2. EXCHANGE SERVICE OFFERINGS (Cont'd)

2.4 CIRCUITS (Cont'd)

B. Monthly Rates (Cont'd)

4. Terminals of the circuit on different premises on non-continuous property; (Cont'd) (T)

a. All terminals within same central office area: (Cont'd)

- (3) The minimum charge for a circuit confined to the same central office area is equal to the monthly rate for two local circuits, except as follows: (T)

(a) When a local circuit can be bridged to the associated exchange service in the normal serving central office, no chargeable local circuit is required between that central office and the main station location. (T)

(b) When the exchange service rate includes the provision of the circuit between the main location and the central office normally serving that location, a separate local loop charge is not applicable; however any appropriate service area function charge applies. (T)

b. Terminals in different central office areas:

- (1) Local circuits furnished between each circuit terminal location and the central office normally serving such location.

A local circuit is comprised of two rate elements. (C)

When local circuits are provided in those central office areas that are not designated in Paragraph 2.4.1, apply the local loop charge and a service area function charge as follows: (C)

(a) Local Loop

For monthly, see a-(1)-(a) preceding.

(b) Service Area Function	<u>Monthly Rate</u>	<u>USOC</u>
- Off-premises extension station.....	\$14.10	OPUY
- Off-premises PBX main or extension station.....	10.50	OPUND

C. Regulations

1. The regulations specified herein are in addition to the applicable regulations specified in this and other tariffs of the Telephone Company.

2.

(D)

(D)

Termination Charges

(T)

- (1) In the event that a customer terminates any or all ISDN Prime Services provided under a given contract period, the customer will remain liable for the contract charges adjusted to their net present worth equivalent using the interest rate specified in Section 2, Paragraph 3.7.13. These charges will become due and payable in their entirety immediately upon such termination.
 - (2) Termination charges are not applicable to changes in the physical location of the customer's ISDN Prime Services as long as the service originates in the same serving central office area.
3. Ameritech ISDN Prime is offered only from central offices where the Telephone Company has arranged facilities for such service. Ameritech ISDN Prime may be extended to central offices within the same Local Access Transport Area (LATA) through the application of Ameritech DS1, DS3, OC-3 or OC-12 Service.

F. Rates and Charges

1. General

- (a) The rate structure for each Ameritech ISDN Prime shall include charges for an Ameritech ISDN Prime including optional features (see 2. following), an Ameritech DS1 Service Local Distribution Channel and End User Common Line Charges (EUCL). These charges represent the physical components of the customer's service.
- (b) WATS Service and Custom 800 Service are available over the Ameritech ISDN Prime at their current tariff charges. Any available CO features (Custom Calling) are also available at additional charges.
- (c) Calls will be subject to the usage charges for the services provisioned on the channels. Measured Local Message Charges for usage will apply to Local Service Area voice and circuit switched data calls provisioned on the channel. Message Toll charges will apply to calls outside the Local Service Area. Custom 800 and WATS usage charges apply. Packet Switched Network Service call usage charges apply.
- (d) Standard features and capabilities for "B" channel Packet Switched Data are provided as shown for Packet Switched Network using X.25 protocol. Optional features and capability charges apply for Packet Switched Network Service using X.25 protocol.

2.7 Ameritech ISDN Direct

A. General

Ameritech ISDN Direct is a local exchange telecommunications service that provides customer access to Circuit Switched Voice, Circuit Switched Data, and Packet Switched Data Services. ISDN Direct consists of a Network Access Line, an ISDN Direct CO Termination, and individual ISDN Direct services. Individual ISDN Direct services require the use of the Network Access Line and the Direct CO Termination components. Each ISDN Direct "B" and "D" channel service includes one telephone number.

(C)
|
(C)

ISDN Direct utilizes a basic rate interface which consists of two B channels operating at 64 Kbps and one D channel operating at 16 Kbps. A maximum of 8 services are permitted per ISDN Direct service, including a maximum of two B channel services.

A variety of standard and optional features and capabilities are offered. The availability and functions of the features may vary by serving central office.

B. Definitions

ISDN Direct CO Termination

Terminates the Network Access Line in the serving central office.

(C)

ISDN Direct Line

The physical connection between and including the customer Network Interface and the ISDN Direct CO termination.

"B" Channel

A 64 Kbps portion of an Ameritech ISDN Direct service used for information transfer (voice/data) from user to user.

"D" Channel

A 16 Kbps portion of an Ameritech ISDN Direct service used for out of band signaling and control of "B" channels.

Issued: January 6, 1995

Effective: January 9, 1995

In accordance with Order No. 93-487-TP-ALT, dated November 23, 1994 and Commission Entry in Case No. 93-487-TP-ALT, dated January 5, 1995.

D. Service Descriptions (Cont'd)

2. Circuit Switched Data Service - "B" Channel (Cont'd)

- c. Custom Calling features are available at the rates and charges set forth in Section 8 of this tariff.

3. Alternate Circuit Switched Voice Service/Circuit Switched Data Service - "B" Channel

- a. Where technology permits, provides the ability to originate and receive either Circuit Switched Voice or Circuit Switched Data calls over a single "B" channel, but not simultaneously.
- b. The standard capabilities and features are those listed in Paragraph 1.(b) and 2.(b) preceding.
- c. Optional capabilities and features are those listed in Paragraph 1.(c) and 2.(c) preceding.

4. Packet Switched Data Service - "B" Channel

- a. Provides the ability to originate and receive X.25 packet data calls over the 64 Kbps "B" channel. Standard capabilities and features for Packet Switched Network Service lines using X.25 are specified in the Digital Switched Service Catalog, Paragraph 3. Optional capabilities and features for Packet Switched Network Service lines using X.25 are available at rates and charges set forth in the Digital Switched Services Catalog, Paragraph 3. Provides throughput of up to 19.2 Kbps per individual logical channel. (C)

5. Packet Switched Data Service - "D" Channel

- a. Provides the ability to originate and receive X.25 packet data calls over the 16 Kbps "D" channel. Standard capabilities and features for Packet Switched Network Service lines using X.25 access are specified in the Digital Switched Service Catalog, Paragraph 3. Optional capabilities and features for Packet Switched Network Service lines using X.25 are available at rates and charges set forth in the Digital Switched Services Catalog, Paragraph 3. The "D" channel packet has a maximum throughput of 9.6 Kbps. (C)

2.8 Ameritech Integrated Services Digital Network (ISDN) Local Calling Value Plan (AILCVP)

(N)

A. Description

The Ameritech Integrated Service Digital Network (ISDN) Local Calling Value Plan (AILCVP) is a local usage billing alternative. AILCVP offers ISDN Circuit Switched Services customers an optional discount on local usage generated on specified Ameritech ISDN Direct, ISDN Centrex or ISDN Prime "B" Channels.

For a monthly rate, AILCVP customers subscribe to a specified quantity of minutes-of-use (MOU), and receive a single per minute rate for voice and/or data "B" Channel usage on those channels comprising an Account Group. Minutes in excess of this quantity are billed at the selected Optional Usage Package (OUP) rate. Packet usage is excluded from this plan.

B. Definitions

Account Group - Ameritech ISDN Direct, ISDN Centrex, and ISDN Prime "B" Channels that are served by the same Central office, billed to a single billing account number and are identified by the customer under a single AILCVP individual contract.

Commitment Level - the specified quantity of minutes-of-use (MOU) for which the customer subscribes and is billed monthly. The Commitment Level is selected from those offered by the Company and is applicable each month through the duration of the contract.

Commitment Term - period selected by the Program Subscriber from those offered by the Company over which specified rates are paid. The Commitment Terms are available on a month-to-month basis or under twelve-month contractual agreements.

Program Subscriber (Subscriber) - a person or entity who has elected to purchase a specified quantity of local ISDN "B" Channel usage for a specific length of time, through the signing of an AILCVP contract.

Optional Usage Packages (OUP) - Minute of Use quantity levels with corresponding rate options, which represent the subscriber's commitment under the plan.

2. EXCHANGE SERVICE OFFERINGS (Cont'd)

2.8 Ameritech Integrated Services Digital Network (ISDN) Local Calling Value Plan (AILCVP) (Cont'd)

(N)

C. Regulations

1. AILCVP is available to all Ameritech ISDN Direct, ISDN Centrex and ISDN Prime "B" Channel customers on a month-to-month or contract basis. Rates and charges are applicable per Account Group and are distance and time of day insensitive.
2. AILCVP cannot be combined with any other local usage calling plan. The customer's selection of an AILCVP OUP is in lieu of all other Company discounts, including those automatically provided by the Company for this usage.
3. ISDN "B" Channels to be included in each AILCVP Account Group must be identified for each OUP option selection, at the time of commitment. "B" Channels added to or removed from established Account Groups will not alter the existing AILCVP contract terms.
4. Minutes of Use in excess of OUP Commitment Level will be billed at the elected OUP per minute rate. Minutes in excess are determined by identifying the difference between the Commitment Level MOU quantity and the accumulated monthly minutes of use associated with the ISDN "B" channels identified in the Account Group. Only one OUP may be selected per Account Group.
5. AILCVP Subscribers may initiate a move to a higher OUP level without penalty by signing a new agreement for an equal or longer Commitment Term. No credit toward the new OUP will be given for that portion of the former OUP which has been utilized.
6. The new payment period begins on the first bill date after the request is received.
7. Rates are not retroactive.
8. ISDN "B" Channel(s) can be relocated (where facilities permit as determined by the Company) anywhere within the same central office serving area without affecting the AILCVP Account Group, within the constraints defined in Paragraph B preceding.
9. An OUP must be selected for each AILCVP Account Group established based upon the customer's predetermined estimated monthly voice and/or data usage and the selected Commitment Term.
10. In any month where the actual Account Group OUP usage is less than the Commitment Level, the customer will be billed for the full OUP Commitment Level minutes of use.

C. Regulations (Cont'd)

11. If the Subscriber terminates an AILCVP contract prior to the expiration of the elected Commitment Term, the subscriber is responsible for payment of the termination charges as shown in E. Following.

