Re: Case No. 07-464-TP-UN  
Case No. 90-5032-TP-TRF

Dear Mrs. McNeal:

On April 30, 2013, tariff pages for the Ameritech Operating Companies were filed with the Federal Communications Commission under Transmittal No. 1792. This filing in the FCC No. 2 Tariff was effective on May 15, 2013.

Pursuant the Federal Communications Commission's (FCC's) Report and Order and Further Order of Proposed Rulemaking (USF/ICC Order), FCC No. 11-161 released November 18, 2011, carriers are required to reduce their terminating intrastate switched end office and transport rates to parity with interstate access rates effective July 2, 2013. As a result, on July 2, 2013 the intrastate jurisdiction may end up having separate intrastate terminating rates that are lower than the intrastate originating rates. Currently, Ameritech's Tariff FCC No. 2 has a single rate that applies to both originating and terminating. As Ameritech splits its intrastate access rate elements between originating and terminating and, when necessary, reduces terminating to be at parity with the functionally equivalent interstate rates, it will be beneficial for the interstate jurisdiction to reflect the same originating and terminating structure and reduce customer confusion. The splitting of interstate rate elements between originating and terminating will be administrative in nature, will have no change in existing interstate rate levels, and will not have any material impact on customers' interstate access billing. These changes will affect both per-minute usage and fixed Port charges.

With this filing, Ameritech Operating Companies (Ameritech) is proposing to list usage rates in the local switching and tandem switching categories in Section 6 of this interstate tariff as originating and terminating. The rates will be exactly the same for both originating and terminating, and there will be no changes to these rates from their current levels. No billing system changes are required because the current billing system already identifies usage data by direction. No changes to the service or associated regulations are required to accommodate this change. In addition to showing usage rates as originating and terminating, Ameritech is proposing to identify the Dedicated End Office Trunk Port and Dedicated Tandem Trunk Port as originating and terminating. This necessitates the addition of new USOCs and tariff language to distinguish between originating and terminating for these ports.

The Traffic Sensitive and Trunking baskets were removed from Price Cap in the 2012 Annual Filing; therefore, no additional supporting information is required with this filing.

Originating RC charge(s) apply to:

- all originating access minutes of use;
- less those originating access minutes of use associated with FGA Access Services where the off-hook supervisory signaling is forwarded by the customer's equipment when the called party answers;
- less all originating access minutes of use associated with calls placed to 500, 700, 900 and toll free numbers;
- plus all originating access minutes of use associated with calls placed to 500, 700, 900 and toll free numbers for which the customer furnishes for each month a report of either the number of calls or minutes or a report of the percent of calls or minutes that terminate in a Switched Access Service that is assessed Carrier Common Line charges, and for which a corresponding reduction in the number of terminating access minutes of use has been made as set forth in (D) preceding.

**(8) Trunk Ports****(a) Dedicated Tandem Trunk Port Rate**

The Dedicated Tandem Trunk Port rate is assessed on all facilities terminating on a tandem trunk port on the serving wire center side of the access tandem. The rate is assessed for all Feature Group services on a per LT-1 basis. Each voice grade trunk terminating will be assessed 1/24th of the LT-1 rate. When Direct Transport is provided as an LT-3, LT-3 to LT-1 multiplexing is required.

Dedicated Tandem Trunk Port is billed as originating and terminating based on a Percent Originating Usage (POU) factor of 50%

Originating Calculation = PIU x Originating Rate x Quantity x POU

Terminating Calculation = PIU x Terminating Rate x Quantity x (100-POU)

## 6.8.2 Description and Application of Rates and Charges (Cont'd)

## (D) Application of Rates (Cont'd)

## (8) Trunk Ports (Cont'd)

## (b) End Office Common Trunk Port Rate

The End Office Common Trunk Port rate will apply to all originating and terminating minutes of use between the access tandem and the end office. This rate will also be assessed on FGA minutes of use terminating outside of the dial tone office, and all minutes of use originating or terminating at a RSS/RSM. The Common Trunk Port rate is assessed to all switched access minutes over Tandem Switched Transport Services, except where Tandem Switched Transport Services originate or terminate to a class 4/5 switch.

The common Trunk Port charge does not apply for Switched Access Services provided in conjunction with a cellular carrier or RCC which is directly connected at an access tandem.

## (c) End Office Dedicated Trunk Port Rate

The End Office Dedicated Trunk Port rate is assessed on all direct-routed facilities between the serving wire center or the hub, and the end office terminating in an end office trunk port. The rate is assessed for all Feature Group services on a per LT-1 basis. Each voice grade trunk terminating will be assessed 1/24th of the LT-1 rate. When Direct Transport is provided as an LT-3, LT-3 to LT-1 multiplexing is required.

