Α. I've never participated directly in a solicitation for Renewable Energy Credits.

- Do you have any other experience regarding solicitations for Renewable Energy Credits, other than direct participation?
- Α. No. I've never worked with a company in formulating -- or a client in formulating either a strategy for or a program plan to acquire Renewable Energy Credits.
- Ο. Do you have any experience in negotiating REC procurements?
 - No, I do not. Α.
- Q. Do you have any experience in rate design related to the recovery of costs for the procurement of RECs?
- I'm trying to remember. I've been in a number of cases that have involved riders or programs dealing with Renewable Energy Resources. And I can't remember specific -- I have testified, for example, on opt-out programs; for example, for large commercial industrial customers, from applicable energy efficiency credits, some of

	Page 9
1	which may include or may have included
2	Renewable Energy Resources.
3	Q. Do you have any experience in the
4	rate design of I'm sorry.
5	Do you have any experience
6	regarding the rate design related to the
7	recovery of cost for the procurement of
8	Renewable Energy Resources?
9	A. I'm not sure what the question
10	means.
11	Q. What do you need to know more about
12	my question?
13	A. Well, rate design encompasses, you
14	know, a multitude of areas and issues, from
15	the basic structure of rates to costs that
16	are included to adherence to public policies
17	and rules and regulations, recognition or
18	adherence to precedent.
19	Q. And under your understanding of
20	rate design, do you have any experience in
21	rate design related to the recovery of costs
22	for Renewable Energy Resources?
23	A. To the extent that those costs may
24	be recovered in riders that include the
25	broad, general term of energy efficiency

1

programs or program costs, I have dealt in issues related to those. I have not dealt specifically with a rider designed solely for the recovery of Renewable Energy Resources.

- Q. So you do not have experience in rates in that design with regard to a rider that's specifically -- sorry, designed to recover costs related to Renewable Energy Resources; is that correct?
- A. Well, I'm not sure anybody does.

 As I said, I'm not aware of riders that are dedicated solely -- well, I shouldn't say I'm not aware.

In Ohio, Rider AER is not designed solely to recover Renewable Energy Resource costs or the costs of Renewable Energy Credits.

- Q. Dr. Goins, do you have any experience in rate design related to a rider for the recovery of Alternative Energy Resources?
- A. I may have filed comments on those in -- I can't remember specific cases. I may have filed comments on behalf of clients regarding those issues in Arkansas, Indiana,

1	
_	

and/or South Carolina.

- Q. Do you have any experience in Ohio regarding rate design with regard to a rider for the recovery of Alternative Energy Resource costs?
- A. No, I've never participated in a case on behalf of a client dedicated solely to that issue.
- Q. Well, have you participated in Ohio on behalf of a client generally related to the recovery of Renewable Energy Resource costs, other than this proceeding?
- A. Well, I've assisted clients in cases; for example, the ESPs, in some of those involving FirstEne5rgy in matters related not to Renewable Energy Resources, but to demand response and interruptible programs that are included, or the cost of recovery, which is related to specific riders established by FirstEnergy.
- Q. Other than your experience regarding demand response and interruptible specific riders, do you have any experience in Ohio regarding rate design regarding the recovery of Alternative Energy Resource

	and the same of th
	Page 12
1	costs?
2	MR. LAVANGA: Objection. Asked and
3	answered.
4	THE WITNESS: No.
5	BY MS. FLOYD:
6	Q. Dr. Goins, you testified that you
7	submitted testimony and affidavits in nearly
8	200 proceedings; is that correct?
9	A. No, I don't think it is.
10	Q. Why is it not correct?
11	A. It says I have submitted testimony
12	and affidavits and provided technical
13	assistance in nearly 200 proceedings.
14	Q. So how many of those proceedings
15	addressed Renewable Energy Credits?
16	A. I don't know. I did not go back
17	and I did try I gave, I think,
18	Mr. Lavanga a list of cases that were related
19	to it may have been energy efficiency or
20	renewableness. I'm not sure which. It was a
21	question that was I'm not sure whether
22	FirstEnergy asked it or who, but he asked me
23	to identify cases related to and I can't
24	remember the specifics of what the question

was, whether it was just renewables in

25

25	

particular, energy efficiency in general, or cost recovery of programmatic costs associated with those.

- Q. Do you know whether you've been involved in any proceedings addressing Renewable Energy Credits specifically?
- A. If I was, it was on what I would call a very broad scale or very broad subject. It was not to the specificity of items that I've addressed in the testimony filed in this case.
- Q. Is this the first case that you've been involved in regarding rate design and involving the costs related to Renewable Energy Credits?

MR. LAVANGA: Objection. Asked and answered.

THE WITNESS: Again, on a single-issue item, that would be generally true. Although, again, I'll point out that Rider AER, regardless of what's being recovered through the rider now, encompasses more than simply Renewable Energy Credit cost recovery.

BY MS. FLOYD:

1	Q. What's your understanding of what
2	Rider AER encompasses?
3	A. Well, it was set up to my
4	understanding is it was set up to recover the
5	costs associated with the alternative energy
6	technology costs and Renewable Energy
7	Resource costs that are part of the laws and
8	regulations in the state regarding the
9	renewable resource standard or alternative
10	energy standard.
11	Q. What information I want to talk
12	about the information you reviewed in
13	conducting your evaluation. Did you review
14	the Goldenberg and Exeter Audit Report?
15	A. I did.
16	Q. Did you conduct any analysis to
17	verify Goldenberg's opinions and
18	calculations?
19	A. No, I did not attempt to verify
20	their numbers or calculations.
21	Q. Did you conduct any research to
22	verify the Goldenberg opinions or
23	calculations?
24	A. I think wasn't that the same
25	question you just asked me?

	rage 13
1	Q. Can you answer my question?
2	A. Well, it would be the same answer I
3	just gave you.
4	Q. So you didn't conduct any analysis
5	or research to verify Goldenberg's opinions
6	or calculations? That's correct?
7	A. That's correct.
8	Q. You also reviewed the Exeter
9	Report; is that correct?
10	A. I did.
11	Q. Did you conduct any analysis or
12	research to verify opinions within the Exeter
13	Report?
14	A. No.
15	Q. Did you review the Companies'
16	direct testimony, exhibits, and discovery
17	responses for your testimony?
18	A. I reviewed the testimony, and I
19	reviewed some discovery responses. I don't
20	know that I reviewed all discovery responses.
21	Q. What discovery responses did you
22	review?
23	A. I don't have a list of them, but
24	they were discovery responses that counsel
25	had provided to me on the basis of
i	

	rage 10
1	conversations and discussions that we had
2	had on these issues.
3	Q. But you cannot identify the
4	particular discovery responses that you
5	reviewed for your testimony?
6	A. Well, some of them, or at least one
7	or two of them are listed in the testimony
8	itself. And, you know, off the top of my
9	head, I can't identify those.
10	Q. Can you describe the topics of
11	those discovery responses?
12	A. They ranged from general responses
13	about the acquisition the REC acquisition
14	process to the budgeting and planning process
15	conducted by FirstEnergy, and some specifics
16	related to issues that were related I think
17	directly to items within the Goldenberg and
18	Exeter Reports. But, again, off the top of
19	my head, I can't, you know, identify a
20	specific one.
21	Q. Did you review statutes related to
22	the AEPS requirements?
23	A. I did.
24	Q. What statutes?
25	A. The ones, again, that are cited in

rage 17
my testimony.
Q. Any other statutes?
A. I may have. I don't recall.
Q. Did you review any
A. I've been involved in cases that
were related to SB 221. And some of those I
can't separate from, you know, whether I
reviewed them in this case or had seen
something in a prior case. But that is
that I've listed in the testimony, for
example, were regulations and laws that I
specifically focused on.
Q. Did you review Section 4928.64 of
the Ohio Revised Code?
A. I may have. I can't remember.
Q. You cite 4928.64 in your testimony;
is that correct?
A. Yes.
MR. LAVANGA: Can we have a
reference?
THE WITNESS: Well, you said 49
BY MS. FLOYD:
Q. 4928.64.
A. Yes, I do cite that.
Q. Did you review 4928.64?

	Page 18
1	A. I did.
2	Q. Did you review any AEPS Statutes
3	from states other than Ohio?
4	MR. LAVANGA: Objection. Unclear
5	what AEPS means.
6	THE WITNESS: Not for purposes of
7	preparing this testimony.
8	BY MR. FLOYD:
9	Q. What Commission Orders did you
10	review for purposes of preparing your
11	testimony in this case?
12	A. Well, certainly I reviewed the ESP
13	3 order. And I can't remember other specific
14	orders that related to this case. There may
15	have been, but I just can't remember them
16	right now.
17	Q. Did you review any of the Ohio
18	Administrative Rules related to Renewable
19	Energy Resource requirements for your
20	testimony in this case?
21	A. Yes.
22	Q. What rules?
23	A. The OAC 4901:1 through 40 1-40,
24	in particular. And I'm sure I probably
25	looked at some other rules that were in and

22	
23	
24	
25	

around that provision or may have been linked to it in some way.

- Q. You mentioned that you reviewed SB 221-related cases. What cases are those?
- A. No. What I said was that, in prior cases, those cases have involved a number of issues related to SB 221. And so I may, during the course of those cases, have reviewed or come in contact with legislation that dealt with the renewable energy standard that was done, not that was -- that information acquired in another case or proceeding, but not in this one. I simply can't identify them.

I did not review other SB 221 cases, other than, in particular, the order for ESP 3. Also, I've tried to remember if I went back and reviewed the orders from ESP 1 and 2.

- Q. Do you know whether you reviewed the orders in the ESP 1 and 2?
 - A. I can't recall right now.
- Q. The other cases that you were involved in related to SB 221, do you know whether those cases involved Renewable Energy

1	Resource requirements?
2	A. They were not focused on the cases,
3	as this particular case is, certainly.
4	Q. Is it fair to say those cases did
5	not involve issues regarding compliance with
6	Renewable Energy Resource requirements or
7	cost recovery for those expenditures incurred
8	to comply with those requirements?
9	A. Well, certainly, you know, the ESP
10	3 case did. You know, the stipulation and
11	the order approving the stipulation are
12	related to some of those issues.
13	Q. Other than the ESP 3 case, any
14	other case?
15	A. I don't recall one.
16	Q. Did you review publicly-available
17	information for your testimony?
18	A. I did.
19	Q. What publicly-available information
20	did you review?
21	A. Well, I reviewed the information
22	available on the FirstEnergy website related
23	to the Renewable Energy Credits procurement
24	processes that FirstEnergy had undertaken, or
25	has undertaken, or plans to undertake. I

1 2 reviewed some information related to the price of solar RECs from the PJM EIS website.

3

I mean, those are two pieces that I remember right off the top of my head.

5

6

Q. Did you review any other publicly-available information for your testimony?

7

9

10

A. I'm sure I probably did, but I can't cite anything. If it's not listed in my testimony as a citation, it was probably just reviewed for informational purposes and I went on from there and didn't plan to use it or to incorporate it in the formulation of my conclusions or recommendations

11 12

13

14

my conclusions or recommendations.

Q. Did you incorporate any of the

15 16

publicly-available information that you reviewed into your conclusions or your

17

regermendations in security of

18 19 recommendations in your testimony?

