Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Dr. Janell Lundgren

PUCO

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Mr. Jeff Heatwole

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Mr. Dan Shramo

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

I benefit from energy efficiency. I have changed lights and electric appliances in my home with energy efficiency in mind. More people in Ohio should have the full benefits of energy efficiency with the latest information, financing, and government support. That's why I'm concerned about this issue.

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Mr. Robert Carpenter

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Ms. Laurel Hobden

Public Utilities Commission of Ohio

Subject: Burn Municipal Refuse in Ohio

Dear Public Utilities Commission of Ohio,

First Energy presented a plan to convert the Burger Units near Akron to biomass and then shelved the idea. I would like them to convert one or two of the boilers to municipal refuse. Toledo needs a new landfill and Cleveland is attempting to build a refuse-fired boiler. There are too many landfills in this state. Burning refuse generates electricity and steam. Ohio needs both. It also eliminates groundwater pollution and bacterial growth. I lived in Minnesota for many years and they burn refuse in both Minneapolis and St. Paul and it works very well. Ohio needs to come into the 21st century.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Mr. Paul Hopkins

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent *on efficiency must result in more than a dollar saved*. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Ms. Linda Novick

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Mr. Michael Webb

Mr. Scott Lundy

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Mrs. Rosa Fair

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved.
