document delivered in the regular course of business.  
Technician JD Date Processed 6-01-12

To the Honorable Public Utility Commission of Ohio Commissioners:

As a current employee of American Electric Power, I would like to remind you that decisions concerning Ohio Power and Columbus Southern Power will impact not only these utilities and their customers, but also the customers of AEP in other states. It is imperative to all AEP stakeholders that AEP be financially stable in order to conduct its day-to-day operations. Your decisions will have a direct impact on this stability. Only in a stable financial environment can the company as a whole continue to provide safe and reliable service to its customers.

Thank you, Sherrill L. McCormack

Please docket the attached in the case number above.

Docketing Case No.:11-346-EL-SSO

Notes:

First Energy is again running misleading ads on television. The current ad shows people knocking on doors to advise that AEP will be raising their electric rates. You don't know it has anything to do with First Energy unless you watch to the very end. and then only to advise First Energy can lower your electric rate. This is extremely misleading as the only way First Energy can offer "cheaper" electric rates is the subsidy that the PUCO has granted them at the expense of AEP and all the electric customers of AEP in this area. Again, if First Energy can afford to run misleading ads then it can afford to pay it's own distribution rates to AEP without this subsidy.

Please docket the attached in the case number above.
