RE: OPSB Construction Notice - Lancers Road Replacement Construction Notice

Dear Ms. McCauley

In accordance with Ohio Administrative Code (OAC) 4906-11-02, NGO Transmission is submitting one original and 10 copies of the proposed Lancers Road Replacement Project for your review.

The project is located in Licking County, Licking Township, approximately 2,500' south of SR 40 on Lancers Road.

OPSB CONSTRUCTION NOTICE

OAC 4906-11-02

Lancers Road Replacement

B) Construction Notice Information:

- 1) **Project name:** Lancer Road Replacement Project
- 2) **Description of the project:** This project will replace approximately 800' of 8" bare pipe installed in 1964 with 10" Welded Treated Pipe. The tie-in pipe on the north end of this project is 10" welded treated that was installed in 1985 and the pipe on the south end is 10" welded treated installed in 1986. This project will also include the replacement of a valve nest and small district regulator station that will allow for future line pigging. This pipeline will be tested at 500 PSIG and operate with a 250 PSIG MAOP. The OPSB Construction Notice is necessary due to the size of the new main being installed.
- 3) **Explanation of need for the project:** The proposed replacement is on a Natural Gas Transmission line known as the West Line. This line is supplied through a Texas Eastern tap in Perry County. It terminates at the West Check Station which and is one of the primary feed lines for the City of Newark as well as the gas operations in central Licking County.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.
Date Processed 5/14/12
Technician [Signature]

- 4) **Construction schedule:** Construction is planned to begin the week of June 18th and should last for 2 to 3 weeks. The final tie-in will be made the week of July 16th in conjunction with a large industrial customers planned gas maintenance shutdown.
- 5) **Project estimate:** This project is currently estimated at \$154,098.
- 6) **Operating characteristics:** This 250 PSIG MAOP pipeline will normally operate between 150 and 180 PSIG. A valve nest will be installed to accommodate future line pigging operations. A district regulator station will be relocated to the valve nest site to allow for a bidirectional inlet supply necessary to maintain gas flow during the pigging operation. All construction will take place within public right of way, railroad right of way, or in current private right of way agreements which allow for line replacements.
- 7) **Area map:** Map depicting construction area is attached.
- 8) **Additional easements:** No additional easements or right of ways were obtained for this project.

C) Public Official Notifications: The following public agencies have been notified of this proposed construction project by providing them with a copy of this construction notice.