D. Minimum Revenue Guarantee (MRG)

1. The Minimum Revenue Guarantee (MRG) is a guarantee by the Subscriber to pay for a minimum amount of AILCVP usage, per OUP selected, each month through the duration of the Commitment Term. The MRG is equal to the applicable selected OUP rate times the Commitment Level MOU, times the number of months remaining in the Commitment Term.
2. The MRG applies to each AILCVP Account Group.
3. Where Subscribers have aggregated usage billing (multiple billing accounts on a single bill), the same MRG will apply, individually, to each billing account.

E. Termination Charges

Termination charges are as follows:

<u>Commitment Term</u>	<u>Termination Charges</u>
Month-to-Month	Not applicable
12 Months	6 months of MRG payment or 60% of the remaining amount due, whichever is less.

2.9 Digital Trunk Service

(T)

A. General

Digital Trunk Service furnishes digital exchange access lines necessary for communicating within specified exchange areas via Ameritech DS1 Service. A list of exchange areas appears in Paragraph 1.1 preceding.

Digital Trunk Service provides the equivalent of 24 exchange access lines between a customer's premises and the customer's normal serving central office. These 24 channels may be used as Trunk lines to PBX equipment, and may provide Direct Inward Dialing (DID) Service, Wide Area Telecommunications Service (WATS), or Custom 800 Service. Touch-Tone Service is a standard feature of Digital Trunk Service.

B. Regulations

1. Digital Trunk Service is offered only from central offices where the Telephone Company has arranged facilities for such service.
2. DID Service must be provided on separate digital trunks that do not provide other trunk lines to PBX equipment.
3. Ameritech DS1 Service central office multiplexing may be required in certain configurations of Digital Trunk Service. The Telephone Company will determine when central office multiplexing is required.

C. Rates and Charges

1. General

- a. The rate structure for each Digital Trunk Service requires charges for a Digital Trunk (see 2. following), an Ameritech DS1 Service local distribution channel, Ameritech DS1 Service central office multiplexing (where required) and End User Common Line Charges (EUCL). These charges represent the physical components of the service.
- b. Central office features such as: Direct Inward Dialing (DID) Service in this tariff, Wide Area Telecommunications Service (WATS), and Custom 800 Service are available at their current tariff rates.

B. Primary Listings

1. One listing without charge, termed the primary listing, is provided for each call number in connection with exchange service (including semi-public). In cases where two or more non-residence services are arranged in a group of rotary numbers, all of such numbers so arranged are identified by but one call number. (T)
| (T)
2. A call number is the telephone number designation with which a customer's service is identified.
3. One primary listing is provided for each PBX, Centrex, Exhibition Hall and Airport Switching system. In connection with PBX systems with DID, Centrex and Exhibition Hall system primary listings, the Telephone Company will include, without charge, informative wording to indicate that stations of the system may be dialed direct when the telephone numbers of the stations are known.
4. One primary listing is provided for each joint user.
5. Public telephones and dormitory service are not listed in the directory. (T)
6. The primary listing is ordinarily the name of the customer or joint user, or the name under which a business is regularly conducted. Where the service is contracted for by one party for the use of a second party, the primary listing may be the name of the second party.
7. A dual name listing is comprised of a surname, two first names, an address and telephone number. This listing may be provided as the primary listing associated with residence service for two persons who share the same surname and reside at the same address or for a person known by two first names.

F. Rates and Charges

1. The following monthly rates apply to both regular and special types of additional listings:

	Maximum Monthly Rate	USOC	
Non-residence additional listing.....	\$ 3.90	CLT*	(C)
Residence additional listing.....	1.80	RLT*	(C)

Billing at the rates specified above, dates from the day following the posting of directory assistance records. Directory assistance records will be posted as of the delivery date of the directory in which the listing first appears or at any date prior thereto, as the customer requests.

2. Alternate listings

- a. The regular additional listing rate applies to alternate listings, depending on the classification of the regular listing under which the alternate listing is to appear. However, should an alternate listing follow two or more regular listings of the same customer which are in alphabetical sequence and one of these regular listings takes the classification of non-residence, the non-residence listing rate is applicable to the alternate listing.
- b. Where two or more alternate listings are furnished under one directive note or caption heading, the alternate listing rate shall apply to each listing under the note or caption, but no charge shall be made for the note or caption itself.

*Additional codes appear in departmental practices.

2. DIRECTORY ASSISTANCE SERVICE

A. Regulations

1. The Telephone Company will offer directory assistance service on an interim basis, subject to P.U.C.O. alteration or cancellation.
2. The regulations and charges in this paragraph 2. apply to calls placed to directory assistance to obtain telephone numbers of services located within the same local service area. The number of such telephone numbers furnished on each call shall be limited to two.
3. Except as otherwise specified in c-(2)-(c) following, directory assistance calls from the following are not subject to the regulations and charges in this paragraph 2.

a. Services furnished to hospitals and skilled nursing homes.

For the purpose of this paragraph, the term "skilled nursing homes" applies to those nursing homes that provide around-the-clock professional nursing care.

b. Public and semi-public telephone service, and Customer-Owned, (C)
Coin-Operated Telephones (COCOT). (C)

c. Services furnished to the handicapped as follows:

(1) Impaired persons

- (a) For purposes of this tariff, the definition of impaired refers to those persons with communication impairments, including those hearing impaired, deaf, deaf/blind, and speech impaired persons who have an impairment that prevents them from communicating over the telephone without the aid of a telecommunications device for the deaf.
- (b) Residential impaired customers or impaired members of a customers' household, upon written application and upon certification of their impaired status, which is evidenced by either a certificate from a physician, health care official, or state agency, or a diploma from an accredited educational institution for the impaired, may receive a discount off their message toll service rates, and, if they utilize telebraille devices, they may receive free access to local and intrastate long distance directory assistance. Additionally, TDD lines maintained by nonprofit organizations and governmental agencies, upon written application and verification that such lines are maintained for the benefit of the impaired may receive a discount off their message toll services rates.

4. JOINT USER SERVICE (See NOTE)

A. Regulations

1. Joint user service is a service whereby one non-residence customer is permitted to share the exchange service of another non-residence customer. Under this arrangement the joint users utilize the same basic exchange service in lieu of each subscribing to their own exchange service. To facilitate this use, one primary directory listing is provided for each joint user.
2. Joint user service is provided in connection with non-residence exchange service and PBX trunks, semi-public telephone service and Centrex service. (T)
3. Applications for joint user service and for associated additional service or facilities, must be made by the customer who is responsible for the payment of all charges incurred, regardless of where such charges are associated with his usage or that of any of his joint users.
4. The total charges for telephone service allocated by the customer among the customer and his joint users shall not exceed the charges of the Telephone Company to such customer as set forth in this tariff.
5. Joint users of a customer's service must have the option of obtaining service directly from the Telephone Company.

B. Monthly Rates

1. Non-residence service and PBX trunks and semi-public telephone service. (T)

For each joint user the monthly rate is the rate applicable for the service with which the joint user is associated, i.e., exchange service, PBX trunk or semi-public telephone service, divided by two, if the quotient is a multiple of five cents; otherwise the monthly rate is the next higher multiple of five cents. (T)

2. Centrex service

For each joint user the monthly rate is applicable monthly rate for a Centrex station (first 100) at the primary location of the Centrex service with such joint user is associated, divided by two, if the quotient is a multiple of five cents; otherwise the monthly rate is the next higher multiple of five cents. (T)

NOTE: Effective July 2, 1982, no further requests for joint user arrangements under the provisions of this section will be accepted by the Telephone Company from non-residence customers who are located in central office areas in which measured rate service is available; however in such areas, the Telephone Company will continue to provide joint user arrangements in service. New joint user arrangements may be provided to non-residence customers located in central office areas in which measured rate service is not available.

EXCHANGE AND NETWORK SERVICES TARIFF
CENTRAL OFFICE OPTIONAL LINE FEATURES

1. MULTI-RING SERVICE

A. General

Multi-Ring Service will be provided only in Telephone Company central offices where facilities permit.

Multi-Ring Service will enable a customer to have as many as three telephone numbers associated with a single exchange service. Customers subscribing to this service will be able to receive calls dialed to two or three separate telephone numbers without having a second or third exchange service. A distinctive ringing pattern will be provided for each of the additional telephone numbers to facilitate identification of incoming calls. A distinctive Call Waiting tone for each additional telephone number will be provided, where facilities permit, to customers subscribing to Call Waiting as defined in Section 8, Paragraph 3 of this tariff. (T) (T) (T)

B. Regulations

Multi-Ring Service is available to customers with simple residence and non-residence exchange service, except as noted below: (T)

Multi-Ring Service is not available with the following: Multi-line Hunt Groups, Remote Call Forwarding Service, Semi-Public Telephone Service, and Customer-Owned Coin Operated Telephone Service (COCOT). (T)

Multi-Ring Service may not be compatible with all types of customer-provided telephone equipment. Some types of customer-provided equipment may not be able to reproduce the distinctive ringing patterns that are sent out from the central office.

Customers subscribing to Multi-Ring Service may subscribe to all Custom Calling Service features available to them. However, regardless of the quantity of telephone numbers associated with a single access line, it can only have one set of Custom Calling features chargeable per access line which are applicable to all the telephone numbers.

A call directed to an off-hook line equipped with Multi-Ring Service will receive busy treatment regardless of which telephone number associated with the access line is dialed.

One distinctive ringing pattern is always associated with the first additional multi-ring number. A different ringing pattern is always associated with the second additional multi-ring number.

Additional listings will also be provided under the terms and conditions described under the tariff for Directory Services.