Dedicated End Office Port is billed as originating and terminating based on a Percent Originating Usage (POU) factor of 50%. (C)

Originating Calculation =  $PIU \times \text{Originating Rate} \times \text{Quantity} \times \text{POU}$

Terminating Calculation =  $PIU \times \text{Terminating Rate} \times \text{Quantity} \times (100 - \text{POU})$  (C)

## (9) Switched Transport Multiplexing

## (a) Common Multiplexing

Common Multiplexing is assessed on a per minute basis at the access tandem for all switched access minutes that are transported over Tandem-Switched Transport between the end office and the access tandem. The Common Multiplexing Charge applies whenever the Tandem Switching rate applies.

## ACCESS SERVICE

## 7. Special Access (Cont'd)

## 7.1 General (Cont'd)

## 7.1.1 Channel Types (Cont'd)

Following is a brief description of each type of channel:

Metallic - a channel for the transmission of low speed varying signals at rates up to 30 baud.

Telegraph Grade - a channel for the transmission of binary signals at rates of 0 to 75 baud or 0 to 150 baud.

Direct Analog - A channel for the transmission of analog signals within an approximate bandwidth of 300-3000 Hz.

Dedicated Access Line (DAL) - a channel from a customer designated premises to a WATS serving office for 800 Service, WATS or similar services.

Program Audio - a channel for the transmission of audio signals. The nominal frequency bandwidths are from 50 to 15000 Hz, from 200 to 3500 Hz, from 100 to 5000 Hz or from 50 to 8000 Hz.

Video - a channel for the analog or digital transmission of a standard 525 line/60 field monochrome or National Television Systems Committee color video signal and from one to four associated 5 or 15 kHz audio signals. The bandwidth for an analog Video channel is either 30 Hz to 4.5 MHz or 30 Hz to 6.6 MHz.

(D)  
(D)  
(D)

Wideband Analog\* - a channel for transmission of wideband signals. The bandwidths are from 60 to 108 kHz (Group), from 312 to 552 kHz (Supergroup), from 564 to 3084 kHz (Mastergroup), from 300 Hz to 18 kHz, from 29 to 44 kHz or from 28 to 44 kHz.

\* Wideband Analog Service is limited to circuits in place as of August 11, 1988. Only changes which do not result in the establishment of a new minimum service period are allowed for these circuits.

## ACCESS SERVICE

## 7. Special Access Service (Cont'd)

## 7.1 General (Cont'd)

## 7.1.1 Channel Types (Cont'd)

Detailed descriptions of each of the channel types are provided in 7.2 following.

The customer also has the option of ordering direct analog service, or DS1 or DS3 Service operating at terminating speeds of 1.544 Mbps or 44.736 Mbps, to a Telephone Company Hub for multiplexing to individual channels of a lower capacity or bandwidth. Descriptions of the types of multiplexing available at the Hubs, as well as the number of individual channels which may be derived from each type of facility are set forth in 7.2 following. Additionally, the customer may specify optional features for the individual channels derived from the facility to further tailor the channel to meet specific communications requirements. Descriptions of the optional features and functions available are also set forth in 7.2 following.

For example, a customer may order a 44.736 Mbps facility from a customer designated premises to a Telephone Company Hub for multiplexing to twenty eight 1.544 Mbps channels. The 1.544 Mbps channels may be further multiplexed at the same or a different Hub to Direct Analog Service (i.e., Group Level) channels or may be extended to other customer designated premises. Optional features may be added to either the 1.544 Mbps or the Direct Analog Service Channels.

## (D) Optional Features and Functions

(1) Video Bridging Capability <sup>(1)</sup>

(T)

Video Bridging Capability is available with Multichannel Video Service (MVS). When the Video Bridging Capability option is ordered in conjunction with MVS, the composite MVS signal will be optically split to allow one-way transmission to multiple customer designated premises. Each of the multiple customer premises receives the same composite MVS video signal. This option is required with MVS multipoint configurations when the splitting function is not combined with the retransmission of the MVS signal.

(D)

(D)

(D)

(D)

When MVS Video Bridging is used, all receiving segments of the circuit must have the same video service channels (MVS /C/D) as the originating segment.

## 7.4.2 Types of Rates and Charges (Cont'd)

## (C) Nonrecurring Charges\*

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation of new services and rearrangements of installed services). The nonrecurring charges that apply for installation of Special Access Service are described in (1) through (3), following. Application of nonrecurring charges for service rearrangements is described in (6), following.

Certain optional features and functions also have separate installation nonrecurring charges as described in (4), following. There are also separate nonrecurring charges for circuit record work associated with hub rearrangements. Applications of these charges is described in (5), following.