20

recommendations or conclusions shown on Pages

Not in the sense of the specific

21

4 through 6 of my testimony. Certainly that

22

information helped inform me and provided a

2324

FirstEnergy's testimony in this case, but

also the Goldenberg and Exeter Reports.

25

better understanding not only of

1	Q. Did you review any additional
2	documents for your testimony?
3	A. I'm sure I know I went to the
4	NREO website and reviewed information that
5	was general information, none of which I
6	specifically incorporated in my testimony.
7	And I'm trying to remember if there were
8	any other specific website resources that I
9	reviewed.
10	Q. What information did you review on
11	the NREO website?
12	A. I can't remember right now. NREO
13	just has a lot of information regarding RECs
14	and general alternative energy programs. I
15	looked at the website, you know, not only in
16	the context of this case, but other work that
17	I do, just as an information resource.
18	Q. Other than the information that you
19	reviewed, did you perform any analysis to
20	support your testimony?
21	A. Well, in terms of analysis, if you
22	mean empirical analysis, some of the numbers
23	that are shown in the tables, you know, I've
24	prepared those tables. But as I mentioned
25	earlier, I did not attempt to go back and

	Page 23
1	empirically verify or test any of the data
2	and analyses contained in the Goldenberg and
3	Exeter Reports.
4	Q. Did you conduct any study to
5	support your testimony?
6	A. Well, I spent, you know, time
7	thinking about it. I'm not sure what kind of
8	study you mean.
9	Q. Other than thinking about your
10	testimony, did you conduct any independent
11	research or study to support the opinions in
12	your testimony?
13	A. If your question is asking whether
14	I attempted to determine whether someone
15	else had reached conclusions or made
16	recommendations identical to the ones
17	presented in my testimony, I did not.
18	Q. Did you conduct any independent
19	research or studies to support your
20	testimony?
21	MR. LAVANGA: Objection. Asked and
22	answered.
23	THE WITNESS: Again, I'm not sure,
24	again, what you mean by study.
25	BY MS. FLOYD:
1	

1	Q. What does study mean to you?
2	A. Well, I gave you my definition of
3	what I would conclude in terms of analysis
4	and study. I did study the issue.
5	Q. Did you create any charts or table
6	to support your opinions in your testimony?
7	A. Only those that are shown in the
8	testimony itself.
9	Q. You have no additional charts or
10	tables to support your opinion, other than
11	the ones in your testimony?
12	MR. LAVANGA: Objection. Asked and
13	answered.
14	THE WITNESS: I'm not sure what
15	those charts or tables would be.
16	BY MS. FLOYD:
17	Q. Do you have any additional
18	spreadsheets, charts or tables, other than
19	the ones in your testimony, that support your
20	testimony?
21	A. No.
22	Q. Do you have any experience in
23	drafting legislation setting benchmarks for
24	Renewable Energy Resource requirements for
25	utilities?
- 1	

1	A. I have never provided that service
2	to a client or on behalf of a client.
3	Q. Do you have any personal experience
4	in drafting legislation setting benchmarks
5	for Renewable Energy Resource requirements
6	for utilities?
7	A. No, I would not do it on a personal
8	basis. I would do it on behalf of a client.
9	Q. So it's fair to say you don't have
10	any experience in drafting legislation
11	setting benchmarks for Renewable Energy
12	Resource requirements for utilities?
13	A. No. I've never been directly
14	involved in the legislative process on that
15	issue.
16	Q. Do you have any experience in
17	drafting administrative rules regarding
18	benchmarks for Renewable Energy Resource
19	requirements for utilities?
20	A. No.
21	Q. So it's fair to say you didn't
22	have any involvement with the Commission's
23	rulemaking proceedings relating to the
24	Commission's adoption of chapters of the Ohio
>5	Administrative Code that were related to

MR. LAVANGA:

Plans?

2.2

23

24

25

To clarify, when you

	Page 27
1	BY MS. FLOYD:
2	Q. Dr. Goins, did you review any of
3	the Companies' Electric Securities Plans
4	whether entered through orders in
5	stipulations in cases?
6	A. Certainly, as I told you, with the
7	with respect to ESP 3, I specifically
8	reviewed that one I remember. And I
9	participated, I think, in ESP 1.
10	Q. Did you have any involvement with
11	ESP 2?
12	A. No. I don't think I testified
13	I'm trying to get the dates straight. I
14	don't think I testified in ESP 2.
15	Q. Is it fair to say that you're
16	familiar with the Companies' ESP 3 plan?
17	A. Well, I'm familiar with the
18	stipulation and the order from that case.
19	Q. Dr. Goins, would you agree that
20	4928.64 specifies annual benchmarks that
21	delineate both the percentage and composition
22	of Renewable Energy Resources that each
23	electric distribution utility in Ohio must
24	include in electricity supplied to SSO
25	customers?

	Page 28
1	A. Yes.
2	Q. And you'd agree that an electric
3	distribution utility may use Renewable Energy
4	Credits to satisfy the benchmarks in Section
5	4928.64?
6	A. Yes.
7	Q. You'd also agree that a utility
8	need not purchase RECs to comply?
9	A. I assume it could build the
10	resources or acquire them directly. So I
11	guess the answer to your question would be,
12	yes. But for general purposes, the purchase
13	of RECs is acknowledged as an acceptable
14	compliance mechanism.
15	Q. RECs are one of the options a
16	utility has for complying with the renewable
17	energy benchmarks; is that correct?
18	A. Yes, that's my understanding.
19	Q. A utility has other options, other
20	than RECs, to comply with the benchmarks?
21	A. That's my understanding.
22	Q. Now, is it also your understanding
23	that if a utility does use RECs to comply,
24	then there are certain requirements regarding
25	those RECs?

1	A. Well, again, I'm not sure what you
2	mean by requirements. A REC can't be a piece
3	of paper you buy from some person on the
4	street. There have to be certain
5	characteristics of the REC, my understanding
6	is, if that's what you mean by requirements.
7	Q. So if the Company uses RECs to
8	comply, then Rule 4901 of Ohio Administrative
9	Code sets forth certain rules regarding those
10	RECs. Do you agree with that?
11	A. Yes, I think that's correct.
12	Q. For example, a company couldn't
13	double-count RECs; is that correct?
14	A. You cannot double-count, that's
15	correct.
16	Q. Double-counting of RECs would be
17	prohibited; is that correct?
18	A. That's my understanding.
19	Q. Do you agree that the baseline for
20	a utility's renewable energy requirements
21	under 4928.64 is based on a volume per a
22	megawatt hour basis?
23	A. Yes.
24	Q. Would you agree that this is a
25	volumetric energy charge?

1	A. Rider AER is, yes.
2	MR. LAVANGA: Lydia, excuse me for
3	breaking in, but did we have somebody call
4	in?
5	MR. BERGER: Yes. This is Tad
6	Berger. Sorry to be late joining the call,
7	but I'm here now.
8	BY MS. FLOYD:
9	Q. Dr. Goins, what is a volumetric
10	energy charge?
11	A. It is a charge applicable to
12	kilowatt hour purchases.
13	Q. Would you agree that a customer's
14	load factor has nothing to do with the Rider
15	AER charge?
16	A. Well, only to the extent that
17	customers with high load factors are going to
18	have a relatively higher share of kilowatt
19	hours per unit of demand imposed on the
20	system than a lower load factor customer.
21	So I make the statement in my
22	testimony, I believe, that higher load factor
23	customers bear a disproportionate share of
24	the cost under Rider AER simply because it is
25	a volumetric charge.

1	If it were a non-volumetric charge,
2	I think it's reasonable to say that those
3	higher load factor customers would bear a
4	smaller share of the compliance costs
5	recovered under Rider AER.
6	Q. And, again, what is a volumetric
7	charge?
8	A. It is a charge based on kilowatt
9	hour consumption.
10	Q. So if someone uses more, then they
11	have a higher charge?
12	A. They pay more, yes. They pay the
13	same rate. They simply pay more in total
14	expenditures or total costs.
15	Q. So volumetric charge is based on
16	usage?
17	A. Yes.
18	Q. Load factor has nothing to do with
19	usage, does it?
20	MR. LAVANGA: Objection.
21	THE WITNESS: Well, usage is a
22	component of calculation of load factor.
23	BY MS. FLOYD:
24	Q. Other than that you calculate load
25	factor based on usage, usage itself is not
- 1	

load factor -- a higher load factor customer,

1

based upon the manner in which the costs are allocated to be recovered through Rider AER and then recovered through Rider AER, higher load factor customers pay a disproportionately higher share of those total compliance costs than lower load factor customers.

BY MS. FLOYD:

- Q. What do you mean by disproportionate share?
- A. Disproportionate in the sense that the per-unit demand imposed on the system, they will pay, based on their load factor, a higher percentage of the cost, again, based on the way those costs are allocated, initially, and then recovered volumetrically.
- Q. Are you saying that a customer with a higher load factor than another customer will use more energy?
- A. The customer may. In particular, I think the statement that I make in my testimony is that large, high load factor industrial customers; for example, those served under Rate GT, certainly on a relative basis, use significantly more kilowatt hours

1	
2	
3	
4	
5

19	
20	
21	
22	
23	
24	
25	

than do customers served under the residential rates, for example.

- Q. So if a high load factor Rate GT customer uses more kilowatt hours, then they will pay a higher Rider AER charge than residential customers who would use less energy; is that correct?
- A. They will pay a higher share of the total compliance costs that FirstEnergy flows through and recovers through Rider AER.
- Q. Because they're using more energy; is that correct?
 - A. That's correct.
- Q. Do you consider it unfair that the higher load factor customers who use more energy pay more for Rider AER?
- A. Unfair? I didn't make -- state an opinion in my testimony. I simply said that it was my opinion that that's what happened. They pay a, in particular, large higher load factor. Customer groups pay a higher share of the renewable compliance costs than do lower load factor classes.
- Q. And those customers pay a higher share Rider AER because they use more energy;

	rage 33
1	is that correct?
2	A. That's correct.
3	Q. I'd like to talk about the
4	recommendations in your testimony. Is it
5	correct to say that you're making four
6	recommendations?
7	A. Yes.
8	Q. Is it correct that you're
9	recommending that the Commission establish
10	a mandatory non-discretionary annual
11	expenditure cap limiting the FEOU's expenses
12	incurred in meeting their renewable resource
13	obligations that can be recovered through AER
14	to no more than 3 percent of their cost of
15	producing or acquiring substitute energy?
16	A. That's correct.
17	Q. Is it correct that this is a
18	forward-looking recommendation?
19	A. That's correct.
20	Q. You're recommending that the
21	Commission establish on a going-forward basis
22	a cap of 3 percent; is that correct?
23	A. Yes.
24	Q. Okay. You're recommendation does
25	not effect recovery of costs for 2009 through
,	

1	2011 related to renewable energy requirements
2	through Rider AER?
3	A. No, it does not.
4	Q. If the Commission accepted your
5	recommendation, what is the first year that
6	the cap would apply?
7	A. The plan year reasonably, and
8	depending on when the order came out in this
9	case, would be 2014.
10	Q. You also are recommending that the
11	Commission establish a rate cap limiting
12	Rider AER charge for each rate class to 3
13	percent of the applicable Rider GEN energy
14	charge for the class; is that correct?
15	A. Yes.
16	Q. And this is also a forward-looking
17	recommendation?
18	A. Yes, it is.
19	Q. When are you what year is the
20	year that you're recommending would be the
21	first year that this would apply?
22	A. Well, theoretically, you could go
23	in with a quarterly change following the
24	order. But, practically, if it coincided
25	with the first compliance year of the 3