Multi-Ring Service can only be provided on exchange services originating from the same central office switching machine. (T)

Multi-Ring Service customers subscribing to Call Forwarding as defined in Section 8, Paragraph 3 of this tariff must choose one of the following options when both Multi-Ring Service and the Call Forwarding feature are combined:

1. Calls to all telephone numbers associated with the service will be forwarded to a single number when Call Forwarding Service is activated. (T)
2. Calls to the main telephone number only will be forwarded when Call Forwarding Service is activated. Calls to the additional Multi-Ring numbers will continue to ring and may be answered at the customer's premises.

C. Rates and Charges

The following charges are for Multi-Ring Service only and are in addition to applicable rates and charges for service and equipment with which this service is provided. In addition to a customer's exchange service telephone number, a customer may subscribe to one or two Multi-Ring telephone numbers, at the following rates: (T)

	Maximum Residence Monthly Rate	Maximum Non-Residence Monthly Rate	USOC	(C)
1. First Multi-Ring Number.....	\$ 8.00	\$ 9.90	DRS1X	
2. Second Multi-Ring Number....	\$ 4.00	\$ 7.90	DRS2X	(C)

On residence service, when any combination of the following Custom Calling and/or Advanced Custom Calling Service features (Call Forwarding, Three-Way Calling, Speed Calling 8, Speed Calling 30, Call Waiting, Repeat Dialing, Automatic Callback, Call Screening, Distinctive Ringing) and/or Multi-Ring Service (First Multi-Ring Number only) are provided on the same service, a \$2.00 reduction in the monthly rate will apply for each such additional feature. However, when Call Waiting and any number of other such features are provided on the same service, the reduction in the monthly rate does not apply to Call Waiting, but will apply to the above listed features. Also, when one or more of these features and Caller ID are provided on the same service, a \$.50 reduction in the monthly rate for Caller ID will apply. (N)

EXCHANGE AND NETWORK SERVICES TARIFF
CENTRAL OFFICE OPTIONAL LINE FEATURES

2. MESSAGE WAITING TONE

2.1 General

- A. Message Waiting Tone is a feature which allows an audible tone signal, i.e., stutter dial tone, to be activated and deactivated on an exchange access line. Visual Message Waiting Indicator is an enhancement to Message Waiting Tone. Where facilities permit, customers with the appropriate Customer Premise Equipment (CPE) will receive a visual message waiting indication (i.e., a light) in addition to the audible tone signal.
- B. Message Waiting Tone is provided in connection with all grades, types and classes of service, except semi-public telephone service. This feature capability is available where facilities and conditions permit.

2.2 Rates and Charges

Such monthly rate is in addition to all other applicable rates and charges in Section 3 of this tariff to establish or change miscellaneous service:

	Maximum Monthly Rate	USOC	(C)
Per Service Equipped	\$.50	MWN	(C)

3. BUSY LINE TRANSFER

3.1 General

- A. Busy Line Transfer is a feature that provides for the automatic transfer of all incoming calls to a fixed telephone number when the called telephone number is busy. An enhancement to Busy Line Transfer allows customers with Busy Line Transfer to forward multiple calls simultaneously.
- B. Busy Line Transfer service is provided in connection with all grades, types and classes of service, except Centrex and semi-public telephone service. This feature capability is available where facilities and conditions permit.
- C. When the Busy Line Transfer feature is provided on an exchange service with Call Waiting service as outlined in Section 8 of this tariff, Call Waiting service takes precedence unless the Call Waiting cancel feature has been activated. (T)
- D. Where a charge (local or toll) is applicable for a call between the customer's telephone and the telephone to which calls are being transferred, such charge is billed to the customer on every call transferred to and answered at that telephone.
- E. The Telephone Company cannot guarantee transmission on calls forwarded outside the local service area.

3.2 Rates and Charges

Such monthly rate is in addition to all other applicable rates and charges in Section 3 of this tariff to establish or change miscellaneous service:

	Maximum Monthly Rate	USOC	(C)

4. ALTERNATE ANSWERING

4.1 General

- A. Alternate Answering is a feature that provides for the automatic transfer of all incoming calls to a fixed telephone number when the called telephone number is not answered by a specified number of rings. An enhancement to Alternate Answering allows customers with Alternate Answering to forward multiple calls simultaneously.
- B. Alternate Answering service is provided in connection with all grades, types and classes of service, except Centrex and semi-public telephone service. This feature capability is available where facilities and conditions permit.
- C. Where a charge (local or toll) is applicable for a call between the customer's telephone and the telephone to which calls are being transferred, such charge is billed to the customer on every call transferred to and answered at that telephone.
- D. The Telephone Company cannot guarantee transmission on calls forwarded outside the local service area.

2. CENTRALIZED ATTENDANT SERVICE

A. General Regulations

1. Centralized Attendant Service (CAS) is a service arrangement which permits a customer with separate Centrex or PBX systems at various locations to serve all such locations with one or more attendant positions at a single centralized answering location. The types and combinations of Centrex and PBX systems on which CAS may be furnished are designated under paragraphs B, C and D following. (T)
2. The centralized attendant positions must be arranged for TOUCH-TONE Calling Service.
3. All calls to the listed telephone number(s) for the unattended locations are routed to the centralized attendant positions via special circuits designated as release link trunks (RLT). Such RLT's are in addition to the tie lines regularly furnished for intercommunication between the system involved.

B. Centrex Systems

1. When all the locations of CAS are Centrex service, the following regulations apply in addition to those set forth in A. preceding.
 - a. The centralized answering location must be a Centrex CO system served from an electronic switching system central office.
 - b. The unattended locations can be served by either Centrex Type I or Type II systems.
 - c. The RLT's may, where facilities permit, be arranged for queuing; i.e., incoming calls that are routed to the answering location via RLT's are automatically placed in a queue, each to be answered in its turn.

3. CUSTOM CALLING SERVICE

- A. The Telephone Company provides custom calling service which includes one or more of the following dial service features:

1. Call Forwarding Feature

Call forwarding permits the customer to activate and deactivate a transfer of his incoming calls to another telephone number. The Telephone Company cannot guarantee transmission on calls forwarded outside the local service area.

(T)

2. Three-way Calling Feature

Three-way calling permits the customer to add a third party to an existing connection, thereby establishing a three-way conference call; however, when more than one of the parties so connected is outside the local service area of the customer establishing the call, the Telephone Company cannot guarantee transmission.

(T)

3.

(D) (1)

(D) (1)

4. Call Waiting Feature

Call waiting permits the customer, upon receipt of a tone signal indicating that a call is waiting, to place the existing call on hold and answer such second waiting call.

(T)

- B. Custom calling service will be provided in connection with all grades, types and classes of service, except Centrex and semi-public telephone service.

- C. The service is offered from central offices where the Telephone Company has arranged the equipment for custom calling and is furnished subject to the availability of facilities.

(1) Speed Calling provided on a detariffed basis.

Issued: January 6, 1995

Effective: January 9, 1995

EXCHANGE AND NETWORK SERVICES TARIFF
MISCELLANEOUS SERVICES AND ARRANGEMENTS

3.1 ADVANCED CUSTOM CALLING SERVICE

A. General

1. Advanced Custom Calling Service as provided for in this paragraph is a telecommunications service that consists of one or more of the optional service features described in B. following.
2. Advanced Custom Calling Service is available to customers subscribing to residence and non-residence exchange services. It is not available to semi-public telephone service customers. (T)
3. The service is offered from central offices where the Telephone Company has arranged the equipment for Advanced Custom Calling and is furnished subject to the availability of facilities. However, a feature cannot be successfully activated unless both the called and calling parties are served by, and the call is routed through, an appropriately equipped central office.

B. Feature Description

1. Repeat Dialing

This feature will enable a customer to reach a called party whose number is busy without having to continually redial the telephone number. The busy number will automatically be dialed, for a thirty (30) minute period, until it becomes available. The caller can make and receive calls during the 30 minute period that the busy number is being dialed. The caller will receive a special ring back when both numbers are freed for use. The feature can also be used to recall a called party after the conversation has been terminated. (T)

2. Calling Party Number Blocking

Calling Party Number Blocking provides telephone customers with the capability to prevent the disclosure of the calling telephone number on calls made to an exchange service equipped with Caller ID and other Advanced Custom Calling services where the calling party number may be disclosed. Calling Party Number Blocking is available on a per call basis for residence and non-residence customers, and for semi-public and public customers where facilities permit. Calling Party Number Blocking is available on a per service basis for residence and non-residence customers. (T)

Per call Calling Party Number Blocking is accomplished by the customer dialing an activation code (*67 for Touch-Tone and 1167 for rotary dial pulse) prior to placing each call for which blocking is desired. Per call blocking is automatically provided without charge to all customers in central offices equipped to offer Caller ID or other Advanced Custom Calling Services where calling party number may be disclosed. (T)

Issued: January 6, 1995

Effective: January 9, 1995

In accordance with Order No. 93-487-TP-ALT, dated November 23, 1994 and Commission Entry in Case No. 93-487-TP-ALT, dated January 5, 1995.

P.U.C.O. No. 1 5th Revised Sheet No. 22.3

EXCHANGE AND NETWORK SERVICES TARIFF

MISCELLANEOUS SERVICES AND ARRANGEMENTS

3.1 ADVANCED CUSTOM CALLING SERVICE

B. Feature Description (Cont'd)

2. Calling Party Number Blocking (Cont'd)

Per Line Calling Party Number Blocking automatically prevents the display of the calling telephone number on all calls dialed from an exchange service equipped with this option. It is not necessary to dial an activation code prior to placing the call. After being informed of their blocking options by the Telephone Company, customers may subscribe to Per Line Blocking at the rates set forth in Paragraph 3.1.C.1. following. (T)

No business, organization or other person may use Calling Party Number Blocking where the primary purpose is to make telephone solicitation calls. The term "telephone solicitation" means the initiation of a telephone message primarily for the purpose of encouraging a person to purchase, rent, or invest in property, goods, or services or to donate to any charity or similar organization or entity without that person's prior express invitation or permission. (T)

3. Caller ID

Caller ID allows a customer to identify the telephone number from which a call is being made. The telephone number of the person initiating the call is displayed on a customer-provided display device. The customer-provided display device must conform with the Technical References TR-TSY-00030 and TR-TSY-00031. These technical references may be obtained from Ameritech, Information Management, 2000 West Ameritech Center Drive, Room 3A43E, Hoffman Estates, Illinois 60196-1025. (T)

Caller ID is offered in appropriately equipped central offices.

