To whom it may concern

I do not believe PUCO is being fair and impartial if they allow the power company to charge a fee if the customer refuses a Smart Meter. It sounds like the choices are having your privacy violated, submit to surveillance, and place a non UL certified device, with health associated to it, and dangerous EMF radiation, placed on your home or pay not to have it placed on your home. That sounds like extortion to me. I do not agree with any customer having to pay not to have their rights violated. Please do not force the citizens of Ohio to pay to be violated.