## (1) Administrative Charge

The Administrative Charge applies any time a customer initiates an order for service. This charge applies once per customer order, as described in Section 5.1 preceding. Administrative Charges for Special Access Service are set forth in 7.5.15 following.

## (2) Design and Central Office Connection Charge

(D)

The Design and Central Office Connection Charge applies to each service installed, and is charged once per circuit. The nonrecurring charges for design and central office connection are set forth in 7.5.15 following. (D)

## (3) Customer Connection Charge

The Customer Connection Charge applies to each service installed, and is charged once per Local Distribution Channel. The nonrecurring charges for customer connection are set forth in 7.5.15 following.

If a single order involves 500 or more terminations at the same location on the same customer requested date, the individual nonrecurring charges for the services provided will not apply, except for the Administrative Charge. The customer will be notified and will be provided

- Change of customer name (i.e., the customer of record does not change but rather the customer of record changes its name -- e.g., AT&T Long Lines to AT&T - Communications),
- Change of customer premises or customer's end user premises address when the change of address does not require a physical relocation of equipment,
- Change in billing data (name, address, or contact name or telephone number or Optional Payment Plan information),
- Change of customer or customer's end user contact name or telephone number.

All other service rearrangements will be charged for as follows:

- If a change involves a change of the customer of record (i.e., Access Service is provided and billed to a different entity) and no physical relocation or rearrangement of the service is required, the Administrative Charge will apply. For the change of customer of record to be treated as a service rearrangement, the new customer must assume liability for both current and prior charges for the service.
- If the change involves the addition of one or more legs to an existing multipoint service, one Design and Central Office Connection Charge associated with the Special Access Service will apply, regardless of the number of legs added. One Customer Connection Charge will apply only for each leg that is being added. One Administrative Charge will also apply.

## 7.4.5 Minimum Periods

The minimum service period for all services is one month, except as follows:

- (A) The minimum service period for part-time and occasional Video and Program Audio services is one day (i.e., a continuous 24 hour period, not limited to a calendar day).
- (B) The minimum period for service provided on an Individual Case Basis (ICB) is as specified in the ICB filing.
- (C) The minimum service period for a DS3 LDC with an Electrical Interface and a DS3 Service Package with an Optical Interface is 12 months. After the minimum period is satisfied, the monthly extension rate will apply.
- (D) The minimum service period for Ameritech OC-3 and Ameritech OC-12 Services is 12 months. After the minimum period is satisfied, the monthly rate will apply unless an OPP is selected.
- (E) The minimum service period for Ameritech OC-3 Dedicated Ring and Ameritech OC-12 Dedicated Ring service is 36 months. After the minimum period is satisfied, the prevailing rates of the current plan will continue until the customer cancels or renews the service.
- (F) The minimum service period for Ameritech Multichannel Video Service<sup>(1)</sup> is 12 months. (D)  
After the minimum period is satisfied, the prevailing rates of the OPP selected by the customer will apply, or the monthly rates will apply if the customer's OPP term has expired. (D)
- (G) The minimum service period for SONET Xpress<sup>(2)</sup> is 12 months. After the minimum (T)  
period is satisfied, the monthly extension rate will apply unless an OPP is selected.

7.4.10 Optional Payment Plan (OPP) for Base Rate, DS1, DS3,<sup>(2)</sup> TV Analog Video Services, Multichannel Video Service<sup>(3)</sup>, and SONET Xpress Service<sup>(4)(2)</sup> (D)

## (A) General

The Optional Payment Plan is a provision that allows a customer to select Base Rate, DS1, DS3, TV Analog Video Service, Multichannel Video Service (AMVS),<sup>(2)</sup> (excluded DS1 - 128.0, 256.0, 384.0, 512.0 and 768.0 Kbps transport) and SONET Xpress, over a 12, 24, 36, 48 or 60 month payment period. Monthly rates for services installed under this Payment Plan will change as Telephone Company initiated rate changes become effective but during the OPP term will not exceed the monthly rate in effect at the beginning of the customer's OPP term.\* (D)

During the term of the selected OPP, Telephone Company initiated rate changes (increases or decreases) will automatically be applied to the monthly payments for the remaining months of the current OPP term. But in no case will any rate change cause the monthly rate during the OPP term to exceed that in effect at the beginning of the customer's OPP term.

Multichannel Video Service, and TV Analog Video Service<sup>(2)</sup> rates and charges for which the OPP is available are listed in 7.5.5 following. Base Rate, DS1, and DS3 Service rates and charges for which the OPP is available are listed in 7.5.9<sup>(2)</sup> and SONET Xpress Service rates and charges for which OPP is available are listed in 7.5.12 following. (D)

Customers subscribing to the OPP will be subject to nonrecurring charges<sup>(1)</sup> as specified in 7.5.13 for installation and rearrangements of service covered by the plan. The nonrecurring charges will not be spread over the OPP term. If the customer subscribes to the OPP on an existing service with no other changes, no nonrecurring charges will apply.