4. Caller ID With Name

Caller ID with Name works along with Caller ID and provides for the display of an incoming telephone number and listed name associated with that telephone number, on a customer-provided display device attached to the customer's (called party's) line or set. The customer-provided display device used to interface with Caller ID and Caller ID with Name must conform with the Technical Reference Specifications as used by the Company and found in Technical References TR-TSY-000030 and TR-TSY-000031. The technical reference documents may be obtained from Ameritech, Information Management, 2000 West Ameritech Center Drive, Room 3A43E, Hoffman Estates, Illinois 60196-1025.

Unless Calling Party Number Blocking is activated, the telephone numbers and names associated with all calls originating from appropriately equipped switches will be displayed.

Caller ID with Name is offered in appropriately equipped central offices and is available with individual non-residence and residence lines.

P.U.C.O. No. 1 1st Revised Sheet No. 22.3.1

EXCHANGE AND NETWORK SERVICES TARIFF

MISCELLANEOUS SERVICES AND ARRANGEMENTS

3.1 ADVANCED CUSTOM CALLING SERVICE

B. Feature Description (Cont'd)

5. Automatic Callback

By dialing a special code, a customer will be able to return the last call received whether or not it was answered. Activation must occur before another incoming call or a call waiting indication is received by the customer.

If the called back telephone number is busy, Automatic Callback will automatically redial the busy telephone number for a period not to exceed thirty (30) minutes, until the number is available. This feature will provide a special ringback when the called back telephone number is available. The callbacks may be to areas where a toll charge would be applicable.

This feature cannot be activated for all telephone numbers such as numbers with the 800 or 900 prefixes, or PBX extensions.

Automatic Callback will be available where facilities permit.

6. Call Trace

This feature will, upon successful customer activation, automatically trace the telephone number used for the last call received by the customer. The customer must dial a Company-designated code, and activation must occur prior to the time that either another call or the call waiting tone is received by the customer. A recording will indicate if the trace was successful or not. Within five business days after the successful activation of Call Trace, the customer must contact the Company to arrange for the continued retention of the trace record. The traced number will not be provided to the customer by the Company, but it will be provided to law enforcement officials. The practices of law enforcement officials vary, and the Company does not represent that any action will be taken by such officials with regard to the traced number. Call Trace will be available where facilities permit. (T)

3.1 ADVANCED CUSTOM CALLING SERVICE (Cont'd)

C. Rates

1. The following monthly rates apply per exchange service:

	<u>Maximum Monthly Rate</u>		<u>USOC</u>
	<u>Residence</u>	<u>Non-Residence</u>	
Repeat Dialing.....	\$ 5.00	\$ 5.00	NSS
Caller ID.....	9.00	9.00	NSD
Caller ID with Name (see Note).....	5.00	5.00	NMP
Automatic Callback.....	5.00	5.00	NSQ
Call Screening.....	8.00	8.00	NSY
Distinctive Ringing.....	5.00	5.00	NSK

Note: The monthly rate for Caller ID with Name is in addition to the monthly rate for Caller ID.

	<u>Residence</u>	<u>Non-Residence</u>
Call Trace, per successful activation.....	3.50 (R)	3.50 (R)

In the event the customer refers the Call Trace through the Annoyance Call Bureau (ACB) and agrees to follow the ACB recommended procedures for resolving the annoyance call problem, including, as appropriate, either a referral to a law enforcement agent or the sending of an ACB letter or letters to the subscriber of the originating number of the annoying calls, the charge for each successful trace utilized shall be retroactively reduced to \$1.00. If the customer initially chooses to follow the ACB recommended procedures for one or more successful trace occurrence(s) but subsequently declines to follow such ACB recommended procedures, then the charge for each such trace occurring after such declination shall be \$3.50 per successful trace occurrence.

C. Rates (Cont'd)

1. The following monthly rates apply per exchange service: (Cont'd) (T)

Per Line Calling Party Number Blocking Rates and Charges

The following rates and charges are in addition to all other applicable rates and charges for the associated facilities and service:

	Nonrecurring Charge	Monthly Rate		USOC	(T)
		Residence	Non-Residence		
Per Exchange Service Equipped	\$ 9.30	\$ 1.00(R) (See Notes 1, 2 and 3)	\$ 1.00(R) (See Notes 1, 2 and 3)		

Note 1: A credit equal to the rate set forth in Section 6, Paragraph 1.F.3 of this tariff applies to the Per Line Calling Party Number Blocking rate for non-published and non-listed customers.

Note 2: The monthly rate for Blocking will not exceed the monthly rate for non-published service.

Note 3: Per Line Calling Party Number Blocking will be provided at no charge to qualified social service agencies, law enforcement organizations, and their certified employees, and volunteers. Per Line Calling Party Number Blocking will be provided at no charge to customer-owned coin-operated telephone (COCOT) customers. (N)

2. On Non-Residence Service, when any combination of Advanced Custom Calling Service feature(s) (other than Calling Party Number Blocking, Call Trace or Caller ID with Name), as specified in A.1. preceding, and/or Intercom Calling Service, as specified in Paragraph 22, of this Section, and/or any Custom Calling Service feature (other than Three-Way Calling, when used with Intercom Calling Service), as specified in Paragraph 3.D.1.a. thru d. of this Section, are provided on the same service, a \$.50 reduction in the monthly rates will apply for each feature per exchange service. (T)

On residence service, when any combination of the following Custom Calling and/or Advanced Custom Calling Service features (Call Forwarding, Three-Way Calling, Speed Calling 8, Speed Calling 30, Call Waiting, Repeat Dialing, Automatic Callback, Call Screening, Distinctive Ringing) and/or Multi-Ring Service (First Multi-Ring Number only) are provided on the same service, a \$2.00 reduction in the monthly rate will apply for each such additional feature. However, when Call Waiting and any number of other such features are provided on the same service, the reduction in the monthly rate does not apply to Call Waiting, but will apply to the above listed features. Also, when one or more of these features and Caller ID are provided on the same service, a \$.50 reduction in the monthly rate for Caller ID will apply. (N)

4. DIRECT INWARD DIALING (DID) SERVICE

A. Regulations

DID service will be provided, subject to the availability of central office facilities and telephone numbers in the serving central office. Customers utilizing DID must arrange to provide for interception of all unused telephone numbers in the groups of DID telephone numbers assigned by the Telephone Company.

B. Rates and Charges

The following rates and charges are in addition to rates and charges applicable for PBX trunks:

(T)

	<u>Nonrecurring Charge</u>	<u>Monthly Rate</u>	<u>USOC</u>
1. Each group of 20 DID numbers or fraction thereof.....	\$174.20¢	\$ 3.45	ND4
or			
Each individual DID number.....	-	.25	SOT
2. Each DID trunk termination in central office.....	339.90	30.15	NDT

(C)

¢ In lieu of the nonrecurring charge included in paragraph B.1 above, the nonrecurring charge per additional group of 20 DID numbers provided on the same occasion as an initial group of 20 DID numbers is \$54.20.

3. The customer shall provide all switching or common equipment located on his premises which is necessary for the provision of DID service.
4. Special intercept on DID numbers will be furnished under the regulations and rates set forth in the Ameritech Competitive Services Catalog.

4.1 Two-Way Direct Inward Dialing (DID) Service With Call Transfer

(N)

A. Description

Two-Way Direct Inward Dialing (DID) With Call Transfer is a Central Office Based service that permits incoming calls to reach customer-provided equipment, without the assistance of an attendant, and allows the transfer of those calls to another line through the use of an incoming/outgoing trunk facility. The transfer capability makes it possible to disconnect after transferring the call, freeing the DID facility for additional incoming calls. This service is provisioned with E&M signaling and a 4-wire connection at the customer's premises. Touch-Tone is a requirement of this service.

B. Regulations

1. The assignment of telephone numbers and the sequence of numbers assigned to a customer are made at the discretion of the Company. Ameritech will be responsible for providing intercept.
2. The customer is responsible for providing intercept on assigned but unused telephone numbers associated with Two-Way DID With Call Transfer service.
3. Trunks arranged for Two-Way DID With Call Transfer may not be combined with trunk groups arranged to provide Direct Inward Dialing (DID) service. Overflow of calls between the two arrangements is not permitted.
4. Two-Way DID With Call Transfer is provided from Central Offices equipped to provide this service and subject to the availability of facilities. Customers are required to sign a confirmation of order for Two-Way DID With Call Transfer.

4.1 Two-Way Direct Inward Dialing (DID) Service With Call Transfer (Cont'd)

(N)

B. Regulations (Cont'd)

5. If a customer's normal serving Central Office is not equipped to provide Two-Way DID With Call Transfer or the customer so requests, the service may be provided, where facilities permit, from a Company Central Office different than that which normally serves the customer, but still within the same LATA, at the additional rates specified in Paragraph C. following and under the regulations applicable for Foreign Exchange (FX) or Foreign Central Office (FCO) services described in Section 5 of this tariff.
6. When Two-Way DID With Call Transfer becomes available or is subsequently requested from the Central Office that normally serves the customer, the service may be transferred to the normal serving Central Office. If the customer requests such a transfer, the customer will be subject to a change in telephone numbers and will also incur initial nonrecurring charges and Service Charges, as appropriate.
7. A change in Central Office equipment could require the customer to discontinue the service or obtain service from another Central Office. Ameritech makes no guarantees and assumes no liability for loss of service to the customer, resulting from the conversion or upgrade of Central Office equipment.
8. Two-Way DID With Call Transfer works in conjunction with Ameritech Direct Inward Dialing (DID) Service and the rates and charges specified in Paragraph C. following are in addition to the rates and charges for DID Service specified in Paragraph 4. of this section. Local and Message Toll charges are applicable.

