Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Ms. Lynn Walker

PUCO

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Cathy Hale

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Mrs. Mary Hart

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

As a 32-year-old father of two and current/former teacher of more than 1,000, I am heavily invested in the future of our American society. Because that society is dependent on the health of our planet, I am also highly invested in the health of our planet's atmosphere, ecosystems and living things. I hope that you are, too.

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Ms. Dawn Marinucci

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Anne Hoke

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Mr. James Cunningham

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Ms. Patricia Fair

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,
Ms. Rayshawn Ambeau

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

The Electric Security Plan that was presented by FirstEnergy is a disaster for the public good. I want to have my voice heard before a project gets the green light from people that are supposed to be representing me.

FirstEnergy customers deserve to have their voices heard. Most of whom do not have access to another provider.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money.
