company or other companies should be disclosed w/o confidential treatment.

Based on this clarification, the numbers shown on this schedule do not require confidential treatment.

## **Appendix RCS-1**

### **QUALIFICATIONS OF RALPH C. SMITH**

#### **Accomplishments**

Mr. Smith's professional credentials include being a Certified Financial Planner™ professional, a Certified Rate of Return Analyst, a licensed Certified Public Accountant and attorney. He functions as project manager on consulting projects involving utility regulation, regulatory policy and ratemaking and utility management. His involvement in public utility regulation has included project management and in-depth analyses of numerous issues involving telephone, electric, gas, and water and sewer utilities.

Mr. Smith has performed work in the field of utility regulation on behalf of industry, public service commission staffs, state attorney generals, municipalities, and consumer groups concerning regulatory matters before regulatory agencies in Alabama, Alaska, Arizona, Arkansas, California, Connecticut, Delaware, Florida, Georgia, Hawaii, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maine, Michigan, Minnesota, Mississippi, Missouri, New Jersey, New Mexico, New York, Nevada, North Carolina, North Dakota, Ohio, Pennsylvania, South Carolina, South Dakota, Texas, Utah, Vermont, Virginia, Washington, Washington DC, West Virginia, Canada, Federal Energy Regulatory Commission and various state and federal courts of law. He has presented expert testimony in regulatory hearings on behalf of utility commission staffs and intervenors on several occasions.

Project manager in Larkin & Associates' review, on behalf of the Georgia Commission Staff, of the budget and planning activities of Georgia Power Company; supervised 13 professionals; coordinated over 200 interviews with Company budget center managers and executives; organized and edited voluminous audit report; presented testimony before the Commission. Functional areas covered included fossil plant O&M, headquarters and district operations, internal audit, legal, affiliated transactions, and responsibility reporting. All of our findings and recommendations were accepted by the Commission.

Key team member in the firm's management audit of the Anchorage Water and Wastewater Utility on behalf of the Alaska Commission Staff, which assessed the effectiveness of the Utility's operations in several areas; responsible for in-depth investigation and report writing in areas involving information systems, finance and accounting, affiliated relationships and transactions, and use of outside contractors. Testified before the Alaska Commission concerning certain areas of the audit report. AWWU concurred with each of Mr. Smith's 40 plus recommendations for improvement.

Co-consultant in the analysis of the issues surrounding gas transportation performed for the law firm of Cravath, Swaine & Moore in conjunction with the case of Reynolds Metals Co. vs. the Columbia Gas System, Inc.; drafted in-depth report concerning the regulatory treatment at both state and federal levels of issues such as flexible pricing and mandatory gas transportation.

Lead consultant and expert witness in the analysis of the rate increase request of the City of Austin - Electric Utility on behalf of the residential consumers. Among the numerous ratemaking issues addressed were the economies of the Utility's employment of outside services; provided both written and oral testimony outlining recommendations and their bases. Most of Mr. Smith's recommendations were adopted by the City Council and Utility in a settlement.

Key team member performing an analysis of the rate stabilization plan submitted by the Southern Bell Telephone & Telegraph Company to the Florida PSC; performed comprehensive analysis of the Company's projections and budgets which were used as the basis for establishing rates.

Lead consultant in analyzing Southwestern Bell Telephone separations in Missouri; sponsored the complex technical analysis and calculations upon which the firm's testimony in that case was based. He has also assisted in analyzing changes in depreciation methodology for setting telephone rates.

Lead consultant in the review of gas cost recovery reconciliation applications of Michigan Gas Utilities Company, Michigan Consolidated Gas Company, and Consumers Power Company. Drafted recommendations regarding the appropriate rate of interest to be applied to any over or under collections and the proper procedures and allocation methodology to be used to distribute any refunds to customer classes.

Lead consultant in the review of Consumers Power Company's gas cost recovery refund plan. Addressed appropriate interest rate and compounding procedures and proper allocation methodology.