7. MAKE BUSY AND BREAK ROTARY ARRANGEMENTS

A. General

1. Make busy and break rotary arrangements are optional arrangements available to customers who do not want to provide for answering incoming calls on all rotary groups of numbers during certain periods of time, e.g., nights, Sundays, holidays, etc. (T)
2. No allowances will be made for interruptions, delays, or errors occurring in connection with the facilities involved, except as provided in Section 2 of this tariff.

B. Make Busy Arrangement

1. A make busy arrangement permits a customer to establish an artificial busy condition on a portion of a non-residence or PBX trunk rotary. (T)
At least one number of each rotary group arranged to provide such artificial busy condition, must be excluded from such an arrangement. (T)
2. Make busy arrangements consist of central office equipment and control channels. The keys to control such make busy equipment must be located on the customer's premises.

One or more ten number groups may be connected to one control key; however, one control key is required for each rotary group or groups separately controlled. (T)

3. Rates and Charges (C)

	Maximum Monthly Rate	USOC	
a. Make busy equipment, per group of 10 or less numbers.....	\$ 161.50	P89	(C)

7. MAKE BUSY AND BREAK ROTARY ARRANGEMENTS (Cont'd)

C. Break Rotary Arrangement

1. A break rotary arrangement permits a customer to take an entire rotary group of non-residence, PBX trunk or Centrex CO station numbers arranged for rotary service and break it into individual numbers or a group of numbers which are unattended and/or which a customer desires to make unavailable to accept incoming calls on the rotary group. The arrangement is available only where facilities permit. (T)
2. Break rotary arrangements consist of central office equipment and control channels. The keys to control such break rotary equipment must be located on the customer's premises. Each break rotary arrangement provides for a maximum of ten breaks in one group of numbers arranged for rotary service. The ten breaks can be simultaneous, non-simultaneous or a combination of simultaneous and non-simultaneous, depending upon the type of central office equipment serving the customer. A separate control channel with control key is required for each break or number of breaks separately controlled. (T)
3. Rates and Charges
 - a. Break rotary equipment providing 10 or less breaks per rotary group.....

B. RCF is furnished at the following rates and charges in addition to the rates and charges for associated service.

	Maximum Monthly		(C)
	<u>Rate</u>	<u>USOC</u>	
1. RCF, per feature	\$36.90	RD8XS*	(C)

2. The message charges applicable to RCF are as follows:

- a. The charge for the portion of the call from the originating station to the call forwarding location will be any regularly applicable tariff charge for the type of call involved.
- b. The charge for the portion of the call from the call forwarding location to the terminating station will be one of the following, as appropriate:
 - (1) a charge equal to the message rate service additional local message charge specified in Section 5 of this tariff;
 - (2) customer-dialed MTS charges; or
 - (3) initial or additional period in-WATS (800 service) usage charges.
- c. The charges in a. and b. preceding apply to all calls answered at the terminating station, including operator handled-person and collect calls even though such calls are not accepted at such terminating station.

* Additional codes appear in departmental practices.

D. Extensions of Patrons' Exchange Service Directly to TAS Equipment (T)

Patron's exchange service (including semi-public telephone service), PBX (T)
trunks, Centrex stations and, where facilities permit, station lines of (T)
the patron's PBX system may be extended via a direct circuit, hereinafter
referred to as a secretarial line, terminating in TAS equipment on the
TAS customer's premises. Secretarial lines are furnished subject to the
rates and charges for Circuits in Section 5 of this tariff.

E. Extensions of Patrons' Exchange Service to TAS Equipment via (T)
Concentrators Provided by Telephone Company

	Monthly Rate	USOC	
1. Bridging connection, each service.....	\$ 4.05	ST2	(T)
2. When the patron and the concentrator are located in the same central office area but the patron's service cannot be bridged in the central office, in addition to the rate specified in 1 above, a circuit (within the same central office area) is required.			(T)
3. When patrons are located in a central office area contiguous to that in which the concentrator is located, in addition to the rate specified in 1 above, an interoffice circuit is required.			
4. When patrons are located in central office areas other than those specified in 2 and 3 above, circuits may be furnished, at the rates specified in 3 above, if the circuit facilities normally used between the central office areas involved meet transmission, signaling and other requirements. If such circuit facilities do not meet transmission, signaling and other requirements, at the request of the TAS customer the circuit will be conditioned for suitable operation at additional rates and charges based on costs incurred.

2. Rates and Charges

- a. Monthly rates for PBX trunks or message rate non-residence services, as appropriate, will apply for Basic 911 services terminated at the PSAP. The monthly rate for a Basic 911 service is the rate applicable for the Access Area in which the central office originating the Basic 911 service is located. Foreign central office charges do not apply to Basic 911 services; however, where appropriate, the provisions for foreign exchange service are applicable. (T)

b. Optional Features

The following rates and charges apply per Basic 911 service equipped: (T)

	Installation Charge	Monthly Rate	
(1) Emergency ringback, including Called party hold	\$98.05	\$7.05	USOC 91V*
(2) Switchhook Status	81.90	2.50	91X

- c. Telephone Company or customer-provided equipment may be furnished to terminate Basic 911 services from the Telephone Company central offices. (T)

(1) When Telephone Company-provided equipment is furnished, it will be provided at the rates and charges specified in the appropriate tariff.

(2) When customer-provided terminal equipment is to be used, it will be furnished in accordance with the regulations, rates and charges set forth in Section 4 of this tariff.

- d. Tie lines, private line channels, extension lines and other facilities connecting a PSAP to various agencies such as police, fire or ambulance service are provided under the regulations and at the rates and charges set forth in this and other appropriate Telephone Company tariffs.

* Additional codes appear in departmental practices.

12. UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE (Cont'd)

C. E911 Service

1. Regulations

The following regulations, rates and charges apply to enhanced universal emergency telephone number (E911) service in addition to the regulations included in A. preceding. When requested by local governmental authorities, E911 service will be furnished subject to availability of facilities.

a. Features

- (1) The following standard features are included with all E911 service offerings:

Forced disconnect: A function of the E911 central office trunk circuit which enables the PSAP attendant to release a connection even though the calling party has not hung up.

Manual Transfer: A feature that enables the PSAP attendant to transfer an incoming call by code dialing. This feature is associated with the E911 trunk unit.

Speed Calling: For definition, see Ameritech Competitive Services Catalog. (T)

- (2) The following features are furnished subject to any applicable regulations in C-1-d following and at the rates and charges in C-2 following.

Automatic Location Identification (ALI): A feature by which the name (non-residence accounts only) and address associated with the calling party's telephone number are forwarded to the PSAP for display. Additional telephones with the same number as the calling party's (secondary location, off-premise, etc.) will be identified with the address of the telephone number at the main location.

Automatic Number Identification (ANI): A feature by which the calling party's telephone number is forwarded to the E911 control office and to the PSAP's display and transfer units.

Central offices that are not currently equipped to transmit ANI will not be modified to provide ANI just for E911 service; in such circumstances, when the Selective Routing feature is provided, Default Routing and Central Office identification will be provided in lieu of Selective Routing and ANI Display.

Issued: January 6, 1995

Effective: January 9, 1995

In accordance with Order No. 93-487-TP-ALT, dated November 23, 1994 and Commission Entry in Case No. 93-487-TP-ALT, dated January 5, 1995.

12. UNIVERSAL EMERGENCY TELEPHONE NUMBER SERVICE (Cont'd)

C. E911 Service (Cont'd)

1. Regulation (Cont'd)

b. Any terminal equipment used in conjunction with E911 service, whether such equipment is provided by the Telephone Company or the customer, shall be configured so that it is unable to extract any information from the Data Management System (See Note) other than information relating to a number identified through the ANI feature as the source of an in-progress call.

c. Outgoing calls can only be made on a transfer basis.

d. Service Feature Offerings

E911 Service is available in any of five service feature combinations:

- (1) Automatic Number Identification (ANI)
- (2) Selective Routing (SR)
- (3) Automatic Number Identification and Selective Routing
- (4) Automatic Number Identification and Automatic Location Identification (ALI)
- (5) Automatic Number Identification, Automatic Location Identification and Selective Routing

Where two jurisdictions are served by a local switching office each jurisdiction may select a different feature combination as long as SR is one of the features.

e. PSAP equipment designed for use with key telephone systems and type 2B automatic call distributor systems provided under terms specified in the Customer Premises Equipment Tariff, includes the following:

(1) ANI display and transfer equipment consisting of a micro-processor-controlled, stored program system capable of serving up to fifteen incoming E911 services and fifteen display and transfer units. (T)

(2) ALI equipment providing retrieval of the calling party's address from a data base and its display on units located at attendant positions. A maximum of fifteen display units may be installed per system.

Note: Data Management System (DMS) is a system of manual procedures and computer programs used to create, store and update the data required to provide the selective routing and ALI features.

2. Rates and Charges

a. Exchange service

- (1) The service feature offerings include provision of E911 exchange services to all primary PSAPs and to secondary PSAPs that are equipped to display ANI information on Telephone Company or customer-provided terminal equipment. The number of lines to a PSAP will be determined by the Telephone Company based upon anticipated call volumes. Secondary PSAPs that do not meet these specifications will receive calls on a transfer basis over the exchange network or the customer may subscribe for an additional E911 exchange line at the following rate and charge: (T)

	<u>Nonrecurring Charge</u>	<u>Monthly Rate</u>
Additional (optional) E911 exchange line terminating at PSAP ..	\$1000.20	\$137.30

- (2) The calling party is not charged for calls placed to the E911 number, however regular tariff charges apply, where appropriate, for messages transferred by a PSAP over exchange facilities from the central office serving the PSAP initiating the transfer to the point of termination of the transfer.

