Access Tariff

SECTION 4 - SWITCHED ACCESS SERVICE (cont'd)**4.2 RATE CATEGORIES (Cont'd)****4.2.1 Service Definition**

Tandem Switched Transport facilities are shared trunks that carry the combined traffic of more than one Interexchange Carrier from an end office to an access tandem where the calls are then switched onto trunks that are dedicated to individual Interexchange Carriers for transport from the access tandem to the serving wire center. Tandem Switched Transport service is provisioned in two parts: (1) transmission from the end office to the tandem over shared circuits; (2) the tandem switching function itself.

4.2.2 Billing Components

Tandem Switched Transport service is billed in two parts as applicable: (1) A usage-based, distance sensitive Tandem Switched Facility charge applied to the shared interoffice transmission between the end office and the tandem. In addition, a usage-based Tandem Switched Termination charge is applied at each end of each measured Tandem Switched Facility segment. Distance is measured in airline miles between the end office and the tandem. Additionally, if the mileage is zero, no Facility or Termination charges apply; (2) A usage-based Tandem Switching charge is applied at each tandem that performs a tandem switching function.

4.2.3 Access Rate Element Description

Common Transport Multiplexing provides for multiplexing, on a per access minute basis, in conjunction with Tandem Switched Transport. Switched access facilities are connected to tandem and end office switches at the DS1 level. Multiplexing is required to convert common switched facilities from a typical operating speed of 44.736 Mbps to an operating speed of 1.544 Mbps.