Project manager in the review of the request by Central Maine Power Company for an increase in rates. The major area addressed was the propriety of the Company's ratemaking attrition adjustment in relation to its corporate budgets and projections.

Project manager in an engagement designed to address the impacts of the Tax Reform Act of 1986 on gas distribution utility operations of the Northern States Power Company. Analyzed the reduction in the corporate tax rate, uncollectibles reserve, ACRS, unbilled revenues, customer advances, CIAC, and timing of TRA-related impacts associated with the Company's tax liability.

Project manager and expert witness in the determination of the impacts of the Tax Reform Act of 1986 on the operations of Connecticut Natural Gas Company on behalf of the Connecticut Department of Public Utility Control - Prosecutorial Division, Connecticut Attorney General, and Connecticut Department of Consumer Counsel.

Lead Consultant for The Minnesota Department of Public Service ("DPS") to review the Minnesota Incentive Plan ("Incentive Plan") proposal presented by Northwestern Bell Telephone Company ("NWB") doing business as U S West Communications ("USWC"). Objective was to express an opinion as to whether current rates addressed by the plan were appropriate from a Minnesota intrastate revenue requirements and accounting perspective, and to assist in developing recommended modifications to NWB's proposed Plan.

Performed a variety of analytical and review tasks related to our work effort on this project. Obtained and reviewed data and performed other procedures as necessary (1) to obtain an understanding of the Company's Incentive Plan filing package as it relates to rate base, operating income, revenue requirements, and plan operation, and (2) to formulate an opinion concerning the reasonableness of current rates and of amounts included within the Company's Incentive Plan filing. These procedures included requesting and reviewing extensive discovery, visiting the Company's offices to review data, issuing follow-up information requests in many instances, telephone and on-site discussions with Company representatives, and frequent discussions with counsel and DPS Staff assigned to the project.

Lead Consultant in the regulatory analysis of Jersey Central Power & Light Company for the Department of the Public Advocate, Division of Rate Counsel. Tasks performed included on-site review and audit of Company, identification and analysis of specific issues, preparation of data requests, testimony, and cross examination questions. Testified in Hearings.

Assisted the NARUC Committee on Management Analysis with drafting the Consultant Standards for Management Audits.

Presented training seminars covering public utility accounting, tax reform, ratemaking, affiliated transaction auditing, rate case management, and regulatory policy in Maine, Georgia, Kentucky, and Pennsylvania. Seminars were presented to commission staffs and consumer interest groups.

### Previous Positions

With Larkin, Chapski and Co., the predecessor firm to Larkin & Associates, was involved primarily in utility regulatory consulting, and also in tax planning and tax research for businesses and individuals, tax return preparation and review, and independent audit, review and preparation of financial statements.

Installed computerized accounting system for a realty management firm.

### Education

Bachelor of Science in Administration in Accounting, with distinction, University of Michigan, Dearborn, 1979.

Master of Science in Taxation, Walsh College, Michigan, 1981. Master's thesis dealt with investment tax credit and property tax on various assets.

Juris Doctor, cum laude, Wayne State University Law School, Detroit, Michigan, 1986. Recipient of American Jurisprudence Award for academic excellence.

Continuing education required to maintain CPA license and CFP® certificate.

Passed all parts of CPA examination in first sitting, 1979. Received CPA certificate in 1981 and Certified Financial Planning certificate in 1983. Admitted to Michigan and Federal bars in 1986.

Michigan Bar Association.

American Bar Association, sections on public utility law and taxation.

Note A: PUCO Staff Set 1 INT-01-025, CONFIDENTIAL Attachment 1

In an email received on 4-16-2012, AEP counsel indicated that:

If they confine the numbers in their testimony to OP and CSP numbers off the schedule we would not require that to be treated as confidential. No total company or other companies should be disclosed w/o confidential treatment.

Based on this clarification, the numbers shown on this schedule do not require confidential treatment.