1	percent mandatory cap, it would be consistent
2	on that basis.
3	Q. I'm sorry. What year is the first
4	year that you're recommending that the 3
5	percent cap apply?
6	A. What I said was, technically, it
7	could actually go into effect in the
8	quarterly adjustment following the
9	Commission's order in this case. However,
10	when we're talking about the plan year for
11	the mandatory 3 percent cap being effective
12	for the plan year 2014, it may seem
13	reasonable to make the implementation of the
14	Rider AER cap consistent with that plan year.
15	So that would be with the quarter beginning
16	January of 2014.
17	Q. You're also recommending in setting
18	Rider AER charges that the Company should
19	continue to utilize loss adjustments
20	consistent with current practices; is that
21	question?
22	A. Yes, I am.
23	Q. What are loss adjustments?
24	A. Loss adjustments are simply a
1	

mathematical adjustment to recognize the

	Page 38
1	voltage differential or the losses associated
2	with voltage differentials of serving
3	customers at different voltages.
4	It takes more energy from the bus
5	or power plant to deliver one kilowatt hour
6	to a secondary distribution customer than it
7	does to deliver a kilowatt hour to a
8	transmission customer.
9	Q. You would agree that a transmission
10	customer has no distribution losses?
11	A. That's correct.
12	Q. So a loss adjustment for a
13	distribution customer would be zero; is that
14	correct?
15	A. I'm not sure what you mean by loss
16	adjustment for a distribution customer.
17	Q. I'm sorry. A loss adjustment for a
18	transmission customer, like customers in Rate
19	Class GT, would be zero; is that correct?
20	A. Or close to it.
21	Q. Why do you say close to it?
22	A. Well, again, every customer, even a
23	transmission, may not be served at exactly
24	the same voltage, so that it depends upon
25	where you're measuring the output or delivery
L

of the energy source. So for practical purposes, the loss adjustments that are incorporated in the current design of Rider AER reflect the notion that I'm talking about.

- Q. The loss adjustments that reflect the current design of Rider AER for a Rate GT customer are what?
- A. I don't recall it off the top of my head.
- Q. Do you believe that the loss adjustment for a Rate GT customer could be zero?
- A. Conceptually, if you were taking power directly out of the power plant, and, again, it depends on how you're measuring from the point at which you start measuring the losses. And that would be the point at which FirstEnergy's taking delivery of purchases that it makes.
- Q. You're also recommending that the Commission should refund any disallowed REC costs to rate classes using the current design of Rider AER; is that correct?
 - A. Yes.

1	Q. You're not making a recommendation
2	of whether any REC costs should be
3	disallowed, though; is that correct?
4	A. Yes, that is correct.
5	Q. You don't have an opinion regarding
6	whether any of the REC costs should be
7	disallowed; is that correct?
8	A. That's correct.
9	Q. Are you making any other
10	recommendations in your testimony?
11	A. I don't think so.
12	Q. So you're not making any other
13	recommendations than the four we discussed in
14	your testimony; is that correct?
15	A. Yes. I think that would be fair.
16	Q. Do you have any opinion regarding
17	whether the Companies' costs of procuring
18	RECs from 2009 to 2011 were within the 3
19	percent cap as set forth under Section
20	4928.64?
21	A. Can I go back? I'm sorry. I
22	missed that because I was thinking about the
23	answer that I just gave you.
24	In the testimony following these
25	four recommendations that are listed here,

there are pieces of the testimony that elaborate on these four. For example, when you described, and I'm speaking specifically about the recommendation shown at Page 5, when you discussed the first recommendation about the mandatory non-discretionary annual expenditure cap, you included the designation that it would be forward-looking or the descriptor that it would be forward-looking. And I don't talk about that until later in the testimony, and I also talk about this specific recommendation, as well.

So just to be clear, I don't make any recommendations, other than those that are directly related to these four shown on Page 5. Anything else said about these four recommendations would simply be clarification or a suggestion to deal with a potential problem with them, if there is one.

- Q. Is it fair to say that, other than the recommendations on Page 4 and then the other supporting opinions that you have in your testimony, you're not making any other recommendations?
 - A. That's correct.

2.5

	Page 42
1	Q. All your recommendations in this
2	case are set forth in your testimony?
3	A. They are.
4	Q. Dr. Goins, do you have any opinion
5	regarding whether the Companies' cost of
6	procuring RECs in 2009 to 2011 were within
7	the 3 percent cap as set forth under Section
8	4928.64?
9	A. Do I have an opinion? The data
10	provided by the Company indicates that they
11	were within the 3 percent cap, or 3 percent
12	provision.
13	Q. And your opinion is that the
14	Companies were within the 3 percent provision
15	of Section 4928.64 for the RECs that they
16	procured during 2009 through 2011; is that
17	correct?
18	A. I have made no determination,
19	independent, that would contradict the
20	statements made by FirstEnergy that they were
21	within the 3 percent provision within the
22	2009 through 2011 period.
23	Q. Dr. Goins, is it correct that you
24	do not have an opinion regarding the
25	Companies' actions in procuring RECs in 2009
l_	

24

25

21

A. Yes.

correct?

Q. Is it correct you have no opinion

specific REC purchases cited by us were

imprudent or should be disallowed; is that

MR. LAVANGA:

25

Can I have that

	Page 45
1	question reread, please?
2	(Referred-to testimony read back.)
3	THE WITNESS: For purposes of this
4	testimony, yes.
5	BY MS. FLOYD:
6	Q. Why do you qualify your answer
7	with, for purposes of this testimony?
8	A. Because, ultimately, I think it
9	boils down to a legal conclusion of let's
10	put it this way: I know that there is
11	testimony in this case that takes contrary
12	positions on this issue. And I have not made
13	a determination of which of those positions
14	is or if one is more reasonable than the
15	other, or if one is correct and the other
16	incorrect.
17	Q. So it's fair to say that you're not
18	offering an opinion regarding whether Section
19	4928.64 allows a utility to make a compliance
20	payment in lieu of meeting benchmarks under
21	the statute?
22	A. Yes. I am offering no opinion on
23	that issue.
24	Q. Is it correct to say you have no
25	opinion regarding the force majeure process

1	provided for under Section 4928.64?
2	A. Again, I'm not sure what an opinion
3	on that would be. I recognize that it is an
4	option available to the utility under certain
5	circumstances. And I have no I'm not sure
6	what an opinion on that provision means or
7	is. If you're asking whether the opinion
8	relates to whether FirstEnergy should or
9	should not have invoked a force majeure
10	clause, I have no opinion on that.
11	Q. Is it correct to say that you're
12	offering no opinion regarding whether any
13	costs incurred by the Companies for the
14	purchase of RECs during 2009 through 2011
15	should be disallowed?
16	A. That's correct.
17	Q. Do you have an opinion regarding
18	the benefits of a competitive process?
19	MR. LAVANGA: Objection. The
20	question is vague.
21	THE WITNESS: Again, which
22	competitive process are you speaking of?
23	BY MS. FLOYD:
24	Q. Do you have an opinion regarding
25	the benefits of a RFP?

	Page 47
1	A. For RECs?
2	Q. Sure. Do you have an opinion
3	regarding the benefits of an RFP for RECs?
4	A. Well, I have an opinion that if
5	properly structured and implemented, a
6	competitive bid RFP is one way to achieve
7	reasonable results.
8	Q. Dr. Goins, it's correct that you're
9	recommending that the Commission establish a
10	mandatory non-discretionary annual cap that
11	limits the Companies' recovery of costs
12	incurred to comply with renewable energy
13	benchmarks to no more than 3 percent of the
14	Companies' costs of producing or acquiring
15	substitute energy; is that correct?
16	A. That's correct.
17	Q. What is your basis for this
18	recommendation?
19	A. The basis is stated at Pages 6 and
20	6 through 8, probably, of the testimony.
21	Q. What are you relying on to support
22	this recommendation?
23	A. Well, I'm relying, as I state in
24	the testimony, on the language of 4928.64
25	and, again, what I say is a reasonable
i	

interpretation of that language, as well as the Commission's own regulations in 4901, and also that what I believe what is simply a reasonable process on a going-forward basis to establish some limits or certainty that customers can expect in terms of costs that they may have to pay under these provisions for implementing the Alternative Energy Standards, Renewable Energy Standards.

- Q. Other than relying on 4928.64, the Commission's rules relating to the renewable energy benchmark and your analysis of what a reasonable process would be to establish limits and certainty for customers, are you relying on anything else to support your recommendations?
- A. Well, I also point out at the top of Page 8 that, to some degree, I believe that the existence of a cap would give FirstEnergy some negotiating leverage with REC suppliers.

Now, I have made no empirical analysis or an attempt to quantify that leverage. I simply say that it is one element, for example, that could enable

FirstEnergy to deal with potential market problems, if, in fact, there are REC suppliers who do have market power or who attempt to achieve excessive economic rents in some way because of the lack of a mature market or whatever circumstances might give potential suppliers any degree of market power.

- Q. Dr. Goins, is it fair to say that your opinion regarding the cap giving -- would give FirstEnergy leverage, you did not conduct any independent study or research to support that opinion?
- A. No. Again, I'm not sure how you would conduct -- I guess there are ways in which you could structure experimental analyses that would help you quantify or determine that. I'm basing it simply on general experience, long-term, that if a potential supplier knows you have a limit on what you can spend, it may influence the bidding strategies that potential suppliers develop and implement.
- Q. You didn't conduct any studies or independent research, though, to support that

1	opinion; is that correct?
2	A. No, not in this case.
3	Q. Now, regarding the basis for your
4	recommendation for establishing a 3 percent
5	cap, is it fair to say that your basis is
6	your review of 4928.64, your interpretation
7	of the Commission's rules relating to
8	renewable energy work resources set forth in
9	4901 of the Ohio Administrative Code, and the
10	other analysis that you've conducted; is that
11	correct?
12	A. Yes.
13	Q. So you haven't actually conducted
14	any research or studies to support that
15	recommendation? That's correct?
16	A. Well, again, I'm not sure how you
17	would support that recommendation. It is
18	simply a recommendation.
19	Q. You haven't conducted any
20	independent studies or research to support
21	that recommendation?
22	A. Again, I don't know that one could
23	do the independent research to support that
24	recommendation. The recommendation could
25	have been for a discretionary cap, as opposed

1	
2	
3	
4

18	
19	
20	
21	
22	
23	
24	
25	-

to a mandatory cap, for example. Then one could have analyzed or made comparisons of the pros and cons of a discretionary versus a mandatory non-discretionary. One could have chosen a 2 percent cap, as opposed to a 3 percent or a 4 percent cap or some other number, and one could have made some comparative analyses of the pros and cons of those different positions.

I did not do that. I simply chose a mandatory 3 percent annual expenditure cap as a reasonable recommendation based on the discussion that I provide in these pages.

- Q. You did not conduct -- other than the discussion you have on these pages, you did not conduct any independent research or analysis to support your recommendation; is that correct?
- A. No. And, again, I'm not sure exactly what kind of analysis that one would do to support this recommendation.
- Q. But you didn't do any independent analysis or research to support this recommendation?

