180 East Broad Street
Columbus, OH 43215

**RE: Orwell Telephone Company Revision to PUCO Tariff No. 8 (Intrastate Access Services)
 Case No. 12-1835-TP-ATA**

Dear Ms. McCauley:

Pursuant to 77 Federal Register 31520, dated May 29, 2012 Revised VoIP-PSTN Originating Access Charge Rule issued by the FCC, enclosed for filing please find a copy of the above referenced tariff filing submitted on behalf of Orwell Telephone Company. This filing revises the description of Identification and Rating of Toll VoIP-PSTN Traffic. The Company respectfully requests an effective date for this filing of July 14, 2012.

The following tariff pages are included with this filing:

Section 6

1 st Revised Sheet 16	Incorporates revision to description of identification and Rating of VoIP-PSTN Traffic;
Original Sheet 16.1	Introduces additional text;
1 st Revised Sheet 17	Incorporates revision to description of identification and Rating of VoIP-PSTN Traffic;
1 st Revised Sheet 18	Incorporates revision to description of identification and Rating of VoIP-PSTN Traffic;

Please acknowledge receipt of this filing. Any questions you may have regarding this filing should be directed to my attention at 407-740-3031 or via email to stthomas@tminc.com.

Thank you for your assistance in this matter.

Sincerely,

/s/Sharon Thomas

Sharon Thomas

*NOTE: During the interim period between the effective date of the rules and an Applicant's Detariffing Filing, changes to existing business Tier 2 and all toll services, including the addition of new business Tier 2 and all new toll services, will be processed as 0-day TRF filings, and briefly described in the "Other" section above.

All Section I and II applications that result in a change to one or more tariff pages require, at a minimum, the following exhibits. Other exhibits may be required under the applicable rule(s). ACN, ACO, AMT, ATC, ATR and CIO applications see the 4901:1-6-14 Filing Requirements on the Commission's Web Page for a complete list of exhibits.

Exhibit	Description:
A	The tariff pages subject to the proposed change(s) as they exist before the change(s)
B	The Tariff pages subject to the proposed change(s), reflecting the change, with the change(s) marked in the right margin.
C	A short description of the nature of the change(s), the intent of the change(s), and the customers affected.
D	A copy of the notice provided to customers, along with an affidavit that the notice was provided according to the applicable rule(s).

Section III. – Attestation

Registrant hereby attests to its compliance with pertinent entries and orders issued by the Commission.

AFFIDAVIT

Compliance with Commission Rules and Service Standards

I am an officer/agent of the applicant corporation, Sharon Thomas, Consultant to Orwell Telephone Company, and am authorized to make this statement on its behalf.

I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) Pursuant to Chapter 4901:1-5 OAC for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules, including the Minimum Telephone Service Standards, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on June 14, 2012 at Maitland, Florida 32751

SUPERSEDED ACCESS TARIFF PAGES

ACCESS SERVICE TARIFF (Continued)

Switched Access Charges Assessable to VoIP-PSTN Traffic

1. Identification and Rating of Toll VoIP-PSTN Traffic

(N)

- 1.1 Scope - Toll VoIP-PSTN Traffic is the interexchange traffic exchanged in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. Traffic originates and/or terminates in IP format if it originates from and/or terminates to an end user customer of a service that requires Internet protocol compatible customer premises equipment.

This section governs the identification of Toll VoIP-PSTN Traffic that is required to be compensated at interstate access rates (unless the parties have agreed otherwise) by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90 et. al., FCC No. 11-161 (November 18, 2011) ("FCC Order"). Specifically, this section establishes the method of separating such traffic from the Customer's traditional intrastate access traffic, so that such Toll VoIP-PSTN Traffic can be billed in accordance with the FCC Order.

This section of the tariff does not preclude carriers from negotiating different rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic.

This Tariff does not supersede rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic in existing interconnection agreements.

Rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic in this tariff applies prospectively, as of December 29, 2011.

- 1.2. Rating of Toll VoIP-PSTN Traffic - The Toll VoIP-PSTN Traffic identified in accordance with this tariff section will be billed in accordance with the applicable interstate switched access rates applicable to the Company as set forth in the National Exchange Carrier Association (NECA) Access Service Tariff F.C.C. No. 5, which is posted at <http://svartifoss2.fcc.gov/cgi-bin/ws.exe/prod/ccb/etfs/webpublic/selectlec.hts>.