\* For DS3 customers under an OPP as of August 4, 1992, the sum of the rates for the Service Package and Service Channels will not exceed, for the remainder of the OPP term, the rate in effect at the beginning of the customer's OPP Term.

(1) For Services ordered under MVP, refer to Section 19.3(E)(5).

7.4.10 Optional Payment Plan (OPP) for Base Rate, DS1, DS3, <sup>(1)</sup>, TV Analog Video Services, Multichannel Video Service <sup>(2)</sup>, and SONET Xpress Service <sup>(3)(1)</sup> (Cont'd) (D)

## (A) General (Cont'd)

At the expiration of the OPP term and if the customer wishes to continue Base Rate, DS1, DS3, TV Analog Video Service, ASVS, AMVS <sup>(1)</sup>, or SONET Xpress Service, the customer may select a new OPP at the prevailing OPP rate. If a customer does not wish to renew the OPP at the expiration of the term, the customer's service will automatically convert to month-to-month or DS3, <sup>(1)</sup> or SONET Xpress Monthly Extension rates.

## (B) Prepayment of an OPP

A customer may, at any time during an OPP term, elect to prepay the remaining monthly charges for the rest of the term. The prepayment amount will be adjusted for the time value of money. Recurring charges will cease for the rest of the term and start up again at the end of the OPP if service has not been disconnected. If prepayment has been elected and the service is discontinued prior to the end of the OPP term, a credit for the unused portion of the OPP term, adjusted for the time value of money, will be given to the customer. Termination charges will still be applicable. Once a customer selects the prepayment option, the prepaid amount is not adjusted for company initiated rate changes that occur during the period for which the customer has prepaid.

## (C) OPP Termination Liabilities

Customers requesting termination of service prior to the expiration date of the OPP term will be liable for a termination charge, except for SONET Xpress Service. <sup>(3)</sup> (T)  
The termination charge for all OPP terms, except for Base Rate OPP terms subscribed to after October 8, 1997, DS1 and DS3 OPP terms subscribed to after February 20, 1997 and DS3 Service Packages with an Optical Interface (see 7.4.10 C(i)), will be calculated as follows:

The dollar difference between the current OPP rate for the OPP term that could have been completed during the time the service was actually in service, or the monthly rate for services in place less than 12 months, and the customer's current OPP rate for each month the service was provided.

## C. OPP Termination Liabilities (Cont'd)

For example, a customer subscribed to a 60 month OPP term and disconnected service during the 37th month. This customer's termination charge would be:

$$[36 \text{ month OPP Rate} - 60 \text{ month OPP rate}] \times 37 = \text{Termination Charge.}$$

The 36 month OPP term could have been completed during the months the service was actually in service.

All recurring rate termination charges will be based on the recurring OPP rates in effect at the time of termination.

Termination Liability charges for all OPP terms including DS3 Service that have been initiated prior to August 29, 1992 may, at the customer's request, be charged as described above or pay a percentage of the monthly charges for the remainder of the term as indicated below:

## (C) OPP Termination Liabilities (cont'd)

- (i) Except for DS1 and DS3 OPP terms subscribed to under the OPP Renewal Program as described in 17.2(6) following, the termination charges for Base Rate OPP terms subscribed to after October 8, 1997, DS1 and DS3 OPP terms subscribed to after February 20, 1997, and DS3 Service Packages, discontinued prior to the expiration of the selected OPP term will be calculated as follows:

## (a) Service discontinued in 1st through 11th month:

## (1) DS3 Service Packages with an Optical Interface

$(.85 \times 12 \text{ Mo. OPP rate} \times [12 - \text{number of Months in service}]) + ([12 \text{ Mo. OPP rate} - \text{subscribed to OPP rate}] \times \text{number of Months in service})$

For example: A customer subscribed to a 36 month OPP term and disconnected service at the end of the fifth month. This customer's termination charge would be:

$(.85 \times 12 \text{ Mo. OPP rate} \times [12 - 5 \text{ Mos}]) + ([12 \text{ Mo. OPP rate} - 36 \text{ Mo OPP rate}] \times 5 \text{ Mos})$

## (C) OPP Termination Liabilities (cont'd)

## (b) Service discontinued in 12th through 60th month:

The dollar difference between the current OPP rate for the OPP term that could have been completed during the time the service was actually in service, and the customer's current OPP rate for each month the service was provided.

