Dear Chairman Snitchler:

As a customer of AEP, I urge you to reject its proposal to limit my ability to save money on my electric bill by switching to another electric supplier.

By imposing excessive capacity fees on other suppliers, AEP's proposed Electric Security Plan would harm competition so it can protect its profits on the backs of customers like me. While nearly 2 million Ohioans are shopping every month with competitive retail suppliers, AEP is the only utility in Ohio that wants to place artificially inflated capacity charges on suppliers, reducing savings for customers.

We all know competition works. That's why we always shop for lower prices. We should let competition work for electricity too.

Please reject or modify AEP's revised Electric Security Plan and preserve my right to shop to save money on my electric bill.

COMMENT DESCRIPTION:

To the Honorable Public Utility Commission of Ohio Commissioners:

I offer this comment as a former citizen and taxpayer of Ohio, a former Ohio Power Customer and a current employee of American Electric Power.

I have served customers in the electric utility industry for almost 30 years. As most state regulators know, customers are best served by a financially stable hometown utility that cares deeply about its customers and its communities. AEP has been such a company for more than 100 years. The erratic, capricious actions of this commission, and the self-serving actions of First Energy Solutions, affect not

only Ohio Power, but also other AEP utilities serving in 11 states. We can only do our best work when supported by stable regulation that holds our company accountable but allows for long-term planning, investment and prudent decisions on behalf of our customers. I respectfully ask that you hold yourselves to these standards when considering these important Ohio Power cases affecting the future of the state.

Respectfully submitted,

Venita McCellon-Allen

Dear Chairman Snitchler:

As a customer of AEP, I urge you to reject its proposal to limit my ability to save money on my electric bill by switching to another electric supplier.

By imposing excessive capacity fees on other suppliers, AEP's proposed Electric Security Plan would harm competition so it can protect its profits on the backs of customers like me. While nearly 2 million Ohioans are shopping every month with competitive retail suppliers, AEP is the only utility in Ohio that wants to place artificially inflated capacity charges on suppliers, reducing savings for customers.

We all know competition works. That's why we always shop for lower prices. We should let competition work for electricity too.

Please reject or modify AEP's revised Electric Security Plan and preserve my right to shop to save money on my electric bill.
