Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Dr. Bill Barron

PUCO

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mrs. Virginia Stone-Meyer

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Andrew Kistler

Public Utilities Commission of Ohio

*Subject: Energy Efficiency is a Winner in Ohio*

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Eric Schickendantz

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mrs. Marsha Clere

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Jim Conroy

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Jerry Jelinek

Public Utilities Commission of Ohio

Subject: Energy Efficiency is a Winner in Ohio

Dear Public Utilities Commission of Ohio,

Ohio customers were not given fair representation in the process of approving FirstEnergy's recent Electric Security Plan. As a result, Ohio customers will most likely see higher costs on their electric bills.

Now, Ohio customers are looking to the PUCO for robust energy efficiency programs that will save them money and protect them from these high electric bills. FirstEnergy customers deserve a fair amount of time in the process to give their input.

Energy efficiency is the cheapest tool Ohio has at its disposal to reduce the cost of monthly electric bills. By law, every dollar spent on efficiency must result in more than a dollar saved. So when residential, commercial and industrial electric customers in Ohio are given access to the best programs, we all save money. Ohio also saves in the long term with electric security and job creation. By reducing demand we can ensure customers are provided with reliable service.

Ohio customers are looking to the PUCO to make the right decision by ensuring we receive the best energy efficiency savings.

Sincerely,  
Mr. Rem Hinkle
