Letter of Notification
Davis Besse-Hayes 345 kV Transmission Line
Construction Project Engineering Change
Case No. 12-2666-EL-BLN

RECEIVED-DOCKETING DIV
2013 MAY 29 AM 10:35
PUCO

Dear Mr. O'Dell:

This letter will serve as notice of an engineering change that is being submitted in Case No. 12-2666-EL-BLN, the Davis Besse-Hayes 345 kV Transmission Line Construction Project, originally submitted on October 3, 2012. Based upon final engineering design, a new steel pole structure with concrete foundation will be installed at the eastern extent of the transmission line project approximately 50 feet north of existing structure 41827 and will be numbered as structure 41827A. The new structure is similar to the prior proposed steel pole at Davis Besse. There is no longer a need for the installation of additional structures at Davis Besse, as was proposed in the original Letter of Notification submittal. All other structures and features of the Project remain the same.

Should the Ohio Power Siting Board desire further information or discussion of this submittal, please contact me at (330) 384-2526.

Sincerely,

Scott M. Humphrys