Termination liability for services provided under the Volume Pricing Plan (VPP) for DS3 LDCs with an Electrical Interface as described in 7.4.10 I following, will be calculated prior to the application of any volume discounts associated with the plan.

Except as provided in 7.4.10 D following, any customer terminating a DS1 service that was installed after February 20, 1997, or a DS3 service that was installed after June 10, 1998, before the expiration of the term under which it was installed shall also be liable for a nonrecurring termination charge. The nonrecurring termination charge will be the dollar difference between the nonrecurring charge for an OPP term that could have been completed during the time the service was actually in service, or the nonrecurring charge associated with the minimum service period for services in place less than 12 months, and the nonrecurring charge the customer actually paid.

## (D) Conversion of service to New OPP, Higher Speed, or SONET Xpress Service

During a customer's OPP term, conversion may be made to a new OPP term of the same or different length or to a higher speed service or to the same or higher speed SONET Xpress service. If the expiration date for the new service or OPP term is beyond the end of the original OPP term, the remaining OPP charges and any nonrecurring termination charges for the original term will not apply. If no physical changes are made to the service, the Administrative Charge, the Design and Central Office Connection Charge and the Customer Connection Charge will not apply.

## (i) DS1 Service and Base Rate Service

During an OPP term a customer may move one Local Distribution Channel (LDC) of an DS1 or Base Rate service to another location in the same LATA and keep the OPP in force, provided no lapse in service occurs. Nonrecurring charges for the move will be based on the customer's existing OPP term.

During an OPP term, a customer may purchase a Local Channel Diversity Arrangement or an Interwire Center Diversity Arrangement (described in Section 11.1.1) and move an in-service DS1 or Base Rate Service to one of these arrangements while keeping the OPP in force, provided the customer's premises and serving wire center remain the same and no lapse in service occurs.

## (ii) DS3 Service

During an OPP term a customer may move one Local Distribution Channel (LDC) of an DS3 Service to another location within the same LATA without incurring termination charges, as described in G following, provided the following conditions are met:

- The DS3 Service has satisfied the twelve month minimum service period requirement at the old location,
- for DS3 Service Channels with an Optical Interface, the number of DS3 Service Channels with an Optical Interface at the new location must be the same or greater than the number of DS3 Service Channels with an Optical Interface being discontinued at the old location,
- the customer subscribes to a new OPP term at the new location that is equal to, or greater than the remaining period of the OPP term being discontinued at the old location and,
- no lapse in service occurs.

A new twelve month minimum service period requirement will apply to the DS3 Service at the new location. The monthly rates for the new service will be those rates in effect at the time the new service is installed.

## (F) NRS

During a customer's OPP term, a customer may elect to include an DS3, DS1 or an Base Rate service into the customer's Network Reconfiguration Service (ANRS) database. The customer may opt to convert to a new OPP term of the same or different length or to continue the current OPP term to the original expiration date. If the expiration date for the new OPP term is beyond the end of the original OPP term, termination charges for the original term will not apply. Adding an existing service to the customer's ANRS database requires that all nonrecurring charges applicable to the installation of the service apply.

## (G) DS3 Service Package with an Optical Interface Upgrade

During a customer's OPP term, conversion may be made from one DS3 Service Package with an Optical Interface to another larger package (e.g., DS3012 to DS3024) for a new OPP term of the same or different length. If the expiration date of the new OPP term is beyond the end of the original OPP term, termination charges will not apply to the original OPP term.

Monthly Extension rates for DS3 Service will apply only after a customer has completed an OPP term or an ICB minimum period.

## (H) Moving Services from an OPP Term to a DCP Term

Customers may terminate Optional Payment Plans for Base Rate and DS1 services in states where they have effective Discount Commitment Program terms for those services. Upon termination of these Optional Payment Plans, the services will begin being billed DCP (as described in 7.4.13 following) rates subject to the DCP terms and conditions. No termination liability charges will be applied to services that move from an OPP term to a DCP term.

## (I) Volume Pricing Plan for DS3 Local Distribution Channels with an Electrical Interface

## (1) General

The Volume Pricing Plan (VPP) will be grandfathered as of January 11, 2002. Customers with OPPs on order or in effect prior to Jan 11, 2002, will continue to receive the VPP until the expiration of their OPP term. The VPP will not be available with OPPs that are ordered on or after January 11, 2002.

The Volume Pricing Plan (VPP) for DS3 Local Distribution Channels (LDCs) with an Electrical Interface (EI) provides rate discounts to customers based on the number of DS3 LDCs with an EI provided to the customer's designated premises and the Optional Payment Plan term selected by the customer.