MR. LAVANGA: Objection. Asked and

	Page 52
1	answered.
2	THE WITNESS: I'll stick with the
3	answer I gave you just prior to this.
4	BY MS. FLOYD:
5	Q. And so the answer is it correct
6	to say you did not do any analysis or
7	research independent of the opinions you've
8	set forth in this testimony to support your
9	recommendation for a 3 percent cap; is that
10	correct?
11	MR. LAVANGA: Objection.
12	THE WITNESS: Are we going to
13	continue along this until I say yes?
14	BY MS. FLOYD:
15	Q. Dr. Goins, can you answer my
16	question?
17	A. Again, I don't know how to answer
18	it, because I don't know what when you
19	talk about analysis or research or anything,
20	I don't know what you're talking about.
21	Q. Did you do any research or analysis
22	or studies outside of your testimony to
23	support your recommendation for a 3 percent
24	cap?
25	A. No. As I told you, everything is

	Page 53
1	included in my opinion.
2	Q. Now, you mentioned that one could
3	do a comparison between a discretionary or a
4	non-discretionary cap. Is it fair to say you
5	did not make any analysis of a comparison
6	between a discretionary or non-discretionary
7	cap?
8	A. No, it would not be fair.
9	Q. Why isn't it fair?
10	A. Because I explained why I believe a
11	mandatory cap is necessary.
12	Q. Did you consider
13	A. If you look at Page 8, at Line 7
14	there's a specific question regarding why it
15	should be mandatory.
16	Q. Did you consider that a 3 percent
17	mechanism could be discretionary?
18	A. Well, yes, if I made a decision
L9	that it should be mandatory, which, again, at
20	Page 8 of the testimony I specifically
21	address, the answer would be, yes, I had to
22	in order to reach a decision that it should
23	be mandatory.
24	Q. Now, is it correct to say that
25	you're not suggesting that

2

25

Also, I was informed, or my Α. position on this was guided, in part, in terms of this issue; for example, of mandatory versus discretionary, by a response that FirstEnergy gave to a data request in which FirstEnergy said something to the effect that they did not -- FirstEnergy did not consider the 3 percent provision to be a cap or a limit. And, in part, while I don't reference, I don't think, that specific RFI response in this testimony, certainly the items or the discussion that I have regarding -- at Pages 6 to 8 do address, for example, this issue of discretionary versus mandatory, and why I believe the language of both the rules and the legislation imply that this is more than just a guide, that it does imply a limit, as I say, or ceiling on payments.

Q. Dr. Goins, you're not suggesting that the Companies' ability to recover costs that the Companies incurred to comply with the renewable energy benchmark during 2009 to 2011 should be capped at 3 percent of the Companies' cost of producing or acquiring substitute energy for 2009 to 2011; is that

Α. No. My recommendations are not backward-looking, as we've discussed.

Now, is it fair to say you're also not testifying that 4928.64 currently applies a mandatory cap on a utility's recovery of costs to comply with renewable energy benchmark?

MR. LAVANGA: Can I have that question reread, please?

(Referred-to testimony read back.)

THE WITNESS: The 4928.64 -- the quote that I show at Page 6 of the testimony simply indicates that the 4928.64 says the Company need not comply with the benchmark. And, again, my look at what the Commissioners had to say on that, the Commission's use and the -- has used the word cap, not in the sense of -- or limit. Mandatory, I don't think, has been determined.

BY MS. FLOYD:

So you're not testifying that 4928.64 currently applies a mandatory cap on a utility's recovery of the costs to comply with renewable energy benchmarks; is that

	rage 50
1	correct?
2	A. Yes. My reading of 4928.64 is that
3	it does not impose a mandatory cap.
4	Q. Your recommendation, then, thus
5	would require a change in the statutory
6	language; is that correct?
7	A. No. What I say is at Page 7,
8	Line 11, I recommend that the Commission
9	interpret the 3 percent mechanism as a
10	mandatory non-discretionary cap on those
11	level of expenditures.
12	I haven't seen anything, for
13	example, that there may be something, but
14	I haven't seen it, that would prohibit the
15	Commission from making such an
16	interpretation.
17	Q. But you agree, though, that the
18	Commission cannot interpret Section 4928.64
19	in any way that's inconsistent with the
20	language of the statute; is that correct?
21	MR. LAVANGA: Objection. Calls for
22	a legal conclusion.
23	THE WITNESS: Do you want me to
24	answer?
25	MS. FLOYD: Yes.

23	

THE WITNESS: The Commission will interpret the statute as the Commission thinks it is required to do by law. And I can't tell the Commission, you know, what it has to do. I'm simply suggesting that it make this interpretation, as I've indicated. BY MS. FLOYD:

- Q. You testified that the 3 percent mechanism in Section 4928.64 could be interpreted as a reasonable cap and ceiling on the Companies' annual compliance costs.

 What is the basis for your opinion.
- A. Well, the specific language of 4928.64 says that, under certain situations, that the Company need not comply with the benchmark; in other words, you don't have to comply with the benchmark if your reasonable expected costs of compliance exceeds the reasonable expected costs of otherwise producing or acquiring the requisite electricity by 3 percent or more.

So the legislature sort of put the burden -- at least in my reading, put the burden on the Company to make a reasonable interpretation of the statute, if it wanted

2.4

to, to be able to justify expenditures that exceeded the 3 percent cap or 3 percent provision. Because the legislature said, you don't have to comply with it if these conditions exist.

6

7

8

9

4

5

Q. Would you read that the language of 4928.64 provides an option to a utility of whether to procure RECs or Renewable Energy Resources or not under the 3 percent mechanism in that statute?

10

MR. LAVANGA: Objection.

12

11

Mischaracterizes his testimony.

13 14

option. It does, again, two things, in my

THE WITNESS: It doesn't present an

15

mind. One, it says that you, as a utility,

16 17 need not comply under these conditions; and,

18

statute, and based on my experience, that

two, I infer from the language in the

19

if the situation exists in which you exceed

2021

the 3 percent provision, that there is a reasonable basis for someone asking you,

22

were your expenditures in excess of this 3

23

percent provision reasonable and prudent; in

24

other words, I think anything above that 3 percent provision shifts a much higher

	Page 59
1	standard on the utility to justify its
2	actions.
3	BY MS. FLOYD:
4	Q. What specific language in Section
5	4928.64 are you relying on to make that
6	opinion?
7	A. I said that it was my inference and
8	my interpretation of the language that I just
9	cited, and that's quoted in my testimony.
10	Q. But to be clear, Dr. Goins, you're
11	relying on the language in Section 4928.64
12	that (b)(3) that says, an electric
13	distribution utility or an electric services
14	company need not comply with a benchmark
15	under Division (b) or (2) of this section
16	to the extent that it's reasonably-expected
17	costs with that compliance exceeds it's
18	reasonably-expected costs of otherwise
19	producing or requiring the requisite
20	electricity by 3 percent or more.
21	That's the language that you're
22	referring to in 4928.64; is that correct?
23	A. Yes.
24	Q. You're not relying on any other
25	language in 4928 64 to support your opinions?

	tage 00
1	A. I'm not sure, because I'm not
2	looking at the statute right now.
3	Q. Do you believe that there could be
4	other sections in the statute that support
5	your opinion?
6	A. There may be. Again, I'm not
7	looking at the statute right now, so I would
8	want to review the entire section before I
9	gave you a definitive answer.
10	Q. In your testimony, though, you just
11	quote that sentence, and then the following
12	sentence, which, let me just be clear, you
13	quote the sentence I read and then the
14	following sentence in 4928.64(c)(3); is that
15	correct?
16	A. Yes.
17	Q. So that's the language that's
18	supporting your opinion in your testimony?
19	A. Well, as I say again at Line 24 of
20	that page, both the I quote or cite
21	4928.64(c)(2), and then OAC 4901:1-40 and
22	4901:1-40-08.
23	So those would be in addition. You
24	asked me are there other provisions than the
25	statute, and certainly 4928.64(c)(2) has this

I think it's also reasonable that

that need not comply.

2.4

1 | 2 | 3

5

it could be mandatory, as well, given the references to a cost cap there in 4928.64(c)(2), and also the Commission's interpretation of that Statute in its regs -- or regulations.

And, you know, I also would point out that I show, at the top of Page 7, a quote from FirstEnergy on, specifically, 4928.64(c)(3), which FirstEnergy said mandates that 4928.64(c)(3) mandates that EDUs be excused from complying with the Statute's Alternative Energy Portfolio requirements, that if the cost of complying with those standards exceeds, by 3 percent or more, the costs that EDUs and their customers would otherwise incur to acquire the requisite energy.

18

17

Q. Dr. Goins, so --

19

A. So all I'm saying is that, in addition to the Statute, I'm relying, in

20 21

part, on FirstEnergy's own words. I think

22

this is an accurate quote from FirstEnergy's

23

24

Q. Dr. Goins, my question to you was,

is one interpretation of the language, need

25

filing.

not comply as discretionary, a reasonable interpretation?

A. It could be. I think it could also be a reasonable interpretation that it is, in fact, mandatory. As I said, that -- and that's the way I believe the Commission should interpret it, that the language almost gives the Commission, I think, more leeway, not the utility, but the Commission itself, in how it wants to interpret that portion of the Statute.

I mean, one could say that this provision of the Statute was written for the utilities, and one could also say it was written for the regulators to give them some flexibility in how they wanted to see -- how they wanted to implement rules and regulations that would implement the legislation in a way that would be fair and reasonable, given that the legislature at the time the law was written didn't know how the markets were ultimately going to develop.

Q. So it's fair to say that one interpretation of need not comply is that that language is discretionary, correct?

Asked and

MR. LAVANGA: Objection.

answered.

THE WITNESS: To the extent we just went through the point that the Statute does not say, shall not comply. So the question is whether need is -- need not comply is ambiguous in the sense of being mandatory or discretionary. And given that it is ambiguous, then one would have to conclude that one, if one wanted, could argue that it was a non-mandatory provision or a discretionary provision. That would be one interpretation of it.

One could also make the interpretation that it does, given not only the language, but given how various parties, including FirstEnergy and the Commission, made statements regarding this specific provision following the write-in legislation, it implied that the language itself may be mandatory.

Whether it is or isn't, what I'm asking the Commission to do is clarify the issue and interpret it as a mandatory cap.

Because, at least in my opinion, this

1.2

	Page 65
1	language gives the Commission the ability
2	whether it has the legal authority, the
3	lawyers could argue, but the language, to
4	a person reading the statute, could be
5	interpreted as giving the Commission leeway
6	to interpret it in a way that could justify a
7	mandatory annual expenditure cap.
8	BY MS. FLOYD:
9	Q. Dr. Goins, you're not suggesting,
10	though, that you know why the legislature
11	included this language, are you?
12	A. No, I do not.
13	Q. You don't know their intent for
14	including the language, need not comply, in
15	this specific section of 4928.64, do you?
16	A. I don't have firsthand knowledge,
17	no.
18	Q. And so you'd agree that or is it
19	your opinion that need not comply is
20	ambiguous?
21	A. Yes. I think that's a reasonable
22	interpretation of the language.
23	Q. So need not comply couldn't mean
24	be discretionary that the section is
25	discretionary; is that correct?

