COMMENT DESCRIPTION:

We just paid our electric bill, \$72.62 for 540kwh or \$.1345/kwh. We are living with the temp set @ 67 deg to CONSERVE as per AEPOhio. We lived with the thermometer this summer set @ 79 deg in 100 deg heat to CONSERVE per AEPOhio. Trouble is the rates continue to go up thanks to the PUCO granting whatever the power company wants. We went through the so-called changes to help the consumer in the early part of the year when my Mar. bill was \$58.74 for 540 kwh or \$.1082/kwh. Almost exactly the same usage but with an increase of 23.6% on the latest bill. In Jan. 2009 my rate was \$.095/kwh when the rates started to really rise. Of course you are now allowing two riders along with the rate increase so we don't have a chance. I am using about 15 kwh/ day now and don't no how to CONSERVE anymore unless I pull the main breaker. The PUCO isn't doing the consumer any favors with the continued rate increases. The last comment I sent to you was sent to AEP which is the easy way out. I want to hear from the PUCO... Thanks to obama and brown ,Cap and Trade is alive
