**AMENDMENT TO MOTION FOR WAIVER**

---

Applicant American Transmission Systems, Incorporated (“ATSI”), files this amendment to its Motion for Waiver in this proceeding. In the original Motion for Waiver, ATSI requested the Board grant Applicant's request to submit voluminous documents regarding wetland and stream assessment and delineation work in electronic format and in a limited number of hard copies. Applicant requested the waiver to limit the amount of superfluous paper copied and filed with the multiple required application copies, provided the Applicant would supply a paper copy to any individual or public entity upon request. In further discussions with staff, it has become clear that to ensure proper docketing of the information being submitted regarding wetlands and stream delineations, a supplement to the application will need to be filed with docketing that includes a hard copy of the wetland and stream delineation and assessment work. This hard copy will be in addition to the two hard copies that have been previously requested by staff and which the application indicated would be filed with the Board staff as part of the filing of the original application. This request for the amendment to the waiver request does not in any way alter the availability of the information or the inclusion of an electronic version of the data on a CD with each and every hard copy cover of the document. This amendment to the waiver request is being filed in order to ensure that the record is clear regarding the filing of this information as part of the application process.

Respectfully submitted,

/s/ C. Darcy Copeland