1 MR. LAVANGA: Objection. Asked and 2 answered. 3 THE WITNESS: Again, if it's need to comply, what I think is -- even if it's 5 discretionary, what it does is it calls into 6 question the reasonableness and prudence of expenditures in excess of the 3 percent 7 8 provision. Because I do think the language puts an additional burden on the utility or 9 the service company to justify the incurrence 10 11 and recovery of compliance costs in excess of 12 the 3 percent provision. 13 BY MS. FLOYD: 14 Ο. As written, the language, need not 15 comply, does not prohibit a utility from complying with a benchmark; is that correct? 16 17 Α. Pardon me? Can you repeat that? 18 Sure. As written, the language, 19 need not comply, does not prohibit a utility 20 from complying with a benchmark; is that 21 correct? 22 Α. I really don't understand the 23 question. 24 The language, need not comply, does 25 not prohibit a utility from complying with

the 3 percent test?

expect that a utility would decide to exceed

24

23

24

25

Α. There could be circumstances in which market prices and market supply availability were such that prices were significantly higher than what the company anticipated. One could anticipate that there were deferral costs being recovered; that, you know, depending on the timing of the recovery it could push the cost above the 3 percent provision. One could think that there might be market situations in which there were opportunities within the market to make purchases in excess of what one would normally make at favorable prices, or, for whatever reason that one might want to make, that could contribute to that. One could think that if there were carrying costs being recovered on deferred expenditures from prior years that, depending on the timing of the recovery of those, it could affect the compliance with a 3 percent -- or a discretionary 3 percent provision.

Q. Would you agree that your recommendation for a 3 percent cap would effectively limit the amount of renewable energy that a utility would procure each

7	
	- 1

year?

2

3

4

5

6

7

8

9

10

12

13

14

15

16

17

18

19

20

21

2.2

23

24

25

No, it wouldn't limit the amount, Α. if by amount you mean physical certificates. It would limit the amount you could spend in compliance costs on an annual basis.

The term I used is -- or phrase is that it would, essentially, set an annual budget, a not-to-exceed budget for FirstEnergy.

- Ο. So under your recommended 3 percent cap, a utility could not purchase Renewable Energy Resources that would exceed the 3 percent cap; is that correct?
- Α. Well, the utility could do what it wished. As I say in the testimony, the utility would, essentially, be responsible for costs in excess of that cap.
- Now, you would agree that Section 4928.64 does not prohibit a utility from recovering costs of procuring Renewable Energy Credits from customers; is that correct?
- It does not -- yes. Α. My reading of that section is it doesn't deal with the recovery of those costs.

1	Q. Section 4928.64 does not prohibit
2	a utility from recovering costs of procuring
3	Renewable Energy Credits from customers even
4	if those costs would be above the 3 percent
5	mechanism in that statute; is that correct?
6	A. Yes. I think that's a fair
7	reading.
8	Q. Would you also agree that Section
9	4928.64 expressly prohibits a utility from
10	recovering any compliance payment imposed by
11	the Commission on the utility from customers?
12	A. Did you say compliance penalty
13	payment?
14	Q. I said sorry.
15	I said, would you agree that
16	Section 4928.64 expressly prohibits a utility
17	from recovering any compliance payment
18	imposed by the Commission on the utility from
19	customers?
20	A. Yes. I think that well, again,
21	I'm not looking at the specific Statute.
22	It's in the Statutes.
23	Q. But it's your understanding that a
24	utility could not recover any compliance
25	payment from customers?

	rage /i
1	A. That's my understanding. I call it
2	a compliance payment penalty. That was why I
3	asked.
4	Q. Why do you call it the compliance
5	payment penalty?
6	A. Because I see it as a penalty.
7	Q. Now, would you also agree that
8	Section 4928.64 does not place a limit on the
9	amount of Renewable Energy Credits that a
10	utility can procure?
11	A. Yes. I think that's reasonable.
12	Q. And you agree that Section 4928.64
13	does not place a limit on the amount of
14	Renewable Energy Resources that a utility
15	can procure to comply with the statute?
16	A. Yes.
17	Q. Would you also agree that Section
18	4928.64 actually provides that nothing in the
19	Statute precludes a utility or a company from
20	providing a greater percentage of energy from
21	Renewable Energy Resources?
22	A. Again, I'm not looking at the
23	Statute itself, but I don't recall anything
24	that would prohibit the utility from doing as
25	you described in your question or doing

what you described in your question.

Q. How do you recommend the Commission implement your recommendation for a 3 percent cap?

- A. First, it would issue an order saying that its interpretation of 4928.64 was as I've discussed in my testimony. And then it would, essentially, set up a calculation process similar to that described on Page 9 of my testimony in which the annual budget for Renewable Energy Resources for FirstEnergy companies would be set. And based on that calculation or that process, then, for that compliance year, the annual expenditure's renewable resource compliance costs would be capped at 3 percent.
- Q. Are you suggesting that the Commission make such an order in this particular proceeding?
- A. Well, I would hope so. The Commission, I assume, could also say it agrees that a cap is a -- a mandatory cap is both reasonable and in the public interest, and then either set up a sub-docket or separate proceeding, which would be on a fast

	rage 73
1	track, to simply iron out any questions about
2	the mechanics of implementing the cap.
3	Q. Dr. Goins, I believe you mentioned
4	earlier another basis for your recommendation
5	for the 3 percent cap is the language you
6	cited from FirstEnergy's application for
7	re-hearing that's cited in your testimony on
8	Page 7; is that correct?
9	A. Yes.
10	Q. Do you know whether the Commission
11	ultimately agreed with FirstEnergy's
12	position, and this is the position of the
13	language you cite in your testimony?
14	MR. LAVANGA: Objection. It's
15	unclear what you mean by their position. I
16	mean, what position are we talking about?
17	BY MS. FLOYD:
18	Q. Dr. Goins,
19	A. Yes.
20	Q did you also rely on language in
21	your testimony that you believe FirstEnergy
22	stated I'm sorry. Strike that.
23	Dr. Goins, did you also testify
24	that you also, as part of your basis for
25	your opinion for the 3 percent cap, relied on

So you don't know whether the

No, I don't.

Α.

Q.

24

14

15

16

17

18

21

22

the language, you know, even if it doesn't preclude the utility from buying RECs in terms of a physical limit, it does have specific language recognizing that excessive expenditures may be unreasonable, and, as a result, it includes the language that I cited.

BY MS. FLOYD:

- Q. Did you consider as part of your recommendation the language in the Statute that says that nothing in this section precludes the utility or company from providing a greater percentage of Renewable Energy Resources?
- A. Again, I'm not sure what you mean by did I consider.

What I considered was the fact that the Statute is explicit, regardless of what it says about physical limits on purchases, that it specifically says that the utility need not comply under certain conditions.

- Q. And it's that language that you base your recommendation for 3 percent cap?
- A. Along with all the other things that we've discussed regarding this issue.

- Q. And one of the things we discussed that you're basing your recommendation on is the language that you cite in your testimony on Page 7 from FirstEnergy; is that correct?
- A. Again, as it relates to the interpretation of a statute as providing a cap, which I've defined immediately on Line 11, Page 7, as to what a cost cap implies.
- Q. Is it fair to say you don't know whether the language you cite from FirstEnergy's application from rate hearing that you're citing in your testimony on Page 7, you don't know whether the Commission adopted or rejected that language; is that correct?
- A. The Company in this quote that I have is not asking the Commission anything. It is simply making a statement, and I quote the statement that the Company made regarding what 4928.64(c)(3) says.
- Q. You're quoting the language from the Company on Page 7, isn't it right, though, from the Companies' application for re-hearing in Case Number 08-888; is that correct?

	Page 79
1	A. That's correct.
2	Q. And you did not participate in Case
3	Number 08-888, did you?
4	A. Not directly, no.
5	Q. You understand that Case Number
6	08-888 was a rulemaking proceeding that the
7	Commission held regarding rules related to
8	Renewable Energy Resource benchmarks?
9	A. Yes.
10	Q. You didn't offer any recommendation
11	for a cap in those proceedings; is that
12	correct?
13	A. I did not.
14	Q. Do you know whether Nucor or OEG
15	offered any recommendations for a cap in
16	those proceedings?
17	A. I think they may have. I read
18	comments filed by both parties in various
19	cases. Again, I don't recall the specifics
20	right now.
21	Q. You are aware that the Commission
22	did approve rules after it held 08-888, that
23	rulemaking proceeding, that they did
24	ultimately approve rules. Are you aware of
25	that?

- A. Yes.
- Q. Do you know whether the rules approved by the Commission related to the Renewable Energy Resource requirements in Section 4928.64 mandate that a utility be excused from complying with the renewable energy benchmarks if the utility's costs exceed the 3 percent mechanism?
- A. My recollection is that it doesn't mandate that excuse.
- Q. Okay. It's fair to say that the rules provide that a utility may file an application with the Commission for a determination of whether the 3 percent mechanism is exceeded; is that correct?
 - A. That's, again, my recollection.
- Q. Okay. So you would agree that the rules do not provide an automatic exemption to a utility for complying with the Renewable Energy Resource benchmark on the basis of the 3 percent cap?
 - A. As a specific exemption, no.
- Q. Do you know whether the rules approved by the Commission related to the Renewable Energy Resource requirements apply

	rage 81
1	a mandatory 3 percent cost cap?
2	A. They do not.
3	Q. You're recommending that the
4	Commission change their rules to apply a 3
5	percent cost cap?
6	A. Well, I guess the phrase I've used
7	is the Commission should interpret the
8	Statute that way.
9	Q. Does your recommendation for a 3
10	percent cost cap take into consideration that
11	the Commission's rules do not apply a
12	mandatory cost cap on a utility at this time?
13	A. Yes, to the extent that I wouldn't
14	be recommending this if there were already a
15	mandatory cost cap in place.
16	Q. Dr. Goins, it's your opinion that a
17	mandatory 3 percent cap on renewable energy
18	expenditures would benefit customers and
19	FirstEnergy; is that correct?
20	A. Yes.
21	Q. And it's your opinion that a
22	mandatory 3 percent cap on the Companies'
23	annual renewable expenditures would protect
24	customers with potentially excessive
25	renewable energy costs, consistent with the

	Page 82
1	legislature's intent when it included the 3
2	percent mechanism in SB 221; is that correct?
3	A. Yes.
4	Q. What supports your belief that the
5	legislature's intent was to protect the
6	customers from potentially excessive
7	renewable energy costs?
8	A. Well, again, I told you earlier
9	that I have no firsthand knowledge of
10	exactly what went into or what was on the
11	legislature's mind when they wrote and voted
12	on this provision, 4928.64(c)(3), but that I
13	think that it is reasonable to interpret that
14	that they had some concern, given the host of
15	unknowns, as to what these compliance costs
16	of the legislation might be.
17	Q. You'd agree that's your
18	interpretation of what you believe the
19	legislature was concerned about, correct?
20	A. Yes.
21	Q. And you're basing that
22	interpretation on the language of the
23	statute; is that correct?
24	A. Yes.
25	Q. Did you attend any legislative

1	and the same of th

session in which the intent of SB 221, which included the Renewable Energy research Benchmark Statute, was discussed?

- A. No.
- Q. Other than the language of the Statute, do you have any support for your opinion regarding what the legislature's intentions were?
- A. Again, I have no firsthand knowledge of what the legislature's intent was, other than my interpretation of what they wrote.
- Q. Could the legislative intent of SB 221 have also been to encourage the advance and renewable energy industry to flourish in Ohio and maximize the economic and environmental benefits to the state?
- A. I think that was one intent, by including a requirement for the purchase of in-state renewable resources and solar resources.
- Q. All things being equal, if the legislative intent that we just discussed, you know, was to encourage the advance in renewable energy industry to flourish in Ohio

25

and maximize the economic and environmental benefits to the State, would imposing a 3 percent mandatory cap on renewable energy expenditures be consistent with that intent?