14. GROUP ALERTING AND DISPATCHING SYSTEMS

A. General

1. A Group alerting and Dispatching System is an arrangement of equipment and facilities designed for use by volunteer fire departments of municipalities for the simultaneous alerting of customer-designated exchange telephones for one-way communication during emergency conditions. An oral or recorded dispatching message may be transmitted by the customer to a maximum of four hundred and eighty telephones arranged to be alerted either as a single group or in not more than eight groups. Such systems will be furnished where transmission limitations within the system will not be exceeded.
2. The Telephone Company will provide all central office facilities for a Group Alerting and Dispatching System. The operation of the equipment and facilities on the customer's premises, or premises designated by the customer, shall be performed by the customer.
3. The System can alert telephones connected to non-residence and residence (including semi-public) service. (T)
4. The following terms, as used in this section, shall mean:
 - a. Control telephone - a telephone located on the customer's premises, or premises designated by the customer, for use only for the transmission of dispatching messages over a Group Alerting and Dispatching System.
 - b. Control channels -
 - (1) The circuit which connects a control telephone with the common equipment in the Primary central office area when the control telephone is located in such central office area, or
 - (2) the circuit which connects a control telephone with the central office serving the control telephone when such telephone is located in a central office area which is not the Primary central office area.
 - c. Alternate control channel -

A second control channel provided at the customer's request to assure continuity of service in case of failure of the first control channel is identified as an alternate control channel.

C. Responsibility of the Sponsor

- (1) The sponsor is responsible for the preparation and recording of all programs and shall be solely responsible for the contents of the programs and the quality of speech or sounds of the programs.
- (2) The sponsor understands and agrees that all programs must comply with the Federal, State and Local laws, rules and regulations.
- (3) The sponsor assumes all financial responsibility for all costs involved in providing programs including but not limited to, the sponsor premises equipment, producing the program, advertising and promotional expenses. (T)
- (4) For exchange network sizing and protection, each sponsor must provide the Telephone Company with an estimate of daily call volumes, the expected busy hour and the busy hour call volumes. Prior to the initiation of service the sponsor must notify the Telephone Company whether the program is to be of a fixed or variable length. The sponsor must provide the actual message length for fixed messages or, in the case of variable length messages, an estimate of the average holding time must be provided. (T)
- (5) The sponsor's announcement machine must be of a design which automatically disconnects at the conclusion of one full cycle of a fixed length message. (T)
- (6) The sponsor is required to subscribe to measured rate non-residence rotary services at applicable tariff charges. These services are to be used exclusively for SPAS. (T)
- (7) The sponsor is required to subscribe to as many additional measured rate non-residence rotary services as in the judgment of the Telephone Company are required to adequately handle calls without impairing the service to others. (T)

P.U.C.O. No. 1 1st Revised Sheet No. 80
EXCHANGE AND NETWORK SERVICES TARIFF
MISCELLANEOUS SERVICES AND ARRANGEMENTS

22. INTERCOM CALLING

A. Description

Intercom Calling is an intercommunication service that provides an exchange service with multiple station sets, associated with the same directory telephone number, with the ability to function as an intercommunication system and provides Three-way Calling as defined in Section 8, Paragraph 3 of this tariff. (T)

B. Regulations

1. Intercom Calling service will be provided in connection with non-complex residence and non-residence exchange service, excluding semi-public telephone service. (T)
2. Intercom Calling service is offered from central offices arranged for Intercom Calling service and is furnished subject to the availability of facilities.
3. Customers who subscribe to Intercom Calling service and currently have Three-way Calling will be billed the Intercom Calling rate in lieu of the Three-way Calling rate.

C. Feature Capabilities

1. Intercom Code Dialing - Permits the customer to depress the switch hook, dial an access code (* plus two digits), go on hook, and then have all of the telephones ring with a distinctive ring.
2. Selective Intercom Dialing - Provides access codes for up to three different ringing patterns. With this feature, the customer may depress the switch hook, dial a particular access code that has been identified with a particular location, go on hook, and all extensions would ring with that particular distinctive ring.

Issued: January 6, 1995

Effective: January 9, 1995

In accordance with Order No. 93-487-TP-ALT, dated November 23, 1994 and Commission Entry in Case No. 93-487-TP-ALT, dated January 5, 1995.

P.U.C.O. No. 1
EXCHANGE AND NETWORK SERVICES TARIFF
MISCELLANEOUS SERVICES AND ARRANGEMENTS

22. INTERCOM CALLING (Cont'd)

C. Feature Capabilities (Cont'd)

3. Selective Call Transfer - Permits the transfer of calls between extensions. The customer can answer an incoming call on one extension, depress the switch hook, dial an access code for one of the three different patterns, and go on hook. All extensions on the exchange service would then ring with the appropriate ringing pattern corresponding to the dialed code. Anyone going off hook from those extensions would be connected to the call automatically. (T)
(T)
4. Dialable Call Hold - Permits the customer to place a non-intercom call (i.e., incoming call) on hold by depressing the switch hook, dialing an access code and going on hook. The call will then remain on hold until any telephone is taken off hook or the calling party goes on hook. During this hold, any telephone going off hook is connected to the call.

D. Rates and Charges

The following rates and charges are in addition to all other applicable rates and charges for the facilities and service furnished:

	Maximum Monthly Rate	(C)
1. Intercom Calling feature, per line.....	\$ 10.00	(C)
2. When any combination of Intercom Calling Service, as specified in 1. preceding, and/or Advanced Custom Calling Service feature(s), as specified in Paragraph 3.1 of this Section, and/or any Custom Calling Service feature (other than Three-Way Calling, when used with Intercom Calling Service), as specified in Paragraph 3.D.1.a. thru d. of this Section, are provided on the same exchange service, a \$.50 reduction in the monthly rates will apply for each feature per exchange service.		(T) (T)

Note: Effective April 16, 1993, no further installations of, or changes to Intercom Calling will be made. Intercom Calling in service on April 16, 1993, will be continued in service only for as long as such service remains at the location at which it is being furnished on the aforementioned date, and so long as the facilities are available.

25. AUTOMATIC METER READING (AMR) SERVICE

A. General

1. Automatic Meter Reading (AMR) Service provides for the remote reading of metering equipment located on a patron's premises by a Utility Company (customer) or other entity providing gas, water or electric utility services.
 2. AMR service consists of Telephone Company central office equipment and facilities which provide a transmission path via the patron's exchange service between the customer's computer terminal, which contains a data base to track and store the meter readings, and a meter interface unit located on its patron's premises. (T)
 3. AMR service provides the customer access to a patron's exchange service without ringing or interfering with the patron's use of the exchange service. (T)
 4. The AMR central office common equipment consists of a Controller, which directs the AMR intra-office connecting facility to provide access to the patron's exchange service; an intra-office connecting facility, which allows use of the patron's exchange service for the transport of meter reading data between the customer's data collection device and the AMR central office common equipment. (T)
- A Meter Interface Unit (MIU), which is provided by the customer in accordance with Part 68 of the Federal Communications Commission rules and regulations and which is technically compatible with the Telephone Company provided Central Office Controller and facilities, is located on the patron's premises. The MIU connects the patron's basic exchange service to the Utility meter. (T)
5. AMR service is activated by the customer's call to the Controller telephone number. After an exchange of security checks between the Controller and the customer's data collection device, a transmission path is established and the meter reading process may begin.

B. Regulations

1. AMR is available where facilities and conditions permit.
2. AMR may be provided in connection with all classes and grades of basic exchange service. Utility patrons must have basic exchange service.
3. AMR central office common equipment is required in each Telephone Company central office for each customer requesting AMR service.

28. TOLL RESTRICTION

A. Regulations

1. Toll restriction is a central office service arrangement whereby calls dialed over an individual residence exchange service or a non-residence exchange service or a PBX trunk, to other than the local service area, are either automatically routed to the customer's attendant position or the calling person receives an announcement. (T)
(T)
2. Toll restriction will be provided, where facilities permit, subject to the following:
 - a. Toll restriction will not allow 1+, 0+, 0-, 10-XXX, 900 service code, or 700 code toll calls.
 - b. Toll restricted services will not have dial access to Telephone Company operators, except for Directory Assistance. (T)
 - c. Toll restriction does not provide restriction of 411 calls, or nonchargeable calls to numbers such as public emergency service 911, or 950 calls. Calls to 800 service will be permitted only from residence service. (T)
(T)
3. Subscribing to toll restriction does not relieve customers of responsibility for calls charged to their telephone number(s).
4. Toll restriction will not be provided on Public, Semi-Public, or COCOT service.
5. The Company shall not be liable to the customer or any other person or entity for damages of any nature or kind arising out of, resulting from, or in connection with the provision of the service, including without limitation, the inability to access the operator or any non toll free number for any purpose.

30. SELECTIVE CALL SCREENING SERVICE

A. Description

Selective Call Screening is an arrangement designed to restrict certain types of billing from a line which originates a call. The screening is designed to inform the operator services provider about special characteristics associated with the line. Under this arrangement, the operator services provider processes the operator-assisted, and/or operator-handled, and/or automated operator-assisted originating call so that that call will conform to one of the allowable types of billing, which could be those which conform only to billing as collect, billed to a third number, or billed to a calling card.

B. Regulations

1. The Telephone Company assumes no liability for calls completed by any other entity or carrier or operator services provider as long as the screening code accompanies the call forwarded to the other entity. The Telephone Company is responsible for properly handling calls which are selectively screened and are not carried over any other entity's network or facilities.
2. Selective Call Screening Service is offered subject to the availability of suitable facilities and equipment.
3. The service is offered to residence and non-residence exchange services, PBX trunks and customer-owned coin-operated telephone (COCOT) service. Centrex customers are covered in the Ameritech Competitive Services Catalog. (T)
(T)
4. Customers subscribing to Selective Call Screening Service are responsible for all toll charges billed to their lines for calls which are not carried solely over the Telephone Company's facilities.
5. Selection Call Screening Service will be provided at no charge to customer-owned coin-operated telephone (COCOT) customers. (N)

31. CALL BLOCKING

A. Description

Call blocking is an optional service which provides residence and non-residence customers and Information Providers (Sponsors) with the capability to block the origination of direct dialed calls to all Sponsor Priced Audiotex Service (SPAS) or 976 provided by the Telephone Company and all other 976-like services including, but not limited to 900 special access services, whether provided by the Telephone Company or others.