Effective: April 19, 2012

Patrick L. Morse, Senior Vice President
Orwell, Ohio

Case No. 12-1021-TP-ATA

ACCESS SERVICE TARIFF (Continued)

Switched Access Charges Assessable to VoIP-PSTN Traffic

1.1 Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd)

(N)

1.3 Calculation and Application of Percent-VoIP-Usage Factor - The Company will determine the number of Toll VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under subsection 1.2, above, by applying a Percent VoIP Usage ("PVU") factor to the total intrastate access MOU (however determined – either based on call detail information or PIU) exchanged between the Company and the Customer. The PVU will be derived and applied as follows:

- (A) The Customer will calculate and furnish to the Company a factor (the "PVU-A") representing the percentage of the total intrastate access MOU that the Customer exchanges with the Company in the State, that (a) is sent to the Company and that originates in IP format; or (b) is received from the Company and terminates in IP format. This PVU-A shall be based on information such as the number of the Customer's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.
- (B) Company will, likewise, calculate a factor (the "PVU-B") representing the percentage of the Company's total intrastate access MOU that the Customer exchanges with the Company in the State that (1) is sent to the Company and that originates in IP format; or (b) is received from the Company and terminates in IP format. This PVU-B shall be based on information such as the number of the Company's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.
- (C) The Company will use the PVU-A and PVU-B factors to calculate an effective PVU factor that represents the percentage of total intrastate access MOU exchanged between the Company and the Customer that is originated or terminated in IP format, whether at the Company's end, at the Customer's end, or at both ends. The PVU factor will be calculated as the sum of: A. the PVU-A factor and B. the PVU-B factor times (1.0 minus the PVU-A factor).

(N)

ACCESS SERVICE TARIFF (Continued)

Switched Access Charges Assessable to VoIP-PSTN Traffic

1.1 Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd)

1.3 (Cont'd)

- (D) The Company will apply the effective PVU factor to the total intrastate access MOU exchanged with the Customer to determine the number of Toll VoIP-PSTN Traffic MOUs.

Example 1: The PVU-B is 10% and the PVU-A is 40%. The effective PVU factor is equal to $40\% + (10\% \times 60\%) = 46\%$. The Company will bill 46% of the Customer's intrastate access MOU in accordance with the Company's applicable interstate switched access tariff.

Example 2: The PVU-B is 10% and the PVU-A is 0%. The effective PVU factor is $0\% + (100\% \times 10\%) = 10\%$. The Company will bill 10% of the Customer's intrastate access MOU in accordance with the Company's applicable interstate switched access tariff.

Example 3: The PVU-A is 100%. No matter what the PVU-B factor is, the effective PVU is 100%. The Company will bill 100% of the Customer's intrastate access MOU in accordance with the Company's applicable interstate switched access tariff.

- (E) If the Customer does not furnish the Company with a PVU-A pursuant to the preceding paragraph 1, the Company will utilize an effective PVU equal to the PVU-B.

- 1.4 Initial PVU Factor - If the PVU factor is not available and/or cannot be implemented in the Company's billing systems by December 29, 2011, once the factor is available and can be implemented the Company will adjust the Customer's bills to reflect the PVU retroactively to December 29, 2011. In calculating the initial PVU, the Company will take the Customer-specified PVU-A into account retroactively to December 29, 2011, provided that the Customer provides the factor to the Company no later than 30 days after approval of this tariff; otherwise, it will set the initial PVU equal to the PVU-B, as specified in subsection 1.3, above.

ORWELL TELEPHONE COMPANY

EXHIBIT B

PROPOSED ACCESS TARIFF REVISION

ACCESS SERVICE TARIFF (Continued)

Switched Access Charges Assessable to VoIP-PSTN Traffic

1. Identification and Rating of Toll VoIP-PSTN Traffic

- 1.1 Scope - Toll VoIP-PSTN Traffic is the interexchange traffic exchanged in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. Traffic originates and/or terminates in IP format if it originates from and/or terminates to an end user customer of a service that requires Internet protocol compatible customer premises equipment.

This section governs the identification of VoIP-PSTN Traffic that is subject to the access compensation rules adopted by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90 et. al., FCC No. 11-161 (November 18, 2011) and in its Second Order on Reconsideration, FCC No. 12-47 (April 25, 2012). Specifically, this section establishes the method of separating such traffic (referred to in this tariff as "Relevant VoIP-PSTN Traffic") from the Customer's traditional intrastate access traffic, so that such Relevant VoIP-PSTN Traffic can be billed in accordance with the FCC Orders.

(C)
|
|
(C)

(T)
(T)

This section of the tariff does not preclude carriers from negotiating different rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic.

This Tariff does not supersede rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic in existing interconnection agreements.

(D)
(D)

- 1.2. Rating of Toll VoIP-PSTN Traffic - The Company will bill Relevant VoIP-PSTN traffic identified in accordance with this tariff Section as follows:

(C)
(C)

- Between December 29, 2011 and July 12, 2012, the applicable rate elements used in providing access for Relevant VoIP PSTN Traffic that originates on the Company's network for termination to the Customer's end users (originating traffic) will be billed at interstate switched access rates applicable to the Company as set forth in the National Exchange Carrier Association (NECA) Access Service Tariff F.C.C. No. 5, which is posted at <http://svartifoss2.fcc.gov/cgi-bin/ws.exe/prod/ccb/etfs/webpublic/selectlec.fts>.