A. Yes, it would.

Again, regardless whether the legislature had a desire to promote the development; in particular, the in-state development of Renewable Energy Resources, the legislature specifically included language -- even given the benchmarks and the targets that had been specified in the legislation, even given that, they had included language which specifically says that, under certain conditions, a utility need not comply with these benchmarks. And regardless, you know, there are competing goals here, obviously, in the legislation, or at least from a reasonable reading of it. And the legislature obviously recognized that there was some limit on how much consumers could be forced to pay in additional costs to meet this other public purpose goal of developing the renewable energy industry.

Q. Where in Section 4928.64 did the

	Page 85
1	legislature include a limit on a company's
2	purchases of renewable energy
3	A. It
4	Q resources?
5	A. The language, again, specifically
6	says, the company need not comply with these
7	benchmarks under certain conditions. That's
8	as plain as I think the legislature could
9	make it.
10	Q. Does the language say that a
11	utility is limited to purchases that fall
12	within that 3 percent mechanism?
13	MR. LAVANGA: Objection. Asked and
14	answered.
15	THE WITNESS: No, it does not.
16	BY MS. FLOYD:
17	Q. Dr. Goins, you have an opinion that
18	a mandatory cost cap would give FirstEnergy
19	greater pricing leverage in negotiating
20	future REC procurements; is that correct?
21	A. I say that it could.
22	Q. Do you have any independent
23	research, study or analysis to support your
24	opinion?
25	A. Only, you know, personal experience

in dealing with parties who are acquiring goods and services, and, generally, when the supplier knows that you have a cap or a limit on what you can spend for certain things, certain goods or services, and there are multiple suppliers in particular, it can affect the bidding strategy of those suppliers.

- Q. Other than your personal experience, did you conduct any study --
 - A. No.
- Q. -- regarding how a mandatory cost cap would affect a negotiation of procurement of Renewable Energy Resources or REC?
 - A. No.
- Q. You agree that you're also offering an opinion that the cost cap should reduce the potential for disputes between FirstEnergy and its customers regarding any possible disallowance of any excessive and prudent REC costs; is that correct?
- A. Yes. To the extent that it eliminates the issue of debating or conducting prudent investigations of costs in excess of the cap, to that extent I think

that it would reduce those disputes as it relates to that issue.

3

Do you have any study or research to support that opinion?

5

Α. No.

6

7

8

So you can't say for sure whether a Ο. cost cap would reduce disputes between FirstEnergy and its customers regarding the cost that FirstEnergy incurred to meet

renewable energy benchmarks?

1.0 11

Well, yes, I do. But, by Α. definition, it would eliminate the discussion on costs in excess of the cap.

12

13

So in your opinion, a cap would Ο.

14 15

eliminate disputes regarding costs in excess

16

of the cap; is that correct?

17

Between customers and the utility, Α. Because, again, customers would

18

recognize that, under the cap as I've

20

19

described it here, FirstEnergy is responsible

21

for costs in excess of the cap. And then it

would be up to the Commission to make a

temporarily adjusted for just cause or

22

23

determination; for example, as I've noted in

24

the testimony, of whether the cap should be

	Page 88
1	reasonable cause or some other circumstance.
2	Q. What basis do you have to support
3	your belief it would eliminate those
4	disputes?
5	A. I just said it takes that element
6	out of the discussion; that element being
7	cost in excess of the cap.
8	Q. It's possible that other disputes
9	could arise, though, even if that element is
10	removed from the discussion?
11	A. Oh, there I don't make a claim
12	anywhere in my testimony that it would
13	eliminate disputes regarding prudence. I
14	simply say that, with respect to the costs in
15	excess of the cap, it does remove one element
16	of the discussion.
17	Q. You testified that, in your
18	opinion, if the 3 percent test prevented
19	FirstEnergy from meeting its renewable
20	benchmarks, that FirstEnergy would be exempt
21	from meeting its benchmarks for that year in
22	excess of the 3 percent capped amount; is
23	that correct?
24	A. Yes.
25	Q. What do you mean by exempt?

	Page 89
1	A. That it would not have to make up
2	the shortfall in a future year.
3	Q. What is the basis for your opinion?
4	A. I think it's reasonable.
5	Q. Are you aware of any utility that
6	the Commission has determined to be exempt
7	from meeting its renewable energy benchmarks
8	based on the 3 percent mechanism in 4928.64?
9	A. No, I'm not.
10	I'm sorry. I answered that
11	question thinking about my recommendation.
12	Your question dealt in general, right?
13	Q. That's correct.
14	A. I know there have been applications
15	for well, no, I don't. The force majeure
16	issues that I read about, in particular with
17	respect to FirstEnergy, dealt with problems
18	of being able to buy certain types of RECs.
19	Q. So you're not aware of any utility
20	that the Commission determined to be exempt
21	from meeting its renewable energy benchmarks
22	based on the 3 percent mechanism; is that
23	correct?
24	A. The 3 percent provision, yes. No,
25	I'm not.

	rage 50
1	Q. Would you agree that, under
2	the current rules, before any waiver of
3	compliance would apply, that a utility
4	would have to file an application with
5	the Commission and prove that the costs of
6	compliance with the benchmark would exceed
7	the 3 percent mechanism?
8	A. That's my understanding.
9	Q. You're recommending a method to
10	calculate the 3 percent test; is that
11	correct?
12	A. Yes.
13	Q. Would you agree that under
14	Section 4928.64, that the costs to acquire
15	electricity is calculated by taking the
16	average of the prior three years'
17	non-shopping megawatt per-hour sales,
18	multiplied by the average of SSO generation
19	costs for the applicable years, adjusted for
20	distribution loss?
21	A. That's my understanding of one way
22	to do it, yes.
23	Q. And that's the way that you
24	recommend calculating the utility's cost
25	to acquire electricity?

1

22	
23	
24	
25	

- A. I think what I've recommended is consistent with what you've just stated.
- Q. So to be clear, you're recommending calculating a utility's costs to acquire electricity by using a three-year average non-shopping megawatt hour sales for the previous three years; is that correct?
- A. Yes. In my testimony, that's the baseline sales number that I used.
- Q. Why are you recommending the calculation of the utility's cost to acquire in that manner?
- A. In part, because of the way that the calculations have progressed or at least been implemented since 2009. In part, in recognition that the number that would fall out of this would be, probably, inflated relative to a number that was calculated in using current-year numbers for megawatt hour sales or even a projected non-shopping sales value. So to that extent, the cap on expenditures is higher than it would be otherwise.

I think FirstEnergy provided testimony, for example, which talked about

why, in terms of Rider AER charges and compliance expenditures, one of the factors that caused those to be higher than one may have liked or may have anticipated is simply because, at the beginning of the transition, the competition or retail accesses, the non-shopping number was relatively high and has declined over time.

Those are two elements.

- Q. Are there any other elements for why you're recommending calculating the utility's cost to acquire in the manner that you are?
 - A. I can't think of one right now.
- Q. Do you believe using the three-year average non-shopping megawatt hour sales to calculate the utility's cost to acquire electricity is consistent with 4829.64?
 - A. Yes.
- Q. Do you believe it's consistent with Goldenberg's recommended method?
- A. Well, I'm not sure what

 Goldenberg's -- Goldenberg had a bunch of

 methods for calculation and offered up

 various alternatives for the Commission's

consideration.

Q. Just to be clear, you're recommending calculating the utility's total cost to acquire electricity by taking the average of the prior three years' non-shopping megawatt hour sales and multiplying that by the average of the SSO generation cost for the applicable year, adjusted for distribution loss; is that correct?

- A. Yes.
- Q. Now, under your calculations, you're recommending, to determine the cap, you multiply the total cost to acquire electricity by 3 percent; is that correct?
 - A. Yes.
- Q. Under your calculations, is it correct that you would wait until January following the SSO auction before you would make -- you would make your calculation -- strike that.

Under your recommendation, is it correct that you would wait until January following the SSO action before the utility would make the calculation?

1	A. Yes. That final piece of the
2	price, the SSO price, would not be known
3	until January of the compliance year. You
4	could, on a preliminary basis, set a
5	preliminary budget based on some expected
6	price and then adjust it on a final basis for
7	the January number.
8	Q. But under your recommended math,
9	you would not know the actual cap that would
10	apply until January of that year?
11	A. You would not know the final
12	number. That's correct.
13	Q. Under your recommendation for a
14	calculation of a 3 percent cap, you would not
15	know the cap for 2014 during 2013; is that
16	correct?
17	A. You would not know the final cap,
18	that's correct.
19	Q. If the companies had a heavy
20	portfolio of long-term contracts I'm
21	sorry. If a utility had strike that.
22	If the utility had a heavy
23	portfolio of long-term contracts for all the
24	RECs it needed to comply with the statutory
25	benchmarks for 2012 through 2015, how would

MR. LAVANGA:

Objection.

Asked and

answered.

_

THE WITNESS: Well, I don't know whether they would or wouldn't. What I'm saying here is that the utility's actual expenditures for compliance in a compliance year would be counted relative to or be evaluated relative to the cap established under the method that I've indicated.

BY MS. FLOYD:

- Q. So the utilities wouldn't know what their cap would be for any year other than the current year that they're in; is that correct?
- A. That is correct, in terms of the cap itself. They can certainly make projections.
- Q. In your testimony, you're not recommending a method for how the utility could compare whether its costs of complying with the benchmark fell within a 3 percent cap to, you know, a cost of complying or cost of acquiring electricity without the benchmarks, are you?
- A. I got lost on that question. I'm sorry.

_	
1	
_	

No problem. Ο.

25

Are you recommending a method in which a utility can calculate a comparison to where it falls within a 3 percent mechanism in your testimony?

- Again, the only thing Α. No. that I am recommending is that the annual expenditures for compliance costs be limited to, as I've said, this 3 percent cap. So the actual expenditures of those compliance costs would be compared against the cap as determined for that compliance year.
- Do you know whether the renewable energy benchmark under the AEPS Statute changes if a utility's non-shopping customer load changes?
- If you would have asked me two weeks ago, I would have told you. I cannot remember.
- You're also recommending in your testimony that Rider AER charges by rate class be no greater than the cost of substitute energy for each class; is that correct?
 - Could I go back to the previous

	Page 98
1	question where you asked about the
2	non-shopping?
3	It will influence the number of
4	RECs that are purchased in the sense that it
5	will influence the level of supply that's
6	being bought.
7	Q. And how is that?
8	A. Simply on the basis of well,
9	I've gotta step back from that, because I
10	don't I can't remember the exact mechanism
11	the afore-related mechanism that's used.
12	I'm blank right now.
13	Q. Dr. Goins, is it correct you're
14	testifying that the Rider AER charges per
15	rate class should be capped at 3 percent to
16	the applicable Rider GEN energy charge for
17	each class per year?
18	A. Yes.
19	Q. And then you're recommending that
20	any costs over the 3 percent would be
21	deferred into future years; is that correct?
22	A. Yes.
23	Q. With regard to the 3 percent cap on
24	the Rider AER charges, is this an annual cap
25	or a biannual cap?