B. Regulations

- (1) Call blocking will be provided only where the Telephone Company's central office can be feasibly modified to provide the service and where facilities and conditions permit.
- (2) Call blocking will be permitted from all residence and non-residence exchange services and PBX lines and Centrex station lines. (T)
- (3) Call blocking is available only on customer-dialed station-to-station calls.
- (4) Call blocking is available only for all SPAS and 900 special access services and not for specific programs.
- (5) Call blocking may be requested by sponsors to prohibit access to 976/976-like services after notification by the Telephone Company that a residence or non-residence customer is delinquent in payment of calls to the sponsor's programs. Upon proof by the customer of payment or other satisfactory resolution of his or her residence or non-residence account, or upon notice by the sponsor, sponsor requested blocking will be removed by the Telephone Company.
- (6) Residence and non-residence customers obtaining service at a new location shall be afforded blocking of all SPAS and 900 special access services at no charge, even if they exercised an option to block all SPAS and 900 special access services at a previous location at no charge.
- (7) Requests by residence and non-residence customers to remove all SPAS and 900 special access services blocking must be submitted to the Telephone Company in written form.
- (8) The Telephone Company may impose blocking on residence and non-residence customers, who have incurred but not paid, SPAS, 900 special access or other 976-like service charges, which are not subject to bona fide dispute. The Telephone Company will remove call blocking from a customer's line upon settlement of the outstanding charges and written authorization from the customer. (N)

33. SCAN ALERT SERVICE (Cont'd)

A. General (Cont'd)

3. Scan Alert Wholesale Pricing Option

Scan Alert Wholesale Pricing Option includes the service features as described in Paragraph 1., preceding. However, unlike Scan Alert Service which is leased to individual residence and non-residence subscribers, the Scan Alert Wholesale Pricing Option is leased to the sponsoring alarm agency.

The rate applied for each network access line equipped with Scan Alert Wholesale Pricing Option is dependent upon the total number of non-residence and residence network access lines equipped that are leased to the alarm agency. An alarm agency can aggregate new and existing non-residence and residence network access lines equipped with Scan Alert to qualify for this option. The number of network access lines equipped with Scan Alert Wholesale Pricing Option will be counted on the last day of the bill month to determine the rate to be paid for each network access line equipped. (T)

4. Scan Alert Contract Pricing Option

Scan Alert Contract Pricing Option includes the service features as described in Paragraph 1., preceding, however the Scan Alert Contract Pricing Option is leased to the sponsoring alarm agency on a wire center specific contract basis, with a minimum contract period of forty-eight months.

To qualify for this service, an alarm agency must designate the wire center, port capacity, and must equip the designated minimum number of lines with Scan Alert in the designated wire center by the last day of the effective contract period (3rd, 6th, 9th, 12th bill month). The minimum number of lines equipped with Scan Alert Contract Pricing Option is determined as follows:

Effective Contract Period	Minimum Number of Network Access Lines Required					(T)
	8 Port Capacity	32 Port Capacity	64 Port Capacity	96 Port Capacity	256 Port Capacity	
End of:						
3rd Bill Month	2	8	16	24	64	
6th Bill Month	4	16	32	48	128	
9th Bill Month	6	24	48	72	192	
12th Bill Month through 48th Bill Month	8	32	64	96	256	

Issued: January 6, 1995

Effective: January 9, 1995

In accordance with Order No. 93-487-TP-ALT, dated November 23, 1994 and Commission Entry in Case No. 93-487-TP-ALT, dated January 5, 1995.

MISCELLANEOUS SERVICES AND ARRANGEMENTS

33. SCAN ALERT SERVICE (Cont'd)

A. General (Cont'd)

4. Scan Alert Contract Pricing Option (Cont'd)

The alarm company will be billed for the actual lines in service.

If the actual number of network access lines equipped does not meet the required minimum, the alarm agency will also be billed at the Contract Pricing Option residence rate for the number of additional ports needed to meet the minimum requirement.

(T)

Should an alarm company discontinue service before the contract has been fulfilled, termination charges equal to the minimum requirement for the remainder of the contract will apply.

5. Scan Alert Change Charge

The Scan Alert Change Charge is applicable for work done to comply with a customer's request for a change in alarm dealer or pricing option. Additional Scan Alert Change charges are applicable for subsequent requests for change of service.

Transfer of Scan Alert, Scan Alert Wholesale Pricing Option, or Scan Alert Contract Pricing Option to a different line at the same customer location will be treated as a new installation.

B. Regulations

1. Undertaking of the Telephone Company

Nothing contained in this tariff shall be construed as establishing any agency agreement, partnership or joint venture between the Telephone Company and any alarm agency. Any such agency utilizing Scan Alert Service shall be responsible for obtaining all licenses, permits and authorizations required by any authority and will comply with all codes, laws, regulations, restrictions or limitations governing the use of equipment or services employed by it in providing a service to its customers. The General Regulations of this tariff state the Obligation And Liability Of Telephone Company.

2. Area Served

Scan Alert Service will be furnished in exchanges where central offices are equipped to provide this service and where facilities are available and compatible. Customer Premise Equipment must also be compatible.

Issued: January 6, 1995

Effective: January 9, 1995

In accordance with Order No. 93-487-TP-ALT, dated November 23, 1994 and Commission Entry in Case No. 93-487-TP-ALT, dated January 5, 1995.

33. SCAN ALERT SERVICE (Cont'd)

B. Regulations (Cont'd)

4. End User Telephone Service

An end user must maintain exchange service at the premises where the STU is located to be served by Scan Alert Service. In the event the exchange service is completely disconnected for any reason, the Scan Alert Service will also be disconnected.

5. End User Designated Alarm Agency

The alarm company designated by the end user will be required to subscribe to at least two (2) telephone company private line channels from its monitoring station to a Scan Alert network hub location. Connection to the network via a hub provides access to the message switch located on Telephone Company premises. The alarm agency will also be required to provide data terminal equipment that is compatible with the output from the Scan Alert message switch.

6. Suspension of Service

Suspension of service is not offered for this service.

C. Rates and Charges

The following rates and charges are in addition to those charged for other facilities required for operation in conjunction with Scan Alert. The provisions relating to residence and non-residence service categories contained in the General Regulations of this tariff apply. The regulations contained in the appropriate tariffs for the other facilities also apply.

34. AMERITECH NETWORK SWITCH ALTERNATE ROUTING

(N)

A. Description

1. Ameritech Network Switch Alternate Routing (ANSAR) is an Advanced Intelligent Network (AIN) based service that allows the customer to safeguard against the loss of incoming calls resulting from the complete failure of the customer's serving central office switch.
2. ANSAR allows the customer to develop and maintain a contingency plan that can be activated at their command to reroute incoming calls around their failed serving central office switch and back to their location or an alternate location.
3. ANSAR allows the customer the ability to develop and test solutions to potential problems before they occur.
4. ANSAR supports up to ten alternate routing plans with a maximum of 10,000 telephone numbers.
5. ANSAR operates across the public network or private facilities.
6. The customer may activate ANSAR 24 hours a day, seven days a week in coordination with Ameritech.
7. Upon local central office recovery, conditions permitting, Ameritech will deactivate network controls in coordination with the customer.
8. An ANSAR plan is subject to review by Ameritech in order to determine effects on network capability, capacity and control.
9. All telecommunications service required for rerouting must be in place or subscribed to at the same time as ANSAR and will be reviewed by Ameritech.
10. ANSAR allows the customer to exercise their back-up facilities during normal conditions.

B. Regulations

1. ANSAR service is available where central office facilities and equipment permit.
2. When subscribing to ANSAR, all members of a hunt group must be included.
3. The ANSAR customer is responsible for the payment of any applicable station-to-station tariff charges for each call between the central office where the ANSAR protected numbers reside and the telephone to which the call is being rerouted.

34. AMERITECH NETWORK SWITCH ALTERNATE ROUTING (Cont'd)

(N)

B. Regulations (Cont'd)

4. Upon request of the customer, Ameritech will coordinate an out-of-hours test of the customer's alternate routing plan which will be subject to a charge as found in Paragraph E.
5. ANSAR is available to PBX, Centrex, ISDN and basic exchange business line customers where facilities permit.
6. Due to network capacity and capability limitations during a long central office outage, some blocking of calls in the network may occur, and therefore, all incoming calls may not be rerouted and terminated to the alternate site. In all cases, the first priority will be to stabilize the public network, to provide telephone service to emergency service providers; e.g. Telephone Service Priority (TSP), 911, hospitals, police and fire agencies, etc.
7. Customer requested changes to an existing ANSAR plan are subject to a charge as found in paragraph E.
8. The services and facilities furnished by the Telephone Company are subject to the terms, conditions and limitations specified herein. With respect to a claim or suit by a customer, or by any others, for damages associated with the installation, provision, termination, maintenance, repair or restoration of service, the Telephone Company's liability, if any, shall not exceed an amount equal to the proportionate charge for the service for the period during which the service was affected.

C. Customer Access

1. ANSAR provides two customer interface options: Terminal Access and Touch Tone Access.
2. ANSAR with Terminal Access provides direct or CentrexMate access to the Service Management System. Under either method, the customer's service administrator may define an entire contingency plan, change the "forward-to" destination for protected telephone numbers, activate or deactivate a contingency plan, modify an existing plan and retrieve reports.
3. ANSAR with Touch Tone Access provides the customer's service administrator the ability to activate or deactivate a contingency plan.

