COMPLAINT DESCRIPTION:

Duke Energy must not be permitted to pass on costs to customers for projects they agree to do with/for private, public OR government customers. Why should they be able to charge me for their private agreements? FEW people in the general area of Cincinnati have an ounce of interest in this StreetCar project and even fewer still will ever benefit in any way from this completely hideous project. However, even if this project had an ounce of merit, the City of Cincinnati has absolutely no right to expect one of their service providers to absorb costs of their projects and

that service provider certainly has absolutely no right whatsoever to enter into such an agreement expecting its' customers to absorb the cost of something they have absolutely nothing to do with. Further, for those of us who don't even live within the city limits OR; as in my case, not even in Hamilton County; to be charged for anything we didn't even have the opportunity to vote on is just simply outrageous. WHERE does it ever end? Plus, now if others don't pay their bills we who do pay are also going to be responsible for that? How/Why in the world can this even be a discussion. PUCO must not approve these rate increase requests.