The following volume discounts, shown in terms of percentage discounts, will be applied to DS3 LDC rates as specified in 7.5.9 (C) (1) (a) following. The volume discount will be based on the OPP term selected by the customer and the number of DS3 LDCs with an Electrical Interface provided to the same customer designated premises and will be provided as a credit on the customers monthly bill.

Volume Discount Percentage Optional Payment Plan Term				
Volume Discount Band	DS3 LDC Quantity	12 and 24 Month	36 and 48 Month	60 Month
A	2	19.5%	2.4%	2.3%
B	3 to 5	23.6%	5.8%	5.5%
C	6 to 11	30.6%	8.5%	12.6%

(I) Volume Pricing Plan for DS3 Local Distribution Channels with an Electrical Interface (Cont'd)

## (1) General (Cont'd)

At the end of each monthly billing period, billing for DS3 LDCs with an EI that are provided under an OPP term will be adjusted via a billing credit. The monthly credit will be developed by determining the number of DS3 LDCs with an EI provided to the customer's designated premises, along with their associated OPP payment term, in service at the end of the monthly billing period. The preceding discount percentages will be applied to all of the customer's DS3 LDCs with a EI that are provided under the same OPP term, and billed to the same customer billing account and will be provided as a credit to the customer's monthly DS3 billing.

## (2) Regulations

All of the customers in service DS3 LDCs with an EI provided under an OPP term, (both interstate access and intrastate access), along with all of the customer's LT-3 Entrance Facilities with an EI provided under an OPP term, as described in Section 6.8.2(D)(6)(g) preceding, will be used to determine the Volume Discount Band applicable for that monthly billing period.

When a customer has DS3 LDCs with an EI provided under different OPP payment terms, each OPP payment term will be administered separately and a Volume Discount Band will be determined for each OPP term based on the customers in service quantities for that term.

When there is more than one DS3 Local Distribution Channel termination location at the customer designated premises, each location will be administered separately and a Volume Discount Band(s) will be determined based on the DS3 Local Distribution Channel OPP term(s) at that location.

When the customer has elected the Prepayment of an OPP option as described in 7.4.10 B preceding, prepaid DS3 LDCs with an EI will be included in the monthly count of DS3 LDCs with an EI in order to determine the Volume Discount Band applicable for that monthly billing period, however, only non-prepaid DS3 LDCs with an EI will be discounted under the VPP.

(3) Conversion of DS3 Service Package and Service Channels in service prior to October 15, 1999

Except for DS3 Service Packages with an EI provided under OPP Vintage Rates as specified in 7.5.16 following, all DS3 Service Packages and Service Channels with an EI in service as of October 15, 1999, will be converted to individual DS3 LDCs with an EI. DS3 LDCs with an EI that are converted from a DS3 Service Package will be converted to the same OPP payment term, and retain the same expiration date as the Service Package. All terms and conditions described above related to the VPP will apply to converted DS3 LDCs.

(i) Conversion Credit for Converted DS3 LDCs

When a converted DS3 LDC rate under the VPP is higher than its equivalent rate under the discontinued Service Package structure, the customer will be given a one time credit, as shown following, based on the difference between what the customer would have paid under the Service Package structure and what the customer will pay under the VPP. The credit will be equal to the difference between the monthly rate for the Service Package, with activated DS3s, and the VPP rate for the same number of DS3s, times the number of months remaining in the customer's OPP term.

For example: assume that 10 converted DS3s were part of a former DS3L Service Package with 10 DS3s activated and the Service Package was located in a rate zone 3 wire center under a 60 month OPP term with six months remaining on the OPP term. The DS3 Conversion Credit will be calculated as follows:

\$415.42 (DS3 conversion credit for a rate zone 3 DS3L Service Package with 10 activated DS3s provided under a 60 month OPP term) X 6 (months remaining on the OPP term) = \$2,492.52 (Conversion Credit)

(3) Conversion of DS3 Service Package and Service Channels in service prior to October 15, 1999 (Cont'd)

Any customer terminating a DS3 LDC that was provided a DS3 Conversion Credit before the expiration of the OPP term under which it was converted shall be liable for a Conversion Credit termination charge. The Conversion Credit termination charge for each DS3 LDC terminated shall be equal to the monthly DS3 Conversion Credit originally provided to the customer, divided by the number of activated DS3s in the original Service Package times the number of months remaining in the customer's OPP term.

For example: Assume that 1 DS3 Local Distribution Channel, which is part of a former DS3L Service Package with 10 activated DS3s located in a rate zone 3 wire center under a 60 month OPP term, is discontinued 3 months before the expiration of its OPP term. The Conversion Credit termination charge will be calculated as follows:

\$415.42 (monthly conversion credit for a DS3L Service Package with 10 activated DS3s in a rate zone 3 wire center under a 60 month OPP term) /10 (number of converted DS3s) = \$41.54 (Conversion Credit for 1 DS3) x 3 (number of months remaining in the customers 60 month OPP term) = \$124.62 (Conversion Credit termination charge).