A. It would be based on the SSO price that was determined for that compliance year and used in estimating the cap.

To the extent that the SSO price would change, then in the -- whenever it changed, the quarterly determination of Rider AER would also mean that that cap would change.

- Q. Are you recommending that the cap is an annual cap?
- A. The -- I've made -- in my testimony, I've made no specific recommendation with respect to that because there is an issue of whether it should be adjusted mid-year for the last two quarterly adjustments of Rider AER.
- Q. So in your testimony, you're not suggesting how to resolve whether it is calculated annually or, perhaps, biannually?
 - A. That's correct.
- Q. Is it fair to say that you're not sure how the cap would apply if a rate class is below 3 percent -- you know, the Rider AER is below 3 percent in the summer but above in the winter?

1	A. Well, I've made no recommendation
2	to deal with that, because I've made no
3	recommendation of when it would change.
4	Q. Do you have an opinion on how you
5	would deal with that?
6	A. Well, not right now.
7	Q. How do you suggest the Commission
8	implement your recommendations for a 3
9	percent cap on Rider AER charges?
10	A. There would, essentially, be a
11	determination that the maximum or the
12	change in Rider AER that was determined when
13	Rider AER was adjusted would be limited to no
14	more than 3 percent of the SSO price. And
15	that, to me, seemed a fairly straightforward
16	determination.
17	Q. How do you suggest the Commission
18	implement the 3 percent cap that you're
19	recommending on Rider AER charges?
20	A. I just told you.
21	Q. Is your recommendation for a 3
22	percent cap for Rider AER consistent with
23	the Companies' current EST?
24	A. I don't know of any specific way in
25	which it would not be consistent, or at least

	Page 101
1	I don't recall right off the top of my head.
2	Q. You'd agree, though, that the
3	Companies' current EST does not limit the
4	Companies' recovery of expenditures incurred
5	to meet the Companies' renewable resource
6	obligations to 3 percent of the Companies'
7	cost to produce either acquiring substitute
8	energy?
9	A. Yes. As far as I know, neither in
10	the stipulation or the final order, is there
11	any provision that does that.
12	Q. And there's no reference to a
13	3 percent cap on Rider AER charges when
14	compared to Rider GEN for rate class in the
15	Companies' current Electric Securities Plan;
16	is that correct?
17	A. To my knowledge, no or, yes, it
18	is correct.
19	Q. Now, it's fair to say you
20	understand that Rider AER was established by
21	the Companies' ESP plan? And that's ESP 1.
22	A. That's my understanding based on
23	reading of what transpired.
24	Q. Are you aware of any rate-making
25	case in which the Commission applied a cap on

	Page 102
1	a rider per rate class based on a comparison
2	of the rider to the Companies' generation
3	rider?
4	A. Not specifically, no.
5	Q. Your recommendation of a cap on
6	Rider AER, when compared to Rider GEN and at
7	a rate class basis is, you're not aware of
8	any other rate-making proceeding in which
9	that's been done; is that correct?
10	A. That's correct.
11	Q. Dr. Goins, in your testimony, you
12	state that the Commission should thoroughly
13	examine the prudence of all REC purchases
14	that SE makes to comply with AEPS
15	obligations; is that correct?
16	A. The testimony sounds familiar.
17	Where are you reading from?
18	Q. On Page 15, Line 14.
19	A. Yes, that's what the testimony
20	says.
21	Q. Are you making this recommendation
22	on a prospective basis?
23	A. Yes. And I would if I rewrote
24	this today or wrote this today, I would
25	probably strike the word thoroughly, because

	Page 103
1	I'm not suggesting that there be a in
2	every compliance year there be a detailed
3	audit and prudence hearing on all REC
4	purchases.
5	My point that I'm trying to put
6	across here is that I believe that
7	FirstEnergy should only be allowed to recover
8	costs, whether it's RECs or any other costs,
9	from customers, that are reasonable and
10	prudent.
11	But I'm not saying that every time
12	FirstEnergy wants to adjust its costs or
13	recovery of costs, or apply for recovery of
14	costs, that what I consider to be a detail
15	prudence investigation be undertaken.
16	Q. Is it correct that you're not
17	seeking any opinion regarding the Companies'
18	purchases of RECs for 2009, 2010 and 2011?
19	A. That's correct.
20	MS. FLOYD: Can we go off the
21	record?
22	THE WITNESS: Sure.
23	MR. LAVANGA: Yep.
24	(Discussion occurred off the
25	record.)

	Page 104
1	BY MS. FLOYD:
2	Q. As part of your recommendation for
3	a 3 percent cap, is it correct that you're
4	recommending that costs that are incurred
5	above the 3 percent cap on Rider AER would be
6	deferred for recovery in a future year?
7	MR. LAVANGA: Objection. Can you
8	clarify which cap, which part of the cap
9	mechanism?
10	MS. FLOYD: Sure.
11	MR. LAVANGA: Are you talking about
12	the rate cap?
13	BY MS. FLOYD:
14	Q. You're recommending, Dr. Goins,
15	that any under-recovered renewable resource
16	costs that FirstEnergy incurred because of a
17	3 percent cap on Rider AER should be deferred
18	for recovery in future years; is that
19	correct?
20	A. That's correct.
21	Q. If a cost is deferred because a
22	rate class reaches the 3 percent cap, where
23	would this cost go?
24	A. It would go in some deferred
25	account, if that's what you mean.

1	Q. How would the deferrals be
2	allocated the next year to the rate classes?
3	A. Well, under the proposal as it
4	stands today, it would be allocated as the
5	costs are currently allocated. It's on a
6	loss adjusted basis to all classes.
7	Q. So it's fair to say that the
8	deferrals incurred because of a 3 percent cap
9	on Rider AER would be spread across all rate
10	classes?
11	A. As the proposal is currently
12	structured, yes.
13	Q. If the GT Class met the cap and
14	another rate class did not, would the
15	deferred renewable resource costs that are
16	deferred because the GT Class met its cap be
17	spread across all the other rate classes for
18	recovery in the next year?
19	A. Again, I missed the well, I
20	didn't miss. I heard it, but I didn't
21	understand the first half of that question.
22	Q. Sure.
23	What didn't you understand about
24	it?
25	A. I'm trying to figure out if you're

saying that, if the cap is applicable or not applicable to a certain class because its assigned AER cost is below the 3 percent threshold versus another class whose AER charge is subject to the 3 percent threshold, and, therefore, some costs that would normally have been recovered from that class are deferred, would those deferrals be recovered or spread across all classes in a future recovery period? And as I said, under the proposal as it stands now, the answer's yes.

- Q. So if one rate class meets its cap in a year and the other rate classes do not, is it fair to say that the next year the other rate classes would be subsidizing the renewable energy cost for the rate class that did, in fact, meet its cap for the prior year?
- A. Well, they would be picking up a share of the deferrals, given that they would be subject to the allocations.
- Q. Have you performed any study, research or analysis of the shopping trends for customers in different rate classes?

2.2

	Page 107
1	A. No, no study, no.
2	Q. Have you performed any analysis,
3	research or study of how a Rider AER cap
4	would have impacted different rate class
5	customers if it had been applied in the past?
6	A. No, I did no back-test of it.
7	Q. Have you done any study or research
8	analysis to determine how a Rider AER cap
9	would have impacted different rate class
10	customers if it is applied in the future?
11	A. No, because we won't know.
12	Q. Have you performed any analysis of
13	what the effect of a Rider AER cap would be
14	on Nucor?
15	A. No, I have not.
16	Q. How about on any member of Ohio
17	Energy Group?
18	A. No, I have not.
19	Q. Is Nucor a high-load factor
20	customer?
21	A. It's a reasonably high load factor,
22	in my understanding. I don't know the exact
23	load factor that Nucor has. But, in general
24	for basic steel operations, the type that
25	Nucor has, the load factor is generally

	Page 108
1	higher, for example, than a typical secondary
2	distribution customer.
3	Q. Do you know whether a cap of Rider
4	AER would require the companies to modify
5	their administrative system?
6	A. I'm sure it would require some
7	tweaking of the computer programs to track
8	any over or under-recoveries.
9	Q. You don't know whether it would
10	increase the administrative expenses of the
11	Company?
12	A. It would increase expenses, you
13	know, somewhat. They would probably be de
14	minimis.
15	Q. Do you agree, in general, that
16	Nucor is a high load factor customer?
17	MR. LAVANGA: Objection. Asked and
18	answered.
19	THE WITNESS: Again, I don't have
20	any current knowledge of Nucor's recent load
21	factor. What I do know is what I've said
22	earlier, and that is, in general, for a load
23	of this type, my experience indicates that
24	the typical load factor is higher than it is
25	for what we would call an average customer.

Certainly generally higher than a secondary distribution customer; in particular, a residential, for example.

BY MS. FLOYD:

- Q. In your testimony, you also address the issue of whether there could be chronic under-recovery of Rider AER costs if a cap is applied; is that correct?
 - A. Yes, I do.
- Q. And it's correct to say that you don't believe that this is a likelihood of chronic under-recovery if a 3 percent cap is applied because the likelihood should diminish at the three-year non-shopping load used in calculating the 3 percent cap becomes more reflective of the current level of non-shopping customers; is that correct?
 - A. Yes, I believe that would happen.
- Q. What do you mean by becomes more reflective?
- A. That you don't get the large swings that you did in the early years of shopping on the FirstEnergy system, in which there was very little shopping and then a great deal, or, relatively speaking, there was a great

sworn or affirmed, was examined and testified

That's correct.

In the Table Rider GEN, is that

Α.

Q.

24

That's my understanding.

And the rates that you have listed

level?

Α.

Q.

Yes.

23

24

Page 122
below under Rider GEN are at the wholesale
level; is that correct?
MR. LAVANGA: Objection. Asked and
answered.
THE WITNESS: Well, again, there
is no Rider GEN for a wholesale in terms of
Rider GEN being applicable here to retail SSO
sales.
BY MS. FLOYD:
Q. So it's your testimony that the
Rider GEN rates are not at wholesale level;
is that correct?
A. Rider GEN is not a rate regulated
by the FERC, which is the general definition
if one wants to identify whether a rider or a
rate is a wholesale or a retail rate.
Q. So you don't know whether the rates
in Table 1 under Rider GEN are retail or
wholesale rates?
MR. LAVANGA: Objection.
Mischaracterizes his testimony.
THE WITNESS: I'll stand on the
previous statements I've given you.
BY MS. FLOYD:
Q. And Dr. Goins, what is your

2

position on what the Rider GEN rates are?
Are they wholesale or retail?

MR. LAVANGA: Objection. Asked and answered.

THE WITNESS: For the fifth time or sixth time, it is a retail rider incorporated in the general tariff of the FirstEnergy Companies.