35. AMERITECH CUSTOMER LOCATION ALTERNATE ROUTING

(N)

A. Description

1. Ameritech Customer Location Alternate Routing (ACLAR) is an Advanced Intelligent Network (AIN) based service that allows the customer to safeguard against the loss of incoming calls due to circumstances that make the customer's physical work location inaccessible (i.e., fire, flood, cable cut, etc.)
2. ACLAR allows the customer to develop and maintain a contingency plan that can be activated at their command to reroute incoming calls to predetermined alternate customer locations.
3. ACLAR provides the customer the ability to develop and test solutions to potential problems before they occur.
4. ACLAR allows the customer to exercise their back-up facilities during normal conditions.
5. ACLAR supports up to ten alternate routing plans with a maximum of 10,000 telephone numbers.
6. ACLAR operates across the public network or private facilities.
7. An ACLAR plan is subject to review by Ameritech in order to determine effects on network capability, capacity and control.
8. All telecommunications service required for rerouting must be in place or subscribed to at the same time as ACLAR and will be reviewed by Ameritech.
9. The customer may activate ACLAR 24 hours a day, seven days a week.

B. Regulations

1. ACLAR service is available where central office facilities and equipment permit.
2. The ACLAR customer is responsible for the payment of any applicable station-to-station tariff charges for each call between the central office where the ACLAR protected numbers reside and the telephone number to which the call is being rerouted.
3. When subscribing to ACLAR, all members of a hunt group must be included.
4. ACLAR is available to PBX, Centrex, ISDN and basic exchange business line customers where facilities permit.
5. Customer requested changes to an existing ACLAR plan are subject to a charge as found in paragraph E.

(1) Dormitory Stations

A dormitory station is a station of a Centrex system provided in student dormitory rooms or suites as described in (a) and (b) following, excluding those for married couples, and in common areas of a dormitory, as described in (c) following, of a college, university or accredited school of nursing of a hospital. Such stations are arranged for inward and outward dialing and access to and from the attendant position of the Centrex system. (T)

- (a) Dormitory rooms include rooms which are designed and furnished to afford sleeping accommodations or a combination of sleeping and study accommodations, for use by one or more students.
- (b) Dormitory suites include units which are comprised of a common study room and one or more rooms with sleeping accommodations for use by one or more students.
- (c) Common areas include, but are not limited to, hallways, study areas and recreational rooms used by all residents of the dormitory.

(e) Network Access

The Centrex station to PBX trunk equivalent schedule (Paragraph d. preceding) is used by the telephone company to determine the quantity of non-residence network access lines, PBX central office terminations and PBX message usage packages required for each Centrex system. The rates and charges for these items are specified in Section 5, Paragraph 2.1 of this tariff.

(f) Intercom Lines

The quantity of Centrex Intercom lines are determined by the telephone company by subtracting the number of Centrex network access lines (paragraph (e) preceding) from the total number of Centrex stations ordered. Intercom quantity discounts are also available for customers who commit to keeping the service for 36 months. The intercom line rate and the associated discounts are determined by access area and are detariffed.

(g) Centrex Station Features

Centrex station feature rates are detariffed and apply to all lines in the Centrex system.

(h) Telephone Numbers

Telephone Numbers are provided at the rates and charges specified in Section 8, paragraphs 4 and 27 of this tariff.

BASIC TELEPHONE ASSISTANCE

1. SERVICE CONNECTION ASSISTANCE (Cont'd)

B. Regulations

1. Service Connection Assistance is a basic local exchange residential service offering available to customers who are currently participating in one of the following assistance programs:
 - (a) Home Energy Assistance Program (HEAP);
 - (b) Emergency - Home Energy Assistance Program (E-HEAP);
 - (c) Ohio Energy Credits Program (OECF);
 - (d) Supplemental Security Income (SSI) under Title XVI of the Social Security Act; or
 - (e) Medical Assistance under Chapter 5111 of the Ohio Revised Code (Medicaid).
2. The Telephone Company shall require, as proof of eligibility for Service Connection Assistance, documentation of the customer's participation in one of the above assistance programs.
3. Customers of Service Connection Assistance cannot be a dependent (as defined by the Federal Income Tax Code) under the age of 60.
4. Service Connection Assistance is available for all grades of service.
5. Service Connection Assistance is available for a single telephone exchange service at the customer's principal place of residence. No other exchange service will be permitted in the same household. (T)
6. Service Connection Assistance shall be available to eligible customers not more than once in a one-year period at the same address. Customers must pay or make arrangements to pay to the Telephone Company any outstanding bills for regulated telephone services in the customer's name, and no other member of the household owes money for such services previously provided at customer's current address. (T)
7. Service Connection Assistance customers are not restricted on the optional services to which they may subscribe.

Issued: January 6, 1995

Effective: January 9, 1995

EXCHANGE AND NETWORK SERVICES TARIFF
BASIC TELEPHONE ASSISTANCE

2. TELEPHONE SERVICE ASSISTANCE

A. General

Telephone Service Assistance is a telephone assistance program which provides certain eligible residential customers requesting local exchange service with the following benefits:

- o Recurring discount on the monthly basic local exchange service charge. (T)
- o Waiver of the Federal Subscriber Line Charge.
- o Waiver of the deposit to establish service, where applicable.
- o Waiver of the applicable service connection charges for establishing, re-establishing, or restoring service when such charges exceed \$5.00.
- o Waiver of applicable service conversion charges for customers changing to or from Telephone Service Assistance.

B. Regulations

1. Telephone Service Assistance is a basic local exchange residential service offering available to customers who are currently participating in one of the following assistance programs:
 - (a) Both Medical Assistance under Chapter 5111 of the Ohio Revised Code and Medicare under Title XVIII of the Social Security Act;
 - (b) Ohio Energy Credits Program (OECF); or
 - (c) Supplemental Security Income (SSI) on the basis of blindness or disability under Title XVI of the Social Security Act.
2. The Telephone Company shall require, as proof of eligibility for Telephone Service Assistance, documentation of the customer's participation in one of the above assistance programs. Thereafter, the Telephone Company shall verify continued participation in the eligible programs not more than once per year.
3. Customers of Telephone Service Assistance cannot be a dependent (as defined by the Federal Income Tax Code) under the age of 60.

Issued: January 6, 1995

Effective: January 9, 1995

2. TELEPHONE SERVICE ASSISTANCE (Cont'd)

B. Regulations (Cont'd)

4. Telephone Service Assistance shall be provided with usage sensitive basic local exchange service in service areas where the Telephone Company offers such service. If the Telephone Company offers more than one type of usage sensitive basic local exchange service in the service area, the customer may choose from among those offered. If the Telephone Company offers no usage sensitive basic local exchange service in the customer's service area, it shall provide to the customer the least expensive basic local exchange service it offers in the customer's service area. (T)
- (a) The Telephone Company shall provide a notice, in each monthly billing statement, to customers of Telephone Service Assistance with usage sensitive basic local exchange service, that it also offers basic local exchange, flat rate, unlimited calling telephone service. The notice shall state the rate for basic local exchange, flat rate, unlimited calling telephone service; that such service is not subject to the discounts and waivers applicable to Telephone Service Assistance; and, that customers may convert to such service at no charge. The notice shall also state that if a customer converts from Telephone Service Assistance to basic local exchange, flat rate, unlimited calling telephone service, the customer cannot convert back to Telephone Service Assistance until one year has passed. (T)
- (b) If customers are receiving usage sensitive service under this section, the Telephone Company shall maintain the usage sensitive service to those customers, even though the Telephone Company ceases offering the usage sensitive telephone service in the customer's service area. The Telephone Company is not required to offer the usage sensitive telephone service to customers who apply for telephone service under this section after the Telephone Company ceases offering the usage sensitive service in the service area.
5. Telephone Service Assistance is available with flat rate, unlimited calling basic local services only if the Telephone Company does not offer usage sensitive basic local service in a customer's service area.
6. If the Telephone Company introduces usage sensitive basic local service to a customer's service area subsequent to the time the customer applies for and receives Telephone Service Assistance, the Telephone Company shall, unless otherwise requested by the customer, maintain the flat-rate service to the customer, even though the usage sensitive service is available in the customer's service area. Customers who apply for Telephone Service Assistance after the Telephone Company introduces usage sensitive service to the area, must take usage sensitive service to receive Telephone Service Assistance.

BASIC TELEPHONE ASSISTANCE

2. TELEPHONE SERVICE ASSISTANCE (Cont'd)

B. Regulations (Cont'd)

7. Telephone Service Assistance is available for a single telephone exchange service at the customer's principal place of residence. No other exchange service will be permitted in the same household. (T)
8. The waiver of deposit, service connection, and service conversion charges under Telephone Service Assistance shall be available to eligible customers not more than once in a one-year period at the same address. Customers must pay or make arrangements to pay to the Telephone Company any outstanding bills for regulated telephone services in the customer's name, and no other member of the household owes money for such services previously provided at the customer's current address, in order to benefit from such waivers. (T)
9. Telephone Service Assistance customers shall be permitted access to Universal Emergency Number Service (911 Service) and Message Toll Telephone Service (MTTS). However, Telephone Service Assistance customers are prohibited from purchasing any other optional services offered by the Telephone Company except 900 blocking, 976 blocking, and toll blocking services (where available); and, Easy Call (where available); and, any other service determined by the P.U.C.O. to be beneficial to customers with handicaps or medical conditions, or in life-threatening situations. (T)

C. Rates and Charges

The rate for Telephone Service Assistance is the Telephone Company's applicable access line rate, as listed below, minus an amount equal to the greater of the Telephone Company's federal subscriber line charges as specified in the Ameritech Access Service Tariff, F.C.C. No. 2, as determined by the Federal Communications Commission and in effect on the effective date of this section, or such subscriber line charge as it may subsequently change. The usage portion is the usage rate set forth at any time in the Company's tariffs as outlined in Section 5, paragraph 2.1.C. (T)

Monthly Rate					(C)
Residence	Access Area	Network Access Line	Central Office Termination	Total Monthly Rate	
- Individual	A	Future Use	-	-	
With	B	\$4.40	\$3.10	\$7.50	
Touch-Tone	C	4.40	3.10	7.50	
	D	4.40	3.10	7.50	
Residence