ACCESS SERVICE TARIFF (Continued)

Switched Access Charges Assessable to VoIP-PSTN Traffic

1.1 Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd)

- 1.3 Calculation and Application of Percent-VoIP-Usage Factor - The Company will determine the number of Toll VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under subsection 1.2, above, by applying a Percent VoIP Usage ("PVU") factor to the total terminating intrastate access MOU (however determined – either based on call detail information or PIU) sent to a Company end user by the Customer (terminating traffic). Beginning July 1, 2014, the Company will apply the PVU to both terminating and originating intrastate access MOU exchanged between the Company and the Customer. The PVU will be derived and applied as follows: (C)
- (A) The Customer will calculate and furnish to the Company a factor (the "PVU-A") representing the percentage of the total terminating intrastate and interstate access MOU sent to a Company end user by the Customer that originates in IP format. This PVU-A shall be based on information such as the number of the Customer's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information. Beginning July 1, 2014, the Customer's PVU-A shall be based on access MOU the Customer exchanges with the Company in State that is (i) sent to the Company that originated in IP format or (ii) is received from the Company and terminated in IP format. (C)
- (B) Company will, likewise, calculate a factor (the "PVU-B") representing the percentage of the Company's total access MOU in the State that the Company terminates in IP format. This PVU-B shall be based on information such as the number of the Company's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information. Beginning July 1, 2014, the PVU-B shall be based on access MOU in the State that originates or terminates in IP format. (C)
- C) The Company will use the PVU-A and PVU-B factors to calculate an effective PVU factor that represents the percentage of total terminating access MOU received from the Customer that is terminated in IP format by the Company and/or originated in IP format by the Customer. Beginning July 1, 2014, the PVU factor will represent the total intrastate access MOU exchanged between the Company and the Customer that originates or terminates in IP format at either the Company end or the Customer end. The PVU factor will be calculated as the sum of: (A) the PVU-A factor and (B) the PVU-B factor times (1.0 minus the PVU-A factor). (C)

ACCESS SERVICE TARIFF (Continued)

Switched Access Charges Assessable to VoIP-PSTN Traffic

1.1 Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd)

1.3 (Cont'd)

- (D) The Company will apply the effective PVU factor to the total terminating intrastate access MOU exchanged with the Customer to determine the number of Toll VoIP-PSTN Traffic MOUs.

Example 1: The PVU-B is 10% and the PVU-A is 40%. The effective PVU factor is equal to $40\% + (10\% \times 60\%) = 46\%$. The Company will bill 46% of the Customer's terminating intrastate access MOU in accordance with the Company's applicable interstate switched access tariff. (C)

Example 2: The PVU-B is 10% and the PVU-A is 0%. The effective PVU factor is $0\% + (100\% \times 10\%) = 10\%$. The Company will bill 10% of the Customer's terminating intrastate access MOU in accordance with the Company's applicable interstate switched access tariff. (C)

Example 3: The PVU-A is 100%. No matter what the PVU-B factor is, the effective PVU is 100%. The Company will bill 100% of the Customer's terminating intrastate access MOU in accordance with the Company's applicable interstate switched access tariff. (C)

In all of the examples above, the Company will apply the PVU to both originating and terminating intrastate access MOU beginning July 1, 2014. (N)
(N)

- (E) If the Customer does not furnish the Company with a PVU-A pursuant to the preceding paragraph 1, the Company will utilize an effective PVU equal to the PVU-B.

- 1.4 Initial PVU Factor - If the PVU factor is not available and/or cannot be implemented in the Company's billing systems by December 29, 2011, once the factor is available and can be implemented the Company will adjust the Customer's bills to reflect the PVU retroactively to December 29, 2011. In calculating the initial PVU, the Company will take the Customer-specified PVU-A into account retroactively to December 29, 2011, provided that the Customer provides the factor to the Company no later than 30 days after approval of this tariff; otherwise, it will set the initial PVU equal to the PVU-B, as specified in subsection 1.3, above.

ORWELL TELEPHONE COMPANY

EXHIBIT C

DESCRIPTION AND TYPE OF CUSTOMERS AFFECTED

Pursuant to 77 Federal Register 31520, dated May 29, 2012 Revised VoIP-PSTN Originating Access Charge Rule issued by the FCC, this filing revises the description of Identification and Rating of Toll VoIP-PSTN Traffic. The Company respectfully requests an effective date for this filing of July 14, 2012.