BY MS. FLOYD:

- Q. If the Rider GEN rates that you had in your Table 1 were wholesale rates and not retail rates, then would you agree that your percentages in your final columns to the far right would be lower?
- A. Again, the Rider GEN is a retail rider incorporated in the FirstEnergy Operating Companies' tariffs or reflected in those tariffs. The numbers -- my understanding of the Goldenberg Report is that these numbers shown under the column Rider GEN represent a blended competitive price as calculated by Goldenberg. That blended competitive price would be reflected in Rider GEN.
 - Q. I'm not sure you answered my

	Page 124
1	question. I asked you, if the Rider GEN
2	rates are the wholesale rates and the Rider
3	AER rates are retail rates, wouldn't the
4	percentage in the column that you have as
5	AER where you show this comparison of the
6	AER rate and the GEN rate, wouldn't those
7	percentages be lower?
8	A. Well, they may or may not based on
9	the loss adjustment that one would use.
10	Q. Dr. Goins, would you agree that
11	Rate GT customers have lower Rider GEN
12	charges than other customers' rates?
13	A. Conceptually, they should.
14	Q. I'm sorry. I didn't hear your
15	answer. Can I have the court reporter read
16	it back?
17	(Referred-to testimony read back.)
18	BY MS. FLOYD:
19	Q. So other customer rate classes
20	have higher Rider GEN charges than Rate GT
21	customers; is that correct?
22	A. I'm not looking at Rider GEN now,
23	but I think that's a fair statement.
24	Q. Would you agree that when comparing
25	Rider GT Class customers' Rider AER charge

with their Rider GEN charge, this percentage of difference will be higher than the same comparison for other classes because Rider GT customers have a lower Rider GEN charge?

- A. I don't know, because I haven't made the comparison.
- Q. Would you agree that, in general, if one class had a lower Rider GEN charge than the other classes, then when you would make a comparison between that classes' Rider AER charge and the Rider GEN charge that the percentage of difference would be higher for the class of customers that have the lower Rider GEN charge?
- A. It would -- you lost me. The comparison, again, would depend on -- the results of the comparison would depend on the level of the Rider AER charge by class and the Rider GEN charge by class.
- Q. And if one class had a lower Rider GEN charge than the other classes, would you anticipate that, when you did that comparison for the class that had the lower Rider GEN charge than the other classes, that the class with the lower Rider GEN charge would have a

	Page 126
1	higher percentage when you do the comparison
2	between Rider AER and Rider GEN?
3	A. I don't know. Again, it would
4	depend on what the Rider AER charge was that
5	you were using for that specific class.
6	Q. Dr. Goins, you've not shown that
7	Rider AER causes a disproportionate impact on
8	Rate GT customers on any table that's in your
9	testimony; is that correct?
10	A. No, I don't have I only have two
11	tables in the testimony.
12	Q. Have you done any study or research
13	to show this?
14	A. No. I just discuss it, as we
15	discussed yesterday extensively in the
16	deposition about my concept of
17	disproportionate responsibility as it
18	applies to large load factor customer
19	groups.
20	Q. So other than your discussion in
21	your testimony, you don't have any
22	independent study or research to show a
23	disproportionate impact that Rider AER
24	causes a disproportionate impact on Rate GT
25	customers; is that correct?

1	A. Well, that's not my testimony
2	doesn't say that Rider AER caused a
3	disproportionate impact on customers. It
4	simply said that, in general, higher load
5	factor customers would bear a
6	disproportionate share of the compliance
7	costs, associated with the RPS standard, with
8	the RPS.
9	Q. In Table 2,
10	A. Mm-hmm.
11	Q you set forth the Rider AER bill
12	impact. The impacts that you're showing,
13	those are for the Rate GT customer class. Is
14	that what you're saying your table shows?
15	A. Yes.
16	Q. Have you done any analysis of the
17	Rider AER bill impact on any other rate
18	class?
19	A. No. This is
20	Q. Do you know how many
21	A. Excuse me. This is not a class
22	impact. It is a customer impact, by class.
23	Q. You're saying that Table 2 shows a
24	customer impact by a customer impact of
25	Rate GT Class customers; is that correct?

1	A. Yes. It is a your statement
2	was referred to class impacts of
3	Rider AER. And Table 2 looks at the
4	customer-specific impacts of Rider AER on
5	GT customers, and customer-specific being
6	defined by usage level on a monthly basis.
7	Q. Do you know how many Rate GT
8	customers have a usage level of 20,000
9	kilowatt hours per month?
10	A. No, I do not.
11	Q. Do you know how many customers in
12	the Rate GT Class have a usage level of 6,000
13	or less kilowatt hours per month?
14	A. No, I do not.
15	Q. Do you have any reason to disagree
16	that most of the Rate GT customers fall below
17	the 6 million usage level per month?
18	A. No, I do not.
19	MS. FLOYD: Dr. Goins and Mike, I'd
20	like to take a quick break.
21	Can we go off the record?
22	MR. LAVANGA: Sure.
23	(Recess taken.)
24	BY MS. FLOYD:
25	Q. Dr. Goins, do you know how many

questions yesterday about the design of the

	Page 130
1	rate cap for Rider AER, including whether
2	this cap would be annual or biannual.
3	Do you recall that?
4	A. Yes, I do.
5	Q. Now, your testimony does not
6	contain all the details about how you would
7	apply that cap, correct?
8	A. That's correct. It does not
9	include details of how the rate cap would be
10	implemented. It specifies the general
11	parameters of the rate cap.
12	Q. If there was a concern about the
13	complexity of a AER cap applied on the basis
14	of rate schedule, is there a different option
15	or a different way that the cap could be
16	applied?
17	A. Yes. The simplest way, or at least
18	one of the simplest ways in which it could be
19	applied would be if one calculated a cap
20	simply as 3 percent of the company-specific
21	Rider GEN charge; that is, the charge before
22	it's adjusted for losses for the specific
23	rate classes.
24	Q. Would that be the blended
25	competitive rate price?

- A. It would. And that 3 percent of that number would essentially establish the cap for Rider AER in that period. And for that reported period, and on that basis, the cap would remain in place for the period of time in order to adjust it as necessary in the AER proceedings.
- Q. And under that approach, you would not have a capped level that would vary by rate schedule significantly, correct?
 - A. You would not.
- Q. So the possibility of large deferrals resulting from one class hitting the cap and then being spread and recovered from other rate classes in following years would be limited or eliminated altogether, correct?
- A. It would certainly be mitigated.

 And a general assessment would be that it would be reduced significantly, relative to a class-specific AER rate cap.
- Q. So in your view, this mechanism would be unlikely to lead to subsidization of one class of customers by another in recovering deferrals in future years?

	Page 132
1	A. I don't think it would.
2	Q. Okay.
3	A. And I'm not sure that well, I
4	don't think it will.
5	Q. Okay. Dr. Goins, you also got
6	a question yesterday about when your
7	recommended 3 percent expenditure cap
8	would take effect. Do you remember that?
9	A. I do.
10	Q. And you said 2014?
11	A. Yes. My answer was, essentially,
12	that it would the implementation date
13	would sync up with a full 12-month compliance
14	year.
15	Q. Is it also possible that the cap
16	could go into effect in 2013?
17	A. It is possible. It would depend
18	on how the Commission wanted to handle it in
19	this order and how long it took to get an
20	order issued in this case and resolve any
21	petitions for re-hearing or reconsideration.
22	In other words, it would ultimately
23	boil down to the timing of when the final
24	order final, final order was issued, with
25	the implementation rule. And I'm sure one

21	
22	
23	

factor that the Commission would consider in that timing decision would be the extent to which -- at the point in time in which the order was about to be issued, the operating companies had completed their portfolio acquisition of RECs for RECs for the 2013 period.

- Q. So assuming that an order was issued, say, in, June and at that point the FirstEnergy Operating Companies had not yet acquired all the RECs it needed for that compliance year, wouldn't it be reasonable to allow the cap to go into effect then?
- A. Well, it would be reasonable.

 There would be no harm to FirstEnergy.

 FirstEnergy wouldn't be put at risk under that situation.
- Q. In other words, you would do the cap calculation and that would create the budget, essentially, for that compliance year, and FirstEnergy just would not go over that budget?
- A. Yes. As I said, the cap mechanism, as I envision it, would, essentially, establish an annual budget for FirstEnergy's

2.4

25

	Page 134
1	compliance costs.
2	Q. Okay. And the same would be true
3	of the rate cap? Isn't it possible that that
4	could also go into effect in year 2013,
5	depending on when the Commission issues
6	its order in this proceeding?
7	A. You're talking about the rate
8	cap or I assume you're talking about the
9	AER cap?
10	Q. Correct.
11	A. It could go into effect, and, you
12	know, would be considered at the next
13	quarterly update of the Rider AER, subsequent
14	to the decision in the case.
15	It would depend solely on the
16	Commission's preference not solely, but it
17	would depend on the Commission's preference.
18	MR. LAVANGA: Okay, Dr. Goins.
19	That's all the questions I have.
20	Thank you.
21	MS. FLOYD: Can we go off the
22	record, please?
23	MR. LAVANGA: Yes.
24	(Recess taken.)
25	FURTHER EXAMINATION

	(
	Page 135
1	BY MS. FLOYD:
2	Q. Dr. Goins, are you planning to
3	modify your testimony to reflect this
4	alternative recommendation?
5	A. No. My testimony is what it is
6	today. As I said earlier, I do not provide
7	implementation details for the rate cap or
8	the expenditure cap or the rate cap
9	mechanism.
10	Q. And is it fair to say regarding the
11	alternative mechanism that you just discussed
12	that you were also just providing general
13	parameters and not necessarily the specific
14	details?
15	A. Well, they were specific to the
16	level that you and I were discussing them
17	yesterday.
18	Q. Is it correct to say that the
19	alternative mechanism you were discussing,
20	you were providing some details, but not
21	necessarily all of the details for that
22	mechanism?
23	A. Well, I'm sure that I haven't
24	provided all of the details. I'm sure that
25	the Commission the Commission's staff,

	Page 137
1	waive signature.
2	MS. FLOYD: Dr. Goins, thank you
3	very much for your time today, and we are
4	concluded at this time.
5	THE WITNESS: Thank you.
6	MR. LAVANGA: Thank you.
7	MS. FLOYD: Can we go off the
8	record?
9	MR. LAVANGA: Yep.

3	I, RYAN K. BLACK, the reporter
4	before whom the foregoing deposition was
5	taken, do hereby certify that the witness
6	whose testimony appears in the foregoing
7	deposition was sworn by me; that the
8	testimony of said witness was taken
9	By me in machine shorthand and thereafter
10	transcribed by computer-aided transcription;
11	that said deposition is a true record of the
12	testimony given by said witness; that I am
13	neither counsel for, related to, nor employed
14	by any of the parties to the action in which
15	this deposition was taken; and, further, that
16	I am not a relative or employee of any
17	attorney or counsel employed by the parties
18	hereto, or financially or otherwise
19	interested in the outcome of this action.

ASSIGNMENT NO: 1612930

CASE NAME: In Re: PUCO Case No. 11-5201-EL-RDR

DATE OF DEPOSITION: 2/14/2013

WITNESS' NAME: Dennis J. Goins, Ph.D.

In accordance with the Rules of Civil Procedure, I have read the entire transcript of my testimony or it has been read to me.

I have listed my changes on the attached Errata Sheet, listing page and line numbers as well as the reason(s) for the change(s).

I request that these changes be entered as part of the record of my testimony.

10

11

I have executed the Errata Sheet, as well as this Certificate, and request and authorize that both be appended to the transcript of my testimony and be incorporated therein.

12 13

Date

Dennis J. Goins, Ph.D.

14

15

16

18

19

Sworn to and subscribed before me, a Notary Public in and for the State and County, the referenced witness did personally appear and acknowledge that:

They have read the transcript;
They have listed all of their corrections

in the appended Errata Sheet;

They signed the foregoing Sworn Statement; and

Their execution of this Statement is of

their free act and deed.

I have affixed my name a

I have affixed my name and official seal this _____, 20____.