The following one time DS3 Conversion Credit amounts, times the number of months remaining in the OPP term, apply to converted DS3 LDCs:

Customers who do not have an effective DCP term in place may terminate Optional Payment Plans for Base Rate and DS1 services in states where they establish a new DCP term of equal or greater length for those services. No termination liability charges will be applied to services that move from an OPP term to such a new DCP term. Upon termination of these Optional Payment Plans, the services will begin being billed DCP (as described in 7.4.13 following) rates subject to the DCP terms and conditions except for 7.4.13 (G). Re: Case No. 07-464-TP-UN  
Case No. 90-5032-TP-TRF

Dear Mrs. McNeal:

On January 4, 2013, tariff pages for the Ameritech Operating Companies were filed with the Federal Communications Commission under Transmittal No. 1785. This filing in the FCC No. 2 Tariff was effective on January 19, 2013.

With this filing, Ameritech changes how access order cancellation charges are prorated. This change is part of a standardization effort across AT&T's ILECs to use a similar cancellation charge prorate methodology to that already used by BellSouth Telecommunications, LLC (BellSouth).

Prior to this change, cancellation charges for Ameritech were based upon the lower of the costs incurred for the installation, less net salvage, or the charge for the minimum period associated with the service. Under the new methodology, cancellation charges are prorated based upon the last critical date completed for the service order. The proposed Critical Date percentages vary by service and the last Critical Date completed in the service cycle.

Additionally with this filing, Ameritech makes changes to allow accrual of service charges on Access Orders, for certain special access services, after remaining open past 31 days. The accrual of service charges applies for situations where the customer has neither accepted service nor cancelled their Access Order.

These tariff pages can also be viewed on the FCC website at <http://svartifoss2.fcc.gov>. Once you have accessed the page, please follow the following steps to access this filing:

With this filing, Ameritech is proposing to change how access order cancellation charges are prorated. This change is part of a standardization effort across AT&T's ILECs to use similar cancellation charge prorate methodology to that used today by BellSouth Telecommunications, LLC (BellSouth).

Today, cancellation charges for Ameritech are based upon the lower of the costs incurred for the installation, less net salvage, or the charge for the minimum period associated with the service. It is proposed that cancellation charges be prorated based upon the last critical date completed for the service order. The proposed Critical Date percentages vary by service and the last Critical Date completed in the service cycle.

Additionally with this filing, Ameritech is proposing changes to allow accrual of service charges on Access Orders, for certain special access services, after remaining open past 31 days. The accrual of service charges applies for situations where the customer has neither accepted service nor cancelled their Access Order.

The Customer may request a modification of its Access Order at anytime prior to notification by the Telephone Company that service is available for the customer's use. The Telephone Company will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours. If the modification cannot be made with the normal work force during normal business hours, the Telephone Company will notify the Customer. If the Customer still desires the Access Order modification, the Telephone Company will schedule a new service date. All charges for Access Order modifications will apply on a per occurrence basis. (T)

Any increase in the number of Special Access Service channels or Switched Access Service lines, trunks or busy hour minutes of capacity will be treated as a new Access Order (for the increased amount only). (T)

If order modifications are necessary to satisfy the transmission performance for a Special Access Service ordered by a customer these changes will be made without order modification charges being incurred by the Customer. (T)

## (A) Service Date Change Charge/Dispatch Charge

A Service Date Change Charge will apply when a Customer modifies an Access Order service date for the installation of new services or rearrangements of existing services. (C)

- (1) For services other than Base Rate, 128.0 Kbps, 256.0 Kbps, 384.0 Kbps, 512.0 Kbps, 768.0 Kbps, DS1 and DS3 special access services: (N)

If the Customer requested service date is more than 30 calendar days after the original service date, the order will be cancelled by the Telephone Company and reissued with the appropriate cancellation charges as set forth in Section 5.2.3(B), following. (T)

- (2) For Base Rate, 128.0 Kbps, 256.0 Kbps, 384.0 Kbps, 512.0 Kbps, 768.0 Kbps, DS1 and DS3 special access services: (N)

If a Customer does not accept Access Service within 30 calendar days after the original service date, the Customer will, at its option: (C)

