SECTION 2 - RULES AND REGULATIONS (CONT'D)

2.9 OBLIGATIONS OF THE CUSTOMER (CONT'D)

2.9.7 Mixed Interstate and Intrastate Access Service (CONT'D)

When mixed interstate and intrastate Access Service is provided, all charges, including nonrecurring charges, usage charges, and optional features, will be prorated between interstate and intrastate. The percentage provided in the reports as set forth in 2.9.7 will serve as the basis for prorating the charges. The percentage of an Access Service to be charged as intrastate is applied in the following manner:

- For nonrecurring chargeable rate elements, multiply the percent intrastate use times the quantity of chargeable elements times the state tariff rate per element.
- b. For usage sensitive chargeable rate elements, multiply the percent intrastate use times actual use (measure or Company assumed average use) times the stated rate.

2.9.8 Identification and Rating of Toll VoIP-PSTN Traffic

(A) Scope

This section governs the identification and billing of Toll VoIP-PSTN Traffic, unless the parties have agreed otherwise, pursuant to the Federal Communications Commission Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (November 18, 2011) ("FCC November 18th Order") and the Second Order on Reconsideration in WC Docket Nos. 10-90, etc., FCC (C) Release No. 12-47 (April 25, 2012). This section of the tariff does not preclude carriers from negotiating different rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic. This tariff does not supersede rates, terms and conditions governing compensation for Toll VoIP-PSTN traffic in existing interconnection agreements. (C)

(1) For purposes of this tariff section, "Toll VoIP-PSTN Traffic" is defined, consistent with 47 C.F.R. § 51.913, as interexchange (access) telecommunications traffic exchanged between Telephone Company and another telecommunications carrier in Time Division Multiplexing ("TDM") format that originates and/or terminates in IP format. Telecommunications traffic originates and/or terminates in IP format if it originates from and/or terminates to an end-user customer of a service that requires Internet protocol-compatible customer premises equipment. The Telephone Company does not originate or terminate traffic in IP format.

ISSUED: June 13, 2012 EFFECTIVE: July 13, 2012

Issued under authority of the Public Utilities Commission of Ohio in Case No. 06-417-TP-ACE.

SECTION 2 - RULES AND REGULATIONS (CONT'D)

2.9 OBLIGATIONS OF THE CUSTOMER (CONT'D)

2.9.8 Identification and Rating of Toll VoIP-PSTN Traffic (CONT'D)

(B) Interstate and Intrastate Rates Apply

(C)

- (1) Intrastate, interexchange Toll VoIP-PSTN Traffic identified in accordance with this tariff section that terminates to the Telephone Company will be billed at (C) rates equal to the Telephone Company's applicable tariffed interstate switched access rate as specified in Section 17.2 of the Telephone Company's Tariff F.C.C. No. 1.
- (2) Effective July 13, 2012, intrastate, interexchange Toll VoIP-PSTN traffic identified in accordance with this tariff section that originates from the Telephone Company will be billed at the applicable tariffed intrastate switched access rates as specified in Section 9 until June 30, 2014.

(C)

(C)

(C) <u>Calculation and Application of Percent-VoIP-Usage Factors</u>

The intrastate Toll VoIP-PSTN traffic minutes of use ("MOU") to which interstate rates will be applied under this section will be determined by the Telephone Company by calculating a Percent VoIP Usage ("PVU") factor to be applied to the total intrastate access MOU exchanged between the Company and the Customer, as follows:

- (1) The Customer will calculate and furnish to the Telephone Company a factor (the "PVU-C") representing the percentage of the total intrastate access MOU that the Customer exchanges with the Telephone Company in Ohio that originated from an end-user customer using a service that requires Internet protocol-compatible customer premises equipment or that the Customer receives from the Telephone Company in Ohio and that is terminated by the Customer to an end-user customer using a service that requires Internet protocol-compatible premises equipment.
- (2) The Company will calculate a factor (the "PVU-T") representing the percentage of the Company's total intrastate access MOU that the Company exchanges with the Customer in Ohio that originated from an end-user customer using a service that requires Internet protocol-compatible customer premises equipment or that the Customer receives from the Telephone Company in Ohio and that is terminated by the Customer to an end-user customer using a service that requires Internet protocol-compatible premises equipment.

ISSUED: June 13, 2012 EFFECTIVE: July 13, 2012
