To Whom It Concerns:

There was an addition recently added on to the Gregory Strong System, case number 13-1122-EL REN with OH State Certification number 13-SPV-PA-GATS-0424.

The addition went on the same roof, so the orientation and tilt are still the same. The addition was 23 Mage PowerTEC 250 Watt panels with 23 Enphase M215 microinverters. The total DC nameplate rating of the new system is now 17.0 kW and will produce around 21,382 kWh/year.

Let me know if you have any questions.

Thank you!

Sincerely,

Marcel Witmer

Process Manager