- (a) Cancel its Access Order, in which case Section 5.2.3(B) shall apply; or
- (b) Accept billing within 30 calendar days after the original service date, in which case billing will begin; or
- (c) Neither cancel the Access Order nor accept service, in which case the following will apply. If the Customer neither cancels the Access Order nor accepts service, all applicable service charges shall begin to accrue on the 31st calendar day after the original service date (the Effective Billing Date). If the Customer accepts service within 90 calendar days after the original service date, the Telephone Company will commence billing upon the Customer's acceptance of service and such billing will apply as of the Effective Billing Date. If the Customer fails to accept service within 90 calendar days after the original service date, the Telephone Company will cancel the relevant Access Order(s) and will bill the Customer for cancellation charges, as set forth in Section 5.2.3(B), following, plus all charges accrued between the Effective Billing Date and the date of cancellation using the rate associated with the shortest term available for the service being cancelled. (C)

- (3) When, for any reason, the Customer indicates that service cannot be accepted for a period not to exceed 30 calendar days, and the Telephone Company accordingly delays the start of service, a Service Date Change Charge will apply. (T)  
(M)

Failure to notify, as noted below, the Telephone Company prior to the original service date to request a different service date will result in the application of a Service Date Change Dispatch Charge for installation, moves and rearrangement of services. If a Telephone Company technician is dispatched to the Customer's premises on the scheduled service date and the Customer is not ready to accept service or the Customer has failed to notify the Telephone Company before 3:00PM (CT) on the business day prior to the scheduled service date that the service date needs to be changed, a Service Date Change Dispatch Charge will apply. If the Customer reschedules the service date, a Service Date Change Charge, as set forth following will also apply. If the customer cancels the service date, cancellation charges will also apply in accordance with terms and conditions for cancellation charges as set forth in Section 5.2.3, following. Cancellation of the order will not preclude the application of the Service Date Change Charge and/or the Service Date Change Dispatch Charge assessed for prior occurrences on the same order. (T)  
(T)

A new service date may be established that is prior to the original standard or negotiated interval service date if the Telephone Company determines it can accommodate the Customer's request without delaying service dates for orders of other Customers. If the service date is changed to an earlier date, the customer will be notified by the Telephone Company that Expedited Order Charges as set forth in (D) following will apply. Such charges will apply in addition to the Service Date Change Charge.

- (4) A Service Date Change Charge will apply, on a per order per occurrence basis, for each service date changed. The applicable charge is: (T)

## 5.2 Access Order (Cont'd)

5.2.3 Cancellation of an Access Order (excluding the following Special Access Service: SONET Xpress Service) (D)

- (A) A Customer may cancel an Access Order for the installation of service on any date prior to the installation of service. The cancellation date is the earliest date the Telephone Company receives written or verbal notice from the Customer that the order is to be cancelled. The verbal notice must be followed by written confirmation within 10 days. Termination liability charges, associated with term plans, will not apply to orders that are cancelled within 90 calendar days after the original service date where the Customer has accepted billing but not accepted service. (N)

(D)

(D)

- (B) When Cancellation Charges Apply (C)

When the Customer cancels an Access Order, a Cancellation Charge will apply. (C)

Cancellation charges are calculated by multiplying the nonrecurring charges (NRC) associated with the shortest term available for the service being cancelled, by the applicable critical date percentage shown in the Table of Cancellation Charge Percentages, following, for the critical date last completed on the order, plus:

1. The Administration Charge
2. Other charges specified in Section 5.2.2 (Access Order Modifications), if applicable.

Example

If a Customer submits an order to install a new DS1 Local Distribution Channel and then cancels the order after the Design, Verified, and Assigned (DVA) critical date, but before the Wired and Office Tested (WOT) critical date, the cancellation charge will be calculated as follows:

**Cancellation Charge = 55.7%** (from the Table of Cancellation Charge Percentages, following) **X** (Design and Central Office Connection Charge, per circuit + Customer Connection Charge, per termination).

The Administration Charge and other charges specified in Section 5.2.2 (Access Order Modifications), if applicable, are added to the cancellation charge.

(T)

5.2.3.1 Cancellation of an Access Order (for the following Special Access Service: <sup>(1)</sup> SONET Xpress Service <sup>(1)</sup>)

Cancellation charges are applied based upon the type of special access service being cancelled which is categorized as either, 1) "point to point" service or 2) "non-point to point" service. However, at no time will cancellation charges apply until costs for installation of facilities have been incurred by the Telephone Company. Service installation costs incurred by the Telephone Company start on the application date, when the Telephone Company confirms the order with the Customer. (M)  
(T)

Cancellation charges for "point to point" services are based upon the date that a customer cancels an Access Order with respect to the Design Layout Report Date (DLRD), of the service being provisioned, as described in Section 5.2.3.1(B)(2) following. The DLRD is the date the Design Layout Report is forwarded to the customer. The DLRD is provided to the Customer upon firm order confirmation. (M)
